Last Friday, Cuban police charged the Spanish embassy grounds and dragged away a would-be refugee.

On Wednesday, Cuban authorities opened fire at, but missed, another refugee as he scaled the Spanish embassy's wall to join three other Cuban dissidents who had entered the diplomatic mission last week.-EFE

JR-BJ 07/19/16-38/90 s on Bogota-Medellin highway)

Bogota, July 19 (EFE).- A lorry packed with 100 kg of dynamite exploded on the highway linking Bogota with the cocaine capital of Medellin Thursday, killing the vehicle's driver and his assistant, Colombian police said.

A police spokesman said that it was not immediately clear whether the explosives, packed in bales of hay, were to have been used in a bomb

attack.

The bodies of the two men have not yet been identified.

The blast occurred near the village of Rionegro, 210 km northwest of the capital.

On Wednesday, two policemen were gunned down in Medellin, bringing to 199 the number of officers killed so far this year in the northwestern city.

Later Wednesday, a bomb composed of 30 kg of dynamite exploded in the village of Sabaneta, 20 km from Medellin, injuring five people and causing dlrs 20,000 in damage.

In another incident, unidentified attackers lobbed a bomb at a police station in the residential neighborhood of Laureles in Medellin. No injuries were reported.

Medellin, one of the world's most dangerous cities, is home to the notorious cocaine cartel of the same name.

Since outgoing President Virgilio Barco's government launched a major offensive against the narcotics cartels last August, traffickers have killed thousands of people in retaliatory attacks.

Drug kingpins have allegedly offered dlrs 4,200 to hitmen for every Colombian police officer killed.-EFE

RIO DE JANEIRO (JULY 19) EFE - Rio's metro workers Thursday gave the city's commuters free travel in an effort to garner public support for a two-week-old strike.

Transport workers' trade union president Rosalvo Costa said, "The Metro management will say that this is illegal, arbitrary, an act of sabotage. We will show them that all is normal -- except that we are not selling tickets."

The union, following the example of transport workers in Europe and Japan, voted at a meeting Wednesday to take special measures proposing "minimum

distress to passengers."

The meeting reaffirmed workers' demands for a 166 percent increase in their wages as opposed to the state government's offer of a 50 percent rise. They also asked the Metro company not to call for police intervention.

Trains connecting the North and South of the city ran as usual Thursday morning without any violence.

BOGOTA (JULY 19) EFE - Colombia's most notorious drug trafficker ordered the killings of two presidential candidates in the weeks leading up to the May elections, the chief of secret police said Thursday.

Pablo Escobar, billionaire boss of the Medellin cartel, sent professional killers to murder Bernardo Jaramillo Ossa and Carlos Pizarro, charged Gen. Miguel Maza Marquez, chief of the Administration of Security Department (DAS), Colombia's secret police.

Jaramillo, presidential candidate for the leftist Patriotic Union (UP) party, was shot dead at point-blank range in Bogota airport in March, while former rebel Pizarro, candidate of the leftist M-19 group, was gunned down on board a domestic flight in April.

Friends and relatives of Pizarro, who led the M-19 guerrillas to lay down their arms and join electoral politics, have always rejected claims that he was killed by the drug baron.

Shortly after Pizarro's murder, his successor, Antonio Navarro, said, "There was no reason for Escobar to put out a contract on Pizarro. We were not at war with him. We signed a non-aggression pact with him many years ago and kept our part of the bargain, and Escobar did too."

The Medellin cartel boss, currently Colombia's most wanted man, is on the run after the government lauched a massive manhunt two weeks ago for his capture, deploying some 4,500 soldiers and police with helicopters, boats and bloodhounds.

Gen. Maza also Thursday accused jailed cartel member Como Yezid Barrera Ramirez of causing an explosion aboard a plane last November in which 11 people died, and setting off a car bomb outside the DAS Bogota headquarters in December which killed 73 people and wounded 600.

Barrera Ramirez, who is serving 24 years in jail for the murder of UP leader Jaime Pardo Leal in 1987, was one of a gang of hitmen employed by

the Medellin cartel, claimed the DAS chief.

MOSCOW (JULY 19) EFE - The Soviet protest group Schit, which includes many former Army officers, warned Thursday of the danger of a military coup to end President Mikhail Gorbachev's reforms.

Former Soviet Army Lieutenant-Colonel Vitaly Urashtzev, one of the group's leaders and a Russian republic deputy, said Schit knew of plans for a "Day X," when the military aimed to grab power, and named Army chief-of-staff Gen. Valentin Varenikov as a possible leader.

Urashtzev, one of several former officers and civilians in the protest group that calls for the de-politicization of the Armed Forces, said that among the Soviet high command were a number of officers who admired Gen. Augusto Pinochet, leader of the 1973 military coup in Chile.

They saw his example as "a symbol of progress and order -- demonstrating the advances that could be made in a country under Army rule," Urashtzev said.

He told a Moscow press conference that he was most worried by the preparation of a sophisticated radio communications system in the capital due to become operational in February.

The system would allow direct communications with other command centers without having to pass through any kind of control.

The majority of the 5,000 former Armed Forces members who belong to Schit were expelled from the forces because of their sympathies for the group, said Urashtzev, who claimed they had the support of 80 percent of the lower ranks.

His group was also worried about large walled compounds on the outskirts of Moscow and other army establishments that "in the case of a military coup could be used as concentration camps."

While he saw Defense Minister Marshal Dmitri Yazov as "a person loyal to civil power" he was not so sure about Varenikov, a prime mover in the Soviet occupation of Afghanistan in 1979.

"He seems the most inclined to favor military intervention," Urashtzev said.

Schit leaders also used the press conference to denounce the deaths of some 15,000 Soviet troops over the last four years, many through

maltreatment and errors but others the result of "simple suicide," they said.

CAIRO (JULY 19) XINHUA - A GROUP OF EUROPEAN SCIENTISTS ARE WORKING WITH EGYPTIAN EXPERTS TO TEST THE QUANTITY OF OZONE AND POLLUTANTS IN THE ATMOSPHERE OF GREATER CAIRO, "THE EGYPTIAN GAZETTE" REPORTED TODAY.

ALARMED BY REPORTS SUGGESTING A RELATIVELY HIGHER PERCENTAGE OF THE PRESENCE OF OZONE IN THE AIR OVER CAIRO, THE NATIONAL ATOMIC AGENCY HAS THUS INVITED EGYPTIAN SCIENTISTS AND METEOROLOGISTS, ARCHAEOLOGISTS AND NUCLEAR PHYSICISTS FROM WEST GERMANY AND YUGOSLAVIA TO DETERMINE THE QUANTITY OF OZONE AND POLLUTANTS WITH EGYPTIAN EXPERTS.

AN OFFICIAL FROM THE NATIONAL ANTIQUITIES AUTHORITY TOLD REPORTERS RECENTLY THAT AIR POLLUTION IS THE MAIN THREAT TO THE HISTORICALLY PRECIOUS PYRAMIDS OF GIZA AND SPHINX LOCATED IN THE SOUTHWEST SUBURB OF CAIRO.

THE STATE OF THE WORLD FAMOUS SPHINX, BUILT IN 2563 B.C., HAS BEEN DETERIORATING IN THE PAST FEW DECADES AND HAS BEEN UNDER REPAIR WITH THE HELP OF THE UNITED NATIONS.

EGYPTIAN SCIENTISTS ATTRIBUTE THE REPORTEDLY HIGH PERCENTAGE OF THE POLLUTANT ELEMENTS TO THE RELATIVELY LARGE AMOUNT OF DUST IN THE AIR OVER CAIRO, A CITY WITH 13 MILLION PEOPLE AND 2.5 MILLION CARS.

THE OZONE MEASURING OPERATION WILL BE CARRIED OUT BY A MOTOR-VEHICLE-MOUNTED LAB WHICH CAN BE MOVED FROM ONE SITE TO ANOTHER ACCORDING TO THE RESEARCH PLAN.

#90200h0081 07/19/1990 ~Chinese News Agency

LONDON (JULY 19) XINHUA - IRISH FOREIGN MINISTER GERRY COLLINS IS TO MAKE A FRESH ATTEMPT TO SECURE THE RELEASE OF AN IRISH HOSTAGE HELD IN BEIRUT, ACCORDING TO REPORTS FROM DUBLIN TODAY.

COLLINS WILL VISIT ISRAEL AND THE ARAB WORLD NEXT WEEK AS HOPES OF A FAST RELEASE FOR BELFAST-BORN TEACHER BRIAN KEENAN APPEAR TO BE FADING.

EXPERTS BELIEVE THAT KEENAN, 39, WAS DUE FOR RELEASE UNTIL OUTSIDE DEVELOPMENTS, INCLUDING ISRAEL"S BOMBING OF LEBANON AND SHI'ITE MOSLEM CLASHES, INTERVENED.

IRISH ENVOYS ARE REPORTEDLY MAINTAINING CONTACT WITH INDIVIDUALS AND

GROUPS IN THE HOPE OF GETTING THE IRISHMAN FREED SOON.

KEENAN, WHO TRAVELLED ON DOCUMENTS ISSUED BY IRELAND, WAS SEIZED ON APRIL 11, 1986, BY FOUR GUNMEN WHILE WALKING TO THE AMERICAN UNIVERSITY OF BEIRUT TO TEACH AN ENGLISH CLASS.

LIKE EVERYONE BORN IN BRITISH-RULED NORTHERN IRELAND, KEENAN WAS ABLE TO CHOOSE BETWEEN HAVING AN IRISH OR A BRITISH PASSPORT. IT IS HOPED THAT A TRAVEL DOCUMENT FROM NEUTRAL, NON-ALIGNED IRELAND, MAY BE CONDUCIVE FOR HIS EXPECTED RELEASE.

LAST WEEK, AN IRISH GOVERNMENT AIRCRAFT STOOD BY AT DUBLIN AIRPORT AS SPECULATION MOUNTED THAT KEENAN WAS ABOUT TO BE FREED,

IRELAND LAUNCHED A CAMPAIGN TO ENSURE KEENAN'S RELEASE DURING ITS SIX-MONTH PRESIDENCY OF THE EUROPEAN COMMUNITY THIS YEAR. A GROUP OF IRISH PARLIAMENTARIANS VISITED TEHRAN LAST MONTH.

KEENAN IS BELIEVED TO BE HELD BY PRO-IRANIAN GROUPS IN LEBANON. EARLIER LAST WEEK, PRO-IRANIAN SOURCES SAID THAT THE PROPOSED RELEASE OF KEENAN WOULD BE A GOODWILL GESTURE BY TEHRAN TO WESTERN EUROPE FOR HELP AFTER THE DEVASTATING JUNE 21 EARTHQUAKE WHICH KILLED AT LEAST 35,000 PEOPLE.

IRISH AID WAS SAID TO BE AMONG THE FIRST INTERNATIONAL RELIEF TO REACH TEHRAN.

#90200h0086 07/19/1990 ~Chinese News Agency

HELSINKI (JULY 19) XINHUA -- FINNISH INDUSTRIAL PRODUCTION WAS DOWN IN MAY AND UNEMPLOYMENT WAS UP, THE GOVERNMENT ANNOUNCED TODAY.

ACCORDING TO THE LATEST STATISTICS OF THE FINNISH LABOR MINISTRY, UNEMPLOYED PEOPLE IN JUNE INCREASED BY 8,500 OVER MAY, TOTALLING 92,600. THE MINISTRY ALSO PREDICTED THAT UNEMPLOYMENT WILL CONTINUE TO INCREASE IN THE SECOND HALF OF THE YEAR.

INDUSTRIAL PRODUCTION IN MAY DECREASED BY 0.6 PERCENT COMPARED WITH THE SAME PERIOD OF LAST YEAR. THE LUMBER AND PAPER INDUSTRIES DECREASED BY 3.7 PERCENT, THE METAL INDUSTRY BY 1.3 PERCENT AND THE CLOTHING, LEATHER AND LIGHT INDUSTRIES BY 20 PERCENT, THE MINISTRY ANNOUNCED.

ONE MAJOR REASON FOR THE INDUSTRIAL DECLINE WAS THE RISING COST OF PRODUCTION, THE MINISTRY ADDED.

#90200h0087 07/19/1990 ~Chinese News Agency

BEIJING (JULY 19) XINHUA -- REFORMS IN CHINA'S AGRICULTURAL MARKETING SECTOR HAVE GREATLY SPURRED ITS FARM PRODUCTION OVER THE PAST DECADE, RAISING THE COMMODITY RATE OF FARM PRODUCTS FROM 30 PERCENT TO 60 PERCENT.

HE JIHAI, VICE-MINISTER OF COMMERCE, TOLD A SYMPOSIUM HERE TODAY THAT CHINA BEGAN TO RAISE THE PROCUREMENT PRICE OF FARM PRODUCTS AND ENCOURAGE DIVERSIFIED MARKETING CHANNELS AS EARLY AS IN 1978 IN A BID TO SUPPORT REFORMS IN THE PRODUCTION SECTOR.

SINCE 1985, HE SAID, CHINA HAS REPLACED UNIFIED PROCUREMENT OF MAJOR FARM PRODUCTS WITH CONTRACTED OR NEGOTIATED PURCHASE UNDER THE STATE PLAN, WHILE MOST OTHER PRODUCTS HAVE BEEN LEFT TO THE FREE MARKET.

WHILE STATE- AND COLLECTIVE-OWNED MARKETING SYSTEMS KEPT THE MAJOR ROLE, OTHER CHANNELS WERE ALLOWED TO GROW, WITH MORE FARMERS ENTERING THE MARKET HE NOTED.

THE NUMBER AND SALES VOLUME OF FREE MARKETS IN RURAL AND URBAN AREAS HAVE INCREASED RAPIDLY IN THE PAST FEW YEARS, AND SPECIALIZED OR COMPREHENSIVE WHOLESALE MARKETS OF FARM PRODUCTS HAVE ALSO GAINED A HIGH PROFILE.

HE SAID THAT THE MARKET MECHANISM NOW PLAYS A BIGGER ROLE, AS 65 PERCENT OF ALL FARM PRODUCTS ARE TRADED AT FLOATING PRICES UNDER THE STATE PLAN OR MARKET-REGULATED PRICES, INSTEAD OF THE STATE-FIXED PRICES.

MEANWHILE, ADMINISTRATIONS AT VARIOUS LEVELS HAVE ALSO INCREASED THEIR MACRO-CONTROL OVER AGRICULTURAL MARKETING BY ESTABLISHING THE RESERVE SYSTEM FOR MAJOR FARM PRODUCTS AND BY SETTING UP THE FARM RISK FUND AND VARIOUS OTHER PROTECTION SYSTEMS.

CANBERRA (JULY 19) XINHUA -- A COMPOUND EXTRACTED FROM A MARINE SPONGE IN AUSTRALIA'S NORTHEAST STATE OF QUEENSLAND HAS BEEN FOUND CAPABLE OF KILLING THE AIDS VIRUS IN OVERSEAS TESTS, BUT RESEARCHERS SAY IT IS TOO EARLY TO SAY IF THE DISCOVERY WILL LEAD TO A CURE.

A SUBSTANCE FROM ANOTHER SPONGE, COLLECTED IN NORTHERN NEW SOUTH WALES, HAS BEEN FOUND TO BE EFFECTIVE IN ANTI-CANCER TESTS CONDUCTED BY THE NATIONAL CANCER INSTITUTE IN THE UNITED STATES.

DIRECTOR OF THE AUSTRALIAN INSTITUTE OF MARINE SCIENCE (AIMS) DR JOE BAKER HAS SAID THE FINDINGS REFLECTED A GROWING AWARENESS THAT SEA PLANTS AND ANIMALS HAVE POTENTIALLY GREAT THERAPEUTIC VALUE.

AIMS LAST YEAR WAS CONTRACTED BY THE U.S. CANCER INSTITUTE TO COLLECT MARINE ORGANISMS WORLDWIDE FOR AIDS AND CANCER RESEARCH.

ACCORDING TO A LOCAL PRESS REPORT TODAY, LABORATORY TESTS ON THE QUEENSLAND SPONGE SPECIMENS SHOW THE COMPOUND ATTACKS AND KILLS THE AIDS VIRUS, BUT IT IS NOT YET KNOWN IF IT WILL LEAVE HEALTHY CELLS UNDAMAGED DURING TREATMENT.

DR BAKER WAS QUOTED AS SAYING THAT "WE HAVE A LONG WAY TO GO BUT THE LEADS ARE INTERESTING AND QUITE POSITIVE." "WE HAVE GIVEN PRIORITY TO FOLLOWING THOSE LEADS THROUGH."

DR BAKER SAID THE SUBSTANCE FROM THE NEW SOUTH WALES SPONGE HAD PROVEN "VERY PROMISING" IN CANCER TESTS, ALTHOUGH HE COULD NOT REVEAL WHAT FORM OF CANCER THE TESTS WERE BASED ON.

BAGHDAD (JULY 19) XINHUA -- IRAQ'S NATIONAL INCOME IN 1989 INCREASED TO 17.3 BILLION DINARS (ABOUT 55.36 BILLION U.S. DOLLARS) FROM 812 MILLION DINARS (ABOUT 26 MILLION U.S. DOLLARS) IN 1968, IRAQI PLANNING MINISTER SAMAL MAJID FARAJ SAID TODAY.

SPEAKING ON THE OCCASION MARKING THE 22ND ANNIVERSARY OF IRAQ'S JULY 17-30 REVOLUTION, THE MINISTER SAID THAT THE PER CAPITA INCOME IN IRAQ LAST YEAR ROSE TO 991 DINARS (ABOUT 3171 U.S. DOLLARS) FROM 92 DINARS (ABOUT 294 U.S. DOLLARS) IN 1968 WITH AN ANNUAL GROWTH RATE OF 12 PERCENT.

LAST YEAR ALSO WITNESSED AN INCREASE IN IRAQ'S GROSS NATIONAL PRODUCT (GNP) WHICH STOOD AT 19.7 BILLION DINARS OR 63 BILLION U.S. DOLLARS, COMPARED WITH 1.03 BILLION DINARS OR 3.3 BILLION U.S. DOLLARS IN 1968, ACCORDING TO FARAJ.

THE MINISTER ALSO NOTED THAT THE REVENUE FROM CRUDE OIL PRODUCTION IN IRAQ INCREASED TO 4.9 BILLION DINARS (ABOUT 15.68 BILLION U.S. DOLLARS) FROM 245 MILLION DINARS (ABOUT 784 MILLION U.S. DOLLARS) IN 1968, REGISTERING AN ANNUAL INCREASE OF 13.5 PERCENT.

IN 1989, IRAQ'S POPULATION HIKED TO 17.4 MILLION FROM 8.5 MILLION IN 1968, THE MINISTER SAID.

#90200h0164 07/19/1990 ~Chinese News Agency

HARARE (JULY 19) XINHUA - A SOVIET CIRCUS, THE MOSCOW CIRCUS, WILL PAY A 12-WEEK VISIT TO SOUTH AFRICA, ACCORDING TO A REPORT FROM JOHANNESBURG TODAY.

SEVENTH AVENUE COMMUNICATIONS DIRECTOR NIKI MOORE SAID THAT THE CONTRACT FOR THE VISIT WAS SIGNED A MONTH AGO BETWEEN A SOUTH AFRICAN COMPANY AND TWO DIRECTORS OF THE MOSCOW CIRCUS, WHO RECENTLY VISITED SOUTH AFRICA FOR A WEEK TO FINALISE PLANS FOR PERFORMANCES.

MRS. MOORE SAID THE 90-MEMBER SOVIET TROUPE WILL ARRIVE EARLY IN DECEMBER AND WILL PERFORM IN JOHANNESBURG, CAPE TOWN, PORT ELIZABETH, DURBAN, BLOEMFONTEIN AND PRETORIA.

IN APPARENT REFERRENCE TO THE WORLDWIDE CULTURAL BOYCOTT AGAINST SOUTH AFRICA FOR ITS APARTHEID POLICY, MRS. MOORE SAID ALTHOUGH IT IS PURELY A BUSINESS VENTURE, PLANS FOR THE CIRCUS'S TOUR WERE MADE SECRETLY BECAUSE IT IS A POLITICALLY SENSITIVE ISSUE.

TRANSPORT EXPENSES FOR THE CIRCUS AMOUNTED TO ABOUT FIVE MILLION RANDS (ABOUT TWO MILLION U.S. DOLLARS) AND TICKETS WILL BE SOLD AT AN AVERAGE OF 25 RANDS EACH.

MRS. MOORE ADDED PLANS FOR A VISIT TO SOUTH AFRICA BY THE BOLSHOI BALLET

ARE ALSO UNDER DISCUSSION.

GABORONE (JULY 19) XINHUA - AFRICAN NATIONAL CONGRESS (ANC) DEPUTY PRESIDENT MR. NELSON MANDELA, WHO RETURNED HOME FROM A SIX-WEEK 14-NATION OVERSEAS TOUR YESTERDAY, WILL REST FOR A FEW DAYS BEFORE GOING TO OFFICE NEXT MONDAY.

THE ANC'S INTERNAL CHAIRMAN MR. WALTER SISULU SAID TODAY THAT MR. MANDELA WILL REPORT BACK TO THE ANC NATIONAL EXECUTIVE COMMITTEE (NEC) ON HIS TOUR ON MONDAY NEXT WEEK.

MEANWHILE, IT IS BELIEVED IN THE SOUTH AFRICAN GOVERNMENT CIRCLES THAT AN AGREEMENT ON THE RELEASE OF POLITICAL PRISONERS AND THE SUSPENSION OF THE ANC'S ARMED STRUGGLE ARE EXPECTED SOON.

DETAILS WILL BE THRASHED OUT AT A MEETING BETWEEN SOUTH AFRICAN PRESIDENT MR. F.W. DE KLERK AND MR. MANDELA IN THE NEXT FEW DAYS, SOURCES SAID.

A MEETING OF A MINISTERIAL COMMITTEE ON NEGOTIATIONS WAS CHAIRED BY PRESIDENT DE KLERK YESTERDAY WHILE THE ANC WILL MEET IN JOHANNESBURG EARLY NEXT WEEK TO REVIEW THE CURRENT SITUATION.

THE OFFICE OF THE PRESIDENT ANNOUNCED FROM PRETORIA TODAY THAT THE CABINET AND "CERTAIN OTHER POLITICAL FUNCTIONARIES" WOULD HOLD A SPECIAL PLANNING SESSION SOMEWHERE OUTSIDE PRETORIA FROM JULY 30 TO 31.

THE SOON-TO-BE MEETING BETWEEN MR. MANDELA AND MR. DE KLERK IS EXPECTED TO TAKE PLACE BEFORE MR. MANDELA TAKES A BREAK IN MID-AUGUST. HE IS POSSIBLY TO GO ON A VISIT TO CUBA.

The Perfect Baby: Barbara Walters hosts this look at the advances in human genetic engineering and the implications for the future, both in terms of preventing and curing genetic diseases and of creating ''designer babies.'' We're on the verge of knowing more than we had ever dreamed about our genes and the thousands of diseases that can kill or cripple our children, but at what cost? We may be on our way to a world in which retardation, inherited diseases and devastating birth defects are things of the past. But along that road, we're being forced to make agonizing decisions about our children and about what kind of society we want. (Transcript #15)

Moneyline (CNN) July 18, 1990

In his mid-year economic report, Federal Reserve Board Chairman Alan

Greenspan boasted that the Fed can change its policy and implement it all in one morning, if necessary, to keep the slashes in spending that might result from a budget pact from hurting the economy; the credit crunch in the banking industry, despite that action by Federal Reserve Chairman Greenspan, may be beyond his control. Some bank analysts say there are totally new conditions that make this crunch hard to fix; many expect the winds of change swirling in Eastern Europe to eventually hit the island of Cuba with hurricane force, leaving a new political and economic system absent Fidel Castro; some scientists say high power lines can be linked to cancer, others say more studies are needed to determine the effects on humans. But there is no debate about one effect, and that is the impact those power lines have on real estate values; Myron Kandel says that the vote by 176 House Republicans to oppose any tax increase is not exactly a profile in courage; the scramble for power is on at the Chicago Merc, with traders believing the one-man reign is over. (Transcript #142)

Back transcripts available on the economy, high electrical power lines and taxes.

Larry King Live (CNN) July 18, 1990

John Goodman / Geena Davis / Faith Ford: John Goodman discusses his latest movie, Arachnophobia, the development of his career, his work on Roseanne, and his marriage last October. Geena Davis talks about her latest movie, Quick Change, and her life with actor husband Jeff Goldblum. Faith Ford plays Corky on Murphy Brown, a role for which she was nominated for an Emmy Award and an American Comedy Award. (Transcript #89)

TOKYO (JULY 19) KYODO - SMALL TO MEDIUM-SIZED COMPANIES REPORTED BRISK BUSINESS IN THE SECOND QUARTER OF 1990, A SURVEY CONDUCTED BY THE MINISTRY OF INTERNATIONAL TRADE AND INDUSTRY (MITI) SHOWED THURSDAY.

THE SO-CALLED DIFFUSION INDEX -- THE PERCENTAGE OF COMPANIES THAT REPORTED THE BUSINESS CLIMATE WAS BETTER IN THE PERIOD THAN IT WAS A YEAR AGO MINUS THAT OF THOSE WHO SAID IT WAS WORSE -- WAS 9.7, POSTING A PLUS FOR THE 11TH CONSECUTIVE QUARTER.

THE SURVEY COVERED 17,438 SMALL TO MEDIUM-SIZED COMPANIES. THE DIFFUSION INDEX FOR SALES IN THE APRIL-JUNE PERIOD WAS 19.4, REACHING THE HIGHEST LEVEL SINCE THE SURVEY WAS STARTED IN THE JULY-SEPTEMBER PERIOD OF 1980.

THE INDEX FOR PRETAX PROFITS WAS 6.2, REMAINING ON THE PLUS SIDE FOR FIVE STRAIGHT QUARTERS.

IN PARTICULAR, THE PROFIT INDEX FOR RETAILERS WAS 2.8, TURNING TO THE PLS SIDE FOR THE FIRST TIME.

RETAILERS ALSO DISPLAYED A POSITIVE ASSESSMENT OF THE OVERALL BUSINESS CLIMATE FOR THE FIRST TIME IN 10 YEARS OF RECORD-KEEPING.

BUT AN OFFICIAL OF THE SMALL AND MEDIUM ENTERPRISE AGENCY SAID, "THE SURPRISING UPTURN AMONG SMALL RETAILERS CAME MOST POSSIBLY IN REACTION TO SLUGGISH BUSINESS IN THE SECOND QUARTER OF 1989, WHEN THEY WERE PLAGUED BY THE CONSUMPTION TAX INTRODUCED THEN."

AS THE MOST SERIOUS PROBLEM FOR THEIR CORPORATE MANAGEMENT, THE LARGEST SHARE OF THE FIRMS POLLED ANSWERED THE LABOR SHORTAGE, ACCORDING TO THE SURVEY.

#90200k0029 07/19/1990 ~Japanese News Agency

TOKYO (JULY 19) KYODO - JAPAN'S WHOLESALE PRICES IN THE FIRST 10 DAYS OF JULY ROSE 0.1 PERCENT FROM THE PREVIOUS 10-DAY PERIOD, WITH A JUMP IN DOMESTIC PRICES OFFSET BY DECLINES IN EXPORT AND IMPORT PRICES, THE BANK OF JAPAN SAID THURSDAY.

THE OVERALL WHOLESALE PRICE INDEX FOR THE FIRST 10 DAYS OF JULY STOOD AT 90.6 AGAINST A BASE FIGURE OF 100 IN 1985.

WHOLESALE PRICES OF DOMESTICALLY PRODUCED GOODS FOR THE HOME MARKET JUMPED 0.4 PERCENT IN THE JULY 1-10 PERIOD, THE STEEPEST RISE IN A YEAR, LARGELY REFLECTING THE INTRODUCTION OF SURCHARGES ON ELECTRIC POWER CONSUMPTION IN THE SUMMER SEASON, THE BANK SAID.

INFLATION-WARY CENTRAL BANK OFFICIALS DISCOUNTED THE MARKED RISE IN DOMESTIC WHOLESALE PRICES, HOWEVER, LINKING IT MAINLY TO SEASONAL FACTORS.

EXPORT AND IMPORT WHOLESALE PRICES IN THE 10-DAY PERIOD DECLINED DUE TO THE YEN'S APPRECIATION AGAINST THE U.S. DOLLAR FROM THE PRECEDING 10 DAYS.

GAS AND WATER BILLS WERE ALSO HIGHER IN ADDITION TO ELECTRIC POWER RATES.

OTHER ITEMS HELPING BOOST DOMESTIC PRICES IN THE PERIOD WERE COMPOUND FEED AND PORK PRICES, WHILE ELECTRICAL APPLIANCE AND SOME TEXTILE PRODUCT PRICES FELL, THE BANK SAID.

#90200k0062 07/19/1990 ~Japanese News Agency

TOKYO (JULY 19) KYODO - ASAHI GLASS CO. SAID THURSDAY THAT IT WILL PURCHASE AN ADDITIONAL 30.4 PERCENT EQUITY IN TOKYO-BASED IWAKI GLASS CO. TO BRING ITS STAKE IN THE COMPANY TO OVER 60 PERCENT.

ASAHI GLASS, JAPAN'S LEADING GLASS MANUFACTURER, HAS JOINTLY OPERATED IWAKI GLASS WITH THE U.S. GLASS MAKER CORNING INC., WHICH HOLDS A 33.4 PERCENT SHARE IN THE COMPANY.

IN ORDER TO STRENGTHEN ITS PRODUCTION CAPACITY IN A SPECIAL TYPE OF ''NEW GLASS,'' HOWEVER, ASAHI GLASS DECIDED TO BRING IWAKI GLASS UNDER ITS FULL MANAGEMENT, OFFICIALS OF ASAHI GLASS SAID.

ASAHI GLASS HAS REACHED AN AGREEMENT WITH CORNING TO BUY MOST OF ITS STOCK HOLDINGS IN IWAKI GLASS. THE TOTAL STAKE OF ASAHI GLASS WILL THEN BE 63.8 PERCENT, THE OFFICIALS SAID.

TOKYO (JULY 19) KYODO - JAPAN WILL DISPATCH AN INVESTIGATING MISSION TO CHINA IN LATE JULY IN PREPARATION FOR THE PLANNED RESUMPTION OF ITS LOANS TO THAT COUNTRY, POSSIBLY IN SEPTEMBER, FOREIGN MINISTRY SOURCES SAID THURSDAY.

THE MISSION, COMPRISING SENIOR OFFICIALS FROM THE FOREIGN, FINANCE, AND

INTERNATIONAL TRADE AND INDUSTRY MINISTRIES, AS WELL AS THE ECONOMIC PLANNING AGENCY, WILL STAY IN CHINA FOR ABOUT A WEEK TO STUDY THE FEASIBILITY OF PROJECTS COVERED BY THE 810 BILLION YEN LOAN PACKAGE PROMISED FOR FISCAL 1990-95.

BASED ON THE FINDINGS OF THE MISSION, THE GOVERNMENT IS EXPECTED TO UNFREEZE IN SEPTEMBER ITS THIRD YEN LOAN, ON HOLD SINCE BEIJING'S SUPPRESSION ON THE PRO-DEMOCRACY MOVEMENT IN JUNE LAST YEAR, GOVERNMENT SOURCES SAID.

A YEAR AFTER JAPAN AND WESTERN COUNTRIES DECIDED ON ECONOMIC SANCTIONS AGAINST CHINA IN PROTEST AT THE CRACKDOWN, PRIME MINISTER TOSHIKI KAIFU WON A TACIT GO-AHEAD FOR JAPAN'S PLAN TO REOPEN THE CREDIT FROM HIS WESTERN COUNTERPARTS AT THE RECENT SUMMIT MEETING OF SEVEN MAJOR INDUSTRIALIZED NATIONS IN HOUSTON, TEXAS.

#90200k0078 07/19/1990 ~Japanese News Agency

TOKYO (JULY 19) KYODO - JGC CORP., A MAJOR JAPANESE PLANT ENGINEERING FIRM, SAID THURSDAY THAT IT HAS RECEIVED A CONSTRUCTION ORDER FOR A NATURAL GAS PROCESSING PLANT IN NIGERIA, TOGETHER WITH U.S. AND FRENCH ENGINEERING COMPANIES.

AT AN INVESTMENT OF 400 MILLION DOLLARS, NIGERIA NATIONAL PETROLEUM CORP. (NNPC) AND MOBIL PRODUCING NIGERIA ORDERED THE CONSTRUCTION OF AN ON-THE-SEA NATURAL GAS PROCESSING FACILITY IN THE COUNTRY'S OSO GAS FIELD, OFF THE COAST OF AKWA, IBOM, BY THE FALL OF 1992.

JGC'S PARTNERS ARE MCDERMOTTO OFFSHORE SERVICES CO. FROM THE U.S. AND BOUYGUES OFFSHORE FROM FRANCE, JGC OFFICIALS SAID.

THE THREE COMPANIES WILL EACH TAKE ON ONE-THIRD OF THE BUSINESS IN THE DESIGNING, CONSTRUCTION AND TEST OPERATION OF THE NEW PLANT, WHICH WILL HAVE A MAXIMUM PROCESSING CAPACITY OF 100,000 BARRELS PER DAY, THE OFFICIALS SAID.

#90200k0084 07/19/1990 ~Japanese News Agency

TOKYO (JULY 19) KYODO - ASAHI OPTICAL CO. SAID THURSDAY IT WILL BUILD A FACTORY AT MACTAN EXPORT PROCESSING ZONE IN THE PHILIPPINES FOR THE PRODUCTION OF LOW-PRICED COMPACT CAMERAS.

CONSTRUCTION IS DUE TO START IN AUGUST, WITH MONTHLY PRODUCTION PLANNED TO REACH 30,000 UNITS BEGINNING NEXT SPRING. THE JAPANESE CAMERA MAKER WILL SET UP A WHOLLY-OWNED SUBSIDIARY, ASAHI OPTICAL PHILIPPINES CORP., NEXT MONTH WITH A CAPITAL OF 90 MILLION PESOS TO MANAGE THE NEW FACTORY,

COMPANY OFFICIALS SAID.

BY SHIFTING ITS MAINSTAY PRODUCTION BASE OF THESE LOW-PRICED CAMERAS OVERSEAS, ASAHI OPTICAL AIMS TO AUGMENT THE DOMESTIC PRODUCTION OF HIGHLY SOPHISTICATED PRODUCTS, SUCH AS AUTO FOCUS SINGLE REFLEX CAMERAS AND LASER PRINTERS.

ASAHI OPTICAL'S PRODUCTION FACTORY IN CEBU IN THE PHILIPPINES WILL BE ITS THIRD OVERSEAS PRODUCTION FOOTHOLD AFTER HONG KONG AND TAIWAN.

-30- 1049

#90200k0089 07/19/1990 ~Japanese News Agency

TOKYO (JULY 19) KYODO - JAPAN TELECOM CO. SAID THURSDAY IT PLANS TO ISSUE STRAIGHT BONDS IN SWITZERLAND AND WEST GERMANY IN THE NEAR FUTURE.

IN SWITZERLAND, A TOTAL OF 50 MILLION SWISS FRANCS WORTH OF BONDS WILL BE OFFERED WITH A COUPON RATE OF 7.5 PERCENT PER YEAR.

THOSE TO BE OFFERED IN WEST GERMANY WILL BE WORTH 60 MILLION GERMAN MARKS, WITH A COUPON RATE OF 9.25 PERCENT PER YEAR, OFFICIALS OF JAPAN TELECOM SAID.

BUT THE REAL YIELD ON BOTH PRIVATELY PLACED BONDS WILL BE ABOUT 7 PERCENT AS THE ISSUING PRICES ARE LIKELY TO BE SET ABOVE PAR VALUE, THEY SAID.

PROCEEDS WILL BE INVESTED TO COMPLETE THE COMPANY'S ONGOING OPTICAL FIBER COMMUNICATION NETWORK PROJECT TO BE SET UP ALONG THE RAILWAYS OF THE JAPAN RAILWAYS GROUP, THEY SAID.

-30- 926

#90200k0093 07/19/1990 ~Japanese News Agency

TOKYO (JULY 19) KYODO - THE GOVERNMENT WILL ESTABLISH AN ORGANIZATION AIMED AT PROMOTING IMPORTS EARLY NEXT MONTH IN ACCORDANCE WITH AN AGREEMENT AT JAPAN-U.S. BILATERAL TRADE TALKS WHICH ENDED LAST MONTH, OFFICIAL SOURCES SAID THURSDAY.

THE BODY, TENTATIVELY CALLED THE IMPORT BOARD, WILL BE SET UP IN THE TRADE CONFERENCE, AN INTERAGENCY COMMITTEE CHAIRED BY PRIME MINISTER TOSHIKI KAIFU, ON AUGUST 7. THE FIRST MEETING OF THE BOARD IS SLATED FOR THIS FALL, THE SOURCES SAID.

THEY SAID THE BOARD, TO BE COMPRISED OF BOTH GOVERNMENT OFFICIALS AND PRIVATE BUSINESSMEN INCLUDING FOREIGN BUSINESS EXECUTIVES, WILL MEET TWICE A YEAR TO SUMMARIZE BOARD VIEWS AND ACTIONS RELATED TO IMPORT EXPANSION. THE BOARD WILL THEN REPORT TO THE TRADE CONFERENCE.

JAPAN PLEDGED TO THE UNITED STATES IT WOULD SET UP SUCH A BODY IN THE FINAL REPORT OF THE TRADE TALKS, KNOWN AS THE STRUCTURAL IMPEDIMENTS INITIATIVE (SII). THE TALKS WERE AIMED AT SCRAPPING BARRIERS TO FOREIGN TRADE AND INVESTMENT IN ORDER TO IMPROVE THE CHRONIC BILATERAL TRADE IMBALANCE.

#90200k0096 07/19/1990 ~Japanese News Agency

TOKYO (JULY 19) KYODO - THE JAPANESE STEEL INDUSTRY, IN RESPONSE TO A REQUEST BY CHINESE OFFICIALS, HAS CHOSEN TWO SITES IN NORTHERN CHINA AS APPROPRIATE FOR STEEL MILL CONSTRUCTION, INDUSTRY SOURCES SAID THURSDAY.

CHOSEN BY THE JAPANESE INDUSTRY WERE YIDONG, HEBEI PROVINCE, WHICH HAS AN IRON ORE MINE NEAR BY, AND SHIJIUSUO, SHANDONG PROVINCE, WHICH IS ADJOINED BY A COAL LOADING PORT, THE SOURCES SAID.

A REPORT ON THE SITE SELECTION IS TO BE SUBMITTED TO THE CHINESE GOVERNMENT WHEN AN INDUSTRY MISSION, LED BY KENSUKE KOGA, EXECUTIVE VICE PRESIDENT OF NIPPON STEEL CORP., VISITS BEIJING ON SATURDAY, THEY SAID.

THE CHINESE GOVERNMENT EARLIER ASKED THE JAPANESE STEEL INDUSTRY TO CHOOSE GOOD SITES FOR THE CONSTRUCTION OF A STEEL MILL OF THE SAME SCALE AS SHANGHAI'S BAOSHAN STEELWORKS, WHICH HAS AN ANNUAL STEELMAKING CAPACITY OF 3 MILLION TONS.

THE PROJECT IS ESTIMATED TO COST 3-4 BILLION DOLLARS. THE CHINESE GOVERNMENT IS EXPECTED TO CHOOSE EITHER OF THE TWO SITES ON ITS OWN BEFORE A FULL-SCALE FEASIBILITY STUDY IS INITIATED ON THE PROJECT.

THE JAPANESE STEEL INDUSTRY INTENDS TO RENDER ACTIVE COOPERATION TO THE CHINESE GOVERNMENT IN CARRYING OUT THE PROJECT, THE SOURCES SAID.

BUT THERE WOULD BE SOME TURISTS AND TURNS BEFORE THE PROJECT TAKES A DEFINITE SHAPE, THE SOURCES SAID, SINCE IT IS NOT INCLUDED IN THE JAPANESE GOVERNMENT'S THIRD YEN CREDIT ARRANGEMENT WITH THE CHINESE GOVERNMENT.

FURTHER, CHINA IS NOW REPORTEDLY PLACING PRIMARY EMPHASIS ON THE BUILDUP AND IMPROVEMENT OF EXISTING STEELWORKS.

#90200m0001 07/19/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (JULY 19) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2)MONEY & ECONOMY.

IN THE NEWS:

The FT 100 is down 2.4 to 2399.6 as traders anxiously await British unemployment figures. ... The DAX index is up 4.91 at 1970.95, just 6 points away from an all-time high. ... The COMMERCE DEPARTMENT says June housing starts fell 2.3% from May, for the fifth straight monthly decline and the lowest level since October 1982. ... GANNETT CO. INC. reports second-quarter earnings down 6% from the same period last year and NEW YORK TIMES CO. posts a 31.6% second-quarter decline. ... PHILIP MORRIS says its earnings were up 27.2% in the second-quarter. ... MCI COMMUNICATIONS CORP. reports a 20% second- quarter earnings increase. ... UAL CORP. non-union workers have ended impasse with unions over a proposed union-led takeover of the airline.

WHAT'S AHEAD:

MICHAEL BOSKIN, chairman of the White House Council of Economic Advisers, spoke before the U.S. Chamber of Commerce at 8 a.m. EDT. Committee on modernization of the financial services industry at 10 a.m. EDT. ... The CHICAGO BOARD OF TRADE and the CHICAGO MERCANTILE EXCHANGE will both propose changes to so-called "circuit breakers" for stock index futures.

FROM THE BULLS:

"With the poor breadth, my feeling is the Dow will pull back to the 2950 area and consolidate," says KENNETH SPENCE of SALOMON BROTHERS. "After that, I'd look for another rally attempt at 3000 with the possibility of a move to 3100." Spence says the market still is not sure about the direction of interest rates. He says, "The burden of proof of an easing is still on Greenspan." ("Investor's Daily", 7/19)

"My guess is the market still has enough momentum to push through that [Dow 3000] barrier and we will next week," says MICHAEL METZ of OPPENHEIMER & CO. (CNBC "Business View", 7/18)

FROM THE BEARS:

MICHAEL BENSON of SHEARSON LEHMAN HUTTON in London says there is no clear direction for Wall Street trading today. "The focus has turned to mostly earnings and special situations this morning" in London, says Benson. As a result, he believes the 3000 threshold is currently out of reach. "One of the things the market is lacking is momentum. With the focus on these earnings, the market won't be able to build up any momentum to punch through that. On the other hand, if we don't get through there relatively soon, I think people will start worrying about a selloff and we could see some more profit- taking hitting the market." (FNN "World Business Update", 7/19)

STOCK MARKET:

Technician GAIL DUDACK of S.G. WARBURG assesses the stock market's reluctance to move the Dow above 3000 this way: "There's no hard rule, but when the market has historically gotten to these big, round numbers, it tends to make people think a great deal more about what their expectations are, or ought to be." ("The Washington Post", 7/19)

"Three thousand is giving people pause," says RONALD J. HILL of BROWN BROTHERS HARRIMAN. "It's just a psychological constraint. We're going into territory [where] we've never been before, and that makes people pause and think if stocks are expensive at these levels." (NYT, 7/19)

"What we really saw most of the day was what looked like selling programs, not program selling," says TED EGGERT of YAMAICHI INTERNATIONAL. He says profit taking and "scared money" accounted for most of the market's decline. "This market needed this type of a pause, and we think, quite frankly, this is rather healthy," says Eggert, who says a consolidation even as low as 2800 would help the market in the long term. (CNBC "Market Wrap-Up", 7/18)

"It's been a mixed bag," says NEWTON ZINDER of SHEARSON LEHMAN HUTTON concerning corporate earnings. "The market is very intolerant of poor earnings reports. So far this quarter they seem to be having more of a negative than positive impact." (FNN "World Business Update", 7/19)

"People are intolerant of bad [earnings] reports, but by and large they're not leaving the market," says PETER CANELO, an investment strategist at BEAR, STEARNS & CO. Instead, he says investors are moving out of stocks where earnings are not meeting forecasts and putting their assets to work in other issues. He says the 3000 mark represents "a psychologically treacherous level, and it's to be expected after a good rally that people would take some profits." (WSJ, 7/19)

Some of yesterday's decline has been attributed to disappointment that FEDERAL RESERVE BOARD CHAIRMAN ALAN GREENSPAN did not say further easing was in works, but those expectations are likely to be disappointed according to LOU EHRENKRANTZ of REICH & CO. "What they want is for Greenspan to get up on a desk, and jump up and down and say interest rates are going to 2%," says Ehrenkrantz. "He's not about to do that." (FNN "Marketwrap", 7/18)

"I've never seen a market go from euphoria to complete pessimism in such a short amount of time," says JIM TARANTINO, head of OTC trading at HAMBRECHT & QUIST in San Francisco. (WSJ, 7/19)

"The stock market isn't being driven by Wall Street analysts, but by investors who are beginning to worry about the revenues," says JACK GRUBMAN, telecommunications analyst at PAINEWEBBER. (WSJ, 7/19)

STOCK TIPS:

CONNER PERIPHERALS reports its quarterly profits almost tripled to $26 million and that sales leaped 85 percent to $303.8 million. The stock is trading at around 30, compared to the initial public offering price of 8 in 1988. "Why is Conner the fastest growing company in the history of the United States?" asks JIM PORTER, a Mountain View, Calif., consultant to the disk drive industry. "Very simple. They have a better mouse trap." ("The Washington Post", 7/19)

KOHLBERG KRAVIS ROBERTS & CO. is the "USA Today" business section cover story this morning after the company announced plans for a restructuring to reduce debt. "KKR has done a wonderful job," says IRA HARRIS of investment banking firm LAZARD FRERES & CO. "They're first-class people. They will continue to do well in any kind of environment." MICHIGAN TREASURER ROBERT BOWMAN, who has about $400 million of state pension money in KKR's takeover funds, says "they're the best in the business." He expects annual returns of 25% to 30% for the next few years on his investment with the company. Another backer is DAVID WEIG, executive director of the WASHINGTON STATE investment board. "They've distinguished themselves in the past," he says. "They're just going to have to look for the nuggets a little bit harder." ("USA Today", 7/19)

IBM announced yesterday that it would license "light-pen" or "stylus" technology from GO, a small Silicon Valley computer company. The agreement was widely seen as a major coup for relatively unknown Go. "It's clear that having IBM rallying around this idea will have a tremendous impact on the industry," says TIM BARJARIN of CREATIVE STRATEGIES RESEARCH. "It puts Go at the forefront." WILLIAM LEMPESIS, publisher of the "Lempesis Report," agrees, saying, "I imagine Go's telephones will start ringing off the hook tomorrow." ("Investor's Daily", 7/19)

MICHAEL METZ, of OPPENHEIMER & CO., likes growth stocks, but he favors cyclicals for this market environment. Among his favorites: DUPONT, REYNOLDS, DOW CHEMICAL, PHILLIPS, CHEVRON and IBM. (CNBC "Business View", 7/18)

PARAMOUNT COMMUNICATIONS, once a favorite on Wall Street seems to be losing ground. "There is just nothing in the fundamentals to make the stock move," says RICHARD SIMON, a media analyst at GOLDMAN, SACHS & COMPANY. LIZBETH BARRON, a vice president of research at S.G WARBURG SECURITIES maintains that the stock is overpriced and the earnings outlook is flat for 1990 and 1991. She estimates the company will earn about $2.15 a share in 1990. She contends that Paramount "is trading at 21 times earnings. Given the fact that there is currently no positive earnings trend, that kind of multiple is high, relative to other entertainment companies and to the market in general." MARIO GABELLI, who heads GABELLI & COMPANY investment firm, is still bullish on the stock. He says that even though the company's earnings are not outstanding, the inherent asset values will ultimately pay off. (NYT, 7/19)

ELI LILLY stock fell 3 7/8 to 85 yesterday in what many analysts say was an overreaction to a $150 million lawsuit filed Tuesday by a woman who claims one of Lilly's anti-depressant Prozac made her attempt suicide. "Investors are using this as an excuse to take profits," says RITA FREEDMAN at PROVIDENT NATIONAL BANK. PRUDENTIAL- BACHE's ROBERT HANSS agrees that Prozac sales could taper off, but joins Freedman in maintaining "buy" recommendations for the stock. ("USA Today", 7/19)

COMPANIA de TELEFONOS de CHILE, Chile's biggest phone company and the first Latin American stock on the big board, begins trading tomorrow on the NYSE and is facing strong demand, according to the "Heard on the Street" column. The, stock underwritten by SALOMON BROTHERS, is said to be oversubscribed, but not everyone is confident in the stock. MARIA ELENA CARRION, an analyst at U.S. TRUST OF NEW YORK, 3 says CTC has "two big negatives: no earnings growth for the next three years and large capital expenses for years to come." (WSJ, 7/19)

-30- 9714

#90200m0002 07/19/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (JULY 19) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

JESSE TORRES, chief foreign exchange trader in New York for BANK BRUSSELS LAMBERT, concludes, after yesterday's testimony by FEDERAL RESERVE BOARD CHAIRMAN ALAN GREENSPAN, that Mr. Greenspan is "a bull on the dollar."

(WSJ, 7/19)

"If you had asked many people last week if the Fed should ease, most would have said yes. But now investors are worried because they believe that if the Fed eases monetary policy again, inflation will get worse. I think it is an unwarranted fear, but it's out there," says CHARLES LIEBERMAN, a managing director at MANUFACTURERS HANOVER SECURITIES CORP. (WSJ, 7/19)

While some think that the Fed will raise rates after it achieves this technical correction, TED EGGERT of YAMAICHI INTERNATIONAL says, "As long as the fed funds rate stays down somewhere around where it is now, which is around 8%, it's not going to happen." FEDERAL RESERVE BOARD CHAIRMAN ALAN GREENSPAN cannot push rates back up because, "if he does, that's going to frighten too many people and ... will eliminate whatever good was done by this little downtick in the fed funds rate." (CNBC "Market Wrap-Up", 7/18)

"The bullish expectations of lower interest rates are probably being destroyed," says SURESH BHIRUD of OPPENHEIMER & CO. ("USA Today", 7/19)

The quarter-point drop in the fed funds rate will "be somewhat positive" for the economy, says STEPHEN AXILROD of NIKKO SECURITIES, but he says the move was merely designed to "push a little more" reserves through the system. Axilrod says that any breakthrough in the budget talks would bring lower rates, but the easing would come slowly to prevent inflation. (FNN "Marketwrap", 7/18)

"I think MR. GREENSPAN will be forced to cut the discount rate by perhaps a half a point in the second half - that's my guess," says MICHAEL METZ of OPPENHEIMER & CO. (CNBC "Business View", 7/18)

"Investor faith in the Fed's commitment to turn back inflation is now being tested," says JOHN LONSKI, senior economist at MOODY'S INVESTORS SERVICE INC. "Without a meaningful slackening of the economy, additional reductions in the federal funds rate are likely to feed inflation expectations and thereby push bond prices lower despite lower money-market rates." (WSJ, 7/19)

Yesterday "was a very confusing day" in the money and credit markets, says ROBERT BRUSCA, chief economist for NIKKO SECURITIES. "It always is when Greenspan speaks." Brusca says Greenspan "is obviously dancing on the edge of a very teetery fence. Doing one thing and saying something else." This, according to Brusca, allows the Fed chief to ease monetary policy without losing the market's confidence in him as an inflation fighter. VALERIE WALKER, New York corporate exchange manager for Chicago's HARRIS TRUST & SAVINGS BANK, says the Fed chairman "did a good job balancing the Fed's conflicting signals" and added that "we got pretty much what the market expected." (WSJ, 7/19)

THE ECONOMY:

"I think things are not too bad and I must say I'm rather pleased with the way the system is working," says FED CHAIRMAN ALAN GREENSPAN concerning the 0.5% increase in the CPI for June as he predicts a slowdown in inflation. "I would be surprised if we did not get some slippage in the rate of increase in the CPI a month from today reported for the month of July." He further dismisses fears of a recession. "I don't see any cumulative evidence that is working towards a recession." ("Nightly Business Report", 7/18)

The chances of a recession are low, "but I think they've grown quite a bit in recent weeks," says CHARLES LIEBERMAN, director of financial markets research at MANUFACTURERS HANOVER SECURITIES. Manufacturing, consumer spending and capital spending on structures are all very weak according to Lieberman. He says, "The risk of recession is material enough that it's important for Greenspan to refocus the Fed away from inflation, which is the last battle, to fighting potential recession, which is the current battle." (CNBC "World Business", 7/19)

DAVID HORNER of MERRILL LYNCH says FEDERAL RESERVE BOARD CHAIRMAN ALAN GREENSPAN's testimony was "a little softer on inflation than I thought it would be." Greenspan allowed for the possibility of further easing, a move which surprised Horner. Greenspan has changed his anti-inflation stance, according to Horner, but "circumstances are changing." He predicts a budget agreement, which will lead to lower rates and a further rally for equities. (FNN "Marketwrap", 7/18)

"Inflation is a bit worse than people expected," says DRI/McGRAW HILL chief financial economist DAVID WYSS. "It will make it difficult for the Fed to ease very sharply." ("Investor's Daily", 7/19)

The CPI report is "very disappointing and it brings up memories of stagflation," says MICHAEL SPENCER, a vice president and portfolio manager at ONE FEDERAL ASSET MANAGEMENT in Boston. "It's too soon to say if [stagflation] is actually happening, but that's the fear in the markets." (WSJ, 7/19)

"We are anticipating stable [housing] prices vs. the doomsday declines people have predicted," says DENISE DiPASQUALE, co-author of the annual assessment by the JOINT CENTER FOR HOUSING STUDIES of HARVARD UNIVERSITY. ("USA Today", 7/19)

The housing market will probably remain weak because of high mortgage rates, overbuilding and concern about the economy, says MIKE NIEMIRA of MITSUBISHI BANK. "The fundamentals are pretty ugly," says Niemira. ("Investor's Daily", 7/19)

"Housing is now at an annualized run rate reminiscent of the early 80s recession," says SHEARSON LEHMAN HUTTON's GREGORY NEJMEH. "While the overall, national economy is not in recession I think it's safe 2 to say the housing sector is." (FNN "Marketwrap", 7/18)

STEPHEN ROACH, senior economist for MORGAN STANLEY, commenting on the 2.3% decline in housing starts says, "This is clearly a sector of the U.S. economy that has been feeling the brunt of the tightness in credit conditions. Hopefully we're near the low point of this current downturn and the Fed will help stabilize activity in this sector by lowering short-term interest rates and this should be an important source of support in the months ahead." ("Nightly Business Report", 7/18)

IN WASHINGTON:

Early yesterday, Republicans in the HOUSE OF REPRESENTATIVES approved a resolution by voice vote that declared their opposition to any deficit reduction plan that includes new taxes. "There is some concern about the near-term outlook on budget negotiations with the passage of the House Republican resolution," says JAMES CAPRA, senior vice president at SHEARSON LEHMAN GOVERNMENT SECURITIES INC. (WSJ, 7/19)

"Our message to the Democrat leadership is: 'Get real,'" says REP. RICHARD ARMEY (R. - Tex.) Armey was one of the sponsors of a resolution passed by the House Republican Caucus which stated that the group was against "new taxes and all tax rate increases." Armey said that were he forced to choose between the "irresponsible packages" forwarded by Democrats, and automatic Gramm-Rudman-Hollings cuts, "... I'd take sequester. You should never underestimate how irresponsible these people are capable of being." ("Investor's Daily", 7/19)

PETER MONROE, president of the federal RESOLUTION TRUST CORP., says the S&L bailout agency has "completed 24 percent of the resolutions we are likely to see" and disposed of "17 percent of all the assets that will ultimately move through the system." ("The Washington Post", 7/19)

FEDERAL RESERVE BOARD CHAIRMAN ALAN GREENSPAN's Humphrey-Hawkins testimony led to some market speculation that Greenspan may have bowed to political pressure to lower rates. "There's some disappointment [that] he didn't explain more fully the data he's seeing that suggests credit conditions have changed in the last three weeks," says DAVID GREENLAW, economist at MORGAN STANLEY & CO. INC. "You don't see much that's new. There's some concern that there could be a political explanation for it [the easing]," he says. (Reuters, 7/18)

SENATOR EDWARD KENNEDY (D-Mass) says rules on discrimination in the work place will change radically if the House and the President support a piece

of landmark legislation that passed the Senate late last night. "This is not a quota legislation; it is an anti- discrimination legislation. The Senate of the United States understood that, the American people understand that, and we are hopeful the President will come to understand that." (CNN "Business Morning", 7/19)

-30- 9009

#90200p6256 07/19/1990 ~PR Newswire

NEW YORK (JULY 19) PR NEWSWIRE - James L. Fitzpatrick has been promoted to publisher of the Entrepreneur Group, it was announced today by Peter J. Shea, chairman and CEO of the Irvine, Calif.-based publisher of magazines and reference guides for small businesses. Fitzpatrick has been vice president and associate publisher since 1987.

"Jim Fitzpatrick has played a key role in making Entrepreneur the fastest-growing business magazine in America," said Shea. "He spearheaded Entrepreneur's relaunch in 1988 and the resulting explosive growth of the magazine in both ad pages and revenue. In addition, Jim was instrumental in the successful launches of Entrepreneurial Woman and New Business Opportunities magazines."

Entrepreneur, the nation's small business authority, is the number one business magazine in newsstand sales and leads all business monthlies in ad pages.

"1990 marks our third consecutive year of record-breaking gains," Shea added. "Our first nine months' figures are very strong. Total ad pages for the period are 1499, up 10 percent, and ad revenue reflects a 31 percent gain. The September issue, which just closed, came in with a total of 186.34 ad pages, the second biggest issue this year, racking up a 21.42 percent increase over the same issue last year, with ad revenues up 38.43 percent over 1989."

Since January 1987, the magazine has experienced a 666 percent increase in advertising revenues (January 1987-December 1990) and Entrepreneur's ad pages have climbed from 469 in 1987 to a projected 2000 in 1990.

Prior to joining the Entrepreneur Group, Fitzpatrick was director of marketing for Stained Glass Overlay, where he was responsible for the marketing and sales of over 400 SGO franchises nationwide. He has extensive sales and marketing experience, including national sales manager B&E Enterprises; president, U-Tel CATV Products, and vice president-sales American Educational Television Network. Fitzpatrick holds an MBA from Golden Gate University, San Francisco, and a BSBA from Valparaiso University in Indiana. He is a pilot and former captain in the U.S. Air Force.

"Small business in America is stronger than ever, and Entrepreneur continues to lead the way," said Fitzpatrick. "Our magazines have experienced tremendous growth in the past two years, and we look forward to continued growth as we enter the 'Decade of the Entrepreneur'."

NEW YORK (JULY 19) PR NEWSWIRE - Popular Mechanics West Coast Automotive Editor Rick Titus is the host of "Countdown to Love," a weekly preview of new car models, on The Auto Channel Show. The nationally syndicated program airs on broadcast TV stations reaching more than 55 percent of American TV homes.

Titus, an automotive engineer and authority on automotive comparison testing, will preview six cars in each half-hour show and ten new cars in the hour-long version. Each car is reviewed in a one-minute profile.

"There are so many models and features in each car category that we will be able to provide a wide sampling of what's available in the market," says Titus. "Besides cost and efficiency considerations, we try to give our viewers an inside look at the 'fun to run ratio' of the cars we profile."

A nationally recognized automotive journalist and consultant to some of America's top car companies, Titus is known for his snappy and insightful coverage of imported cars and trucks for Popular Mechanics, a Hearst publication.

The Auto Channel Show premiered nationally in June 1990. It is produced by Gordon Communications and distributed by Fries Entertainment, Hollywood.

NEW YORK (JULY 19) PR NEWSWIRE - Lever Brothers Company has begun to incorporate recycled plastic into bottles for several of its leading laundry product brands. In June, Lever Brothers began filling bottles that contain recycled resins at two of its manufacturing facilities, located in Baltimore and Los Angeles. The program will be expanded to its plants in St. Louis and Hammond, Ind. later this year.

Among the national brands included in this initiative are WISK and "all" liquid laundry detergents and Snuggle liquid fabric softener in the most popular 64-ounce and larger size bottles.

By the end of the first stage of this program, approximately half of the bottles Lever sells nationwide will contain recycled plastic. Initially, the levels of recycled resin in the plastic bottles are between 25 and 35 percent.

According to Arnold Brown, vice president of packaging and director of Lever's state-of-the-art Packaging Development Center in Owings Mills, Md. "It is our goal to steadily increase the quantity of recycled HDPE (high density polyethylene) plastic we use in our bottles. Of course, our success will depend on an adequate and reliable supply of recycled plastic."

The initiative we are announcing today offers the potential to save the equivalent of more than 50 million bottles from disposal in landfills each year, said Brown.

"Lever Brothers is committed to the use of recycled resins in our plastic bottles, and to doing our part to generate greater demand for recycled plastics. In turn, we hope this will encourage more communities nationwide to institute plastics collection and recycling programs. This is where the consumer can help," said Melinda Sweet, director of environmental affairs.

Lever Brothers said the new initiative was made possible by cooperation with three of its major bottle suppliers -- Continental Plastic Containers Owens-Brockway and Sonoco Graham -- which together produce approximately 90 percent of the company's plastic laundry product bottles. All three companies have begun converting their manufacturing facilities to use recycled plastic resins in bottles made for Lever Brothers.

"Lever's announcement to use recycled resins in their plastic containers is great news. This is exactly the action suppliers like R2B2 have been working to achieve," said Phyllis Atwater, president and general manager of R2B2 Inc., and a member of the Recycling Advisory Council. "Recycling is supply driven. We depend on container users to create the demand for recycled plastics so we can increase the supply."

Lever Brothers Company is a leading consumer household products corporation headquartered in New York. The company operates manufacturing facilities in Baltimore; Cartersville, Ga.; Hamond, Ind.; Los Angeles; and St. Louis.

LANGHORNE, PA (JULY 19) PR NEWSWIRE - Cabot Medical Corp. (NASDAQ-NMS: CBOT), today announced that it has entered into loan and acquisition option agreements with Meditron Devices Inc. of Hackensack, N.J.

Under these agreements, Cabot will provide funding for Meditron's growth in exchange for an option to purchase Meditron (in 1993). No terms were disclosed.

Meditron Devices Inc. develops, manufacturers and markets electronic medical devices and associated products for the less invasive surgery market. Their products are sold under the Meditron name through an extensive sales representative network. Additionally Meditron manufactures, on an OEM basis, to customer specifications. Meditron's initial focus has been in the gastrointestinal and related internal organ disorders. The product line includes such products as the Bipolar Polypectomy System, Electrohydraulic Lithotriptor, GI Electrosurgery and Coagulation System, and an Endoscopic Lavaging Pump.

"We are very excited about the medical electronic device capability presented to us by the Acquisition Agreement," stated Marvin Sharfstein, vice president of corporate development for Cabot. "It allows Cabot to further strengthen its own electronic and manufacturing capabilities while expanding our market presence into new as well as existing segments," said Sharfstein.

Cabot Medical Corp. designs, develops and manufactures medical devices for less invasive diagnostic and surgical procedures. The products are sold under the Cabot, Berkeley, KLI, Cryomedics and Ultroid trade names.

#90200p6273 07/19/1990 ~PR Newswire
MORRISTOWN, NJ (JULY 19) PR NEWSWIRE - Pitney, Hardin, Kipp & Szuch, one of New Jersey's largest and most distinguished law firms, will relocate its headquarters offices from 163 Madison Ave. in Morristown to the new 170-acre, 1.1 million-square-foot Park Avenue at Morris County complex. According to Clyde A. Szuch, chairman of the management committee, Pitney, Hardin, Kipp & Szuch will lease 110,000 square feet of a 193,000-square-foot four-story contemporary office building on a long-term lease basis.

In commenting on his firm's move to new headquarters, Szuch cited his

firm's dramatic growth over the past decade, which is reflected by an increase from 45 attorneys to 155 attorneys. "Our new office provides us with nearly double the space we currently have, and, as a result, the capability to accommodate an increase in size to more than 200 attorneys over the next five-year period.

"It is fitting that we retain Morris County as our headquarters location, given the long and proud tradition we have established here. We look forward to continuing our history of providing our clients with superior legal services that are both cost-effective and goal-oriented. In addition we believe that such an attractive suburban office setting will continue to attract other leading practitioners to the Pitney, Hardin, Kipp & Szuch lifestyle," Szuch said.

Pitney, Hardin, Kipp & Szuch provides a comprehensive range of legal services including litigation, environmental, trusts and estates, labor and employment, commercial and bankruptcy, real estate, taxation, corporate, public finance, matrimonial, and white collar criminal defense.

The firm's new facilities will feature a fully equipped two-story law library, 20 individual conference rooms, a state-of-the-art communications center, and electronic mail and other on-line services, such as Lexis/Nexis research functions at each attorney's desk.

The firm's four-story headquarters building is one of three buildings which comprise the new commercial complex under the construction supervision of the Sammis Company/Northeast Region. Designed by Harwood K. Smith of Dallas, the complex will be architecturally coordinated, with each building combining granite and reflective glass elements to achieve its own distinctive look.

Szuch indicated that Pitney, Hardin, Kipp & Szuch will maintain its office at 33 Washington St. in Newark: "Newark remains an integral part of our client-servicing strategy, as it has for the past 82 years."

Pitney, Hardin, Kipp & Szuch provides full service legal representation for leading, national and New Jersey-based corporations.

LAS VEGAS (JULY 19) PR NEWSWIRE - Sahara Casino Partners, L.P. (NYSE: SAH) today declared its 12th consecutive full cash distribution of 28 cents per unit, payable Aug. 14, 1990, to holders of publicly traded units of record on Aug. 1, 1990.

Sahara Casino Partners, L.P. is the gaming master limited partnership which owns and operates the Sahara Hotel and Casino and the Hacienda Resort Hotel and Casino in Las Vegas, and the Pioneer Hotel and Gambling Hall in Laughlin, Nev.

The partnership is currently building the Santa Fe Hotel and Casino in Las Vegas, a full facility property which will cater to the local Las Vegas market. The Santa Fe will include a state-of-the- art, 60-lane bowling center, which will be one of the few bowling facilities to feature the new Brunswick "BowlerVision" capabilities. The new property will also feature Southern Nevada's only public ice skating arena, a National Hockey League regulation size rink with seating for approximately 2,500 spectators.

In addition to the new construction at the Santa Fe, the partnership is expanding the Sahara, to add nearly 600 new guest rooms and a six-story parking garage. At the Hacienda, nearly 400 new guest rooms are being built as part of a new tower, the ground floor of which will double the size of the existing casino.

#90200p6278 07/19/1990 ~PR Newswire

SAN BRUNO, CA (JULY 19) PR NEWSWIRE - Anton R. Hendriksz, president of North Lily Mining Co. (NASDAQ: NLMC), today announced receipt of the final feasibility study on the Taltal Joint Venture property in northern Chile. The study, prepared by Davy McKee Corp., concludes that the substantial nitrate/iodine project is feasible and that there are no technical obstacles from either mining, processing or environmental standpoints.

The feasibility study has focused on the Yumbes and Yolanda pampas of the joint venture property, which represent approximately one third of the entire property holding. Combined ore reserves for these two pampas exceed 120 million tonnes, with an estimated yield of 40,500 tonnes of iodine and sufficient sodium nitrate to produce 13,310,000 tonnes of potassium nitrate. Gross revenues of approximately $4.4 billion are attainable from this resource.

Total ore reserves on the Yolanda and Yumbes sectors have been calculated as follows:

		Grade			Tonnes	
Deposit	Years(i)	Iodine (Grams/ Tonne)	Nitrate (pct. Sodium Nitrate)	Ore (000's)	Iodine	Nitrate (000's)
Yumbes	14	1,025	17.2	25,088	25,715	4,315

(high grade)						
Yumbes	34.75	304	12.9	62,274	18,927	8,003
(low grade)						
Yolanda	19.50	296	11.7	34,949	10,345	4,089
TOTAL	68.25			122,310	54,987	16,407

(i) Years at a mining rate of 1,792,000 tonnes per year. The feasibility study concluded that development should commence on the Yumbes area. High grade ore can be produced from the Yumbes pampa for a period of 14 years with lower grade ore being available beyond this period for continued operations in both the Yumbes and Yolanda pampas. An estimated revenue of $1.28 billion will be generated during the initial 14 year production period of the higher grade Yumbes area. Recoverable resources during this period of 18,900 tonnes of iodine and 3,500,000 tonnes of potassium nitrate will result in a gross margin of $710 million. The ore will be mined at a rate of 5,120 tonnes per day. Due to the superficial nature of the deposit, mining will be performed by removing an average of 0.3 meters of barren overburden to access the 0.8 meters of caliche ore. The ore will be trucked to heap leach pads where the soluble salts will be leached. Water will be pumped from the sea for the leaching process. The daily production rate has been established to optimize the current market conditions and may be increased significantly to react to market conditions.

Four feasible and economically viable scenarios have been evaluated to maximize productivity. The economic analyses for the two most viable alternatives over the first 14 years of operation are summarized below:

	Capital Cost	Gross Revenue
Production of iodine and potassium nitrate	$69,237,000	$50,778,000
Production of iodine and solar evaporated sodium nitrate	$18,148,000	$12,965,000

In order to produce iodine and potassium nitrate, two separate plants will be constructed. Each of these plants will operate independently and do not need to be constructed at the same time. One plant will produce iodine and sodium nitrate while the other will utilize the sodium nitrate to produce potassium nitrate. It is expected that it will take about nine months to build up sufficient quantities of sodium nitrate.

In assessing the options it is clear that the joint venture should place the property into production and immediately proceed with the option to

produce iodine and sodium nitrate. Production of iodine and sodium nitrate should commence in 1991. Once production is underway and sufficient sodium nitrate has been produced, the joint venture will secure financing to construct the potassium nitrate plant which is anticipated to be complete within two years of commencement of production.

North Lily Mining Co. is the operator and has a 10 percent net profits interest in the property. Under the terms of North Lily's contract as operator, the joint venture not only reimburses North Lily for its efforts but also allows the company to share in the profits without providing any capital investment in the project.

North Lily currently employs over 60 people in Chile and is on the verge of capitalizing on several unrelated significant mining opportunities in the fastest growing mining country in the world.

CONTRACT: Thomas L. Crom of North Lily Mining Co., 415-742-0133

#90200p6281 07/19/1990 ~PR Newswire

BOISE, ID (JULY 19) PR NEWSWIRE - West One Bancorp (NASDAQ-NMS: WEST) reported record earnings of $10.2 million or 82 cents per share in second quarter 1990. This represents a 21 percent increase over second quarter 1989 earnings of $8.4 million, or 68 cents per share. Net income for the six months ended June 30, 1990, was $19.0 million, a 17 percent increase over the $16.2 million reported for the first six months of 1989. On a per share basis, net income for the six months ended June 30, 1990 was $1.53 compared to $1.32 a year ago.

"Good economic growth in our market area, increased loan volume and a higher net interest margin were primarily responsible for our improved earnings performance," said Dan Nelson, chairman and chief executive officer.

Total assets, loans, deposits and shareholders' equity all increased from June 30, 1989 to June 30, 1990. Total assets at June 30, 1990, were $4.4 billion, a 9 percent increase over $4.0 billion one year ago. Loans grew 21 percent to $2.8 billion over the same period. Deposits increased 9 percent to $3.3 billion at June 30, 1990. Shareholders' equity was $287 million at June 30, 1990, an 11 percent increase over $259 million at June 30, 1989.

Net interest income and margin (adjusted to a tax-equivalent basis) increased in second quarter 1990 compared to second quarter 1989 due to the volume and composition of earning assets. Net interest income increased $4.6 million or 12 percent to $42.5 million in second quarter 1990 from second quarter 1989. Net interest margin increased to 4.44

percent in second quarter of 1990. Average earning assets increased $289.1 million or 8 percent during this period due to loan growth. Loans, the highest yielding component, represented 71 percent of earning assets in the current quarter compared to 64 percent in second quarter 1989.

The provision for credit losses was $2.5 million in second quarter 1990 compared to $1.1 million recorded in second quarter 1989 and $2.3 million in fourth quarter 1989. The increase in the provision is related to the growth in the loan portfolio. Nonperforming assets at the end of second quarter 1990 decreased to $34.7 million, a 16 percent improvement from $41.2 million at June 30, 1989.

Noninterest income increased $2.5 million or 22 percent from second quarter of 1989 to 1990 due to successful incentive based sales programs, service charges from account growth, increases in managed trust assets and pricing adjustments. Noninterest income for the first half of 1990 increased $4.3 million or 19 percent from the same period in 1989.

Noninterest expense increased $2.6 million or 8 percent from second quarter 1989 to second quarter 1990 due to higher deposit insurance assessments and expenses associated with a successful loan promotion. Noninterest expense for the first six months of 1990 exceeded the prior year by $5.4 million or 8 percent.

The board of directors today declared a cash dividend of 22 cents per common share payable Oct. 18 to shareholders of record Sept. 28.

#90200p6283 07/19/1990 ~PR Newswire

MACON, GA (JULY 19) PR NEWSWIRE - The Bibb Company announced today that its offer to exchange its 14 percent Senior Subordinated Notes due 1999 for its 13-7/8 percent Senior Subordinated Notes due 1999 and its solicitation of consents of the holders of the 13-7/8 percent Notes to certain proposed amendments to the indenture relating thereto expired at 5:00 p.m., New York City time yesterday.

The company has accepted for exchange all of the 13-7/8 percent Notes which have been validly tendered in accordance with the terms of the exchange offer. Based upon a preliminary count, an aggregate principal amount of approximately $27,177,000 of 13-7/8 percent Notes had been tendered and related consents delivered. Since it appears that less than the requisite 66-2/3 percent of the aggregate outstanding principal amount of the 13-7/8 percent Notes were delivered, the proposed amendments to the

indenture relating to the 14 percent Notes which would have eliminated certain restrictive covenants or the proposed amendment to the indenture relating to the 14 percent notes to reduce the amount of Restricted Payments permitted thereby will not be adopted. Closing of the Exchange offer is expected to occur as soon as practicable.

Merrill Lynch Capital Markets is acting as dealer manager in connection with the Exchange offer and Solicitation, and any questions may be directed to them at World Financial Center, North Tower, New York, New York 10281-1329, telephone number 212-449-8881 or to Georgeson & Company Inc., the information agent, at Wall Street Plaza, New York, New York 10005, telephone number 1-800-223-2064.

CONTACT: John Stevenson of Georgeson & Co., 800-223-2064.

ATLANTA (JULY 19) PR NEWSWIRE - S. Truett Cathy, founder and chairman of Chick-fil-A Inc., has been selected as the 1990 recipient of The National Exchange Club American Enterprise Award.

Cathy will be presented with the award during the 72nd Annual Convention of The National Exchange Club in Washington, D.C., on July 19. The award is presented annually by the service organization to a leader in the business and professional community who exemplifies the spirit of the American free enterprise system.

President of Chick-fil-A Inc. until 1988, Cathy launched the national restaurant chain from a single suburban Atlanta diner in 1967. Chick-fil-A has nearly 425 restaurants in 31 states, making it the fourth-largest chicken fast food chain in the nation. The Atlanta-based corporation had 1989 sales of $264 million.

Since 1973, Chick-fil-A has awarded more than $6 million in $1,000 college scholarships and supports the WinShape Centre, founded by Cathy in 1984 at Berry College in Rome, Ga., to provide scholarships, camping programs and foster care.

Cathy, who also serves on numerous boards, was a 1989 recipient of the Horatio Alger Award.

In addition to the American Enterprise Award, The National Exchange Club sponsors a variety of other community service programs including National Crime Prevention Week, Freedom Shrine displays of historic American documents, and the National Youth of the Year Award. Exchange adopted child abuse prevention as its national project in 1979.

Exchange is the oldest and largest exclusively American service club, with over 1,200 clubs and 43,000 members throughout the U.S. and Puerto Rico.

Cathy was nominated for the American Enterprise Award by Robert B. McCord Jr., past president of the Exchange Club of Hapeville, Ga.

WALTHAM, MA (JULY 19) PR NEWSWIRE - The Waltham Corporation (NASDAQ: WLBK), the holding company of Waltham Savings Bank, today reported its earnings for the second quarter ended June 30, 1990 of $453,000 or 16 cents per share. Net income for the comparable period last year was $272,000 or eight cents per share. For the six-month period ended June 30 1990 net income was $919,000 or 31 cents per share, compared with $947,000 or 29 cents per share for the same period in 1989.

Deposits were $322.4 million at June 30, 1990, compared to $316.6 million for the same period last year. Assets on June 30, 1990 totaled $552.8 million, comprised primarily of $283.1 million in investments and $251.9 million in net loans. The investment portfolio consists primarily of one year adjustable-rate mortgage-backed securities.

Net loans were $251.9 million at June 30, 1990, a decrease of $6.3 million from March 31, 1990. Nonperforming loans and other real estate owned were $24.3 million as compared to $22.7 million at March 31, 1990. An $813,000 loan loss provision for the quarter resulted in an increase in the allowance for possible loan losses to $7.1 million at June 30, 1990.

On April 25, 1990 Waltham Savings Bank entered into an agreement to purchase certain assets and assume certain deposit liabilities of two branch offices of First Mutual Bank for Savings. It is expected that the transaction will be completed in early August.

In addition, on May 9, 1990, Waltham Savings Bank announced the signing of a definitive agreement to acquire Lexington Savings Bank. The agreement is subject to satisfaction of a number of significant conditions, including approval by state and federal regulatory agencies and by the stockholders of Lexington Savings Bank, as well as conditions based on the level of Lexington net worth and non-performing assets.

On July 11, 1990, the board of directors declared a cash dividend of 12 cents per share, payable on Aug. 3, 1990 to shareholders of record on July 25, 1990. At June 30, 1990 the corporation had 2,917,900 shares of common stock outstanding and a net book value of $17.60 per share.

Waltham Savings Bank, a wholly owned subsidiary of The Waltham Corporation offers a comprehensive line of business and personal banking services at four retail offices located in the Boston suburbs of Waltham, Weston and Sudbury.

ERIE, PA (JULY 19) PR NEWSWIRE - Autoclave Engineers, Inc. (NASDAQ: ACLV) today announced record net sales and income from continuing operations for both the fourth quarter and the fiscal year ended May 31, 1990. For the year as a whole, income from continuing operations reached $5,570,000 or $1.29 per share, surpassing last year's previous record of $4,909,000 or $1.14 per share by 13 percent. An after-tax gain of $917,000 in fiscal 1989 from discontinued operations in France brought net income for the prior year to $5,826,000 or $1.35 per share. Net sales for the year were $84,858,000, representing an 11 percent increase over fiscal 1989's previous record of $76,353,000.

The fourth quarter ended May 31, 1990, was the best in the company's history for both sales and income from continuing operations. Sales of $26,465,000 represented an 18 percent increase over the $22,470,000 reported for the same period of 1989, which was the prior record for a quarter. Income from continuing operations reached $2,397,000 or $0.56 per share, surpassing last year's $1,391,000 or $0.33 per share by 72 percent. The previous record for quarterly income from continuing operations was the $1,765,000 or $0.41 per share realized in the third quarter of fiscal 1989.

The company attributed the record fourth quarter results to a continued strong performance at its Unit Instruments subsidiary and exceptionally high volume at both its Autoclave Engineers Group and Burton Corblin subsidiaries. Inventory reductions had a positive impact as well.

Commenting on these results, James C. Levinson, president, said, "We are very pleased that the fourth quarter was stronger than anticipated and it enabled us to surpass our objectives for the year. Because it is difficult to forecast the precise timing of much of our business, we place more emphasis on annual rather than quarterly results. In this light, we take great satisfaction in the fact that 1990 was our third consecutive year of record sales and profits."

In looking ahead, Levinson said, "1991 should be another good year, although we expect first half results to lag those of 1990, with particular softness in the first quarter. This is due to normal seasonal factors, compounded by temporary low backlogs in our domestic markets and a shipment schedule skewed towards year-end at Burton Corblin. Nonetheless, the performance we anticipate in the second half should produce a fourth straight year of strong results."

Autoclave Engineers, Inc., headquartered in Erie with subsidiaries in Erie; Orange, Calif.; and Nogent, France, is a recognized leader in providing high quality engineered products for chemical research and related process markets throughout the world.

#90200p6288 07/19/1990 ~PR Newswire

PHILADELPHIA (JULY 19) PR NEWSWIRE - Consolidated Rail Corp. (NYSE: CRR) today reported second quarter 1990 net income of $74 million ($1.46 per share, fully diluted basis) vs. second quarter 1989 net income of $82 million ($1.19 per share), a decrease of 9.8 percent in net income and an increase of 22.7 percent in earnings per share.

Second quarter 1990 revenue was $861 million, a decrease of 2.3 percent vs. second quarter 1989 revenue of $881 million.

First half 1990 net income was $99 million ($1.78 per share, fully diluted basis) vs. first half 1989 net income of $142 million ($2.07 per share), a decrease of 30.3 percent in net income and a decrease of 14.0 percent in earnings per share. Revenue for the first six months of 1990 was $1.68 billion, a decrease of 4.0 percent vs. $1.75 billion for the same period of 1989.

Among factors affecting second quarter 1990 was Conrail's previously announced sale of the Cockeysville Industrial Track to the Maryland Mass Transit Administration, resulting in an after-tax gain of approximately $9 million. This gain was more than offset by a $15 million reduction in second quarter 1990 net income due to the financing of Conrail's $1.1 billion first quarter 1990 Dutch auction tender offer.

"We are pleased with these very solid results for the second quarter and our financial restructuring, which has enhanced shareholder value," said James A. Hagen, Conrail's chairman, president and chief executive officer.

Second quarter 1990 traffic (in tariff based ton-miles) was virtually flat decreasing 0.1 percent vs. the same period of 1989. Increases were registered in coal (9.1 percent), forest products (3.3 percent), and chemicals and related products (1.3 percent). Declines occurred in metals and related products (6.9 percent), automotive (6.8 percent), food and grain (4.5 percent), and intermodal (2.5 percent).

Traffic for the first six months of 1990 was also flat, up 0.2 percent vs. the first half of 1989. Increases were registered in coal (9.4 percent), chemicals and related products (1.6 percent), and intermodal (0.4 percent). Declines occurred in automotive (11.6 percent), metals and related products (6.8 percent), forest products (2.1 percent), and food and grain (0.6 percent).

#90200p6291 07/19/1990 ~PR Newswire

NEW YORK (JULY 19) PR NEWSWIRE - ALW Marketing Corporation, a Primerica Corporation (NYSE: PA) subsidiary, said today it has learned that the United States Attorney in Jacksonville, Fla., is investigating certain practices of a small number of life insurance salespersons and other individuals affiliated with the company.

Arthur L. Williams Jr., the founder of A.L. Williams and Associates Inc. and the owner of its sales agency until its purchase by Primerica in November 1989, has advised the company that he desires a temporary leave of absence as a sales consultant in order to assist in looking into this matter and its proper resolution. Williams hopes that the matter will be resolved as soon as possible.

The activities believed to be under investigation involve the competitive conduct of certain agents related to an ongoing dispute with another insurance sales force, Amerishare Investors, Inc., with whom A.L. Williams and Associates Inc. and ALW Marketing Corporation have been engaged in vigorous litigation for some time. In this litigation, a federal court has issued an order curbing unfair competitive practices by Amerishare. The current investigation apparently involves an inquiry into whether the respective sales forces made inappropriate efforts to obtain information about or interfere with each others' operations.

There are no indications that any policyholders or consumers have been affected by the practices under scrutiny or that the company is likely to be exposed to material financial liability.

The company said it will cooperate with the government's investigation,

has undertaken a review of its competitive practices to assure its ongoing compliance with applicable law, and has appointed an insurance professional from within the Primerica organization to the staff of ALW Marketing Corporation.

ALW Marketing Corporation is a wholly owned subsidiary of Primerica Corporation, a diversified financial services company engaged in life, credit, accident & health, and property & casualty insurance, investment banking and securities brokerage, mortgage banking, mutual funds, asset management, consumer lending and credit cards.

#90200p6294 07/19/1990 ~PR Newswire

MILPITAS, CA (JULY 19) PR NEWSWIRE - Komag Inc. (NASDAQ: KMAG), the leading independent supplier of sputtered thin-film metallic disks for data storage applications, today announced second quarter financial results for fiscal 1990.

For the second quarter ended July 1, 1990, net sales totaled a record $35.5 million, a 92 percent increase over the $18.6 million for the comparable quarter of 1989. Net sales in the quarter just ended were 18 percent higher than the $30.1 million recorded in the first quarter of 1990.

Income before extraordinary credits for the second quarter was $2.8 million or 18 cents per share. In comparison, the company posted a net loss in the second quarter of 1989 of $1.6 million or 12 cents a share. The company's second quarter income before extraordinary credits was 93 percent higher than the $1.5 million or 10 cents per share reported in the first quarter of 1990.

"Komag's strong second quarter performance was fueled by increased demand for higher performance 3 1/2 inch and 5 1/4 inch thin-film media. Komag was able to hold its unit costs constant during the second quarter as our product mix continued to migrate to these higher performance, higher priced disks. As a result, our gross margin increased to 23.7 percent from 20.4 percent in the first quarter of 1990," reported Stephen C. Johnson, Komag Inc.'s president.

"To expand our gross margins in the coming quarters we need to make further improvements in our manufacturing efficiencies to drive our product costs downward," Johnson commented. "We are continuing to work with our Japanese partners, Asahi Glass Co. Ltd. and Kobe Steel Ltd., to introduce new procedures and approaches to achieve these goals in our substrate and disk manufacturing operations," he continued. "Increased

disk production volume available from Komag's eighth sputtering line, which began operation in late May at the company's new San Jose, Calif., manufacturing facility, should also contribute to reduced product costs," Johnson noted.

Komag Inc. develops, manufactures and markets sputtered thin-film metallic disks for use in high-capacity, high-performance Winchester disk drives. Komag is the largest independent supplier of these disks to independent disk drive manufacturers and computer system manufacturers which build their own disk drives. Komag applies a recording layer only microinches thin onto a polished aluminum substrate using a sputtered or vacuum deposition technique similar to the way the semiconductor industry coats wafers with thin metallic films. Founded in 1983, the company maintains 360,000 square feet of manufacturing and administrative space in California. The company also manufactures and sells products through a joint venture, Asahi Komag Co. Ltd., which is among the top three media producers in Japan. Komag employs approximately 1,500 people. The company is traded on the NASDAQ over-the-counter market under the symbol KMAG.

PITTSBURGH (JULY 19) PR NEWSWIRE - Westinghouse Electric Corp. (NYSE: WX)

today announced an agreement to join Consumers Power Co. and Bechtel Power Corp. as investors in the company that will purchase the Palisades nuclear power plant in South Haven, Mich.

According to the Equity Subscription Agreement signed today, Westinghouse will become a stockholder in the Palisades Generating Co. (PGC). PGC was formed to purchase the existing, operating 768-megawatt Palisades nuclear generating plant from its present owner, Consumers Power.

Under terms of the agreement, Westinghouse will invest $20 million for about a 22 percent equity interest in PGC. Bechtel previously announced it will have a 33 percent equity interest in PGC. Consumers Power will hold approximately a 44 percent equity interest.

The purchase is expected to be completed and the title transferred to PGC in early 1991 following regulatory approvals and the completion of Palisades' steam generator replacement. PGC represents the first independent ownership of a commercial U.S. nuclear power plant by three major companies. The purchase price will be approximately equal to the plant's book value.

Consumers Power will continue to operate the plant under contract to PGC and buy Palisades' power under a long-term power purchase agreement. A request for approval of the wholesale power rate has been filed with the Federal Energy Regulatory Commission (FERC).

Westinghouse Electric Corp., headquartered in Pittsburgh, is a technology-based, diversified corporation and is a world leader in the commercial nuclear power industry.

Bechtel Group, Inc., is a worldwide professional engineering and construction firm headquartered in San Francisco, Calif. Bechtel Power Corp., a major Bechtel operating subsidiary, is headquartered in Gaithersburg, Md.

Consumers Power Co., the principal subsidiary of CMS Energy Corp. (NYSE: CMS), is Michigan's largest utility serving almost six million of the state's nine million residents in 67 of the 68 Lower Peninsula counties. Its headquarters are in Jackson, Mich.

#90200p6296 07/19/1990 ~PR Newswire

ERIE, PA (JULY 19) PR NEWSWIRE - Autoclave Engineers, Inc. (NASDAQ: ACLV) today announced record net sales and income from continuing operations

for both the fourth quarter and the fiscal year ended May 31, 1990. For the year as a whole, income from continuing operations reached $5,570,000 or $1.29 per share, surpassing last year's previous record of $4,909,000 or $1.14 per share by 13 percent. An after-tax gain of $917,000 in fiscal 1989 from discontinued operations in France brought net income for the prior year to $5,826,000 or $1.35 per share. Net sales for the year were $84,858,000, representing an 11 percent increase over fiscal 1989's previous record of $76,353,000.

The fourth quarter ended May 31, 1990, was the best in the company's history for both sales and income from continuing operations. Sales of $26,465,000 represented an 18 percent increase over the $22,470,000 reported for the same period of 1989, which was the prior record for a quarter. Income from continuing operations reached $2,397,000 or $0.56 per share, surpassing last year's $1,391,000 or $0.33 per share by 72 percent. The previous record for quarterly income from continuing operations was the $1,765,000 or $0.41 per share realized in the third quarter of fiscal 1989.

The company attributed the record fourth quarter results to a continued strong performance at its Unit Instruments subsidiary and exceptionally high volume at both its Autoclave Engineers Group and Burton Corblin subsidiaries. Inventory reductions had a positive impact as well.

Commenting on these results, James C. Levinson, president, said, "We are very pleased that the fourth quarter was stronger than anticipated and it enabled us to surpass our objectives for the year. Because it is difficult to forecast the precise timing of much of our business, we place more emphasis on annual rather than quarterly results. In this light, we take great satisfaction in the fact that 1990 was our third consecutive year of record sales and profits."

In looking ahead, Levinson said, "1991 should be another good year, although we expect first half results to lag those of 1990, with particular softness in the first quarter. This is due to normal seasonal factors, compounded by temporary low backlogs in our domestic markets and a shipment schedule skewed towards year-end at Burton Corblin. Nonetheless, the performance we anticipate in the second half should produce a fourth straight year of strong results."

Autoclave Engineers, Inc., headquartered in Erie with subsidiaries in Erie; Orange, Calif.; and Nogent, France, is a recognized leader in providing high quality engineered products for chemical research and related process markets throughout the world.

#90200p6303 07/19/1990 ~PR Newswire

SUNNYVALE, CA (JULY 19) PR NEWSWIRE - Mass Microsystems Inc. (NASDAQ: MMIC) today reported results for the second quarter ended June 30, 1990.

Revenue for the period was $5,543,000, up from $4,435,000 during the second quarter of 1989. Net income before income taxes was $204,000 versus $190,000, while net income for the quarter was $189,000 as compared to $190,000. Earnings per share were 4 cents versus 5 cents. The company operated as a S corporation until Oct. 1, 1989 and therefore, did not pay any income taxes prior to that date. Average weighted shares outstanding as of June 30, 1990 were 5,248,000 as compared to 3,654,000.

For the six month period, revenue totaled $10,736,000 versus $9,119,000. Net income was $351,000, or 7 cents per share versus $474,000 or 13 cents per share.

"As we reported in mid-June, competitive pressures on removable storage disk drives products caused some pricing and margin pressures in the market for our DataPak product line," stated Adel El-Shimi, president. "At the same time, the market for our multimedia videographics products remains strong and we continue to build market share. During the quarter, we announced the signing of a major agreement with Advanced Promotion

Technologies of Deerfield Beach, Fla. This joint venture company of Proctor & Gamble, Dun & Bradstreet, GTE, CheckRobot, PNC Corp. and Schlumberger is marketing a revolutionary electronic promotion delivery system for supermarkets. The Vision System uses ColorSpace III boards from Mass Microsystems and is just one of the many exciting examples of the applications being developed through the use of our product line of videographics products," he added.

Mass Microsystems is a multimedia driven, peripheral enhancement company operating worldwide. The company manufactures the award-winning ColorSpace line of videographic products and the DataPak line of 45 mb removable cartridge storage systems for the Apple Macintosh family of personal computers.

WARSAW (JULY 19) PR NEWSWIRE - Disney programming, including animated shows and familiar live-action features, will appear on Polish television in a weekly prime family time period beginning in September.

The shows will be carried for three years on Saturdays from 2:30 p.m. to 4 p.m. and on Sundays from 7 p.m. to 7:30 p.m. on Polish Television, the national network covering the entire country. Each of the programs will be dubbed into Polish.

The announcement was made by Lew Rywin, vice president of Polish Radio & Television, and Richard H. Frank, president of The Walt Disney Studio.

The animated Disney series "Chip 'n Dale's Rescue Rangers" and "Disney's Adventures of the Gummi Bears" will be offered in the 30- minute Sunday time period. The 90-minute Saturday time period will carry episodes of "DuckTales" and "The Disney Sunday Movie."

"Chip 'n Dale" and "DuckTales" have become the most successful animated children's programs in worldwide television. In these two series, established Disney characters likes Chip 'n Dale, Scrooge McDuck, Huey, Dewey and Louie Duck will be joined by newcomers to the Disney character family Monterey Jack, Zipper the Fly, and Launchpad McQuack. "The Gummi Bears" has been the top-rated show in its Saturday morning time period in the United States for the last five years.

The Disney characters and tradition are well known in Poland. Disney books were published here in the 1930's, and "Snow White" was released in Polish theaters in 1939. Since the 1960's, a limited number of Disney films have been shown in Poland, and Disney series and television movies have been seen on Polish Television throughout the 1980's.

The agreement marks the first time that a U.S. studio has placed a program block within a guaranteed time period on Polish Television. Disney provides the programming in exchange for the advertising time within the show, which will be sold to international advertisers and sponsors.

The Polish programs will be provided by Buena Vista International Television (BVI), a subsidiary of The Walt Disney Studios that distributes the company's products in some 100 countries worldwide. In addition, BVI oversees "Disney Club" programs that originate in the United Kingdom, France, Scandinavia, Holland and Australia. All told, some 14 million people watch these shows every week. Similar programs in Germany, Spain, Italy, Mexico and Venezuela will be introduced later this year.

ONTACT: Erwin Okun of The Walt Disney Co. (United States), 818-560-5400; or Etienne de Villiers of Buena Vista International (London), 011-44-71-734-8111.

#90200p6306 07/19/1990 ~PR Newswire

MOUNTAIN VIEW, CA (JULY 19) - California Biotechnology Inc. (NASDAQ: CBIO) today reported a net loss of $1.1 million (10 cents per share) for the company's second quarter, ended June 30, 1990, compared to a net loss of $2.5 million (22 cents per share) in the like quarter last year. For the first six months, the net loss was $2.9 million (24 cents per share) compared to a $4.4 million (38 cents per share) net loss for the first six months last year.

Revenues for the second quarter were $3.4 million, compared to $2.6 million last year. The increase is attributed to fees associated with the completion of a licensing agreement during the quarter. Costs and expenses of $5.3 million for the second quarter were unchanged from the same quarter last year. The current quarter's operating loss declined to

$1.9 million as compared to $2.5 million in the same quarter of last year primarily as a result of the increase in revenues.

Net loss for the second quarter declined by $1.4 million to $1.1 million as compared to the same quarter of 1989 as a result of increased revenues and elimination of equity losses of a foreign affiliate. The company's investment in affiliate was reduced to zero in 1989. At quarter-end, Cal Bio had more than $32 million in cash and marketable securities.

In the second quarter, the company announced that insulino-tropin, an insulin releasing hormone, was approved to enter clinical trials. Insulinotropin has been developed by Cal Bio's subsidiary, Meta Bio, in association with Pfizer Inc. during the past two years. The trials will be conducted by Pfizer. This is Cal Bio's fifth product to enter human clinical testing.

During the quarter, an agreement was concluded with E. Merck, Federal Republic of Germany, for development and marketing of Cal Bio's fibroblast growth factor (FGF), a potent wound healing factor. E. Merck has exclusive marketing rights for FGF in Europe and other territories outside of North America.

Rights to FGF in the North American territory have been retained by Cal Bio and the Far East territories were previously licensed to Kaken Pharmaceutical Co., Ltd.

California Biotechnology Inc. is a biopharmaceutical company engaged in the development of a number of novel human therapeutics on its own behalf and through collaborative arrangements with other pharmaceutical and biotechnology companies.

#90200p6308 07/19/1990 ~PR Newswire

CHICAGO (JULY 19) PR NEWSWIRE - Illinois Central Corporation and its wholly owned operating company, Illinois Central Railroad Company, today announced improved operating and net earnings for the second quarter ended June 30.

Operating income for the current quarter was $32.9 million, compared to $23.1 million in the same period a year ago, and net income was $11.1 million (47 cents per share) compared to $3.0 million (3 cents per share) in 1989. Revenues in the quarter of $137.6 million were 3.5 percent greater than last year's $132.9 million. An improved commodity mix, primarily an increase in long distance grain traffic, caused the increase in revenues.

Operating income for the six-month period ended June 30 was $72.7 million compared to $28.5 million in the same period a year ago, and net income was $24.9 million ($1.08 per share) compared to $2.7 million (2 cents per share) in 1989. These earnings were posted on revenues of $285.9 million, up slightly from last year's $281.4 million.

Earnings per common share are based on 18.9 million common shares outstanding and are calculated after giving effect to preferred dividend requirements of $2.3 million for the quarter and $4.5 million for the six months.

During the first half of 1990, the company repaid $65 million of the debt incurred when the Illinois Central Railroad was acquired by The Prospect Group, Inc. (NASDAQ: PROSZ). The repayments lowered interest expense in the second quarter to $18.5 million from last year's $19.8 million. Proceeds from the sale of non-operating properties and surplus rolling stock and cash from operations were used to make the debt repayments.

In January 1990, The Prospect Group distributed to its shareholders 11.1 million shares of Illinois Central Corporation common stock. This common stock is currently traded in tandem with Prospect's stock as a "stapled" unit on the NASDAQ National Market System. It is expected that Illinois Central Corporation's common stock will be unstapled and traded independently by mid-September. The balance of the company's outstanding shares is held by Shearson Lehman Hutton and management of the company.

Prior to the unstapling, the company's redeemable preferred stock and accrued dividends will be exchanged for shares of Illinois Central's common stock in a ratio to be determined by the board of directors of Prospect and of the company. Prospect will distribute the shares it receives in this exchange to its shareholders. The exchange of the preferred stock will result in the transfer of all voting rights to the common shareholders, as well as elimination of preferred stock dividend requirements.

#90200p6309 07/19/1990 ~PR Newswire

CALHOUN, GA (JULY 19) PR NEWSWIRE - Horizon Industries, Inc. (NASDAQ: HRZN), today announced results for the third quarter and first nine months of fiscal 1990.

Net sales for the third quarter ended June 30, 1990, rose 2.0 percent to $79,660,000 compared to $78,097,000 in the similar period last year. Net losses of $494,000, or 9 cents per share, in the current period compare to

net earnings of $1,614,000, or 34 cents per share, in last year's third quarter.

For the first nine months of fiscal 1990, net sales increased 2.7 percent to $228,880,000 from $222,835,000. Net losses for the first nine months of the current year were $2,403,000, or 44 cents per share. In the prior year's first nine months, earnings were $4,256,000, or 97 cents per share. Horizon's book value at June 30, 1990 was $9.97 per share.

Commenting on the results, Peter R. Spirer, chairman, stated, "While the third quarter loss underscores a continuation of difficult business conditions for the company, we are pleased by the considerable progress made in key areas. During this quarter, inventories were reduced substantially, distribution and administrative costs abated, and efficiency was improved in manufacturing. These operating improvements were offset by a large sample loss which management deemed necessary to enhance the product mix," Spirer continued.

"The net result of these swings was a lower loss than recorded in the previous two quarters," Spirer added. "We are witnessing an encouraging trend which should continue into and beyond the fourth quarter as recently introduced products generate momentum in the marketplace."

Horizon Industries, Inc, manufactures a broad range of residential carpets marketed through specialty retailers, department stores, design centers, and wholesale distributors. The company also manufactures specialized lines of commercial carpets for the corporate, hospitality and institutional markets through its subsidiary, The Harbinger Company, Inc.

#90200p6316 07/19/1990 ~PR Newswire

PHOENIX, AZ (JULY 19) PR NEWSWIRE - Phelps Dodge Corporation (NYSE: PD) today reported consolidated net income of $114.5 million ($3.30 per common

share) for the second quarter of 1990, and $225.8 million ($6.50 per common share) for the six months ended June 30, 1990. The company reported net income of $126.4 million ($3.50 per common share) and $292.3 million ($8.03 per common share) in the corresponding periods in 1989. Per share amounts reflect average shares outstanding on a fully diluted basis for the respective periods.

Sales were $682.8 million in the 1990 second quarter and $1,325.4 million in the first six months of 1990, compared with $694.5 million and $1,437.8 million in the corresponding 1989 periods. These decreases resulted principally from lower average realized copper prices. Phelps Dodge Mining Company reported sales of $370.6 million in the 1990 second quarter, and $708.1 million in the first six months of 1990; sales were $384.0 million and $807.5 million in the corresponding 1989 periods. Phelps Dodge Industries reported sales of $312.2 million and $617.3 million, respectively, in the second quarter and first six months of 1990, compared with sales of $310.5 million and $630.3 million in the corresponding 1989 periods.

During the 1990 second quarter, Phelps Dodge Mining Company recorded earnings from operations of $152.4 million, compared with $153.7 million in the second quarter of 1989, as increased volumes offset moderately lower average realized copper prices. For the six-month period ended June 30, 1990, Phelps Dodge Mining Company contributed earnings from operations of $292.9 million, compared with $374.0 million in the 1989 six-month period. The New York Commodity Exchange spot price per pound of copper cathode averaged $1.19 in the second quarter and $1.15 in the first six months of 1990, compared with $1.23 and $1.33 in the corresponding 1989 periods.

Phelps Dodge Industries recorded earnings from operations of $38.4 million in the 1990 second quarter and $75.9 million in the first six months of 1990, compared with $48.7 million and $91.8 million in the corresponding 1989 periods. The lower 1990 earnings for the second quarter and first six months were primarily a result of lower sales and reduced margins in the wheel and rim and domestic magnet wire businesses. This was moderated by continued good product demand for the group's foreign operations and the inclusion of the results of Hudson International Conductors, acquired in November 1989.

Phelps Dodge is the world's second largest producer of copper. The company is also the world's second largest producer of carbon blacks, the leading North American fabricator of wheels and rims for medium and heavy trucks, a major manufacturer of magnet wire and specialty conductors, and has operations and investments overseas in mines and wire and cable manufacturing facilities. The company's operations are located throughout the United States and in twenty-two other countries.

#90200p6318 07/19/1990 ~PR Newswire

HUNTINGTON, WV (JULY 19) PR NEWSWIRE - Ashland Coal Inc. (NYSE: ACI) reported today that it had net income of $7.8 million, or $.48 a share on a primary basis, for the second quarter ended June 30, 1990.

This compares to net income of $4.8 million, or $.29 a share, for the same quarter last year. Revenues for the second quarter were $112.0 million, as compared to $80.2 million in the second quarter of 1989.

For the six months ended June 30, 1990, Ashland Coal had net income of $14.7 million or $.90 a share. For the same period last year, the company had net income of $11.1 million or $.67 a share. Revenues were $202.2 million in the first half of 1990 compared to $156.8 million a year ago.

"Mingo Logan Coal Co. made a meaningful contribution to the quarter's operating income, and the company's other operations achieved a substantial increase in operating income," said William C. Payne, president and chief executive officer. "These other operations benefited from increased prices and increased levels of production," Payne continued. "In addition, the second quarter of 1989 was adversely impacted by the UMWA work stoppage in West Virginia."

"We are pleased with the progress being made at Mingo Logan which has resulted in a small contribution to earnings after interest charges in this quarter," Payne said. "However, as Mingo Logan carries out its capital expenditure program, it is still expected that there will be some dilution of earnings in the future."

Ashland Coal's effective tax rate for the first six months of 1990 is somewhat higher than the first quarter level due to the company's improved profitability and greater state income taxes; however, it remains below that of the comparable six month period of 1989. The second quarter of 1989 had an unusually low effective rate due to the recognition of an income tax refund in that period.

"As for the rest of 1990, I remain optimistic that it will be a good year " Payne stated.

Ashland Coal Inc. is engaged in the mining, processing and sale of low-sulfur steam coal principally to electric utilities in the United States and into the export markets.

Mingo Logan Coal Co. is an independent operating subsidiary of Ashland Coal Inc.

CONTACT: David Todd of Ashland Coal, 304-526-3333.

#90200p6321 07/19/1990 ~PR Newswire

RICHMOND, VA. (JULY 19) PR NEWSWIRE - Owens & Minor, Inc. (NYSE: OMI) announced today its second quarter and six month results. For the second quarter ended June 30, 1990, sales were $300.7 million, up 37.5 percent from $218.7 million during the second quarter of 1989. The second quarter sales increase includes two months of sales from the National Healthcare acquisition that was not present in the second quarter of last year. The earnings for the three month period were $2.0 million or $.23 per share as compared to negligible earnings for the second quarter of 1989. The second quarter of 1989 results included a $1.4 million pretax, or a $.09 per share loss from the devaluation of foreign imported surgeons' and examination gloves.

Sales for the six months ended June 30, 1990 were a record $593.3 million, an increase of 43.1 percent from the $414.5 million level for the same period in 1989. The six month sales increase includes five months of sales from the National Healthcare acquisition that was not present in the same period last year. Earnings for the six month period were $3.5 million as compared to $.9 million for the same period in 1989, an increase of 289.7 percent. Net income per share for the six month period was $.41 as compared to $.11 for the same six months in 1989, an increase of 272.7 percent. The 1989 six month results included a $2.5 million pretax, or a $.17 per share loss from the devaluation of foreign gloves of which $1.1 million pretax or $.08 per share was previously recorded in the first quarter.

According to G. Gilmer Minor, III, President and CEO: "I am very pleased that during the second quarter we continued to show steady improvement in our operating performance. My basis for optimism is on the month-to-month and quarter-to-quarter improvements we have shown since the beginning of 1990. Although we still have some trouble spots, we are diligently working to accomplish our critical objectives for the year with regard to improved gross margin and asset management. I am encouraged that our positive momentum will carry into the second half of 1990."

Owens & Minor, Inc. is a wholesale distributor of medical and surgical supplies, pharmaceuticals and other related products. Through its Vangard Labs and Harbor Medical subsidiaries, the Company also packages generic and brand name pharmaceuticals and assembles sterile procedure trays, respectively. Owens & Minor, Inc. is traded on the new York Stock Exchange under the symbol OMI.

#90200p6322 07/19/1990 ~PR Newswire

WILMINGTON, DE (JULY 19) PR NEWSWIRE - Matlack Systems Inc. (AMEX: MLK) today reported the results for its third fiscal quarter and the nine months ended June 30, 1990.

The company's operations in its third fiscal quarter were profitable despite continued sluggish conditions in the bulk trucking industry. The company believes that the industry will continue to be soft for the near term and that its future results may be reflective accordingly. Revenues of $56,655,000 in the quarter were essentially unchanged from last year, however, earnings before income taxes increased to $862,000 compared with $237,000 last year. Net earnings were $505,000 or 9 cents per share compared with $130,000 or 3 cents per share last year.

The cost reduction program, which was implemented earlier in the fiscal year, was in place for the entire quarter and it enabled the company to record improved results for this period.

Revenues for the nine months ended June 30,1990 were $164,449,000 compared with $167,472,000 for the same period last year. A net loss of $597,000 or 11 cents per share was realized for the year to date compared with a profit of $47,000 or 1 cent per share a year earlier.

The cash flow from operations and lower capital spending enabled the company to reduce its indebtedness by approximately $3,900,000 since the end of the previous quarter.

Matlack Systems Inc.'s major operation consists of Matlack, Inc., one of the largest carriers of bulk commodities by truck in North America. Matlack operates approximately 1,400 tractors and 2,900 trailers out of 85 terminals located in 35 states and three terminals in Canada.

#90200p6323 07/19/1990 ~PR Newswire

FREEPORT, IL (JULY 19) PR NEWSWIRE - Newell Co. (NYSE: NWL) today reported that earnings reached record highs for the second quarter and six months ended June 30, 1990.

For the second quarter, net income increased 28.4 percent to $22 million from $17.1 million last year and fully diluted earnings per share were 36

cents, up 28.6 percent over the 28 cents achieved in the second quarter of 1989. For the first half of 1990, net income increased 48.1 percent to $46.1 million from $31.2 million last year and fully diluted earnings per share were 76 cents, up 49.0 percent from 51 cents in the comparable 1989 period.

For the second quarter, net sales were $262.0 million, down 5 percent from $275.7 million in 1989. For the first half net sales were $519.9 million, down 5.1 percent from $547.6 million in the comparable 1989 period. Sales were lower in 1990 because of the divestitures of the Wm. E. Wright and Carr-Lowrey businesses in late 1989. Excluding the divested businesses, total sales were up 1.3 percent in the first half; consumer domestic sales were up 4.2 percent.

The record levels of net income and fully diluted earnings per share were due to operating margin improvements in several of Newell's businesses, a substantial reduction in interest expense, and a lower effective tax rate. Also, the six-month results reflect a nonrecurring gain from the sale of securities which was recorded in the first quarter. This first quarter gain was partially offset by the write-down of certain intangible and other noncurrent assets. Taken together, these gains and charges increased fully diluted earnings per share by 9 cents for the six months ended June 30, 1990. Excluding these gains and charges, fully diluted earnings per share were 67 cents for the first half, up 31.4 percent.

Newell manufactures and markets high-volume hardware/housewares and industrial products. Hardware/housewares products are sold principally through discount, variety, chain and hardware stores, hardware and housewares distributors, and home improvement centers. Industrial products are sold directly and through distributors to volume purchasers.

#90200p6329 07/19/1990 ~PR Newswire

GLENDALE, CALIF. (JULY 19) PR NEWSWIRE - Citadel Holding Corp. (AMEX: CDL) today announced net earnings of $6.8 million, or $2.06 per share, for the second quarter ended June 30, 1990, compared with $3.8 million, or $1.14 per share, for the second quarter of 1989. For the six months ended June 30, 1990, net earnings were $14.1 million, or $4.27 per share, compared with $6.8 million, or $2.06 per share, for 1989. The 1989 second quarter and year-to-date periods included an insurance recovery which, net of tax, produced earnings of $1.4 million.

In announcing earnings, William C. Walbrecher, president and chief executive officer, said: "Our strong earnings performance in the first half of 1990 is right on target with our 1990 full year forecast and is

the result of all our people putting forth a team effort to achieve the long-term strategic objectives of the company. The quality of our earnings continues to improve as we concentrate our efforts on core business operations. As we continue to focus our time and resources on our strategic goals the positive trend of our core earnings should improve." Core earnings exclude gains from loan and securities sales as well as other fee income and represent the company's ability to generate ongoing earnings from operations.

Net interest income totaled $57.7 million for the first six months of 1990 versus $35.5 million in the first half of 1989. The primary item improving the company's net interest income was the recovery of the net interest margin which increased to 2.32 percent at June 30, 1990, from 1.07 percent at June 30, 1989. The 5 percent increase in interest-earning assets and the related net interest margin also provided additional growth in the company's net interest income.

The company's nonperforming asset ratio increased to .69 percent at June 30, 1990, from .47 percent at Dec. 31, 1989, primarily due to the delinquency of one commercial real estate property. A thorough review of the underlying values of all the company's nonperforming assets has been completed and no significant losses are anticipated. The company provided $4.5 million in loan loss provisions for the first half of 1990 compared to $1.5 million for the first half of 1989. This has increased the general loss reserves from $7.6 million at Dec. 31, 1989 to $10.6 million at June 30, 1990, and is part of the company's strategic objective of increasing the general loss reserves.

#90200p6331 07/19/1990 ~PR Newswire

LOS ANGELES (JULY 19) PR NEWSWIRE - Western Waste Industries (NASDAQ: WWIN) today announced that the company has successfully reached an agreement in principle to acquire an existing permitted solid/industrial, non-hazardous waste disposal facility in Baton Rouge, La. The 200-acre facility also incorporates a permitted 100- acre land application and deep well disposal operation for the non- hazardous oil field waste.

"This disposal facility is consistent with our strategy for both adding landfill capacity and expansion within existing markets," stated Kosti Shirvanian, Western Waste president and chief executive officer. "This facility provides additional opportunities for increasing our customer base in the Baton Rouge and surrounding area."

The permitted landfill, which has not received any waste as yet, will be

constructed by Western Waste and is scheduled to begin operations by early 1991. The landfill is scheduled to initially receive 700 tons per day of municipal solid waste and industrial non- hazardous waste, and is expected to have a life span of approximately 20 years. The landfill is anticipated to generate in excess of $150 million in revenue. Western Waste plans to update the existing permit to reflect the requirements of anticipated new regulations.

Western Waste also owns and operates landfills in California, Texas, Arkansas, Florida and Arizona.

Headquartered in Los Angeles, Western Waste is one of the largest publicly held integrated waste management companies and services residential, commercial and industrial customers in California, Texas, Arkansas, Louisiana, Florida, Colorado and Arizona. The company expects to record revenue of approximately $170 million in fiscal 1990.

NORWOOD, MA (JULY 19) PR NEWSWIRE - Microcom, Inc. (NASDAQ: MNPI) today reported financial results for the company's first quarter of fiscal year 1991.

For the three months ended June 30, 1990, revenues were $10,554,000 as compared to $17,012,000 for the first quarter of last year. Operating loss for the period was $5,985,000 vs. operating income of $3,491,000 in the comparable period one year ago. Net loss was $4,308,000 (46 cents per share) for the period, compared to net income of $2,530,000 (29 cents per share) for the first quarter of last year.

"Overstocking by key domestic distributors of Microcom products led to first quarter results that were considerably lower than we anticipated," stated James M. Dow, president and CEO.

"We have taken steps to correct these circumstances with additional marketing programs and increased operational controls to insure that our resellers do not become overstocked in the future.

In addition, we have seen evidence that distributors and resellers are reducing inventories - indicating that their purchases should increase in the second quarter. Finally, we are also launching the most ambitious new product introduction plan in the company's history."

Microcom, Inc., is a workstation connectivity company headquartered in Norwood, Mass., with offices in Danbury, Conn.; Wilmington, Del.; Durham, N.C.; Caguas, Puerto Rico, and international offices in France, Hong Kong, and the U.K. Principal product lines include Protocol Modems(tm); LAN bridging products; Carbon Copy(tm), RELAY Gold(R) and Virex(R) communications software packages, and ISDN products.

NOTE: The following are trademarks of Microcom Systems, Inc.: Protocol Modems and Carbon Copy Plus. RELAY Gold and Virex are registered trademarks of Microcom Systems, Inc.

#90200p6338 07/19/1990 ~PR Newswire

NEWTOWN SQUARE, PA (JULY 19) PR NEWSWIRE - ARCO Chemical Co. (NYSE: RCM) today reported second quarter 1990 earnings per share of $1.06 on $102 million of net income as compared to $1.25 per share on $120 million of net income in the same quarter last year.

Year-to-date earnings per share were $2.37 compared to $2.46 for the six months ended June 30, 1989. Second quarter 1990 revenues were $705 million vs. $726 million in the second quarter 1989. Year-to-date revenues for the first half 1990 and 1989, respectively, were $1,390 million and $1,425 million.

Harold A. Sorgenti, president and chief executive officer, said: "Gross profit in the second quarter was slightly lower than last year. Margin gains in propylene oxide and derivatives, and volume gains in methyl tertiary butyl ether nearly offset lower styrene volumes and margins, and higher plant costs."

Gross profit was $227 million in the second quarter 1990 compared to $233 million last year. Propylene oxide margins benefitted from lower propylene feedstock costs. Methyl tertiary butyl ether demand reflects increased acceptance of the product in reformulated gasolines to lower vehicle emissions and increased demand as an octane enhancer. Lower styrene margins in the second quarter 1990 reflect a more balanced supply/demand picture than that which existed in the same period in 1989. Lower styrene volumes reflect second quarter 1990 scheduled maintenance activities and operating problems.

Interest expense was up $7 million to $13 million in the second quarter 1990 as a result of higher long-term debt outstanding in 1990. The company currently expects its 1990 effective tax rate to be 36.2 percent.

DEARBORN, MI (JULY 19) PR NEWSWIRE - The following statement may be attributed to John P. King, Parts and Service Engineering Office manager, Ford Parts and Service Division:

Ford Motor Company (NYSE: F) is notifying owners of a voluntary safety recall of approximately 110,000 1989-90 model E- and F-Series 4x2 vehicles to inspect and, if necessary, replace a snap ring in the transmission.

In some cases where the snap ring has broken, it may not be possible to engage the "Park" mechanism even though the transmission shift control lever is in the "Park" position. If the parking brake is not engaged, vehicles experiencing this condition may roll when parked on an inclined surface. All other transmission functions will remain normal.

Dealers will inspect the transmission for build date and, if necessary, replace the snap ring with an improved part. Permanent revisions to the transmission have been made, eliminating the possibility of this problem occurring in the future.

As a matter of good driving practice, drivers should follow the precautions recommended in the Owner's Guide to apply the parking brake in

addition to placing the gear selector in "Park" when exiting the vehicle.

Owners will be notified by mail and asked to return the vehicles to their dealers to have the work performed at no cost. Of the vehicles affected, 103,457 are located in the United States, 6,163 are in Canada and 297 are in export locations.

CONTACT: Jim Trainor of Ford, 313-594-2880.

MASON, MI (JULY 19) PR NEWSWIRE - Consumers Power Company President and Chief Operating Officer Fred W. Buckman today saluted Sunseeker, a solar car created by Western Michigan University (WMU) and Jordan College students with help from a $10,000 contribution from the utility.

Sunseeker left the Ingham County Fairgrounds today in Mason, the next-to-final stop in the 1,600-mile GM Sunrayce from Orlando, Fla., to Michigan.

"We applaud the dedication, ingenuity and fortitude of the students and faculty involved in making this dream come true," said Dr. Buckman, a Massachusetts Institute of Technology doctoral recipient. "Under arduous weather conditions and demanding terrain, the combined WMU/Jordan College team has made an excellent showing in this competition," Buckman said.

"Supporting this emerging technology expands Consumers Power's ongoing interest in research and development of alternate energy uses," said Buckman.

At various sites through November 1990, Sunseeker will be displayed with Consumers Power's Energy Conservation Van. The van is used to promote energy efficiency applications, primarily for residential electric customers.

Consumers Power Company, the principal subsidiary of CMS Energy Corporation (NYSE: CMS), is Michigan's largest utility serving almost 6 million of the state's 9 million residents in 67 of the 68 Lower Peninsula counties.

#90200p6347 07/19/1990 ~PR Newswire
NEW YORK (JULY 19) PR NEWSWIRE - Primerica Corporation (NYSE: PA) today announced that earnings per share rose 29 percent to $.84 for the quarter ended June 30, 1990, vs. $.65 per share for the 1989 period. Net income was $96.9 million, vs. $63.4 million for the 1989 second quarter. Revenues were $1.554 billion compared with $1.402 billion for the comparable quarter last year.

Results for the 1990 second quarter include after-tax gains totaling $12.3 million - $9.7 million from the sale of 6.3 million common shares of the company's Fingerhut subsidiary in a May 1990 initial public offering, and $2.6 million from the sale of a portion of the company's investment in Transatlantic Holdings, Inc., a reinsurer which completed an initial public

offering during the quarter.

These gains were largely offset by net losses totaling $11.1 million in the company's investment portfolios, and are reflected in business segment results for the quarter.

For the first six months of 1990, net income was $180.1 million, or $1.56 per share, vs. $114.8 million, or $1.18 per share, for the 1989 period. Revenues were $2.997 billion, vs. $2.640 billion for the first half of the prior year. Earnings per share are based on 117.9 million and 117.4 million average common and equivalent shares in the 1990 second quarter and six months, vs. 99.2 million shares in the 1989 periods.

Sanford I. Weill, Primerica's chairman and chief executive officer, said, "We are very pleased with the continuing demonstration of growth in our business segments in the quarter, and particularly with the strong progress recorded by Consumer Finance and Smith Barney, as well as the completion of the Fingerhut public offering in May."

Consumer Finance earnings rose 29 percent to $38.6 million in the 1990 second quarter, before investment portfolio losses of $3.3 million, on revenues of $235.2 million. This compares with earnings and revenues of $30.0 million and $171.8 million, respectively, for the 1989 quarter.

These strong results are primarily attributable to continued growth in Consumer Finance receivables quarter-to-quarter, contributions from the BarclaysAmerican/Financial operations which were acquired on March 1, 1990 and integrated into Commercial Credit's branch network, as well as tight control of operating expenses.

Primerica's Insurance Services segment's earnings were $65.7 million for the second quarter, before net investment portfolio losses of $3.3 million on revenues of $598.6 million, vs. net earnings of $57.1 million on revenues of $522.5 million for the prior year period.

CONTACT: Mary McDermott, (212) 891-8870, or Ken Koprowski, (212) 891-8871, both of Primerica.

LOS ANGELES, CA (JULY 19) PR NEWSWIRE - MedGroup, Inc. (NASDAQ: MDGP), operator and manager of Workers' Compensation (I.P.A.) and physical occupational therapy facilities, today reported record results for the fiscal year ended March 31, 1990.

The company had net income of $250,952 or four cents per share on net fee revenues of $5,811,252 for fiscal 1990 versus net income of $34,724 or one

cent per share on net fee revenues of $4,494,435 for the prior year.

"The strong operating results were generated by rising caseloads in our clinics and very positive responses from physicians and patients in the hospitals and nursing homes we serve," F. Briton McConkie, chief executive officer, said.

"Our initial public offering in April 1990 provided the company with approximately $2.3 million, more than half of which is being dedicated to the development and acquisition of additional facilities and state-of-the-art equipment," he noted.

Last month, the company entered the Northern California market by acquiring the assets and business of an industrial medical clinic in San Carlos.

"Our financial strength and record of performance contribute to optimism that further gains will be achieved in fiscal 1991," McConkie concluded.

In addition to the newly-acquired San Carlos facility, MedGroup operates five physical therapy centers in the Los Angeles area and two in Milwaukee WI, and manages physical therapy facilities in three acute care hospitals one medical clinic and one free-standing clinic owned by an acute care hospital. In addition, MedGroup provides physical therapy to patients in approximately 70 nursing homes.

MEDGROUP, INC.

DALLAS (JULY 18) PR NEWSWIRE - American Petrofina Inc. (AMEX: APIA) today reported record quarterly net earnings of $53.8 million in the second quarter ended June 30, 1990, a 28.6 percent increase compared with the second quarter of 1989.

Net earnings for the first six months of 1990 were $80 million, an 11.7

percent decrease compared with 1989's first half due to a nonrecurring profit of $23 million last year from the adjustment to deferred taxes associated with the Financial Accounting Standard Board's Statement 96. Before tax profits for the first six months of 1990 increased 18.3 percent compared with the same period last year.

Sales and other operating revenues for the second quarter of 1990 were $832.6 million, essentially flat with the corresponding period last year.

Sales and other operating revenues for the first six months of 1990 were $1.7 billion, a 10.4 percent increase compared with last year's first half due largely to higher crude oil and natural gas prices in this year's first quarter. Ron W. Haddock, FINA's president and chief executive officer, said, "The year 1990 continues to be a good one for the company.

"Upstream results in the second quarter were down compared with the same quarter last year due to lower crude oil and natural gas prices and higher exploration costs.

"On the other hand, lower crude oil prices, only partially offset by lower product prices, contributed to higher refining margins, which, when coupled with modest throughput gains, substantially increased Downstream results.

"In Chemicals, second quarter results were essentially flat with the same period last year, but our styrene business line showed a significant gain from this year's first quarter due to higher production volumes and improved margins.

American Petrofina Inc. (AMEX: APIA), through its main operating subsidiary, Fina Oil and Chemical Co., engages in crude oil and natural gas exploration, production, and marketing; petroleum products refining, transportation, and marketing; and chemicals manufacturing and marketing. Organized in 1956, it is part of an international group of companies affiliated with Petrofina S.A., which is headquartered in Brussels, Belgium.

#90200p6350 07/19/1990 ~PR Newswire

DALLAS (JULY 19) PR NEWSWIRE - Grace Energy Corporation (NYSE: GEG) today reported that, despite higher operating profits due to improved performances by its energy services businesses, second quarter 1990 net income of $2.1 million, or 9 cents per share, was 67 percent lower than second quarter 1989 pro forma net income of $6.5 million, or 26 cents per share. Sales and revenues for the 1990 quarter were $112.8 million, up

27 percent from sales and revenues of $88.5 million for the 1989 period.

The improved operating results for the company's energy services businesses were offset by the absence of certain adjustments that favorably affected 1989 second quarter results and two factors that adversely impacted the second quarter of 1990. The 1989 results included workers' compensation insurance credits and a $1.0 million favorable tax adjustment. The 1990 results reflected the previously reported inability to allocate a portion of the losses of the company's Grace Drilling Company subsidiary to the former minority interest and the bankruptcy of a long-term contract customer of Colowyo Coal Company in which Grace Energy has a 50 percent interest.

Second quarter 1990 operating profit (before depreciation, interest and taxes) from energy services was $8.4 million, significantly higher than the $4.9 million operating profit for the 1989 second quarter, an increase of 71 percent. The latter included $1.8 million of favorable workers' compensation insurance adjustments and $0.6 million of well blowout insurance proceeds paid to Grace Drilling. Excluding these items, 1989 second quarter operating profit from energy services would have been $2.5 million, resulting in a $5.9 million or 236 percent favorable variance in 1990 versus 1989.

Homco International, Inc., Grace Offshore Company and Grace Drilling experienced improved operating results over the 1989 second quarter. Volume growth and margin improvements, reflecting a 21 percent higher level of active onshore and offshore drilling rigs and a 26 percent increase in the number of active workover rigs, fueled the growth in energy services operating profits.

Results from oil and gas operations were flat with last year's quarter, primarily reflecting higher production offset by lower selling prices.

Grace Energy Corporation, headquartered in Dallas, is a diversified energy holding company whose subsidiaries are engaged in supplying services and equipment to the petroleum industry; in the exploration for and development of natural gas; and in coal mining.

#90200p6352 07/19/1990 ~PR Newswire

SACRAMENTO, CA (JULY 19) PR NEWSWIRE - American Confectionery (NASDAQ: CNDY) announced today that it had appointed Arnold Gendel, 49, to the position of sales consultant. Gendel will take charge of the company's sales drive targeted towards major retailers, particularly supermarkets and mass merchandisers.

With more than 25 years in the confections industry, Gendel most recently served as executive vice president of the candy division of MEI, a $200 million California-based confectioner.

During his tenure at MEI, from 1980 to 1988, Gendel is credited with expanding sales of the company's candy lines to major supermarket chains including Safeway, Waldbaum's, and A&P, and to mass merchandisers such as Sears Roebuck and Price Company.

Gendel began his career in the candy business when he was in his early twenties, assuming a sales representative position with his family-owned business, Los Angeles Nut House.

In 1970, he was appointed vice president of the company's confectionery division, California Peanut Company, and, in 1980, when MEI purchased that concern, Gendel stayed on in the same capacity with the parent company.

In 1987, Gendel left the formal employ of MEI, but remained on as a consultant for more than another year. During Gendel's 17-year stewardship of California Peanut, from 1970 to 1987, the division's sales grew from $4 million to over $50 million.

Commenting on the appointment, American Confectionery President Steve Kircher said that Gendel would prove "an invaluable asset" in his company's drive to pick up additional supermarket and mass merchandiser business.

"There are very few individuals in this industry I'd rather have become associated with our company than Arnold," said Kircher. "I have every confidence that he will be instrumental in helping us to dramatically expand our market share in the months and years to come."

American Confectionery, which had $32 million in gross revenues in fiscal 1989, is a manufacturer and distributor of gourmet treats, including nuts, candies, chocolates, and frozen yogurt. The company's executive offices are located in Sacramento, Calif.

ARUBA, DUTCH CARIBBEAN (JULY 19) PR NEWSWIRE - Divi Hotels N.V. (AMEX: DVH) announced today that the company does not plan to make the payment of

interest, which was due July 15 on its $50,000,000 12-3/4 percent subordinated notes.

Management had announced on April 27, 1990, that the company had begun a bond exchange with the holders of its two issues of debt securities. The exchange offer has been extended until midnight, Eastern Daylight Time on Aug. 14, 1990.

On July 16, the company announced on-going negotiations for the sale of its hotel properties to Accor S.A. At the same time, the company also announced its intention to submit a revised exchange offer to the holders of its two debt securities which will include cash, new debt securities and common stock representing at least a majority interest in the continuing interval ownership company.

#90200p6355 07/19/1990 ~PR Newswire

NEW YORK (JULY 19) PR NEWSWIRE - Chris-Craft Industries Inc. (NYSE: CCN) reported record second quarter net income of $20,730,000, or $.80 per share, compared to net income in last year's corresponding period of $3,467,000, or $.13 per share.

The substantial increase in net income primarily reflects income earned on cash and marketable securities held by Chris-Craft's television broadcasting subsidiary, BHC Communications Inc., as well as an increase in television station earnings.

Herbert J. Siegel, Chris-Craft chairman and president, stated: "While the demand for television advertising varied significantly among our markets, overall revenue growth was surprisingly strong in the second quarter.

The 14 percent increase in television division operating revenues more than offset a nine percent increase in programming costs, and produced a 46 percent increase in the division's second quarter operating income."

Interest and other income increased to $40,640,000 from $1,739,000 in last year's second quarter, primarily reflecting interest earned on BHC cash and dividends recorded on Time Warner Inc. convertible preferred stock held by BHC.

BHC's cash balances were substantially augmented in August 1989 upon the sale of 63 percent of its major interest in Warner Communications Inc. In January 1990, BHC exchanged its remaining WCI shares, primarily for TWI convertible preferred stock, pursuant to the merger of those two companies.

Second quarter interest expense declined to $643,000 from last year's $3,250,000 reflecting the 1989 payment of most long-term debt.

Net income for the first six months of 1990 totaled $255,999,000, or $9.93 per share, compared to net income of $4,722,000, or $.17 per share, in last year's corresponding period.

Approximately $220 million of 1990 net income reflects Chris-Craft's first quarter gain, after income taxes and minority interest, on the exchange of BHC's remaining interest in WCI. Excluding the WCI gain, six month net income totaled $36,029,000, or $1.39 per share.

Operating income increased to $7,550,000 from last year's $5,168,000, primarily reflecting an 18 percent increase in television division operating income. Interest and other income increased to $78,951,000 from last year's $3,505,000, reflecting increased interest and dividend income, and decreased interest expense, resulting from the disposition of WCI shares.

#90200p6356 07/19/1990 ~PR Newswire

UNIVERSAL CITY, CALIF. (JULY 19) PR NEWSWIRE - Lew R. Wasserman, chairman of the board of MCA Inc. (NYSE: MCA), today announced that for both the three and six months ended June 30, 1990, the company reported record second quarter and first half revenues and higher net income than the comparable periods of 1989.

Revenues for the second quarter of 1990 were $949,942,000 compared to $828,256,000 for 1989. Operating income was $91,968,000 compared to $97,563,000, income from continuing operations was $44,781,000 compared to $44,172,000 and net income was $44,781,000 or $.54 per share compared to $41,972,000, or $.58 per share for 1989. Operating income decreased 6 percent, income from continuing operations increased 1 percent and net income increased 7 percent for 1990. The weighted average number of common and common equivalent shares used in the determination of earnings per share for the three months ended June 30, 1990 and 1989 was 83,245,493 and 73,142,872, respectively. The 1990 calculations of earnings per share include the equivalent common shares for the company's Series B convertible preferred shares issued during the second quarter of 1990 in connection with the acquisition of The David Geffen Company.

Revenues for the first half of 1990 were $1,862,888,000 compared to $1,531,602,000 for 1989. Operating income was $163,079,000 compared to $163,125,000, income from continuing operations was $76,359,000, compared

to $70,459,000 and net income was $76,359,000 or $.96 per share compared to $69,313,000 or $.95 per share for 1989. Operating income was comparable to the prior year, while income from continuing operations increased 8 percent and net income increased 10 percent for 1990. The weighted averaged number of common and common equivalent shares used in the determination of earnings per share for the six months ended June 30, 1990 and 1989 was 79,243,797 and 73,141,969, respectively.

BLUE BELL, PA (JULY 19) PR NEWSWIRE - U.S. Healthcare (NASDAQ: USHC), a leading operator of health maintenance organizations (HMOs), has announced a companywide community relations program, according to Leonard Abramson, the company's founder and president.

The Blue Bell-based insurer has a long history of charitable giving and decided to expand its support by directly working with non-profit organizations in the areas where its offices are located.

Marcy Abramson, vice president of operations, said she is supportive of the effort and recognizes the importance of making meaningful contributions to groups that need help the most.

"Our company philosophy has always been to provide a healthy environment for all of our employees, and we decided we would like to do the same for the communities that have been so supportive of us," she said.

"Too often, companies isolate themselves and become strictly consumed by profits. While we're in business to grow and be profitable, a primary goal is also to help our members and their families live better and more productive lives. As part of this effort, we feel it is our obligation to give something back to the communities in which they reside and also play a role in solving some of the problems that are having an impact on all Americans today."

U.S. Healthcare will be providing support to the following non-profit organizations for 1990: Big Brothers/Big Sisters of Philadelphia; The Pennsylvania School for the Deaf; The American Heart Association; The Freedom Festival; The Three Rivers Regatta (Pittsburgh); The Philadelphia Area Council for Excellence (PACE); New York March of Dimes (Walk-America '90); the Long Island Marathon; The Crain's Corporate Sports Battle; Healthcare Healthcheck 1990 and The American Quality Foundation.

According to Marcy Abramson, this program is one of many that will be introduced in early fall, when the company's $10 million new building will

be officially opened.

"Our new building symbolizes a new era of quality and service and this community effort is part of our overall strategy of helping our members and our employees get the most from their relationship with the U.S. Healthcare family."

U.S. Healthcare is one of the nation's leading operators of state licensed and federally qualified HMOs. Founded in 1976, the organization has more than one million members in the Mid-Atlantic, greater New York, and New England marketplaces.

#90200p6360 07/19/1990 ~PR Newswire

ATLANTA (JULY 19) PR NEWSWIRE - Samna Corporation (NASDAQ: SMNA), a leading developer of graphical interface word processing software for use with Microsoft Corporation's Windows 3.0, today announced the results for the second quarter of 1990. Net revenues of $3,269,000 represented an increase of 31 percent from 1989 net revenues of $2,501,000. The revenue increase is attributable to technology license fees and royalties received during the second quarter of 1990. A net loss for the quarter of $98,000 compares to a net loss of $651,000 for the second quarter of 1989. The net loss per share was $.04 for the second quarter of 1990 as compared to a net loss per share of $.25 for the second quarter of 1989. The results of the 1990 quarter were not affected by an income tax benefit, while the net loss for the 1989 quarter was reduced by $269,000 or $.10 per share due to a net operating loss carryback.

For the six months ended June 30, 1990, the company reported net revenues of $6,231,000 up 15 percent from the $5,437,000 for the six months ended June 30, 1989. The net loss for the six months ended June 30, 1990 of $1,366,000 compares to a net loss of $1,292,000 for the comparable period of 1989. The net loss per share was $.53 for the six months ended June 30 1990 as compared to a net loss per share of $.50 for the comparable 1989 period. The company had a net operating loss carryback tax benefit of $613,000 for the six months ended June 30, 1989.

Management anticipates that the company's revenues for the remainder of 1990 will be substantially dependent on sales of Ami Professional and that such sales will in turn be affected by the availability and success of Microsoft Windows.

NORCROSS, GA (JULY 19) PR NEWSWIRE - Stockholder Systems Inc. (NASDAQ: SSIAA) and NYNEX Information Solutions Group announced today the execution of a definitive agreement for the acquisition by NYNEX (NYSE: NYN) of SSI in a tax-free transaction.

SSI would become a part of AGS Computers Inc., a unit of NYNEX Information Solutions Group.

SSI shareholders would receive NYNEX common stock having a value of between $15 and $16 per share of SSI common stock. The exact amount SSI's shareholders would receive would be based on the average price of NYNEX's common stock shortly before the closing of the transaction. Completion of the transaction is subject to significant conditions such as the availability of pooling of interest accounting and SSI shareholder approval. There can be no assurance that these conditions will be satisfied.

The two companies had announced the signing of a letter of intent on Apr. 26.

NYNEX is a leading provider of sophisticated information systems, software and telecommunications services to a diverse base of customers worldwide. NYNEX Corp. is headquartered in New York.

Founded in 1971, SSI designs, markets and supports a line of financial application software for IBM and IBM-compatible computers. SSI has over 1,200 customers who use SSI's software for check processing, securityholder recordkeeping, electronic funds transfer, cash management, lease accounting, loan origination, safe box accounting, loan recovery,

loan servicing and secondary marketing.

NEW YORK (JULY 19) PR NEWSWIRE - Schlumberger Limited (NYSE: SLB) reported second quarter net income of $145 million compared to $127 million earned in the same quarter of the previous year. Excluding $35 million of extraordinary and unusual gains from prior year results, 1990 second quarter net income increased 56 percent. Earnings per share were $0.61 versus $0.53 in the previous year and also grew 56 percent compared to the $0.39 per share excluding $0.14 of extraordinary and unusual items in 1989. Operating revenue in the second quarter was $1.29 billion compared with $1.20 billion in the prior year. When businesses acquired and sold in the interim are excluded, consolidated revenue was 17 percent higher.

For the first six months of 1990, net income was $273 million, $1.15 per share, compared to $175 million, $0.74 per share, reported in the previous year excluding the extraordinary and unusual items, an increase of 56 percent.

FINANCIAL SUMMARY

Six months ended June 30	1990	1989
Operating revenue	$ 2,513,826,000	$2,378,618,000

NEW YORK (JULY 19) PR NEWSWIRE - Apple Bancorp, Inc. (NYSE: APK) announced today that it has amended certain advance notification provisions of its by-laws in order to permit Stanley Stahl to present two new items of business for shareholder action at the company's 1990 annual meeting.

The two new proposals made by Stahl earlier this month relate to advisory votes of shareholders concerning continuation of the company's shareholder rights plan and adoption of a policy against entering into new, or modifying in certain respects existing, compensation arrangements with directors, officers of employees providing for a payment in the event of a change in control.

Also, in response to Stahl's request, the company advised him that if any of his nominees became unwilling or unable to stand for election on his slate, the person designated earlier this month by Stahl as an alternate will be permitted to join his slate as a nominee.

#90200p6369 07/19/1990 ~PR Newswire
MAUMEE, OH (JULY 19) PR NEWSWIRE - "TRINOVA Corporation's (NYSE: TNV) sales for the second quarter and first six months of 1990 were comparable to a year ago, but income was lower than last year primarily due to changes in our sales mix," said Darryl F. Allen, president and chief executive officer.

1990 second-quarter sales were $500.8 million compared with 1989 second-quarter sales of $496.0 million. Operating income in the 1990 second quarter declined to $37.1 million, from $47.0 million in 1989. Net income was $17.8 million, or 56 cents per share, which includes a gain from the settlement of terminated defined-benefit pension plans amounting to $2.8 million net, or 8 cents per share. This compares with net income of $23.3 million, or 67 cents per share, in the 1989 second quarter. The tax rate in the 1990 second quarter was 39.5 percent, compared with 36.7 percent in the 1989 second quarter. The higher effective rate in 1990 is due to a greater percentage of income in certain countries outside the U.S. where tax rates are higher. During the 1990 second quarter, TRINOVA repurchased 331,900 of its outstanding shares under its share repurchase program.

"The aggressive restructuring program we announced nine months ago is being implemented, and during the first six months of 1990 we divested certain businesses and improved operating cash flow by reducing

inventories by more than $40 million," Mr. Allen said. "However, this is not a nine-month project, and while we continue to make progress, significant returns from our program are still ahead of us." Six-Month Results

Sales for the first six months of 1990 were $986.4 million, compared with sales in the first six months of 1989 of $980.2 million. Operating income in the 1990 first half declined to $71.5 million, from $87.6 million in 1989. Net income for the 1990 six-month period was $32.3 million, or $1.02 per share, which includes a gain from the settlement of terminated defined-benefit pension plans amounting to $2.8 million net, or 8 cents per share. This compares with 1989 six-month income from continuing operations of $42.8 million, or $1.24 per share.

During the first six months of 1990, TRINOVA repurchased nearly 2 million of its outstanding shares for a total of 3.2 million shares purchased at an average share price of $24.00.

TRINOVA -- through Aeroquip Corporation and Vickers, Incorporated -- supplies power and motion control systems and components and custom-engineered plastic products to the industrial equipment, transportation and aerospace/defense markets.

#90200p6370 07/19/1990 ~PR Newswire

PROVIDENCE, RI (JULY 19) PR NEWSWIRE - Textron Inc. (NYSE: TXT) reported higher second quarter net income of $72.1 million (80 cents per share), up from $59.3 million (67 cents per share) in 1989 after an extraordinary loss of $9.5 million (11 cents per share), B.F. Dolan, chairman and chief executive officer, announced today. Revenues in the second quarter rose to $2.0 billion from $1.8 billion in 1989. Earnings per share for 1990 reflect an increased average number of shares outstanding and a higher tax rate compared to the prior year.

Dolan said "Operating income increased as a result of continued strength in financial services and improved contract performance in the Systems segment, while Bell Helicopter's income declined due principally to a less favorable mix of non-U.S. Government sales." He added that "our balanced diversity enabled us to achieve a good first half, and while certain of our markets remain soft, 1990 should be another good year for Textron."

Revenues for the first half of 1990 increased to $3.9 billion from $3.7 billion last year. Net income for the first half of 1990 was $138.3 million ($1.53 per share), compared with $122.6 million ($1.40 per share) in 1989, which included an extraordinary loss of $9.5 million (11 cents

per share).

As a result of the previously reported Federal Trade Commission preliminary injunction relative to Textron's acquisition of Avdel in early 1989, Textron is precluded from consolidating Avdel's earnings with Textron's results of operations. Operating income of the commercial products sector for the first half of 1990 included dividends of $6.5 million received from Avdel. Interest expense on the borrowings related to the purchase of Avdel was $10.6 million in the first half of 1990, compared with $10.4 million in 1989. Avdel's unaudited sales and earnings before income taxes for the first half of 1990 were approximately $81 million and $12 million, up from $77 million and $11 million, respectively in 1989.

Textron is a multi-industry company with operations focused in three business sectors -- aerospace technology, commercial products and financial services.

NEW YORK (JULY 19) PR NEWSWIRE - Lancer Industries Inc. announced today the successful refinancing of its bridge loan with Merrill Lynch Capital Markets used to finance the acquisition of its Fairfield Manufacturing Company unit. The new financing, for a total of $135 million, includes a $105 million bank financing led by Bank of America National Trust and Savings Association and the issuance of $30 million in subordinated debt to institutional investors.

Also today, Lancer, formerly known as McLean Industries, completed a $25 million financing with Westinghouse Credit Corporation through the issuance of Lancer subordinated notes. The funds will be used to finance acquisitions.

Paul S. Levy, Lancer's chairman, said, "With the successful completion of these financings we have not only lowered our ongoing debt service levels but also have obtained long-term financing for future operations and our acquisition program."

TROY, NC (JULY 19) PR NEWSWIRE - First Bancorp (NASDAQ: FBNC) announced today that consolidated net income for the quarter ended June 30, 1990 was $492,323, or 36 cents per share, compared to $432,547, or 31 cents per share, for the same quarter of 1989. Net income for the first half of 1990 was relatively unchanged at $920,582, or 67 cents per share, when compared to $919,300, or 67 cents per share, for the corresponding period of 1989. Earnings per share have been restated to reflect 10 percent stock dividends paid in January 1990 and 1989.

Net interest income increased 8.4 percent to $2,441,909 for the three months ended June 30, 1990 compared to $2,251,400 for the same period of the previous year. In addition, non-interest expenses increased 8.8 percent, primarily as a result of increased personnel costs.

Mr. John Wallace, President, attributed the increase in second quarter net income to an improved growth rate of net interest income and a reduction in the growth rate of non-interest expenses.

First Bancorp is a bank holding company based in Troy, North Carolina. Its principal activity is the ownership and operation of First Bank, a state-chartered bank that operates 25 branch offices in an eight county market area centered in Troy.

#90200p6375 07/19/1990 ~PR Newswire

ATLANTA (JULY 19) PR NEWSWIRE - Days Inns of America Inc. is exceeding its goals and shattering the all-time records set only one quarter earlier in the areas of franchise sales, property openings, reservations and travel industry bookings.

"No one else in the industry works this fast or this effectively," said John Snodgrass, president of Days. "We will hang a Days flag in every location a traveler could possibly choose."

In the three month period from April through June, Days closed an unprecendented 137 franchise agreements. Of those, 40 percent were for the construction of new Days properties while 60 percent will be conversion from other brands or independents. Openings during that period numbered 70, including the first Days Inn in France. Of these openings, 22 were new constructions while 48 were conversions. The total number of open hotels in the Days system at the close of June 1990 was 1,042, with 127,481 rooms.

Filling those additional rooms is an equally important challenge -- one

the Days reservation center is well equipped to handle. Call volume for the second quarter was up 11.8 percent and actual bookings increased 18.1 percent. A milestone was reached on June 25, as the Days Reservations Centers handled 45,080 calls, the most ever received on one given day.

Another proven way to fill rooms is through marketing to travel industry professionals. Days Travel Industry Marketing Department is also breaking records with a 52.7 percent increase in inbound international business, a 15.6 percent increase in domestic group bookings, and an overall increase in sales of 20.5 percent.

According to Snodgrass: "No matter how you look at the numbers, Days is on the move. The momentum is up and Days is becoming further entrenched as the dominant force in the mid-market segment of this industry. We have no intention of slowing down."

Days Inns of America Inc., with its Days brand inns, hotels, suites and Daystops, is the third largest hotel brand in the world and the fastest growing in the moderate price segment of the market. An international lodging operator and franchisor, the chain has more than 1,600 hotels open and under development in 50 states, Canada, Mexico, Europe, the Pacific Rim and India.

#90200p6376 07/19/1990 ~PR Newswire

PHILADELPHIA (JULY 19) PR NEWSWIRE - Right Management Consultants Inc. (NASDAQ: RMCI) today announced revenue and earnings for the second quarter and six months ended June 30, 1990.

For the second quarter, net income surged 91 percent to a record $589,000 or 22 cents per share, compared to $308,000 or 12 cents per share, for last year's second quarter. Revenue (consisting of company- owned office revenue and affiliate royalties) increased 41 percent in the quarter to $8,077,000 compared to $5,716,000 in the same quarter last year. For the six months ended June 30, 1990, net income was $1,107,000 or 41 cents per share, on a 44 percent increase in revenue to $15,608,000 compared to net income of $579,000 or 22 cents per share on revenue of $10,876,000 for the same period in 1989.

The significant improvement in net income is due to continued increases in revenue and earnings from domestic operations, and the continued improvement in the operations of the company's French subsidiary, which generated modest profits in the second quarter and first six months of 1990 compared to losses of $163,000 and $291,000 in the second quarter and first six months of 1989 respectively. This turnaround resulted in an

increase of 7 cents and 12 cents per share for the second quarter and six months of 1990 compared to 1989, partially because no tax benefit was recognized from these losses in the earlier periods.

Network revenue, comprised of company-owned office revenue and affiliate offices' revenue, aggregated $13,096,000 for the second quarter 1990, a gain of 14 percent over network revenue of $11,522,000 for the same quarter in 1989, and a 23 percent increase to $26,264,000 compared to $21,305,000 for the six months ended June 30, 1990 vs. 1989.

Right Management Consultants Inc., which does business under the name Right Associates(R), develops, markets and delivers human resource consulting services through more than 65 offices in the United States, Canada and Western Europe, with primary emphasis in outplacement consulting. These services are designed to assist employers with employee termination issues and, after termination, to help separated employees develop skills and define career strategies to assist them in finding new employment.

RIGHT MANAGEMENT CONSULTANTS INC.
(Unaudited)

Periods ended	Quarter		Six months	
June 30	1990	1989	1990	1989

Weighted average number of shares outstanding	2,661,177	2,671,528	2,661,125	2,650,953

(A) No tax benefit was recognized during the second quarter and six months ended June 30, 1989, for operating losses generated by the company's French subsidiary of $163,000 and $291,000 respectively. During the second quarter and six months ended June 30, 1990, income of the French subsidiary was offset against its net operating loss carryforward. As of June 30, 1990, the company has approximately $672,000 of net operating loss carryforwards to offset against future income of its French subsidary.

MARTINSVILLE, VA (JULY 19) PR NEWSWIRE - Tultex Corporation (NYSE: TTX), a leading producer of fleeced knit activewear, today reported a substantial increase in net income for its second quarter and a profit for its first half compared with a loss in the same period last year. Sales were the highest ever recorded for a second quarter or a first six-month period in Tultex history.

Net income for the three months ended June 30, 1990 amounted to $3,474,000, or 12 cents per share, compared with $517,000, or two cents per share for the quarter ended July 1, 1989. Net sales were $80,102,000 compared with $57,284,000 for the second quarter of 1989.

Net income for the six months was $1,179,000, or four cents per share, on sales of $137,455,000. For the first half of 1989, there was a net loss of $1,022,000, or four cents loss per share, on sales of $103,764,000.

"Our improved financial performance," said Dick Hunnicutt, chairman and chief executive officer, "is the result of increased sales volume, higher average selling prices, reduced material costs and continuing efforts to reduce production costs.

"This should position us for a much improved annual performance in 1990. Our order base for shipments in the third and fourth quarters is strong. Fleeced knit activewear is a very seasonal product, however, and fourth-quarter demand for our garments will depend upon retail consumer purchasing behavior. As a result, the fourth quarter will weigh heavily in determining the degree of improvement for the full year."

Tultex, a vertically integrated producer of fleeced knit activewear and leisure time apparel, operates yarn and apparel manufacturing plants in Virginia and North Carolina.

RIVIERA BEACH, FL (JULY 19) PR NEWSWIRE - Consulier Engineering, Inc. (NASDAQ: CSLR) (the "company") (formerly Consulier Industries, Inc.) of Riviera Beach, Fla., announced the completion of pre-production models of its Pocket Winch and Lug Buster.

The Pocket Winch, small enough to fit in a standard sized tool box, is designed to lift 2,000 pounds. The company expects the winch will cut heavily into the market presently dominated by devices such as the come-a-long. The company is negotiating a joint venture development agreement covering its Pocket Winch with ASHA, Inc., a California

corporation headed by Alan Clinet. The joint venture will also conduct all sales and marketing activities.

The company also unveiled its Lug Buster. The one pound device is designed to break the seal of any tire lug, however over-tightened or rusted, wit several turns of an allen type wrench attachment. The company is optimistic about the acceptance of its Lug Buster in the huge automotive after market, where no comparably priced and sized product is presently offered.

The company also announced that the preliminary unaudited results of operations for the second quarter ended June 30, 1990, the first quarter since the sale of its automobile manufacturing operation, indicate a bottom line net profit of between $180,000 to $190,000. The final results of operations will be released in several weeks when the company files its quarterly Form 10-Q with the Securities and Exchange Commission.

Consulier Engineering, Inc.'s common stock and warrants trade on the over-the-counter market under the NASDAQ symbols CSLR and CSLRW, respectively.

NEW YORK (JULY 19) PR NEWSWIRE - The New York Times Company (AMEX: NYT.A) today increased the annualized dividend rate on its Class A and Class B common stock by 8 percent, from $.52 to $.56, effective with the quarterly payment of $.14 a share on Sept. 24 to shareholders of record on Sept. 6.

This is the 86th consecutive quarterly dividend paid on the company's common stock since its Class A shares were admitted to trading on the American Stock Exchange in 1969.

A regular quarterly dividend of $1.375 per share on the 5-1/2 percent cumulative prior preference stock was also declared, payable on Oct. 1, to shareholders of record on Sept. 6.

The New York Times Company is a $1.8 billion media company with four lines of business -- newspapers, magazines, broadcasting/information services and forest products. In addition to the New York Times, the company publishes 35 regional newspapers; owns a one-third interest in the International Herald Tribune; publishes 17 magazines, including McCall's, Family Circle and Golf Digest; operates five television stations, two radio stations, a news service and other information services; and has interests in three newsprint mills and one supercalendered paper mill.

DALLAS (JULY 19) PR NEWSWIRE - International Telecharge, Inc. (AMEX: ITI) announced that it anticipates reporting a substantial net loss for the second quarter ended June 30, 1990.

The company indicated that although second-quarter figures are preliminary revenues declined 4 percent to 6 percent from revenues reported for the first quarter ended March 31, 1990, while certain expenses increased significantly. The company expects to release final results for the second quarter in early August.

Allan Rayfield, chairman and chief executive officer, said that reasons for the loss included a special charge of $1.3 million in billing credits and adjustments due to an incremental increase in fraudulent international calls made over the ITI network during the period. The company has taken steps to curtail such fraud in the future.

In addition to the special charge, Rayfield cited expenses for new marketing programs, adding that he expects revenues from these programs in the third and fourth quarters. He indicated that the continuing competitive nature of the market has narrowed margins for some ITI products and services.

Rayfield also stated that the quarter benefited from a gain recognized by the company in connection with the sale of certain rights in the company's batch software.

Finally, Rayfield said that while the anticipated loss will place the company in technical default of its demand line of credit agreement, ITI expects the loan agreement to remain in effect at this time.

ITI, headquartered in Dallas, is a leading national telecommunications supplier of network-based operator and information services to hotels, hospitals, institutions, payphone owners and interexchange carriers.

OMAHA, NE (JULY 19) PR NEWSWIRE - America First Financial Fund 1987-A reported earnings of approximately $9.7 million for the six months ended June 30, 1990 ($5 million for the quarter ended June 30, 1990). The Fund's income consisted primarily of earnings from EurekaBank which it acquired on May 27, 1988.

Net income for the six months ended June 30, 1989 was $10.4 million ($5.2 million for the quarter ended June 30, 1989). The decrease in net income from 1989 to 1990 is primarily attributable to the acceleration of the write-off of goodwill resulting in a charge to net income of over $600,000. The book value of EurekaBank and the Fund will be 100 percent tangible by year-end.

Earnings for the first six months of 1990 represent an annualized yield of approximately 16 percent to investors, based on the full $120 million of funds raised. Investors earned $1.59 per beneficial unit certificate for the six months ended June 30, 1990 ($.82 for the quarter ended June 30, 1990). Investors continue to receive monthly distributions of 7.5 percent with additional earnings retained at EurekaBank to enhance the ultimate return to investors in the Fund. The book value per unit was $20.43 at June 30, 1990.

EurekaBank, which is located in Foster City, California, is a $1.7 billion organization with 35 branches located in the San Francisco Bay area.

NEW YORK (JULY 19) PR NEWSWIRE - Citicorp today announced the election to its board of directors of Dr. H.O. Ruding, an economist, banker and international finance leader who was the Netherlands Finance Minister from 1982 to 1989.

Ruding will bring to Citicorp and Citibank a depth of experience at a time when special emphasis is being placed on expansion across Europe in advance of the EEC consolidation in 1992.

While Netherlands Finance Minister, Ruding was at times also Chairman of the International Monetary Fund's Interim Committee, the Group of Ten (industrialized countries), the Inter-American Development Bank, the Asian Development Bank, and the European Investment Bank.

Before becoming Finance Minister, Ruding had been a member of the board of managing directors of the Amsterdam-Rotterdam Bank, from 1981 to 1982; one of the executive directors of the IMF, from 1977 to 1980; joint general manager of the Amsterdam-Rotterdam Bank, from 1971 to 1976; and head of the Division of International Monetary Affairs in the Netherlands Ministry of Finance, from 1965 to 1970.

Ruding is an advisory director of Unilever N.V. in Rotterdam and Unilever PLC in London, a member of the board of supervisory directors of Nationale-Nederlanden in The Hague, a member of the board of external advisors of Moret Ernst and Young in Rotterdam and a member of the board of advisors of the Robeco group of mutual funds in Rotterdam.

JACKSONVILLE, FL (JULY 19) PR NEWSWIRE - Barnett Banks, Inc. (NYSE: BBI) again led all banks in Florida in gaining new deposits during the 12 months ended March 31, according to figures just released by the Florida Bankers Association.

The state's leading banking company increased its share of the deposits in Florida banks to 22.4 percent on March 31. That was up from 21.9 percent a year earlier. Adding deposits of six failed institutions Barnett acquired in the second quarter, Barnett's share of total deposits was 23.4 percent.

Barnett collected $2 billion, or 30.2 percent of the new deposits, in Florida during the 12-month period ended March 31, according to the FBA figures. Barnett had $24.8 billion in total deposits as of March 31. The state's independent banks got the next biggest share, gathering 19.7

percent of the new deposits. In the 45 counties in which Barnett operates, the bank is first in deposits in 22, second 17 and third in four.

With more than $31 billion in assets, and almost 600 offices, Barnett Banks, Inc. is the leading banking company in Florida and the eighth-largest in Georgia. The company's stock (BBI) is listed on the New York Stock Exchange.

PHILADELPHIA (JULY 19) PR NEWSWIRE - An advanced electronic component designed by SPD Technologies has won the 1990 Powder Metallurgy Part-of-the-Year award in international competition sponsored by the Metal Powder Industries Federation.

The award was presented for the application of advanced metal injection molding (MIM) technology in the development of a unique solenoid housing assembly used in a new electronic circuit breaker introduced earlier this year.

SPD's new Actron 102, which utilizes the award-winning component, is the first electronically controlled 100 ampere military circuit breaker, and is being hailed as a breakthrough in electrical protection systems technology.

Accepting the award for the Philadelphia-based military systems developer were Mark Jacobsen, director of integration engineering, and Rich Etherton general supervisor of tool design.

SPD Technologies is the largest producer of military circuit breakers and world leader in advanced electrical protection equipment, and ship control and interior communication systems designed for U.S. Navy ships. Headquartered in Philadelphia, the company has service, repair and overhaul facilities across the United States and serves military markets throughout the world.

PITTSBURGH (JULY 19) PR NEWSWIRE - PPG Industries Inc. (NYSE: PPG) today

reported the strongest single quarter and first half sales and earnings performance in its history.

Second quarter net earnings were $141.0 million, or $1.31 per share, on sales of $1.57 billion, including a pre-tax charge of $25 million -- equal to 14 cents per share -- in its chemicals business. In the 1989 quarter, net earnings were $127.3 million, or $1.13 per share, on sales of $1.49 billion.

Additionally, the company said that it has reached agreement with the state of New Jersey for remediation of chrome residue sites.

Also, PPG's board of directors declared a regular quarterly dividend of 42 cents a share, payable Sept. 12 to shareholders of record Aug. 10.

PPG said that the second quarter special charge, earlier reserves and other measures would satisfy, insofar as is known, PPG's material obligations associated with residues from chrome chemicals operations in Jersey City discontinued nearly 30 years ago.

Under the agreement with New Jersey, PPG will remediate 53 sites, pay a $2.5 million fine, withdraw its lawsuits against the state and reimburse the state $900,000 for certain administrative costs. PPG will provide $80 million in contingent financial assurances for the remediation.

PPG also said its board authorized redemption of the company's $100 million of 9-1/2 percent notes due 1991.

In addition, the board approved the purchase of shares in Dutch fiber glass producer Silenka B.V. owned by partners Akzo Chemicals International B.V. and N.V. Noordelijke Ontwikkelingsmattschappij, giving PPG full ownership, and formation of a 51 percent venture with Essilor International of France, Transitions Optical Inc., based in St. Petersburg Fla., to make photochromic plastic eyewear lenses. Terms of these previously announced transactions were not disclosed.

For the first half, net earnings were $266.3 million, or $2.47 per share, on sales of $3.05 billion, compared with net earnings in the year-earlier period of $257.1 million, or $2.28 per share, on sales of $2.95 billion.

Second-quarter 1990 and 1989 average shares outstanding were 107.6 million and 112.8 million, and for the respective six-month periods, 108.0 million and 112.9 million.

SOUTH PLAINFIELD, NJ (JULY 19) PR NEWSWIRE - Precision Drug- testing Laboratories of America, Inc., Princeton Diagnostic Laboratories of America, Inc.'s (PDLA) newest subsidiary in Oxford, Miss., announced today that Elizabeth S. Keith, Ph.D., has joined the company as senior scientist.

Dr. Carlton E. Turner, PDLA's president and CEO, stated, "I have known Dr. Keith since 1970 when we worked together on the marijuana analytical research project at the School of Pharmacy. Her extensive background and analytical knowledge will provide PDLA with the expertise needed to expand the facility and enhance our toxicology program."

Prior to joining PDLA, Dr. Keith was an assistant professor of biology at the University of Mississippi. Dr. Keith received her B.A. in biology and chemistry from the University of Mississippi; her M.S. in food sciences at the University of Georgia and her Ph.D. in Biological Sciences (Microbiology Immunology) from the University of Mississippi and specializes in gas chromatography and high-performance liquid chromatography.

Prior to working towards her doctorate Dr. Keith worked on several research projects at the University of Georgia, at the Worcester Foundation for Experimental Biology in Massachusetts and at the Research Institute of Pharmaceutical Sciences at the University of Mississippi.

PDLA is a NIDA certified laboratory authorized to provide drug testing services to government agencies and businesses regulated by the U.S. Department of Transportation, contractors for the Department of Defense, and other industries subject to federal drug testing guidelines.

PDLA's diagnostic drug tests utilize a forensic approach and are used as pre-employment drug screens by businesses involved in transportation, oil and chemical, nuclear power, finance, security, general manufacturing and sports.

BERKELEY (JULY 18) PR NEWSWIRE - Send EnviroMedia Inc., a California company that provides integrated delivery systems for environmental information, products, and services, announced today the premiere of GreenLine (TM), the telephone resource for environmental action.

"We expect GreenLine to open a new era in environmental communications," according to CEO Gil Friend. The service, which can be accessed 24-hours-a-day by dialing 1-900-446-4761, costs 95 cents per minute conveniently charged to the caller's home telephone bill.

GreenLine offers daily environmental news and a weekly "audio column" from John Javna, co-author of the best-selling book, "50 Simple Things You Can Do to Save the Earth." GreenLine also enables callers to send instant letters on current environmental issues to government and business leaders.

By late summer, GreenLine will also carry environmental shopping guides, green products, environmental voting records, access to environmental organizations, and more.

"GreenLine was designed to let callers access exactly the information they want, exactly when they want it," said Friend. "And it helps callers take the action they choose - immediately."

GreenLine uses the world's most widely available, universally understood computer - the touch-tone telephone - to give callers access to an "audio data base" of action information of what's going on and what they can do - as individuals in their homes and businesses, as decision-making consumers and as effective citizens. GreenLine callers use their touch-tone phones to "drive" through a constantly updated system that responds almost instantly to their choice.

"National environmental consciousness has reached its highest levels ever " according to Friend. "Earth Day was just one indication of that. Now the challenge for all of us is to live that concern every day, despite the conflicts of work, family, and busy lives. GreenLine is designed to meet that challenge, by providing an up-to-date, easy-to-use system for environmental action and information."

Send EnviroMedia Inc. clients include the EarthWorks Group, publisher of "50 Simple Things," and the P3 Foundation, publisher of "P3, The Earth-based Magazine for Kids." GreenLine's talking computers are provided by US Audiotex. Transmission services are provided by MCI.

PHILADELPHIA (JULY 19) PR NEWSWIRE - CoreStates Financial Corp (NASDAQ: CSFN), its two Philadelphia banks and the Philadelphia Urban Coalition announced jointly today that CoreStates expects to make a $250,000 grant to the Philadelphia Urban Coalition.

The Urban Coalition, after certain conditions are met, will purchase $250,000 common stock in the minority-controlled United Bank of Philadelphia.

CoreStates is the parent of Philadelphia National Bank and First Pennsylvania Bank.

Thomas J. Patterson, First Pennsylvania vice president with responsibility for CoreStates' overall community development activities, said the grant signifies CoreStates' support for the goals of the United Bank.

He noted that CoreStates previously has offered to provide United Bank with correspondent banking services at reduced rates.

Ernest Jones, executive director of the Philadelphia Urban Coalition, said the coalition "is most appreciative of CoreStates' support, both tangibly and as a symbol that CoreStates is there to help. We see this as a challenge to the minority community.

"It is extremely important for the African-American community to accept and meet the challenge of raising the remaining capital needed from within the community's resources, and we are looking forward to success in that effort," Jones said.

Patterson said CoreStates has a long-standing policy of not making equity investments in other local financial institutions.

He said the involvement of the Urban Coalition, as a well- established community organization and a highly respected advocate for minority concerns, "can only deepen the United Bank's ties to our region's minority communities."

TITUSVILLE, PA. (JULY 19) PR NEWSWIRE - At a formal signing ceremony held on Capitol Hill on Wednesday, July 18, Cytemp Specialty Steel became a founding member of a government/industry/university program aimed at increasing U.S. competitiveness by conducting research into the processing of high technology metals, it was announced.

Cytemp is one of 10 current member companies who have formed the Specialty Metals Processing Consortium Inc. (SMPC) with the Department of Energy and Sandia National Laboratories in Albuquerque, N.M., to perform research in the liquid metal processing of high technology metals. Processes include

vacuum arc remelting, electro slag remelting, electron beam melting and computer modeling of fluid flows. The specialty metals to be studied include nickel-based super alloys, titanium alloys and other high performance metals used in aircraft, satellites, nuclear reactors and other high-tech products.

Goals of the SMPC include the development of a focused industrywide research and development effort to address generic process problems and to use the facilities and expertise of national laboratories and universities. Additionally, the program provides for internship and training of industry and university technologists at Sandia. These individuals would later return to their respective companies to apply their acquired skills and knowledge. Member companies will share the research results, and they will be free to apply this information to the development or improvement of their own processes and products.

In addition to Cytemp, the other companies involved in the SMPC are: Allegheny Ludlum Corp. (NYSE: ALS), the Garrett Engine Division of Allied-Signal Aerospace Co.; Carpenter Technology (NYSE: CRS); Howmet Corp.; Inco Alloys; Pratt & Whitney; Special Metals Corp.; Teledyne Allvac; Teledyne Wah Chang, Albany, Ore.

PHILADELPHIA (JULY 19) PR NEWSWIRE - Rohm and Haas Co. (NYSE: ROH) announced today plans for expansion at its Plexiglas cell cast sheet plant in Matamoros, Mexico. The expansion will more than triple the sheet capacity at the plant.

In announcing the expansion, John R. Frazier, the company's business manager for Sheet Products said, "Our decision to increase capacity at Matamoros underscores the commitment we made when we began production there three years ago.

"Since then, the response from our customers has been excellent and we foresee the need for additional capacity. The expansion also will enable us to introduce new sizes and thicknesses for our acrylic sheet customers and increase our ability to remain competitive against import pressures from developing countries." Construction will begin this summer with start-up scheduled for the third quarter of 1991.

John J. Doyle, vice president and business group executive for Plastics, noted that the expansion is another example of the company's effort to ensure high quality, lower cost acrylic sheet in the face of global competition.

The initial start-up at Matamoros in mid-1987 placed sheet production in close proximity to the company's Houston, Texas, plant which produces methyl methacrylate for use in making Plexiglas acrylic sheet.

Rohm and Haas currently produces acrylic sheet using two processes - cell-casting and a proprietary melt-calendaring (MC) process. An expansion of Plexiglas MC was announced in November 1989.

"The expansion at Matamoros moves us one step further in our strategy to assure our position as a leader in this important market," said Doyle.

OAK BROOK, IL (JULY 19) PR NEWSWIRE - Waste Management, Inc. (NYSE: WMX) today reported record second quarter revenue and net income.

Net income for the three months ended June 30 increased 26 percent to $178,872,000, or $0.38 per share, from $141,914,000, or $0.31 per share, in the same period in 1989. Revenue in the second quarter climbed 26 percent to $1,414,601,000 from $1,118,808,000 in the year-earlier period.

For the six months ended June 30, net income increased 25 percent to $322,899,000, or $0.69 per share, compared with $257,453,000, or $0.56 per share, in the comparable period in 1989. Revenue for the six months was up 27 percent to $2,635,239,000 versus $2,077,674,000 a year earlier.

Per share results for 1989 have been restated to reflect a two-for-one stock split in the form of a stock dividend distributed in December 1989.

"Waste Management is continuing to grow strongly," said Dean L. Buntrock, chairman and chief executive officer. "Our second quarter results are consistent with our expectation that we will have another outstanding year

in 1990."

"Waste Management is positioned to respond to continued business opportunities both domestically and abroad," Buntrock said. "Stronger environmental regulations will enhance the need for the comprehensive environmental services offered by the company's business units," he said.

"Waste Management's three principal business units, Waste Management of North America, Inc.; Chemical Waste Management, Inc., a 77-percent-owned subsidiary; and Waste Management International, Inc. all contributed improved results," Buntrock said.

Waste Management of North America's Recycle Americarated solid waste services, are expanding rapidly. The number of communities served now is 253, representing 1.8 million households.

The company earlier this week announced that Waste Management of North America had reached an agreement with Stone Container Corporation to form a paper recycling joint venture that is expected to become the world's largest marketing enterprise for recycled paper.

The joint venture organization will purchase paper collected by Waste Management's recycling programs and independent recycling systems and sell it to Stone Container and other paper manufacturers. The company earlier established with the DuPont Company the Plastic Recycling Alliance to recycle post-consumer plastics.

ELMSFORD, N.Y. (JULY 19) PR NEWSWIRE - Setting up and maintaining a home office has never been easier, thanks to "The Fuji Home Office Guide," a free 24-page booklet announced today by Fuji Film Floppy Disks.

Examining all aspects of working from home, the Fuji guide brings together vital information and resources that home-office workers need to manage their businesses and lives more effectively. Fully illustrated and arranged in an easy-to-follow format, the new booklet is a resource that home-office workers will refer to repeatedly.

"The Fuji Home Office Guide" is available free of charge to consumers by writing to:

The Fuji Home Office Guide P.O. Box 1738 Ridgely, Md. 21681 "For more than 30 million Americans, working from home is exciting, but serious, business " said Jeff Ash, product marketing manager for the computer media division

of Fuji Photo Film U.S.A., Inc. "However, with no one standing over your shoulder to provide counsel as you go along, operating a home office can be intimidating. That's why the guide is such an indispensable reference tool; it will be as useful five years from now as it is today."

"The Fuji Home Office Guide" also includes a coupon for $4.00 off the list price of the newly revised, third edition of the book "Working From Home" by Paul and Sarah Edwards. The Edwardses, widely acknowledged as the country's leading authorities on the home office, were editorial consultants for the Fuji booklet.

Fuji Photo Film U.S.A., is the U.S. marketing subsidiary of Fuji Photo Film Co., Ltd. of Tokyo, a leading manufacturer of imaging and information products. These include professional and consumer film and cameras, minilabs, color copiers, photographic paper and photofinishing supplies, professional motion picture film, professional and consumer videotape, audio cassettes, computer floppy disks, microfilm and other micrographic products, graphic arts film, plates, equipment and chemistry, a color proofing system, a monotone scanner system and reprographic films.

#90200p6428 07/19/1990 ~PR Newswire

ST. LOUIS (JULY 19) PR NEWSWIRE - Southwestern Bell Corporation (NYSE: SBC) today reported net income of $262.5 million for the second quarter of 1990, compared with $261.5 million for the second quarter of 1989. Revenues for the three months ended June 30 were $2,169.7 million, up from $2,140.5 million for the second quarter of 1989.

Earnings per share for the second quarter of 1990 were $.87, as they were for the same quarter in 1989. Return on shareowners' equity was 12.41 percent, up from 12.11 percent in the second quarter in 1989.

"Net income results were in line with our expectations, our fundamentals are strong, and all signs point to a good overall 1990," said Edward E. Whitacre Jr., chairman and chief executive officer.

Several factors influenced this quarter's results, including the effect of federal and state rate reductions on telephone company revenues and an inventory write-down taken by Southwestern Bell Telecom. In addition, 1989 second quarter net income results were boosted by a one-time adjustment that increased network access revenues for the telephone company.

"The recovery of the southwestern economy continues to be reflected in our local telephone access line growth," Whitacre said. In the past 12

months, the telephone company has gained more than 444,000 lines, compared to 317,000 lines the previous 12 months.

During the second quarter, access lines increased more than 75,000 in what is traditionally a slow growth period due to the disconnection of college students and home relocations.

"We are continuing to see the dynamic growth potential in cellular mobile telephone service. Our mobile systems subsidiary again finished a record growth quarter and we reached a milestone by signing up our half millionth cellular customer," Whitacre said.

During the second quarter, 71,000 new cellular telephone customers were added -- more than twice as many as during the same quarter a year ago -- resulting in a total of 513,000 customers served.

Southwestern Bell Corporation, based in St. Louis, is an international communications corporation with 1.1 million shareowners. It provides a variety of products and services through its principal subsidiaries including Southwestern Bell Telephone Company, Southwestern Bell Yellow Pages, Southwestern Bell Telecom, Southwestern Bell Mobile Systems, Metromedia Paging Services, Mast Advertising & Publishing, and Gulf Printing.

#90200p6430 07/19/1990 ~PR Newswire

NEW YORK (JULY 19) PR NEWSWIRE - The Greater New York Savings Bank (NASDAQ: GRTR) announced today that its net income for the second quarter of 1990 was $2.2 million, compared with $4.1 million for the first quarter of 1990 and $6.2 million for the second quarter of 1989. The decline from the first quarter of 1990 was principally due to the effects of a higher level of nonperforming loans. The decline from the second quarter of 1989 was primarily the result of the effects of a higher level of nonperforming loans and an increase in the provision for loan losses.

Nonperforming assets increased to $130.3 million at June 30, 1990, from $85.7 million at March 31, 1990. The 1990 second quarter provision for loan losses amounted to $2.5 million. This compares with $2.5 million for the first quarter of 1990 and $0.9 million for the second quarter of 1989. The quarterly provision for loan losses was maintained at $2.5 million since it has been estimated that an adequate allowance for loan losses presently exists. The adequacy of this allowance is reevaluated on an ongoing basis in relation to the existing status of the loan portfolio and real estate market conditions in the Bank's lending areas. At June 30, 1990, the allowance for loan losses amounted to $15.2 million.

In commenting on the second quarter results, Charles J. Ohlig, chairman and chief executive officer of The Greater, stated: "The increase in nonperforming assets and the resultant effect on earnings reflect the current state of our economic environment. The real estate markets in our lending areas remain weak and we do not yet see signs of a turnaround."

Primary earnings per share was 13 cents for the second quarter of 1990, compared with 44 cents for the second quarter of 1989 and 29 cents for the first quarter of 1990.

The Bank's net interest margin was 2.16 percent in the second quarter of 1990, down from 2.32 percent in the first quarter of 1990. The decline was primarily attributable to the effects of the increase in nonperforming loans. Absent a significant increase in nonperforming loans, it is anticipated that the net interest margin will resume an upward trend in the third quarter of 1990.

The Greater's operating expense to average assets ratio was 1.65 percent for the second quarter of 1990. Additionally, at June 30, 1990, The Greater's tangible capital position was 6.94 percent. These ratios continue to compare favorably to industry norms.

The Greater New York Savings Bank is an FDIC insured, New York- chartered stock savings bank with assets of $3.1 billion, deposits of $2.2 billion and total stockholders' equity of $213 million at June 30, 1990. Nine of its 13 banking offices are located in Brooklyn, where The Greater was originally chartered in 1897, and its four other offices are located in Manhattan, Queens, Nassau and Suffolk.

DALLAS (JULY 19) PR NEWSWIRE - Harken Energy Corporation (NYSE: HEC) of Dallas today announced the addition of Stephen C. Voss as president of its drilling and well servicing subsidiaries, Harken Resource Management Corporation and Burns Drilling Company.

Voss, who brings to Harken extensive experience in the oil and gas drilling industry, holds a bachelor of science degree in petroleum engineering from Texas A&M University as well as a master of business administration degree from Harvard Graduate School of Business Administration. He is also a Registered Professional Engineer in Texas.

Voss' previous experience includes five years with Goldrus Drilling Company, where, beginning in 1976, he held engineering and management positions leading ultimately to the position of executive vice president and chief operating officer. At the time of his departure in 1981, he had complete operational responsibility for Goldrus, including the company's 19 land rigs.

In 1981, Voss founded Reliant Drilling Company, which developed to an operation including 15 operating rigs in Texas and three rigs in South America. Through an affiliate, Reliant was an early leader in the development of horizontal drilling techniques and the selection of reservoirs suitable for exploitation using this process.

Currently, HRMC and Burns provide contract drilling and workover/ well services in Texas and Oklahoma with an emphasis on horizontal drilling in the Austin Chalk trend of South Texas where they operate seven rigs.

#90200p6444 07/19/1990 ~PR Newswire

BOSTON (JULY 19) PR NEWSWIRE - The Colonial Group, Inc. (NASDAQ: COGRA) announced today earnings and revenues for the second quarter 1990.

Second Quarter Results Earnings. For the three months ended June 30, 1990 earnings totalled $3.1 million compared to $3.1 million earned for the same period last year.

Revenues. Revenues were $19.6 million for the second quarter of 1990. This represents an increase of $0.4 million compared to revenues of $19.2 million for the same period last year.

Earnings per share. Earnings per share were 39 cents for the second quarter this year vs. 38 cents last year.

Chairman and CEO, John A. McNeice, Jr. made these comments: Mutual fund sales in this year's first half were $560 million. Last year, sales were $819 million, including $300 million in sales from Colonial High Income Municipal Trust and $138 million in sales from Colonial Investment Grade Municipal Trust, two closed-end funds. Redemptions exceeded sales by $33 million this year; sales exceeded redemptions by $36 million a year ago.

Total assets under management were $8.0 billion at June 30, 1990 compared to $8.2 billion at Dec. 31, 1989. This decrease was due primarily to the decline in the bond market in the first half.

Two quarterly dividends of 10 cents per share were paid to shareholders in the first half of 1990.

In the second quarter this year, we added another large client for our CPORT portfolio accounting system.

Our goal is to show a moderate improvement in our performance over 1989 during the balance of the year.

Founded in 1931, Colonial is one of the nation's oldest and most experienced investment advisors. In 1989, Forbes magazine named Colonial the 7th best small company in America. Colonial manages approximately $8 billion for over 400,000 investors.

LINCOLNSHIRE, IL (JULY 19) PR NEWSWIRE - Morgan Products Ltd. (NYSE: MGN) today announced earnings of $1,392,000 or $0.17 per share on net sales of $112.6 million for the three months ended June 30, 1990. Net income for the first half of 1990 was $1,622,000 or $0.19 per share on net sales of $212.4 million. In the first quarter of 1990, the company had reported net income of $230,000 or $0.03 per share on net sales of $99.8 million. Compared to the same periods in 1989, net sales in the first half of 1990 were down 3.6 percent, while net sales in the second quarter were off approximately 2.0 percent. Earnings per share for the second quarter were $0.17 compared to $0.20 for the previous year and $0.19 for the first half of 1990 versus $0.23 for the same period of 1989.

Commenting on these results, company management cited continued weakness in housing starts and competitive pressures, principally in eastern markets, as negative factors partially offset by the continued successful sales thrust into the growing home center sector of the repair and remodeling market. Housing starts during the first five months of 1990 were reported to have decreased by 12 percent on a seasonally adjusted annual rate in comparison to the same period last year, adversely impacting sales of products distributed by the company and manufactured products shipped from the company's Oshkosh facility. The previously cited expansion of sales to the home center sector resulted in increased shipments from the company's Springfield, Ore., and Lexington, N.C., manufacturing facilities. Total sales to home centers for the first half increased 32 percent which included a 79 percent increase in the sale of products manufactured by the company.

The gross profit percent in the second quarter of 1990 remained the same as the first quarter of 1990 at 13.4 percent. The net income decline in the second quarter and first half of 1990 as compared to the same periods in 1989 was principally caused by the lower sales volume. However, this decline was partially offset by lower operating expenses and a reduction in interest expense. The salaried workforce has been reduced by 6.5 percent as of June 30, 1990, as compared to July 1, 1989.

Morgan's financial condition continues to be strong as a result of previously implemented asset control programs. Inventories at June 30, 1990, were almost $17 million below the July 1, 1989 balances. Long- term debt as a percentage of total capitalization improved from 36 percent at this time last year to 33 percent at June 30, 1990.

The previously announced phased closing of the Weed, Calif., fir door production plant was completed on schedule as of June 30, 1990. Production requirements have been integrated into the company's Springfield, Ore., facility as anticipated.

Morgan Products Ltd. is a leading manufacturer and distributor of specialty building products.

WOODBRIDGE, NJ (JULY 19) PR NEWSWIRE - Supermarkets General Corporation announced today that Jules Borshadel has been appointed president of Rickel Home Centers.

Borshadel joined the Pathmark division of Supermarkets General Corporation in 1965 as a trainee, and later served in a number of operations and administrative positions for the company. In 1976 he was named vice president, personnel and organizational planning, and later served as vice president of Pathmark's Southern division. In 1986 Borshadel was appointed senior vice president of planning, administration and retail development, also for the Pathmark division.

Borshadel received a B.A. in English from St. Peter's College. He is a graduate of the Harvard Graduate School of Business' Program for Management Development. In May 1989 Borshadel was honored by the New Jersey Association for Retarded Citizens, receiving the New Jersey Humanitarian Award for his efforts to promote the employment of handicapped people by Pathmark. He and his wife, Marilyn, and their three children reside in Green Brook, N.J.

Supermarkets General Corporation is a diversified retailer whose principal business is the operation of Pathmark supermarkets and drugstores. SGC also operates Rickel Home Centers and the Purity Supreme stores. The company, whose market area is the Northeast, ranks seventh largest in the supermarket industry, based on sales. SGC recorded sales of $6.3 billion for the fiscal year ended Feb. 3, 1990.

EDMONTON, ALBERTA (JULY 19) PR NEWSWIRE - Numac Oil & Gas Ltd. (Toronto: NMC) announces the completion of an outpost Wabamun oil well, Numac PCP Eaglen 4-20-79-24 W5M, in the Eaglesham area of the Peace River Arch. Numac has a 100 percent interest in the well until recovery of 300% of the drilling and completion costs and following which Numac's interest will be 50 percent. The well flowed light gravity oil at rates in excess of 300

barrels per day through perforations and is now on steady production. Numac is following up with an offset well on the section in which it has a 50 percent working interest.

Numac, with Pan Canadian as a 50 percent partner, also announces two proposed Wabamun prospective locations in the Tangent field, 11-19W-80-23 W5M and 3-19-80-23 W5M, which will be drilled in the immediate future.

HINGHAM, MA (JULY 19) PR NEWSWIRE -- The board of directors of the Hingham Institution for Savings (NASDAQ: HIFS) has declared a second quarter cash dividend of 8 cents per share, payable on Aug. 15, 1990, to shareholders of record on Aug. 1, 1990.

Paul E. Bulman, president and chief executive office, announced a net loss of $235,000 or 19 cents per share for the quarter ended June 30, 1990. The loss resulted in part from a second quarter provision to the allowance for possible loan losses of $100,000 and an additional operating loss of $80,000 resulting from the sale of properties owned by the bank. The second quarter ended June 30, 1989, had resulted in a net income of $235,000 or 19 cents per share.

Hingham Institution for Savings is a state-chartered savings bank serving the South Shore of Massachusetts. On June 30, 1990, total assets were $152,818,000 and stockholders' equity totaled $16,805,000 for a bank value of $13.44 per share.

PHILADELPHIA (JULY 19) PR NEWSWIRE - Richard A. Doran, former city representative and commerce director for the City of Philadelphia, has been appointed vice president of Corporate Communications of Independence Blue Cross.

The announcement was made by G. Fred DiBona Jr., president and chief executive officer of Independence Blue Cross, the region's largest health insurer.

Doran leaves his post as senior vice president of Constitution Bank, where

he has been responsible for communications, marketing, advertising and government affairs since 1987. Before joining Constitution Bank, he served as vice president of the Hay Group and as vice president- Community Affairs for ARA Services.

Between 1980 and 1983, as city representative and director of commerce for the City of Philadelphia, Doran played a major role in strengthening the city's economic base.

He has been praised by business leaders and the press for his efforts in fostering the development of plans for the Philadelphia Convention Center and Penn's Landing.

Doran's outstanding service as liaison between city government and the business community included his role in the completion of the Gallery II shopping complex, Philadelphia's enormously successful Century IV celebration highlighted by the visit to the city of the Tall Ships, an increased emphasis on tourism, expansion of hotel facilities and the creation of The Mayor's Small Business Conference -- the first city-sponsored event of its kind in the nation.

"Dick Doran has provided unparalleled leadership in Philadelphia's commercial and industrial development," said DiBona. "He has been extremely effective both as a communicator and as an administrator. I am delighted to welcome Dick as a key player for Blue Cross as we tackle the important health care challenges facing us in the 90s."

#90200p6456 07/19/1990 ~PR Newswire

HOUSTON (JULY 19) PR NEWSWIRE - Transwestern Pipeline Company today announced customer support that will anchor the construction of a 520 million cubic feet per day (MMcf/d) lateral pipeline from the San Juan Basin and the expansion of its existing mainline system by approximately 340 MMcf/d.

As a result of the projects, Transwestern will serve the northern California marketplace for the first time in addition to its traditional market area in southern California.

Transwestern has held an open season for commitments to long-term firm transportation service on both the San Juan lateral and mainline expansion, and has negotiated binding customer contracts to fully justify both projects.

The San Juan project is primarily supported with transportation contracts for 200 MMcf/d by Southern California Gas Company (SoCalGas), 213 MMcf/d by Pacific Gas & Electric Company (PG&E), and 50 MMcf/d by Sunrise Energy Company (Sunrise). The mainline expansion is anchored by PG&E for 213 MMcf/d and Sunrise for 50 MMcf/d.

"The support of SoCalGas and PG&E was an integral part of our decision to proceed with these projects," said Terence H. Thorn, president of Transwestern.

"The SoCalGas commitment to diversify its access to the San Juan basin through Transwestern will provide a new source of long-term, stable supplies to serve the growing California requirements and will aid in offsetting the decline in deliverability from Transwestern's traditional sources. PG&E's support for both projects will provide the northern California market with a new conduit to this southwest gas supply source," he added.

"Producers also will enjoy a new cost-effective option for transporting gas and will realize relief from the growing capacity constraint from the San Juan Basin," Thorn noted. "The low cost of Transwestern's mainline expansion supports the San Juan project as the first logical step to increase interstate capacity to California's curtailed markets."

The San Juan project will include installation of a compressor station near the Blanco, N.M. plant complex and installation of approximately 100 miles of 30-inch pipeline to connect with Transwestern's existing mainline near Thoreau, N.M. and is estimated to cost $90 million.

The San Juan lateral will provide volumes needed to facilitate the 340 MMcf/d expansion of Transwestern's mainline from the intersection of the San Juan lateral to the Arizona/California border. The mainline expansion will include installation of approximately 200 miles of 30-inch mainline looping and minor compressor station modifications and is estimated to cost $160 million.

Transwestern Pipeline Company, a wholly owned subsidiary of Enron Corp. (NYSE: ENE), is a 4,500-mile natural gas transmission system extending from west Texas and southern Oklahoma to the California border.

GOLDEN, COLO. (JULY 19) PR NEWSWIRE - Canyon Resources Corp. (NASDAQ:

CYNR), a Colorado-based mining company, announced today that ore is being loaded on the newly constructed life-of-mine pad at the Kendall Mine, near Lewistown, Mont. Construction of the nine million-ton heap-leach pad commenced in November 1989, after approval of an amended mine plan by the Montana Department of State Lands. In addition, the Merrill-Crowe recovery plant has been expanded to double its capacity.

"With the new pad capacity, Canyon expects to mine and crush one million tons of ore and to recover, by heap leaching, a total of approximately 37,000-39,000 ounces of gold during 1990, increasing to 45,000 ounces in 1991 and 51,000 ounces in 1992 from the Kendall Mine. Present reserves are adequate for continued operations from the Kendall Mine through 1993. Ongoing development drilling is expected to add reserves and extend the mine life," stated Richard H. De Voto, president.

Canyon acquired 100 percent ownership and sole operatorship of the Kendall Mine in January, 1990, through its acquisition of Addwest Gold Inc., which previously owned 60 percent of the Kendall Mine. Canyon has entered into a three-year lease for a $5.7 million mine equipment fleet with Caterpillar Financial Services Corp. Mining is now being conducted by Canyon's Kendall Mine staff, whereas contract mining had been conducted previously by Addwest.

AUSTIN, TX (JULY 19) PR NEWSWIRE - Tracor Applied Sciences, Inc., a subsidiary of Tracor, has received a contract from the Naval Underwater Systems Center (NUSC) to provide engineering and technical services supporting towed arrays and interfacing systems, sound source program support, and transducer repair facility support for NUSC's Towed Array Test and Evaluation Facility. The contract is for three years with a total value of approximately $9.4 million.

K. Bruce Hamilton, group vice president for Tracor Applied Sciences, said Tracor will provide engineering and technical support services involving streaming and recovery evolutions, in-service engineering, preparation and revision of documentation, maintenance, test, calibration, logistic support including operation and maintenance of leased facilities, and at-sea evolutions. Hamilton said that Tracor has provided these services to NUSC since 1984.

The engineering services division of Tracor Applied Sciences' systems technology operations in Groton, Conn., will provide the engineering and technical services. Marshall P. Hall, division vice president, said that Robert L. Warenda will serve as program manager.

Tracor, owned by privately held Westmark Systems, Inc., is an international technological products and services company with headquarters in Austin. The company is a significant engineering and support contractor in sonar, communications, and aviation; a leader in the development and production of electronic countermeasures systems and other advanced defense electronics; and a major manufacturer of electrical components.

BOSTON (JULY 19) PR NEWSWIRE - The U.S. Food & Drug Administration will permit the continued sale of fish oil supplements, according to Patricia Heydlauff, executive director, of the National Nutritional Foods Association, (NNFA), the trade organization representing the health food manufacturers and store owners.

Speaking at the health food industry's annual trade show at the Hynes Convention Center, Heydlauff said, "Despite recent media coverage to the contrary the industry was assured by FDA that the agency will allow the sale of fish oil supplements as long as specific claims for health benefits for these products are not made."

The FDA will also look at additional research and re-evaluate its position on fish oils health claims, Heydlauff said. The FDA was expected to release a clarification statement later this week.

The health food industry will submit a citizens petition to the FDA to establish their official position on fish oil, preventing future action against these products as "unsafe food additives". Heydlauff pointed to the long history of the use of cod liver oil as a food as an example of the legality of these products.

The NNFA Convention, attended by more than 8,000 health food industry representatives, will be open to the media 12 p.m. to 5 p.m. July 22 & 23. Complimentary press passes may be obtained at the Hynes Convention Center on the 3rd floor.

DETROIT (JULY 19) PR NEWSWIRE - U.S. car/truck output for this week is

estimated at 165,334, Ward's Automotive Reports said today.

Chrysler Corp. car assembly plants remained closed for model changeover this week, while Ford Motor Co. began making cars and trucks again after a two-week shutdown for summer vacation. Ford's output accounted for much of the rise in this week's production total over last week's count of 107,455. Production this week was also up from same- week year-ago's count of 154,646, Ward's reported.

Along with Chrysler's car production, all Chrysler Jeep production remained at a standstill for model changeover. Nissan of America Mfg. Corp. also remained closed this week for a second week of vacation. Production at Nissan is expected to resume on Monday.

Estimated U.S. car output for the week ending July 21 is 92,917, bringing the year-to-date estimate for 1990 up to 3,443,531, equal to 85.6 percent of like-1989's total of 4,021,538 cars, said Ward's.

U.S. truck output, scheduled at 72,417 for this week, stands at an estimated 2,199,141 units for calendar year 1990 through the end of this week, equal to 91.3 percent of year-ago's 2,408,330.

Of this week's estimated U.S. car output, General Motors Corp. share was 40.2 percent; Ford returned to production with 32.9 percent take; Honda of America Mfg. Inc. had 9.7 percent; Toyota Motor Mfg. USA Inc., 4.8 percent; New United Motor Mfg. Inc., 4.4 percent; Mazda Motor Mfg. USA Corp., 4.3 percent; Diamond-Star Motors Corp., 3.1 percent; Subaru- Isuzu Automotive Inc., 0.6 percent; Chrysler, 0.0 percent; and Nissan, 0.0 percent.

#90200p6469 07/19/1990 ~PR Newswire

RICHMOND, VA (JULY 19) PR NEWSWIRE - Tredegar Industries Inc. (NYSE: TG)

reported today its sales, net income and earnings per share for the second quarter ending June 30, 1990.

Tredegar became an independent company following a spin-off from Ethyl Corporation at the end of the second quarter of 1989. While second-quarter 1990 results reflect actual performance, comparative figures for 1989 were reported on a pro forma basis in order to illustrate how Tredegar might have performed as an independent company.

The pro forma figures assume that Tredegar would have incurred expenses of approximately $3 million per quarter on an after-tax basis. These expenses relate primarily to interest on Tredegar's debt and incremental administrative expenses.

Second-quarter sales for 1990 were $148,771,000, down from $164,694,000 in 1989. For the first six months of 1990, sales decreased to $296,431,000 from $323,280,000 in 1989.

On June 1, 1990, Tredegar announced the sale of its U.S. oil and gas properties for $16.5 million, resulting in an after-tax loss of $3.6 million, or 31 cents per share.

Excluding the effect of the divestiture, second-quarter net income was $1,163,000, or 10 cents per share. For the first six-months of 1990, excluding the effect of the divestiture, net income was $1,885,000, or 16 cents per share.

Including the effect of the divestiture, the net loss for the second quarter was $2,416,000, or 21 cents per share, compared to pro forma net income of $3,601,000, or 29 cents per share, a year earlier. For the first six months of 1990, the net loss was $1,694,000, or 15 cents per share, down from pro forma net income of $5,843,000, or 48 cents per share in 1990.

Tredegar Industries is a Fortune 500 manufacturer of plastics and aluminum products and has interests in coal, oil and gas.

BOULDER, CO (JULY 19) PR NEWSWIRE - Satellite Information Systems Co. (SISCOM) (NASDAQ: SATI) makers of the broadcast industry's most advanced newsroom automation system, today announced the availability of the new Digital Equipment Corp. VT-420 Dual Session terminal as the preferred user terminal on the SISCOM's NewsPro(TM) system.

Building on the success of the earlier VT-320 terminal, the new device affords performance, ergonomic and display features that make it the ideal terminal for today's demanding newsroom applications. Perhaps the most outstanding attribute of the VT-420 is its ability to interact with two sessions of NewsPro simultaneously over a single wire.

"The ability to work in two areas of NewsPro at the same time from any of the terminals on the system will be of tremendous benefit to our users," Bob Turner, SISCOM's director of marketing, commented. "Previously, 'Power Users' in broadcast production were required to use expensive work stations to achieve this functionality. Now all system users can have a dumb terminal with a high IQ."

Shipments of the new device have begun, and trade-up programs are available to existing users of NewsPro. SISCOM has 22 NewsPro installations worldwide and customers affiliated with the three major networks -- NBC, ABC and CBS -- as well as with cable-based television, radio broadcasters and independent broadcast organizations.

NewsPro automates the editorial and production control aspects of broadcast news operations and provides information management facilities for use by organizations in the print media, public affairs, press relations and image industries.

MIAMI (JULY 19) PR NEWSWIRE - Margo Nursery Farms, Inc. (NASDAQ: MRGO), today announces the company's sales and earnings for its second fiscal quarter ended June 30, 1990. The company's consolidated sales for the second quarter of fiscal 1990 increased by 30 percent to $2,825,000 compared to sales of $2,163,000 for the same period in 1989.

The company's consolidated sales for the first six months in fiscal 1990

were $4,877,000 which represents a 23 percent increase on sales of $3,974,000 for the same period in 1989.

Pre-tax earnings for the second quarter in 1990 were $465,000 compared to $171,000 in the prior year. Pre-tax earnings for the first six months in 1990 were $906,000 compared to $326,000 in the prior year.

The company's net earnings for the second quarter were $447,000 or $0.27 per common share compared to $135,000 or $0.08 per common share in the prior year.

The company's net earnings for the first six months in 1990 were $879,000 or $0.52 per common share compared to $266,000 or $0.16 per common share for the same period in the prior year.

#90200p6478 07/19/1990 ~PR Newswire

AUSTIN, TX (JULY 19) PR NEWSWIRE - The Continuum Company, Inc. (AMEX: CNU) announced that for the quarter ended June 30, 1990, net income was

$1,485,000 or $.17 per share compared to a loss of $297,000 or $.03 per share for the same quarter last year. Per-share amounts reflect the 2-for-1 stock split which was declared on May 17, 1990, for shareholders of record June 29, 1990.

Revenues for the most recent quarter increased 25 percent from $17,309,000 to $21,574,000 compared to last year, entirely due to increased service revenues.

While service revenues grew approximately $4.3 million compared to last year, service expenses other than marketing and administration grew approximately $2.7 million, resulting in an increased contribution of $1.6 million, or 37 percent of the revenue increase.

Marketing and administration expense decreased approximately $1.2 million due to the absence of legal expenses, which were significant during the first half of last year.

For the most recent quarter compared with the quarter ended March 31, 1990 net income declined approximately $1 million, or approximately $1.5 million on a pretax basis, resulting from decreased license revenue of approximately $1.1 million.

Additionally, profits from service activities decreased approximately $400,000 while revenues increased approximately $900,000.

Several factors caused expenses to increase more rapidly than revenues. In Austin, Continuum increased its computer capacity with an upgrade to an IBM 3090-500J. In Europe, the company moved to larger facilities in London and Paris as well as new facilities in Frankfurt. Compensation expense increased with total personnel increasing from 807 to 836 during the quarter.

The Continuum Company is an international consulting and computer services firm based in Austin, serving the needs of life insurance and other financial services companies for computer software and services.

#90200p6481 07/19/1990 ~PR Newswire

NEW YORK (JULY 19) PR NEWSWIRE - Reflecting its strong position in global consumer products, Colgate-Palmolive achieved record sales and earnings in the second quarter ended June 30, 1990.

Gross profit margin increased to 44.9 percent from 42.7 percent in the second quarter of 1 989, reflecting enhanced mix of products being sold,

effective pricing, and some reductions in raw material costs. EBIT increased 31 percent to 10.5 percent of sales versus 9.0 percent, in spite of the 1989 real estate gain. The higher tax rate of 39.9 percent versus last year's 32.7 percent reflects the higher effective tax rates in the Western Hemisphere and the non-deductibility of acquisition goodwill. Earnings dilution from recent acquisitions was approximately $0.10 per share. Acquisitions completed in the past year raised the company's overall volume growth in the quarter from 1 percent to 4 percent.

WORLDWIDE HOUSEHOLD AND PERSONAL CARE PRODUCTS

Net Sales (000)	1990	1989	Change
2nd Quarter	$1,267,906	$1,145,380	+11 percent
1st Half	2,415,468	2,221,744	+ 9 percent

Worldwide household and personal care products, Colgate's largest business segment, achieved sales growth of 11 percent and expanded operating profit margins in the second quarter.

Colgate-Western Hemisphere generated widespread growth in sales and profits. Mexico was particularly strong, and Venezuela benefited from improved general economic conditions compared to a year ago . Colgate-Brazil contributed to sales growth and, as expected, was less profitable than a year ago, due to the Brazilian government economic actions in March. In addition, the April 1990 acquisition of the Javex companies, Canada's leading bleach and liquid fabric softener business, contributed to regional sales growth.

Colgate-Europe also realized sales and profits growth, benefiting from currency appreciation versus the dollar, additional volume in new and existing products, and selling price increases. The pan-European launches of Colgate Gum Protection Formula toothpaste and Ajax Microemulsion cleaner are producing incremental business, as are shipments to Eastern Europe and the U.S.S.R.

Colgate-U.S. achieved sharply higher profits on planned lower volume and level sales revenue compared to the year-ago quarter. This unit is succeeding in its programs to control costs, reduce less profitable volume shipments, and improve overall spending effectiveness. Colgate- Far East/ Africa reported higher sales and earnings, with growth in Thailand and the Philippines offsetting slower economic conditions in Australia.

Specialty Marketing, consisting primarily of Hill's Pet Products, produced strong second quarter growth in sales, volume and profits. The recognized

leader in small animal dietary care, Hill's is rapidly developing its international business, particularly in Western Europe. In the U.S., Hill's targeted educational programs for veterinarians and the mid-1989 acquisition of the McKesson veterinary distribution company contributed to sales advances.

Hill's is investing to continue its growth. Upgraded packaging and improved palatability formulations are being introduced in the third quarter of 1990, and its new $80 million factory in Indiana will be brought on stream in 1991.

Colgate-Palmolive Company is a leading $5 billion global consumer products company focusing on the core businesses of oral care, body care, household surface care, fabric care and animal dietary care. Colgate is growing these core businesses through product development, geographic expansion and selective acquisitions.

#90200p6483 07/19/1990 ~PR Newswire

FORT LAUDERDALE, FL (JULY 19) PR NEWSWIRE - BankAtlantic, (NASDAQ-NMS: ASAL) in its effort to expand its commercial business, has introduced a special, interest-bearing "Sweep" checking account tailored to the needs of small businesses and professionals. No other bank in South Florida offers this type of "Sweep" account with a balance requirement as low as BankAtlantic's.

The new BankAtlantic "Sweep" account transfers money automatically from the business' checking account into an investment account once the available balance level exceeds $25,000.

"The closest thing that other banks offer requires minimum balances of $100,000 or $50,000, and a monthly fee of at least $145," John O'Neill, BankAtlantic's executive vice president-community banking, said. "In contrast, BankAtlantic offers its 'Sweep' account with a minimum balance of $25,000 and a low fee of only $12 per month.

"This new account can have an extremely positive impact on a small business," O'Neill said. For example, over a one-year period, $75,000 at eight percent will produce an additional $500 a month or $6,000 annually in income.

$75,000 is the difference between BankAtlantic's $25,000 threshold and other banks' $100,000 minimum. "That $6,000 in interest is found money," he said. "It's money that would not otherwise be realized."

"We're offering this product as part of our continuing commitment to provide needed services to our customers, and this is one more service that sets us apart from other banks in South Florida," O'Neill said.

"Most other competing institutions don't offer this type of product, and if they do, you've got to ask for it to get it," he said. "Typically, most banks would prefer to maintain small business checking as non-interest bearing accounts."

Since the "Sweep" account is tied to a checking account, BankAtlantic customers also receive automatic and constant tracking and transferring of excess funds, a comprehensive monthly statement, and checking account where business funds are taken care of on a daily basis.

"In our quest to become a full-service commercial operation, small businesses are obviously a niche for us to address," O'Neill said. "The product is profitable for us, and we find it to be an excellent core account to build relationships around."

SYRACUSE, NY (JULY 19) PR NEWSWIRE - Carlisle Companies Incorporated (NYSE: CSL) today reported net earnings of $6.6 million, equal to 82 cents per share, on record sales of $161.1 million for the second quarter ended June 30, 1990. In the corresponding period of 1989, the company reported net earnings of $11.1 million, or $1.38 per share, which included a nonrecurring gain of $5.9 million, or 74 cents per share, from the sale of its interest in a Japanese joint venture.

For the comparative six months, net earnings totaled $10.7 million, equal to $1.33 per share, compared with net earnings of $17.3 million or $2.14 per share. Year-ago results also included the above-mentioned nonrecurring gain recorded in the 1989 second quarter. Net sales for the six months amounted to $311.8 million versus $248.8 million a year ago.

As previously announced on July 6, Carlisle signed a preliminary agreement to purchase the Off-Highway Braking Systems Division of BFGoodrich Company.

OLDSMAR, FL (JULY 19) PR NEWSWIRE - Homestyle Buffet, Inc., (NASDAQ: HBUF) today reported record sales of $8,700,000 for the second quarter (12 weeks) ended June 20, 1990, a 69 percent increase over sales of $5,145,000 for the same quarter last year. Net earnings for the second quarter were $516,000, a 100 percent increase over net earnings of $258,000 last year.

Earnings per share in the second quarter of 1990 were 10 cents on 5,321,000 shares, as compared with seven cents per share on 3,914,000 shares in the same quarter last year. The increase in 1,407,000 shares was the result of public offerings of common stock in June 1989 and May 1990.

Barry M. Rowles, chairman, said that restaurants were opened in June of the second quarter, in Norfolk, Va. and Albany, N.Y., for a total of 24 restaurants at quarter-end. Thirteen were open at the end of the second quarter last year.

Rowles stated that four more restaurants will be opened in the third quarter, including the 25th unit that opened on June 29, 1990 in Philadelphia. The other locations will be Virginia Beach, Va. and Harrisburg and Reading, Pa. The Virginia Beach restaurant will be the first utilizing a new 'scatter' service system design with nine food islands replacing the company's usual five buffet lines.

The company successfully completed a public stock offering in May, 1990, selling 1,100,000 shares with net proceeds of approximately $9,450,000.

#90200p6493 07/19/1990 ~PR Newswire

WARWICK, RI (JULY 19) PR NEWSWIRE - Dr. Kenneth E. Blackman, president of Applied DNA Systems, Inc. (NASDAQ: ADNA, ADNAZ) today announced that its wholly owned subsidiary, Analytical Biosystems Corporation (ABC) has entered into an exclusive option agreement with Adria Laboratories Division of Erbamont Inc. Adria has an exclusive option to enter into an exclusive sales agency agreement for the marketing of ABC's chemosensitivity assay, known as the Fluorescent Cytoprint Assay (FCA), in the United States and Canada. Adria is a leader in the North American oncology market and is a broad-based pharmaceutical company with approximately 100 oncology specialty sales representatives servicing the

North American market.

During the option period, Adria will conduct additional clinical trials of the FCA. The option agreement also allows Adria to market the FCA in selected territories. Adria and ABC will negotiate a long-term sales and marketing agreement during the option period.

Blackman stated, "The relationship with Adria brings to ABC seventeen years of marketing experience in the chemotherapy marketplace. Adria has a strong research team that has successfully brought to the market several major drugs which generate annual sales of over $200 million. In particular, Adriamycin(R), a chemotherapeutic drug developed and introduced by Adria in 1973, has been for the past several years one of the most widely used chemotherapeutic drugs in the United States. We believe our assay and technology will enhance Adria's range of products and services offered to the oncologist."

The FCA, which was developed at Brown University by Dr. Boris Rotman, is a patented in vitro assay which measures the effectiveness of specific chemotherapeutic drugs in destroying cancer cells. To date, clinical trials compiled by ABC indicate approximately a 95 percent accuracy in determining when tumors are resistant to particular chemotherapeutic drugs and approximately an 88 percent accuracy in identifying the chemotherapeutic drugs that will be effective.

PROVIDENCE, RI (JULY 19) PR NEWSWIRE - Thomas J. Skala, senior executive vice president for the past four years, has been elected president of Fleet Bank, Rhode Island's largest financial institution, it was announced today by Terrence Murray, chairman and chief executive officer of the bank's parent company, Fleet/Norstar Financial Group (NYSE: FNG).

Murray also announced that Robert J. Higgins was named chairman of Fleet Bank, in addition to his position as chief executive officer. Higgins had been president of the bank since 1986 and last year was given added responsibility as the bank's chief executive officer. Higgins also is an executive vice president of Fleet/Norstar. Murray, in addition to his corporate roles, had been chairman of Fleet Bank since 1982.

Murray, who said that Higgins "has demonstrated outstanding leadership and talent in both his bank and corporate positions," had similar praise for Skala.

"Tom Skala is particularly well-qualified for his new role as president of Fleet Bank, Rhode Island's leader in serving both consumers and business," Murray said. "Since joining the bank in 1965, he has proved his management ability in both of these areas, especially as an outstanding and highly respected commercial lender.

Tom has lived in Rhode Island most of his life, he's a graduate of Providence College, chairman of the Greater Providence Chamber of Commerce and he's a genuine community leader. Tom's broad banking experience makes him the natural choice to succeed Bob Higgins as president of Fleet Bank."

Skala, 46, has headed Fleet Bank's Domestic Lending/Corporate Services Division since 1982. He joined the bank in 1965 and served in the branch system and as a credit officer before being named a vice president in 1975.

He was placed in charge of the New England Division in 1981, was named an executive vice president in 1982, and a senior executive vice president of the bank in 1986. Skala is a member of the bank's Assets and Liabilities Committee, chairman of the Senior Credit Committee and the Civic Affairs Committee, and a member of the bank's Executive Committee.

A native of Springfield, Mass., Skala serves on the Capital Campaign Committee for Meeting Street School. He is chairman of the Greater Providence Chamber of Commerce; a member of the Executive Committee, Catholic Charities Fund of the Diocese of Providence; a member of the board of LaSalle Academy, Providence; and a member of the board of Leadership Rhode Island, a Greater Providence Chamber of Commerce affiliate.

LISLE, IL (JULY 19) PR NEWSWIRE - Citing a general strength of orders and continued spending at planned levels in support of new strategic products, Tellabs, Inc. (NASDAQ: TLAB), reported today higher sales and lower earnings for the second quarter and first half of 1990.

Sales for the second quarter, ended June 29, were $51,603,000, up 14.1 percent when compared with sales of $45,237,000 for the same period in 1989. Sales for the first six months of the year were a record $100,873,000, a 17.8 percent increase over sales of $85,642,000 a year earlier.

Net income for the second quarter was $2,131,000, a 26.2 percent decrease from $2,888,000 a year earlier. For the first six months, net income decreased 12.8 percent to $4,673,000 from $5,356,000. Earnings per share of common stock were 17 cents, compared to 23 cents for the second quarter of 1989.

"Sales were strong across all product lines, including robust sales of data communications products in the United States and Canada," said Tellabs President Michael J. Birck. "This general strength in orders was offset by operating expenses, which while higher than in previous years, are within planned levels. Moreover, these expenses are being incurred to bring to market new products that support the company's strategic direction."

During the second quarter, Tellabs' first SONET-based TITAN digital cross-connect systems were shipped to three field-trial sites across the United States. General availability of the TITAN cross connects is scheduled to begin during the latter part of this year.

"We have seen great interest in this product line from many of our primary customers," said Birck. "The TITAN products will provide the platform for much of our growth in the '90s."

Tellabs designs, manufactures, markets and services voice and data equipment. The company's products are used internationally by telephone companies, interexchange carriers, governments and businesses.

BETHESDA, Md. (JULY 19) PR NEWSWIRE - The U.S. Postal Service has awarded Martin Marietta Corporation (NYSE: ML) a $138 million contract to produce 614 automated sorting machines.

The contract is for a new, high-speed sorting machine using bar code technology to process mail by ZIP code. The Delivery Bar Code Sorter will be able to process letter mail by automatically reading and sorting preprinted bar codes.

The new machines also will be able to process mail without bar codes. Operators at two workstations would input codes that instruct the automated sorter where to send the non-bar-coded mail.

The sorting machine contract is part of the U.S. Postal Service's multiphase initiative to speed the processing of mail and improve service through automation.

The machine was developed jointly by Martin Marietta Information Systems Group and National Presort Inc. (NPI) of Dallas. NPI is a leading technology firm in the design and development of automated mail processing equipment.

Martin Marietta Information Systems Group will produce the machines at its new manufacturing facility in Albuquerque, N.M. First delivery will be in late summer of 1991.

This is Martin Marietta's second production contract for mail-sorting machines. In October 1989, the company was awarded a U.S. Postal Service contract to produce 267 sorting machines for flat mail. That $51 million contract also includes an option for 200 additional flat sorting machines.

#90200p6505 07/19/1990 ~PR Newswire

NEW HAVEN, CT (JULY 19) PR NEWSWIRE - Southern New England

Telecommunications Corporation (NYSE: SNG) announced today consolidated earnings for the second quarter of 1990 of $36.7 million or 61 cents per share. Compared with $44.9 million or 72 cents per share for the second quarter of 1989, which excludes the one-time gain from the sale of SNET's interest in LIGHTNET, this represents a decline in earnings per share of 15.3 percent. SNET sold its interest in its LIGHTNET fiber optic partnership during second quarter 1989, which added 30 cents per share to that quarter's results.

Walter H. Monteith, Jr., SNET chairman and CEO, said, "The downturn in the Connecticut economy has continued, dampening revenue growth. Clear evidence of this is in the flat growth we are seeing in toll and WATS message volumes. The worsening economy as well as intense price competition also continued to put pressure on SNET Systems' profit margins and negatively impacted that subsidiary's results."

Consolidated revenues and sales for the quarter declined 3.1 percent to $403.8 million from $416.9 million in the second quarter of 1989. Southern New England Telephone's revenues, which were $346.7 million for the second quarter, compared with $354.9 million a year ago, were affected by the loss of a large operator services contract that ended last year and by a five percent reduction in telephone rates, effective Jan. 1, 1990, that reflected the elimination of the gross earnings tax on telecommunications services. Revenues for non-telephone subsidiaries continued to grow with the exception of SNET Systems, which reported $27.6 million in sales versus $36.6 million in the second quarter last year.

Costs and expenses for the second quarter, excluding interest, were $316.7 million, compared with $320.0 million for the same quarter last year. Although some expenses rose, such as depreciation expense, mainly because of increased investment in Connecticut's telecommunications network, they were more than offset by the elimination of the gross earnings tax and reductions in employee-related expenses resulting from the company's cost-cutting measures. Interest expense went up 34.7 percent to $26.8 million for the quarter largely because of short-term borrowing to fund the last gross earnings tax payment and also because of expenses related to SNET's Employee Stock Ownership Plans.

Headquartered in New Haven, SNET is an independent telecommunications company that offers network services, cellular mobile phone service, communications equipment, and information management systems.

#90200p6506 07/19/1990 ~PR Newswire

WILMINGTON, DE (JULY 19) PR NEWSWIRE - Wilmington Trust Co. (NASDAQ: WILM) reported that net income for the second quarter rose 16 percent to $16.0 million, or $.92 a share, compared with $13.8 million, or $.78 a share, a year ago.

Net income for the first six months also grew 16 percent to $30.6 million, or $1.76 a share, versus $26.5 million, or $1.50 a share, last year.

The improvement was led by significant growth in noninterest income, which increased $3.0 million, or 16 percent, to a record $22.2 million.

The three major operating components of noninterest income reached new quarterly highs: trust and investment management fees rose 20 percent to $15.9 million, service charges on deposit accounts increased 23 percent to $2.4 million and other operating income also grew 23 percent to $3.8 million. Securities gains totaled $6,000 versus $836,000 a year ago.

Net interest income for the second quarter rose 6 percent to a record $30.4 million. The average level of loans outstanding increased 11 percent to an all-time high of $2.4 billion, and the investment portfolio grew 40 percent to $784.4 million. Net interest margin was 4.28 percent versus 4.82 percent in the second quarter a year ago.

Operating expenses for the quarter increased 5 percent to $29.8 million over the same period last year. Employment costs, the largest component, grew 6 percent, while all other expenses rose 5 percent.

The provision for loan losses for the second quarter totaled $2.4 million versus $2.75 million a year ago. This brought the reserve to a record $36.9 million, or 1.51 percent of loans outstanding, at June 30, 1990, compared with $34.2 million, or 1.57 percent of loans, on the same date last year.

The reserve was equal to 5.3 times total nonaccruing loans, which stood at $7.0 million on June 30. This compares with 3.7 times a total of $9.3 million on the same date a year ago.

For the first six months, return on assets was 1.79 percent versus 1.82 percent for the same period last year. Return on equity reached 23.79 percent, up from 22.60 percent last year.

On June 30, 1990, assets totaled $3.6 billion, up 10 percent over the year before, total loans rose 12 percent to $2.4 billion and deposits increased 13 percent to $2.7 billion.

The Wilmington Trust Board of Directors declared the regular quarterly dividend of $.36 a share, payable August 15, 1990, to stockholders of record August 1, 1990.

DETROIT (JULY 19) PR NEWSWIRE - ANR Pipeline Company, a subsidiary of The Coastal Corporation (NYSE: CGP), today announced that it has completed construction of its Lebanon Extension and will be able to move gas through the new pipeline, as anticipated, on Aug. 1, 1990.

"Earlier this week, we began the hydrostatic testing of the entire Lebanon line," said William J. Haener, executive vice president and chief

operating officer of ANR Pipeline Company. "That includes the 37-mile segment in Indiana, which is solely owned by ANR, as well as the 61-mile segment in Ohio, which is jointly owned with Panhandle Eastern Corporation."

Designed to move additional volumes of natural gas to the incremental market in the Northeast, the Lebanon Extension will have three meter stations. Those connecting the new pipeline with CNG Transmission Corporation and Texas Eastern Corporation will be in operation on Aug. 1.

The third meter station, which will link the Lebanon Extension with Columbia Gas Transmission Corporation, should be completed by Sept. 1, 1990.

"ANR will be able to provide both firm and interruptible transportation services for natural gas shippers on its new Lebanon Extension at the beginning of next month," confirmed Haener. "Shippers wishing to request service should contact ANR's Director of Transportation and Exchange Craig Fishbeck, at 313-496-2148."

The Coastal Corporation is a Houston-based energy holding company. Coastal has consolidated assets of $8 billion and subsidiary operations in natural gas transmission and storage, oil and gas exploration and production, refining and marketing, coal and chemicals, and independent power production.

ERIE, PA (JULY 19) PR NEWSWIRE - Zurn Industries Inc. (NYSE: ZRN), a leading designer and manufacturer of environmental waste-to-energy equipment and systems and water control products, announced today that net income for the first quarter ended June 30, increased 12 percent to $6,725,000 ($.54 per share) from $6,012,000 ($.49 per share) for the same period a year ago.

Sales totaled $170,308,000, up 30 percent from $130,627,000 reported last year.

Backlog at June 30 was up 29 percent to a record level of $515,000,000 from $399,000,000 a year ago, and increased 15 percent from the previous record level of $446,000,000 at March 31, 1990. Waste-to-energy segment backlog increased 29 percent from a year ago to $319,000,000 while backlog for the water control segment was up 43 percent to $164,000,000 for the same period.

Zurn Chairman George H. Schofield noted that, "Performance of the water control group was particularly encouraging with sales for the quarter 19 percent above a year ago in markets with continuing good activity." He added, "Waste-to-energy sales, while up 61 percent from last year's first quarter, was driven in large part by the status of construction contracts in progress as of the end of the period, rather than the level of construction activity, and was not indicative of expectations for the year. Total company sales for the first half are expected to be in the range of 15 percent greater than the prior year six-month period."

CHICAGO (JULY 19) PR NEWSWIRE - Inland Steel Industries, Inc. (NYSE: IAD) today reported consolidated net income for the 1990 second quarter of $20.0 million, or 42 cents per common share, up modestly from the first quarter of the year, but substantially below the $45.3 million, or $1.25 per share, earned in the second quarter of 1989. The year-ago quarter included a pre-tax charge of $17 million, or 30 cents per common share, to settle a claim by a supplier.

Sales for the quarter declined 9 percent to $1.0 billion from $1.1 billion a year earlier.

For the first six months of 1990, net income fell 59 percent to $38.7 million from $94.7 million. Earnings per common share dropped by a greater percentage, to 79 cents from $2.62 in the like 1989 period, due to dividend requirements on the new Series E and F preferred stock. Sales declined 9 percent to $2.0 billion from 1989's record level of $2.2 billion.

Inland's integrated steel operations generated operating profit of $29.7 million for the three months ended June 30, compared with $76.9 million in the year-earlier quarter. Sales were off 11 percent to $591.0 million. Steel shipments of 1.24 million tons were 8 percent below those of the 1989 quarter, due in part to the integration of I/N Tek with the company's steelmaking operations. Average selling prices were off by 3 percent from a year ago, but were unchanged from the first quarter.

For the first half of 1990, the steel segment reported operating profit of $60.3 million, down from $136.4 million in the year-ago half. Sales of $1.1 billion compared with $1.3 billion in 1989. Six month operating profit for the service center segment was $21.7 million, compared with $53.9 million a year earlier. Sales in that segment of $955.9 million were down from $1.0 billion in the 1989 period.

As of June 30, the company had repurchased approximately three million shares of its common stock at a cost of $100 million as part of the $185 million buy-back program initiated last December.

The company's wholly owned Inland Steel Co. subsidiary reported net income for the first half of 1990 of $24.4 million, compared with $84.4 million in the 1989 period.

DALLAS-FORT WORTH AIRPORT, TX (JULY 19) PR NEWSWIRE - American Airlines announced today it has flown its first passenger-carrying flights using an advanced onboard system designed to help avoid inflight collisions. The regularly scheduled flights carried passengers from Dallas-Fort Worth to San Antonio, and back, aboard an American 757 jet.

American recently received FAA approval to begin using the innovative device known as TCAS (Traffic Alert and Collision Avoidance System). The carrier will spend more than $130 million and nearly 700,000 man-hours installing the equipment in its entire fleet by 1993. American will have TCAS installed in more than 20 percent of its planes by the end of 1990. The work is being performed at American's Maintenance and Engineering Center in Tulsa, Okla.

"American is pleased to have passed this milestone," said Robert W. Baker, American's executive vice president-operations. "TCAS is a terrific safety enhancement, and we intend to be an industry leader in implementing it."

American will conduct an inflight demonstration of TCAS for the news media on Friday, July 20.

ST. LOUIS (JULY 19) PR NEWSWIRE - Trans World Airlines's Child Care Centers at Lambert-St. Louis International Airport and New York's Kennedy International Airport have provided an important service to both parents and children during this heavy summer travel season, TWA announced today. The staff at these centers have ensured the safe transfer of hundreds of unaccompanied children throughout the summer.

TWA's Child Care Program offers unaccompanied children, ages 5 through 11,

a room in which they wait for their connecting flight. Each room contains a refrigerator, beverages, television, chalkboards and a wide assortment of books and games.

Adult passengers pay $25 per segment at the time of ticket purchase for the child.

The program works as follows: a parent or guardian remains at the point of origin until the child's flight has departed. A flight attendant watches the child in flight and then gives him or her to a customer service agent at Lambert or Kennedy who stays with the child until his or her flight departs. At the point of destination, the child must be met by a parent or guardian.

Any child traveling on TWA, Trans World Express or shared USAir/TWA flights can take advantage of the Child Care Program.

St. Louis, the airline's domestic hub, has one center while Kennedy Airport, with separate domestic and international terminals, has two. More than 1,000 children passed through the Kennedy center in June while the St. Louis center averaged more than 500 per day.

TWA and its commuter affiliates serve more than 125 cities throughout North America, Europe, the Middle East and Africa.

#90200p6529 07/19/1990 ~PR Newswire

BEAVER, PA (JULY 19) PR NEWSWIRE - Michael Baker Corp. (AMEX: BKR) today reported new second quarter records for net income and total contract revenues.

Second quarter net income was $673,689, or 24 cents per share, on total contract revenues of $28,844,030. This compares with net income of $475,556, or 27 cents per share, on total contract revenues of $25,945,964 for the second quarter of 1989.

Net income for the first six months was $1,042,471, or 37 cents per share, on total contract revenues of $55,458,093. For the first six months of 1989, net income was $715,228, or 40 cents per share, on total contract revenues of $50,164,176.

According to Donald J. Nelson, senior vice president and chief financial officer, net income for the quarter was up 42 percent over the previous year's second quarter while operating income rose 14 percent for the period, both on an 11 percent increase in total contract revenues, with the company posting its 25th consecutive profitable quarter.

Nelson also noted that per-share earnings, although slightly lower than for the corresponding 1989 periods, are based on average shares outstanding of 2,813,214 - 57 percent greater than the average of 1,793,214 a year earlier, prior to the stock offering of July 1989.

Funded backlog at the end of the period stood at $77 million, the same as in the corresponding 1989 quarter. However, total backlog, which includes that portion of contracts for which options are still to be exercised, as well as the company's portion of funded joint venture contracts, is up 15 percent to $168 million, compared to $146 million a year ago.

Commenting on the second quarter results, Vice Chairman, President and CEO Richard L. Shaw noted that performance was encouraging, and that the outlook for the third and fourth quarters is favorable.

"As we had reported previously, our civil engineering work on long-line fiber optic telephone lines has substantially diminished. However, the impact has been largely offset by other new work added and by important contract modifications in the Facilities Planning and Transportation groups for additions to existing contracts."

Said Shaw, "We view the remainder of the year with optimism. We have recently signed a letter of intent for the acquisition of MO Inc., a Houston-based company with current revenues in excess of $25 million.

#90200p6535 07/19/1990 ~PR Newswire

PHOENIXVILLE, PA (JULY 19) PR NEWSWIRE - The West Co. Inc. (NYSE: WST) announced today that its board of directors had amended the company's bylaws to exclude West from the disgorgement provision of the Pennsylvania Business Corporation law.

This provision can require that an organization which fails in a takeover

attempt forfeit any profits made from the sale of the target company's shares.

The West board took no action on the law's provisions relating to the exercise of a board's fiduciary duty or the control-shares provision.

Rene Guerster, president and chief executive officer, said, "The board believes that the disgorgement provision would not contribute to the enhancement of shareholder value. The directors elected to remain within the fiduciary duty and control share provisions because these provisions are consistent with their responsibility to shareholders as well as other provisions of the company's Articles of Incorporation."

The West Co. Inc. is the premier supplier of specialized packaging systems and components for the worldwide pharmaceutical and hospital supply/medical device industries and the domestic consumer products industry, with more than 85 percent of its revenue generated by the health care markets. West's products include stoppers, closures, containers, medical device components and assemblies made from elastomers, metal, plastic, glass and combinations thereof, plus related packaging machinery.

BALTIMORE, (JULY 19) PR NEWSWIRE - Legg Mason, Inc. (NYSE: LM) announced today operating results for its first fiscal quarter ended June 30, 1990. Revenues were $60,138,000 compared to $59,403,000 in the corresponding quarter of 1989. Net earnings rose 4 percent to $3,180,000 from $3,054,000 in the prior year. Earnings per share increased to $.37 from $.36.

Commenting on the company's operating results, Raymond A. Mason, chairman and chief executive officer, said:

"In the June quarter, revenues from Legg Mason's investment advisory activities continued to show healthy gains, rising 19 percent from levels in the corresponding period a year ago. These gains more than offset a modest decline in securities commission revenues. Assets under management in Legg Mason's mutual funds and investment advisory subsidiaries now exceed $8.5 billion."

Legg Mason, Inc., headquartered in Baltimore, is a holding company which provides securities brokerage, investment advisory and other financial services through its wholly owned subsidiaries.

#90200p6537 07/19/1990 ~PR Newswire

PRESTON, MD (JULY 19) PR NEWSWIRE - Preston Corporation (NASDAQ: PTRK) announced today its operating results for the quarter ended June 30, 1990. Net income was $1,238,000 or $.21 per share vs. net income of $2,133,000 or $.37 per share for the same period in 1989. Revenues for the quarter ended June 30, 1990, were $167,382,000 compared to $156,578,000 for the second quarter of 1989.

For the six months ending June 30, 1990, net income was $1,023,000 or $.18 per share compared to $3,210,000 or $.55 per share for the same period of 1989. Revenues for the first six months of 1990 were $328,399,000, up from $309,007,000 in the first half of 1989.

"We are pleased with the progress made by Preston Trucking Company during the second quarter of 1990," said William B. Potter, president and chief executive officer. "The improved quality of service has allowed Preston Trucking to increase freight density and market share in its regional markets. During the quarter, Saia Motor Freight continued to produce superior operating results. Revenues for Saia increased 21.7 percent over the same period in 1989, while operating margins increased from 14.8 percent to 15.5 percent."

Potter said that "each of the regional carriers experienced continued pressure on prices throughout the second quarter. Higher wage and fringe costs, due predominantly to a 3 percent contractual increase in April at Preston Trucking and to higher workers' compensation and group health expenses, resulted in lower earnings for the quarter."

Second half earnings should improve as a result of higher tonnage levels and the 4 percent price increases which became effective in June and July by Preston, Saia and Smalley.

Preston Corporation is a holding company which, through its subsidiaries, transports freight by truck for a wide range of manufacturers, wholesalers and retailers. The subsidiaries include Preston Trucking Company, Inc., of Preston, Md.; Saia Motor Freight Line, Inc., of Houma, La.; Pioneer Transportation Systems, Inc., of Hurlock, Md.; Reeves Transportation Company of Calhoun, Ga.; and Smalley Transportation Company of Tampa, Fla.

#90200p6538 07/19/1990 ~PR Newswire

HOUSTON (JULY 19) PR NEWSWIRE - American General Corporation (NYSE: AGC) today announced second quarter net income of $198.0 million, or $1.65 per share, compared to $190.0 million, or $1.47 per share, reported in the second quarter of 1989. Operating earnings, which exclude realized investment gains, increased 26 percent to $.98 per share in the second quarter compared to $.78 per share in the second quarter of 1989. Total shares outstanding were 119.4 million during the second quarter of 1990, compared to 131.8 million for the 1989 period, reflecting the effect of American General's share repurchase program.

In commenting on the proposed sale of the company, announced at the May 2nd shareholders' meeting, Harold S. Hook, chairman and chief executive officer said, "We are pleased with the strong interest expressed by both domestic and international prospective buyers. In short, the sale process is proceeding according to our expectations and those of our investment advisers -- First Boston and Goldman Sachs."

In commenting on earnings, Hook added, "The record second quarter results demonstrate that American General has achieved a new level of earnings from ongoing operations. This new level reflects both the major restructuring completed in 1989 and improvement in business segment operations. Especially noteworthy are the 65 percent second quarter gain in consumer finance and the 28 percent improvement in the retirement annuity business. And special recognition should be given to our employees and sales representatives, who have achieved these record results in the face of the added stress and requirements associated with the pending sale."

Second quarter results in both 1989 and 1990 were comparable, with one-time factors largely offsetting each other. The principal 1989 one-time factor was the sale of the property-liability insurance operation which resulted in a gain of $86.6 million, or $.65 per share. The principal factor in 1990 was the sale of approximately one-half of the

company's common stock portfolio, which resulted in realized investment gains of $80.5 million, or $.67 per share. The sale of the common stock portfolio is designed to stabilize asset values by reducing the company's exposure to stock market volatility while the sale of the company proceeds.

For the first six months of 1990, net income was $305.1 million, or $2.55 per share, compared to $287.2 million, or $2.24 per share, for the equivalent 1989 period. Operating earnings, which exclude realized investment gains, were $220.0 million, or $1.84 per share, for the first half of 1990 compared to $190.4 million, or $1.51 per share, for the same 1989 period.

American General Corporation is an insurance and financial services holding company headquartered in Houston.

#90200p6541 07/19/1990 ~PR Newswire

MADRID, SPAIN (JULY 19) PR NEWSWIRE - During the first half of 1990, Banco Santander (NYSE: STD) had a net income of Ptas. 35,075 million ($342 million), a 21.48 percent increase as compared to the same period the previous year, it was announced today.

"The increase in income is highly satisfactory, having been obtained at a time of deep change for the Spanish banking community," according to Emilio Botin, chairman of the board. "Interest bearing checking accounts, pioneered among the major Spanish banks by the Santander Group, have become widespread and have caused an increase in the cost of customer deposits with the consequent effect on the financial margin. Offsetting this, the Santander Group has registered a very considerable increase in customer deposits, rising by Ptas. 686,626 million in the September '89 to June '90 period," he added.

Banco Santander accounted for more than 40 percent of the total growth of traditional bank deposits in Spain during the period. Furthermore, there was a considerable increase in the bank's private customer base.

"Another significant feature of the first half of the year has been the sharp rise in computed equity, from Ptas. 313,102 million to Ptas. 378,337 million ($3.7 billion) as of June 30, 1990, not counting the recent placement of $400 million of subordinated perpetual bonds," Botin said. "The group has a solid 14.1 percent capital base, far above the minimum 8 percent established by the Bank for International Settlements of Basel. This will allow the group to continue growing with no need for recourse to

our shareholders or to the international capital markets at less favorable times than at present. Our current 24.85 percent ROE has been unaffected by this policy."

"I feel optimistic about the continued progress of the group's results for the second half of the year. The margin for our asset's growth, within the limitations set by the Bank of Spain, will be slightly higher in the second half of the year and the strategy of diversifying our financial activities, both in Spain and abroad, is achieving very positive results. A major contribution to this result has come from the group's banks abroad which have registered a 40 percent increase in earnings, a trend I hope will continue through the second half of the year," the chairman said.

"Additionally, the business generated by Banco Santander's new clientele structure will help to consolidate the increase in profits achieved by the group in the first half of the year and allow for a comparable increase in the interim dividend, which as usual will be payable in October," he added.

The Santander Group's net income for the first half of 1990 increased 21.48 percent as compared to the same period of the previous year. The anticipated narrowing of the financial margin has been partially offset by the increase in "other ordinary revenues," primarily fee income.

PHILADELPHIA (JULY 19) PR NEWSWIRE - Shipments of California food products and beverages to the Northeast have increased 21 percent in the first five months of operation of a cooperative service by Consolidated Rail Corp. (NYSE: CRR), Santa Fe Railway and Modesto & Empire Traction Co. (M&ET).

The service, "Coast Connection," provides five-day-a-week, expedited boxcar service from California to East Coast and Midwest consumer markets. The "Coast Connection" improves transit time from California by two days or more. Primary customers include grocery, perishable and beverage distributors.

Austin Rattigan, general manager-traffic and transportation for Beatrice/Hunt-Wesson at Fullerton, Calif., encouraged the three railroads to set up the "Coast Connection" service. "We saw the need for an improved schedule with consistent performance, and we have been delighted with our experience to date with the new train," Rattigan said. "If railroads are to be successful in this competitive era, I firmly believe

their service has to be faster, consistent and reliable, and with the 'Coast Connection' they are providing that and doing it well."

"The success of this cooperative service proves that through team efforts, connecting railroads can provide customers with the consistent, reliable and economical transportation product necessary to increase traffic on the rails," said Gordon H. Kuhn, Conrail's senior vice president-marketing and sales.

"The coordinated, coast-to-coast service provides a quality transportation product and it is meeting our customers' expectations," said Don Skelton, Santa Fe's vice president-marketing and sales. "Service is why more shippers are using the 'Coast Connection'."

"By pre-classifying car loads and simplifying the transcontinental move, the M&ET is pleased we can help meet the many shipper demands for this type of service," said James L. Beard, M&ET president and chief executive officer.

To explore the advantages of consistent, cost-effective transportation of perishables, grocery products and beverages, customers may contact their M&ET, Santa Fe or Conrail account representative or call M&ET at 219-524-4631, Santa Fe at 800-727-ATSF or Conrail at 800-932-9292.

COSTA MESA, CA (JULY 19) PR NEWSWIRE - Procom Technology Inc., technology leader in the storage arena, today announced an exclusive national distribution agreement with Merisel to distribute the full line of Procom Technology's advanced storage subsystems to United States and international resellers. Merisel will offer Procom Technology storage products for IBM PS/2, AT, XT and compatible systems, laptop computers and Apple's entire Macintosh line.

Procom Technology's line will be sold through Merisel's Advanced Products Division. Among the Procom Technology products Merisel will distribute are external 3.5 inch and 5.25 inch floppy drives for IBM PS/2's, laptops, XT, AT and compatible systems, as well as the Enabler Series of SCSI host adapters for Micro Channel and Classic Channel machines. Merisel will also distribute Procom Technology's entire line of external SCSI periphals which includes fixed and removable drives, erasable optical drives, CD-ROM drives, DAT and tape backup devices.

Procom Technology's products provide end-users with highly reliable,

leading-edge peripheral devices. Procom Technology products are available immediately through Merisel.

Procom Technology was founded in 1987 as a leading designer and manufacturer of storage periphals for the microcomputer industry. Under the leadership of the current executive staff the company has expanded its focus to become a leader in the supply of board level products for PCs and Apple systems.

Procom Technology has pioneered and expanded the concept of kitted product distribution, where hardware and integrated software, cables and necessary documentation are attractively bundled together to provide resellers with powerful "plug and play" solutions for their storage requirements.

Merisel (NASDAQ: SOFS) is one of the largest distributors of microcomputer hardware and software products to computer resellers worldwide. The company stocks over 7,000 products from more than 400 hardware and software vendors for sale to 35,000 computer resellers in the United States. International operations account for 30 percent of sales and consist of seven wholly owned subsidiaries serving resellers in Canada, Europe, Latin American and Australia. The company supplies products for microcomputer platforms including Apple Macintosh, IBM and compatibles, and a variety of UNIX systems, in addition to offering a wide range of services to help resellers support these products.

CONTACT: Debbie Mercer of Procom Technology Inc., 714-549-9449, ext. 233; or Cathy Quattrocchi of Merisel, 213-615-6483.

HOUSTON (JULY 19) PR NEWSWIRE - Vista Chemical Company (NYSE: VC) today announced earnings per share of $1.93 and net income of $20.4 million for the third fiscal quarter of 1990, ended June 30, 1990. Third-quarter results were up 26 percent from second quarter fiscal 1990 results. This improvement was due primarily to strengthened margins from increased product prices and lower feedstock costs, partly offset by lower volumes.

Sales for the quarter just ended were $182.9 million, compared to $202.3 million reported for the same quarter last year. Earnings per share for last year's third fiscal quarter were $2.36 and net income was $35.1 million. The decline in sales from the prior-year quarter reflects an 18 percent decline in product prices, partly offset by an 8 percent increase in sales volumes. Higher interest expense resulting from the financial restructuring completed in July 1989 also contributed to lower net income. On a per-share basis, the higher interest expense was offset by the reduction in shares outstanding resulting from stock repurchases in fiscal 1989.

"Third-quarter results reflect a continued strong demand for all our products, especially in our surfactants and specialties product line," said John D. Burns, chairman, president and chief executive officer.

Earnings per share for the first nine months of fiscal 1990 were $4.79, compared to $6.61 per share reported for the first nine months of fiscal 1989. Net income for the nine months ended June 30 was $50.8 million, compared to $98.8 million for the same period last year. Sales for the nine-month period were $536.7 million, compared to $592.0 million reported for the first three quarters of fiscal 1989.

LIMERICK, Pa. (JULY 19) PR NEWSWIRE - Teleflex Incorporated (AMEX: TFX) today reported that revenues for the second quarter ended July 1, 1990, increased by 28 percent to $116,061,000 compared to $90,606,000 for the same three months last year. Net income increased 6 percent to $7,632,000 or 70 cents per share, for the quarter vs. $7,220,000, or 66 cents per share, for the same period in 1989.

Revenues for the first six months of 1990 increased 24 percent to $225,254,000 compared to $180,974,000 last year. Net income increased 6 percent to $14,905,000, or $1.36 per share, compared to $14,043,000, or $1.29 per share, for the same period in 1989.

In commenting on the company's second-quarter results, Lennox K. Black, chairman, said, "While some of our markets have been affected by the soft economy, revenues from our non-cyclical businesses were unusually robust. In the second half, we anticipate weakness in the automotive and marine markets to be more than offset by strength in our medical and industrial groups."

Teleflex Incorporated is a company which solves engineering problems by the development and application of new specialized technologies.

BEVERLY HILLS, CA (JULY 19) PR NEWSWIRE - Hilton Hotels Corp. (NYSE: HLT) announced today that it has filed a registration statement with the Securities and Exchange Commission for a proposed offering of Liquid Yield Option(TM) Notes ("LYONs(TM)") due 2005. The LYONs are zero coupon, subordinated notes, convertible into common stock of Hilton. The company will have the option of satisfying any conversions in either cash or stock at the time of conversion. Merrill Lynch Capital Markets will act as sole underwriter of the offering.

The offering is expected to result in proceeds to Hilton of approximately $270 million, which will be used for general corporate purposes, including possible repayment of outstanding indebtedness. The LYONs have a principal amount at maturity of $650 million, which represents a 6.0 percent yield to maturity.

Hilton is engaged primarily in the ownership and management of hotels and hotel-casinos and is one of the largest lodging companies in the world. At July 1, 1990, Hilton had a network of 264 hotels with approximately 94,000 rooms, including owned and partially owned, managed and franchised properties.

A registration statement relating to these securities has been filed with the Securities and Exchange Commission but has not yet become effective. These securities may not be sold nor may offers to buy be accepted prior to the time the registration statement becomes effective. This announcement shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of these securities in any state in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state. The offer of these securities shall only be made by means of a prospectus.

#90200p6561 07/19/1990 ~PR Newswire

KANSAS CITY, MO (JULY 19) PR NEWSWIRE - Torotel, Inc (AMEX: TTL), the manufacturer of magnetic electronic components, announced substantially higher sales and earnings for the three months ended April 30, 1990, resulting in slightly better performance for the fiscal year.

Net sales for the fiscal year ended April 30, 1990, were $9.2 million compared with $9.1 million for fiscal 1989. Operating earnings were up nearly 15 percent to $670,000 compared with $585,000 for the previous fiscal year. Net earnings for the latest year increased 10 percent, to $337,000 or 13 cents per share, compared with $305,000 or 12 cents per

share for the prior fiscal year.

For the fourth quarter, net sales increased 45 percent to $3.2 million, compared with $2.2 million for the same period last year. Operating earnings reached $835,000, up nearly 600 percent from the $121,000 attained in last year's fourth quarter. Net earnings for the three months were $800,000 or 30 cents per share, compared with $46,000 or 2 cents per share for the last quarter of fiscal 1989. Earnings in the 1990 quarter included a gain of $83,000 (3 cents per share) from the sale of three acres of unimproved land, and a gain of $51,000 (2 cents per share) from the reversal of an overaccrual of certain non-income taxes in a prior period.

The company's financial condition continued to improve. Torotel's current ratio was 2.7 at the close of the year, compared with 2.4 a year ago. The company's debt-to-equity ratio was 2.7-to-1 at April 30, 1990, compared with 3.1-to-1 at April 30, 1989. Stockholders' equity increased 26 percent to 1.75 million from fiscal 1989's $1.4 million.

Torotel, Inc. specializes in the design and high-volume manufacture of a broad line of precision magnetic components used in military and industrial electronic systems. These components, which include transformers, chokes and toroidal coils, are sold to original equipment manufacturers for use in such programs as avionic equipment, marine communication and navigation, telecommunications, and weapons fire control systems. The company has a customer base of more than 400 companies and over 85 percent of its sales are for defense applications.

#90200p6564 07/19/1990 ~PR Newswire

CINCINNATI (JULY 19) PR NEWSWIRE - Roto-Rooter, Inc. (NASDAQ: ROTO) today reported revenues of $18,449,000 for the quarter ended June 30, 1990, a 13 percent increase over revenues of $16,382,000 reported in the comparable 1989 quarter. On a year-to-date basis, revenues for the first six months of 1990 reached $36,660,000, a 13 percent increase over the $32,423,000 reported in the first six months of 1989.

Plumbing revenues for the second quarter of 1990 were $4,476,000, a 31 percent increase over the prior year's second quarter revenues of $3,425,000. On a year-to-date basis, plumbing revenues for the first six months of 1990 reached $8,986,000, a 35 percent increase over the $6,660,000 reported in the comparable 1989 period. Sewer and drain cleaning and industrial/municipal revenues for the second quarter of 1990 increased by 7 percent and 3 percent, respectively, over the prior year's second quarter revenues. On a year-to-date basis, revenues from sewer and drain cleaning and industrial/municipal services increased 7 percent and 10 percent, respectively, over comparable revenues in the first six months of 1989.

Net income of $1,368,000 for the second quarter of 1990 declined 7 percent from earnings of $1,466,000 in the comparable 1989 quarter. On a year-to-date basis, net income for the first six months of 1990 was $2,732,000, as compared with the $2,827,000 earned in the first six months of 1989.

Earnings per share for the second quarter of 1990 were 28 cents, as compared with prior year's second quarter earnings per share of 30 cents. On a year-to-date basis, earnings per share for the first six months of 1990 were 55 cents versus the 57 cents reported for the first half of 1989.

During the first six months of 1990, the company's pretax profit margin declined by 2.1 percentage points. This decline in margin was primarily attributable to higher insurance costs, investments in people resources to

assist in future growth, and lagging profit growth by certain large, company-owned operations.

Commenting on Roto-Rooter's results, William R. Griffin, president of Roto-Rooter, stated, "During the first six months of 1990 we were pleased with the continued rapid expansion of our plumbing repair business. In addition, we made progress in solving several key problems. We continue to invest in our direct sales force and to identify additional sales opportunities in the commercial market on which these people can develop our special programs for ongoing emergency and preventive maintenance service. We believe this new sales force will contribute to higher growth in sewer and drain cleaning revenues from commercial and industrial/municipal customers.

"To address the problem of slower growth in several large, company- owned operations and to accelerate growth in other large metropolitan areas, we have gradually begun to divide some of our larger operations into smaller, more efficient units. This change will enable local management to concentrate their efforts within more manageable territories and to devote more time to areas that are vital to the growth of the business, such as manpower growth and direct customer contact. For example, our Connecticut company-owned operation was split into two operations on Jan. 1, 1990, and for the first six months of 1990, the results are favorable. In the future, other large, metropolitan, company-owned operations will be similarly divided. These changes should serve better to meet the needs of our customers and employees and are expected to result in faster rates of growth for sales and profits in the large metropolitan markets."

Commenting further, Griffin stated: "We continue to be pleased with the success of our acquisition program. During the first six months of 1990, we made acquisitions of Roto-Rooter franchises that added 2.8 million people to the population covered by our company-owned operations, an increase of 3.6 percent since year-end 1989. Also, during the first six months of 1990, Roto-Rooter experienced an improving trend in insurance claims. This improving claims trend should minimize the effect of increasing insurance costs on our future operating results. Importantly, Roto-Rooter's balance sheet remains strong with cash of $12,111,000, a current ratio of 2.7:1, and long-term debt as a percent of stockholders' equity of less than 2 percent. This solid financial base will allow Roto-Rooter to grow internally and to continue to make acquisitions of additional businesses. Our business is fundamentally strong and we are optimistic that Roto-Rooter will report improved earnings per share during the remainder of 1990."

Roto-Rooter, Inc., through its 53 company-owned operations and approximately 650 independent franchises, is the largest provider of sewer and drain cleaning services in the United States. The company, headquartered in Cincinnati, also offers plumbing repair services,

industrial and municipal pipe cleaning services, and consumer products.

CHICAGO (JULY 19) PR NEWSWIRE - Illinois Tool Works Inc. (NYSE: ITW) today reported record second quarter and first half operating revenues, operating income and net income.

Second quarter 1990 operating revenues were $652.6 million, an increase of 14 percent over 1989 second quarter operating revenues of $572.8 million. Operating income in the 1990 second quarter was $90.2 million, an increase of 9 percent over the 1989 second quarter.

Net income in the 1990 second quarter was $49.9 million or 92 cents per share, an increase of 12 percent over 1989 second quarter net income of $44.4 million or 83 cents per share.

First-half 1990 operating revenues were $1.2 billion, an increase of 14 percent over 1989 first half operating revenues of $1.1 billion. Operating income in the 1990 first half was $167.1 million, an increase of 10 percent over the 1989 first half.

Net income in the 1990 first half was $90.5 million or $1.68 per share, an increase of 11 percent over 1989 first half net income of $81.4 million or $1.53 per share.

Operating revenues increased in both domestic and international operations in the second quarter and the first half. Domestic operating income was down slightly in the second quarter and first half. International operating income was up in both the quarter and the first half.

The company's two segments, engineered components, and industrial systems and consumables, had increases in operating revenues in the 1990 second quarter compared to the same period a year earlier. Operating income was up in the second quarter for engineered components and essentially flat for industrial systems and consumables. Both segments were up in revenues and operating income in the first half.

RAPID CITY, SD (JULY 19) PR NEWSWIRE - Dale Fullerton, president of Evro Financial Corp., (NASDAQ: EVRO), formerly known as Envirosearch Corp., announced today the signing of an agreement whereby Evro Financial Corp. will undertake an evaluation on a 120-acre gold and aggregate discovery near Klamath Falls, Ore.

This deposit was discovered by Wayne Hall, consulting geologist from Santa Fe, N.M. The initial samples from the test hole drilling showed one section where gold was present at a rate of four ounces of gold per ton. Additional drilling and testing needs to be done to determine the size of the total gold deposit. There are over five million tons of aggregate which will be marketed simultaneously with the testing for the gold.

This venture could sizably increase Evro's earnings as there is the potential deposit of gold in access of one million ounces.

Evro Financial Corp. previously announced, on Feb. 15 of this year, the acquisition of Treasure Rock Hound Corp. of Conroe, Texas. The consideration was $1.4 million, which included 10,000 acres of deeded land with eight locations, which are used as camping facilities for more than six thousand dues-paying members.

These ranch camping developments are located in Texas, New Mexico, Oklahoma, and Arizona. Management estimates this acquisition will increase profits by approximately 4 cents per share.

Evro Financial is traded on the NASDQ under the symbol of EVRO.

#90200p6569 07/19/1990 ~PR Newswire

BOSTON (JULY 19) PR NEWSWIRE - Houghton Mifflin Company (NYSE: HTN) today reported net sales of $122.5 million for the second quarter ended June 30, 1990, an 11 percent increase over last year's $110.4 million. Net income for the quarter rose 9.5 percent to $11.5 million, or 81 cents per share, from $10.5 million, or 74 cents per share, in 1989.

For the six months ended June 30, 1990, net sales were $166.3 million, an 8 percent increase from $154.0 million in 1989. The company reported a net loss for the first half of $554,000, or 4 cents per share, compared with loss of $749,000, or 5 cents per share, in 1989. The 1990 six-month results included a nonrecurring net gain of $4.0 million, or 17 cents per share after taxes.

Nader F. Darehshori, chairman and chief executive officer, said "General publishing segment sales rose 33 percent in the second quarter with all

units contributing to the sales gain. Educational publishing segment sales rose 8 percent, led by strong sales gains by the College Division and The Riverside Publishing Company. The School Division also increased its sales of both elementary and secondary school textbooks, surpassing the exceptionally strong second-quarter sales of reading textbooks it recorded in 1989.

Darehshori said, "The education sales increase in the second quarter reflected in part the ordering of elementary English and other school textbooks by such states as North Carolina and Texas than was earlier than anticipated. Second-quarter expenses included an increase in publication development costs associated with the creation of new textbooks for the school and college markets.

"The first-half results were in line with our 1990 business plans, which call for increased revenues and income for the full year," Darehshori said. "However, school and college textbook sales in the third quarter will be key to full-year results because a large proportion of those materials are ordered for the beginning of the new school year."

CINCINNATI (JULY 19) PR NEWSWIRE - E. Thomas Arington, president and chairman of Duramed Pharmaceuticals, Inc. (NASDAQ: DRMD) announced today Duramed's return to profitability with the results for the second quarter ended June 30, 1990. Net sales for the quarter were $8.4 million compared to $7.8 million for the second quarter of 1989. The net profit for the second quarter of 1990 was $150,000 compared to a second quarter 1989 net profit of $404,000.

For the six months ended June 30, 1990, net sales were $13.6 million compared with net sales of $16.0 million for the first six months of 1989. The second quarter 1990 profit reduced the cumulative loss for the first six months to $1.6 million compared to a profit in the first six months of 1989 of $908,000.

Arington explained "The company's return to profitability in the second quarter was due to balanced corporate performance including stronger sales improved product mix and improvements in manufacturing efficiencies, each of which contributed to higher profit margins. Current business trends continue to be good and Duramed's management is optimistic about third quarter 1990 performance." Arington further stated, "We are confident of Duramed's ability to address both business and regulatory requirements as

we remain committed to our program for long-term success."

The following table sets forth Duramed's comparative operating results for the quarters and six-month period ended June 30, 1990 and 1989:

#90200p6571 07/19/1990 ~PR Newswire

EMMAUS, PA (JULY 19) PR NEWSWIRE - Buckeye Management Co., general partner of Buckeye Partners L.P. (NYSE: BPL), today reported that the partnership's 1990 second quarter net income was $7.4 million, an increase of 5 percent over net income for the 1989 second quarter of $7 million.

Net earnings for the second quarter of 1990 were $.61 per unit, compared with $.58 per unit for the second quarter of 1989. Revenue and operating income for the second quarter of 1990 were $39.9 million and $15 million, respectively, compared with $37.5 million and $14.2 million, respectively, for the second quarter of 1989. Volume transported in the second quarter of 1990 averaged 926,000 barrels per day, an increase of 4 percent compared with an average of 890,300 barrels per day transported in the second quarter last year.

The partnership's net income for the six months ended June 30, 1990, was $13.7 million, or $1.13 per unit, compared with 1989 net income for the same period of $16 million, or $1.32 per unit. The partnership's 1990 and 1989 results include revenues being collected subject to refund depending on the outcome of Federal Energy Regulatory Commission (FERC) tariff rate proceedings.

The general partner today also declared a quarterly partnership cash distribution of $.65 per unit payable Aug. 31, 1990, to unitholders of record on Aug. 8, 1990.

Buckeye Partners L.P., through its subsidiary entities, is one of the nation's largest independent pipeline common carriers of refined petroleum products with nearly 4,000 miles of pipeline operating in 11 states.

In May 1990, Buckeye Pipe Line Co. L.P. filed tariff increases with FERC

designed to produce approximately $3.7 million of additional revenue per year. The tariff increases became effective June 19, 1990. FERC has permitted Buckeye to collect the revenue attributable to the increases subject to future investigation of whether the tariffs are just and reasonable, with any excess to be refunded (with interest).

Through June 30, 1990, the aggregate amount of revenue and accrued interest subject to refund was approximately $23.5 million. The general partner said it believes that Buckeye's tariff rates are just and reasonable; however, it is unable at this time to predict the timing or outcome of these investigations.

HARTFORD, CONN. (JULY 19) PR NEWSWIRE - Washington Secretary of State Ralph Munro was named President of the National Association of Secretaries of State (NASS) this week, the Office of the Secretary of the State said today.

Munro was elected at the conclusion of the association's 73rd annual conference, which was held July 16-18 in Hartford, Conn.

NASS is the oldest organization of major public administrators in the United States. It was established in 1904 to improve public administration in the fields in which the Secretaries of State work -- primarily elections administration, business licensing and records management.

In an address to the association on Wednesday, Munro pledged that NASS will use its expertise in elections and voting to assist emerging democracies around the world, particularly in Eastern Europe. "Many of these countries are holding their first free elections in decades," he said. "They're looking to the United States for help in exercising their

hard-won right to vote."

On another issue, Munro urged his fellow secretaries of state to continue the fight against the early projection of election results by the major television news networks. Munro said the network practice of calling presidential elecitons before the polls have closed on the West Coast is "dead wrong."

"Every American has a right to vote in privacy, and to have his or her vote count," he said. "By declaring a race is over before the polls have closed, the networks are stealing that right."

Munro also said the association must persist in developing innovative programs which will enable all Americans to vote. Munro recently won legislative approval of a "motor voter" registration program involving computer-based registration at driver's licensing stations in Washington state. He has also been active in promoting similar legislation in Congress.

#90200p6577 07/19/1990 ~PR Newswire

CHICAGO (JULY 19) PR NEWSWIRE - GATX Corp. (NYSE: GMT) today announced that it earned $17.9 million for the quarter ended June 30, 1990, compared to net income of $15.3 million for the second quarter of 1989. The company earned $0.75 per common share for the second quarter of 1990 compared to $0.81 per common share for the second quarter of 1989. For the first half of 1990, GATX earned $37.8 million or $1.61 per common share compared to earnings of $32.7 million or $1.73 per common share for the first half of 1989. The earnings per share reflect the effects of the dividend on the $3.875 convertible preferred stock issued in the 1989 third quarter and the two-for-one stock split of GATX common shares which took place during the second quarter of 1990.

James J. Glasser, chairman of the board, president and chief executive

officer stated, "The earnings of General American Transportation Corp., GATX's largest subsidiary, continue to reflect the high demand of its tank car and specialized hopper car fleets. GATX Terminals generated record throughput of 165 million barrels for the second quarter, reflecting expansion of operations and continuing demand for storage and distribution of chemical and petroleum products. GATX Capital continues to experience a strong operating environment especially for commercial jet aircraft and rail equipment. American Steamship Co. is experiencing strong demand for coal, stone and ore on the Great Lakes."

General American Transportation Corp., GATX's railcar leasing and management subsidiary, reported quarterly earnings of $13.4 million compared with $13.2 million for the second quarter of 1989. At the end of the second quarter, utilization of the fleet was 94 percent, compared to 95 percent at the end of the second quarter of 1989.

GATX Capital Corp., GATX's equipment financing subsidiary, reported earnings of $7.0 million for the second quarter of 1990 compared to $6.9 million for the second quarter of 1989. The earnings reflect increased lease income from a larger portfolio, income from a Boeing-747 freighter conversion, and realty residual participations from the sale of property. These increases were partially offset by a lower level of disposition gains, reduced interest income, and increased loss provision. Disposition gains for the second quarter of 1990 were $4.2 million pre-tax compared to $8.4 million for the second quarter of 1989.

GATX Terminals Corp., GATX's bulk liquid storage and pipeline subsidiary, earned $4.1 million for the second quarter of 1990 compared to $5.1 million for the second quarter of 1989. GATX Terminals' earnings declined as a result of financing costs related to acquisitions, start-up of newly purchased facilities, and increased maintenance expenses during the quarter. Utilization was 83 percent compared to 90 percent a year ago, reflecting the acquisition of under utilized tankage.

American Steamship Co., GATX's Great Lakes shipping company, earned $1.1 million for the second quarter compared to earnings of $1.2 million for the same period of 1989. Although demand for cargo movement is high and pricing is improving, quarter earnings declined slightly from the year ago period due to bad weather and low water levels on the Great Lakes.

NEW YORK (JULY 19) PR NEWSWIRE - USLIFE Corporation (NYSE: USH) announced today that it will redeem an additional 10 percent, or 26,234 shares, of the original number of shares outstanding of its $3.33 Series C cumulative

preferred stock on Sept. 1, 1990. The redemption price is $36.00 per share. Accrued dividends of $.8325 per share to the redemption date will also be paid to holders whose shares have been called for redemption. The announcement was made by Gordon E. Crosby, Jr., chairman, president and chief executive officer of USLIFE.

This will be the sixth in a series of annual redemptions, initiated in September 1985, in accordance with the terms of the issue. Additional 10 percent increments will be redeemed each successive year through 1994.

Manufacturers Hanover Trust Company, New York, will serve as the redemption agent.

Shares to be redeemed will be selected randomly by lot. The transfer books will close on July 20, 1990 for the purpose of determining the shares to be redeemed and will re-open on July 24, 1990 for shares not selected for redemption. Redemption notices will be mailed on or about July 27, 1990.

PHILADELPHIA (JULY 19,) PR NEWSWIRE - The transformation in three years of a little-used, largely abandoned rail yard in West Philadelphia into what is the largest inner-city industrial park in Pennsylvania was marked today in a ribbon-cutting ceremony at the first building in the industrial park: Bell of Pennsylvania's West Philadelphia Work Center.

Some 200 people, including Mayor W. Wilson Goode; Thomas F. Foley, representing Gov. Robert P. Casey; other elected and appointed officials; Bell of Pennsylvania executives; community leaders; employees and their families; participated in the ceremony at the West Parkside Business Park, just a short distance from the Mann Music Center in Fairmount Park.

The industrial park encompasses 66 acres, making it the second largest urban industrial development park in the United States, according to William P. Hankowsky, president of the Philadelphia Industrial Development Corp. (PIDC), the agency that masterminded and oversaw its creation.

At the dedication ceremonies of the work center, Goode praised Bell's commitment to Philadelphia and to the West Parkside community.

"Bell, once again, has clearly shown its leadership role in our city's economic growth and development," he said.

The mayor pointed out that Bell's facility is also an important addition to the West Parkside enterprise zone, one of four such zones in the city. Enterprise zones are designated areas where enhanced financial incentives are provided by the city and the commonwealth to retain and attract industry in order to create jobs for residents of the zone.

Robert Valentini, president and chief executive officer of Bell of Pennsylvania, said the park indicated "the spirit of cooperation at its finest and everyone here today should take some pride in the part you played."

SEATTLE (JULY 19) PR NEWSWIRE - Don Wozniak has been promoted to branch manager of the South Bend, Ind., branch office of Van Waters & Rogers Inc. (VW&R), the nation's largest chemical distributor, the company said today. Van Waters & Rogers Inc. is the U.S. subsidiary of Univar Corp. (NYSE, PSE: UVX).

With more than 13 years' industry experience, Wozniak has held a variety of sales and managerial positions with Van Waters & Rogers and McKesson Chemical Co., a firm VW&R acquired in 1986. He most recently served as field sales manager in Van Waters & Rogers' Denver Area office.

Wozniak is a graduate of the University of Wisconsin in Green Bay. "Don brings to the position a blend of diverse industry experience and management know-how," said Dean A. Sievers, VW&R Chicago Area manager. "That combination will enable him to effectively manage the South Bend facility."

Univar Corp., headquartered in Seattle, is a leading North American distributor of chemicals to industry. It operates through two subsidiaries, Van Waters & Rogers Inc. in the United States, and Van Waters & Rogers Ltd. in Canada.

#90200p6583 07/19/1990 ~PR Newswire

DALLAS (JULY 19) PR NEWSWIRE - Central and South West Corp. (NYSE: CSR) reported a decrease in consolidated earnings for the three and 12 month periods ended June 30, 1990. These decreases were due to the inability to

recognize equity cost deferrals associated with the South Texas Project (STP) nuclear power plant and to various non-recurring items during the prior periods. These decreases were offset by interim rate increases at Central Power and Light Co.

Consolidated earnings per share for the second quarter decreased to 54 cents from 75 cents on 94.1 million average shares outstanding. Net income for common decreased to $51 million for the three month period from $70 million during the same period in 1989.

For the 12 months ended June 30, 1990, earnings per share were $2.63 on 94.1 million average shares as compared with $3.40 on 94.3 million averags shares for the same period a year ago. Net income for common decreased to $247 million from $321 million.

Earnings for the first and second quarters of 1990 will be restated if the Public Utility Commission of Texas (PUC) approves Central Power and Light Co.'s stipulated agreement to settle all issues in its rate request to recover its investment in STP. The settlement would allow recognition during the first quarter of 1990 of $110 million of income related to deferred interest charges, to the extent actual interest charges were incurred during the period between commercial operation of STP Units 1 and 2 and March 1990. The settlement would also allow recognition of an additional $49 million of income related to deferred interest, to the extent it was incurred, on STP Unit 2 for the balance of 1990. A Texas PUC order is not expected until the third or fourth quarter of this year.

Central and South West Corp. is a Dallas-based public utility holding company with four electric subsidiary companies that provide service to portions of Texas, Oklahoma, Louisiana and Arkansas.

PONTIAC, MI (JULY 19) PR NEWSWIRE - Detroit Mayor Coleman A. Young and other federal, state, county and city officials are expected to attend the grand opening ceremonies of a new Perry drugstore in Detroit at 9 a.m. Wednesday, July 25.

This opening marks the continual expansion of Perry Drug Stores, Inc. (NYSE: PDS) in Detroit, increasing the number of stores Perry operates in the city to 14. The store will be at Oakman and Livernois.

"Our expansion in Detroit is part of a commitment we made many years ago to support the city," explained Jack A. Robinson, chairman and chief executive officer. "Continuous growth enables us to expand our service to

the community. Efforts such as this are our way of saying 'YES' to Michigan as well as 'YES' to Detroit."

Detroit Pistons basketball star John Salley will make a special appearance at the ribbon-cutting ceremonies from 11 a.m. until 1 p.m. to sign autographs and pose for photographs.

Customers will have the chance to participate in a raffle, with the prize of tickets for two to a Detroit Tigers baseball game.

Gifts such as tote bags, hats and product samples will be distributed to the first 1,000 customers. The popular cartoon character Care Bear will join the festivities and will be available for free photographs for Perry's younger customers.

#90200p6585 07/19/1990 ~PR Newswire

CHICAGO (JULY 19) PR NEWSWIRE - Santa Fe Pacific Corporation (SFP) (NYSE: SFX) reported a second quarter net loss of $1.3 million, or $.01 a share, compared with net income of $2.7 million, or $.02 a share, for the same period last year. Operating income for the quarter was $72.3 million, compared with $103.6 million last year. This decrease reflects reduced results from the transportation and natural resources groups, somewhat offset by higher operating income from the real estate group.

For the six months, the net loss was $62.7 million, or $.40 a share, compared with net income of $190.2 million, or $1.19 a share in 1989. Net income in 1990 was significantly affected by the settlement of lawsuits which resulted in a net after-tax charge of approximately $115.0 million or $.73 per share. Net income in 1989 included $210.0 million, or $1.32 a share, for adoption on a prospective basis of new rules for accounting for income taxes. Operating income increased 79 percent to $236.3 million for the first half compared with the same period last year. This increase was due primarily to the first quarter receipt of all scheduled 1990 coal lease royalties of $56.5 million, property tax settlements of $31.3 million in the first quarter of 1990, and the $52.2 million before-tax charge associated with a change in the method of estimating personal injury liability at Santa Fe Railway in the first quarter of 1989.

SECOND QUARTER RESULTS BY LINE OF BUSINESS Santa Fe Railway reported operating income of $29.2 million, down from the $53.9 million reported in the 1989 quarter. Revenues decreased 8.4 percent to $513.2 million. Carloadings decreased 4.1 percent and revenue per carload decreased 4.4 percent. Operating expenses decreased 4.4 percent, due primarily to lower labor, material and fuel costs associated with

lower freight volume and the effect of recent cost containment measures.

Future quarters will benefit from efficiencies recently implemented or planned in the near future for the railway. As a result of restructuring reorganization and consolidation of operating and staff functions, more than 1,000 positions have been eliminated late in the second quarter and early in the third quarter. About 300 more positions are scheduled for elimination later this year. The railway also anticipates increasing efficiency in train operations, partly as a result of the receipt of new, more reliable locomotives.

Petroleum production and marketing operations reported operating income of $3.2 million, down from $15.9 million in 1989. Petroleum revenues were down $13.7 million, or 16.3%, due primarily to significantly lower oil prices which averaged $2.86 less per barrel and slightly lower gas prices. Both oil and gas production were up while operating expenses stayed essentially even.

Operating income from real estate operations increased to $30.0 million from $14.3million last year. Improved results from joint ventures, an increase in rental income, improved gains from property sales and lower operating expenses accounted for this improvement.

Operating income from hard minerals totaled $2.0 million, down from $12.5 million last year, due principally to the early receipt of the 1990 scheduled coal lease royalty in the first quarter of 1990. Without this accelerated payment, hard minerals operating income would have been slightly above the 1989 quarter.

Pipeline activities contributed operating income of $7.9 million, $0.9 million above last year, due primarily to increased volume and higher rates.

#90200p6586 07/19/1990 ~PR Newswire

LOS ANGELES (JULY 19) PR NEWSWIRE - Mattel Inc. (NYSE: MAT) today reported record net income of $20.3 million or $.40 per share for the quarter ended June 30, 1990, up 22 percent from $16.6 million or $.33 per share for the 1989 second quarter. Net sales for the 1990 quarter also reached record levels, up 17 percent to $318 million from $272 million for the second quarter last year.

Net income for the first half of 1990 was $28.7 million or $.57 per share, up 37 percent from $20.9 million or $.42 per share for the first six months of 1989. Net sales for the 1990 first half were $552 million, up

18 percent from $468 million in the year-ago period.

"The company's performance in the first half of 1990 reflects the strength of our consumer franchises and Mattel's unparalleled international marketing and distribution network. These advantages set Mattel apart from other companies in the toy industry. As a result, Mattel continues to gain market share," John W. Amerman, Mattel's chairman and chief executive officer, said.

"Specific growth in core product sales and international volume demonstrates the impact of these advantages," Amerman said. "First half volume growth for core Barbie, Hot Wheels, Disney Preschool and Infant Toys, He-Man, large dolls and See'N Say products increased by 24 percent versus the year-ago period. Mattel's first half volume in international markets grew by 26 percent over the comparable year-ago period."

Mattel Inc., which reported annual revenues of $1.2 billion in 1989, is a worldwide leader in the design, manufacture and marketing of childrens' toys. With headquarters in Hawthorne, Calif., Mattel has offices and facilities in 20 foreign countries and sells its products in more than 100 nations throughout the world.

LOUISVILLE, KY. (JULY 19) PR NEWSWIRE - Humana, Inc. (NYSE: HUM) announced today that it has received a cash payment of approximately $68 million in settlement of all contested issues with the Internal Revenue Service through 1986. The payment consisted of a refund of approximately $31 million in federal income tax and $37 million in interest.

The principal issue involved the deductibility for income tax purposes of premiums for professional liability insurance paid by subsidiaries of Humana to Health Care Indemnity, Inc., a wholly-owned insurance company subsidiary of Humana. The United States Court of Appeals for the Sixth Circuit decided Humana's case involving the issue in July 1989.

The transaction will increase Humana's net income in the three months ending August 31, the fourth quarter of fiscal 1990, by approximately $19 million or 18 cents per share.

Humana is an integrated health care company, operating 85 hospitals and offering a variety of health benefit plans for employee groups and Medicare beneficiaries, covering more than 1.1 million members.

PHILADELPHIA (JULY 19) PR NEWSWIRE - Vu/Text, in conjunction with The Philadelphia Inquirer and Philadelphia Daily News, has developed a computerized automotive classified service comprised of the used car classifieds from both papers. The new database, Autos OnLine, will be distributed to consumers on the Bell Atlantic network, IntelliGate.

Autos OnLine marks the second customized project in which Vu/Text has assisted newspapers in creating a means for delivery via a regional Bell operating company.

Last spring, Vu/Text and The Atlanta Journal and The Atlanta Constitution introduced a service enabling Atlanta residents with a personal computer and modem to access the Journal-Constitution's publication library via an inexpensive, easy to use interface on Bell South's videotex gateway. This low cost, user-friendly service, along with the Journal-Constitution's audiotex service, positions the papers as progressive local information sources.

Donna Willmann, Vu/Text vice president, commented, "Vu/Text is interested in continuing its partnership with newspapers to help them maintain their role in their communities as the place to go for information. With so many newspaper archives online in Vu/Text we're well positioned to help find new uses for the papers' electronic information."

Vu/Text, a Knight-Ridder company, is the largest U.S. newspaper databank with 61 newspapers online including the Philadelphia Inquirer, Philadelphia Daily News, Atlanta Journal, Atlanta Constitution, Boston Globe, Washington Post, Chicago Tribune and Los Angeles Times.

If you would like more information about Vu/Text please call 1-800-323-2940 nationwide, or in Pennsylvania, (215) 574-4400. For information concerning Autos OnLine contact IntelliGate at 1-800-543-8843 or in Pennsylvania, (215) 834-5866.

CONTACT: Tonia Kimbrough of Vu/Text, (215) 574-4469.

#90200p6589 07/19/1990 ~PR Newswire
PITTSBURGH (JULY 19) PR NEWSWIRE - PNC Financial Corp (NYSE: PNC) today announced that the board of directors has voted to exempt the corporation from the provisions of the 1990 amendments to the Pennsylvania Business Corporation Laws, commonly referred to as the Anti-Takeover Statute.

Thomas H. O'Brien, chairman, president and chief executive officer, said, "Each Pennsylvania corporation must consider this issue based on its particular circumstances. We believe that the pre-1990 anti-takeover provisions provide an adequate balance of management's responsibilities and the interests of our shareholders. We also believe that the interests of our shareholders should be dominant. In PNC's case the additional provisions are not necessary."

PNC Financial Corp, headquartered in Pittsburgh, is the nation's 14th-largest bank holding company with assets of $47.8 billion. PNC was formed in 1983 with the consolidation of Pittsburgh National Corp., Pittsburgh, and Provident National Corp., Philadelphia. Its principal banking affiliates include: Bank of Delaware Corp., Wilmington, Del.; The Central Bancorporation, Inc., Cincinnati, Ohio (includes banks in Ohio and Kentucky); Citizens Fidelity Corp., Louisville, Ky. (includes banks in Kentucky and Indiana); The First Bank and Trust Company, Mechanicsburg, Pa.; The Hershey Bank, Hershey, Pa.; Marine Bank, Erie, Pa.; Northeastern Bank of Pennsylvania, Scranton, Pa.; Pittsburgh National Bank, Pittsburgh; Provident National Bank, Philadelphia; PNC National Bank, Wilmington, Del.; and PNC National Bank of New Jersey, Cherry Hill, N.J. PNC currently operates 530 community banking offices in Pennsylvania, Kentucky, Indiana, Ohio, Delaware and New Jersey. It also conducts business through additional offices in 15 states and seven foreign countries.

#90200p6592 07/19/1990 ~PR Newswire

MIAMI, FL (JULY 19) PR NEWSWIRE - Citizens Savings Financial Corporation (NASDAQ-NMS: CSFCB), parent company of Citizens Federal Bank, a five-state Federal Savings Bank, has reported operating income of $3.1 million for the second quarter of 1990, a gain of 38 percent over its operating income of $2.2 million for the comparable quarter of 1989. For the first six months this year, operating income rose 26 percent to $6.1 million, compared to $4.8 million in 1989.

Net earnings for 1990 also rose but not as much due to a sizeable extraordinary gain in the second quarter last year.

Citizens Savings reported net earnings of $6,087,000 ($1.82 per share) on total income of $203,515,000 for the six months ended June 30, 1990, compared to net earnings of $5,640,000 ($1.84 per share) on total income of $210,537,000 for the first half of 1989.

For the three months ended June 30, 1990, Citizens Savings reported net earnings of $3,054,000 ($.91 per share) on total income of $101,309,000, compared to net earnings of $3,022,000 ($.98 per share) on total income of

$107,221,000 for the same quarter last year.

Stockholders' equity per common share climbed to $30.84 on June 30, 1990, a gain of 19 percent over the $25.90 per share a year ago.

In announcing the figures, Charles B. Stuzin, chairman and president of Citizens Savings, stated, "Looking at our operating income before extraordinary items, it is gratifying to see such improvement in a difficult environment. Based upon our first six months, I believe we will achieve extremely good earnings, maybe even record numbers, for the full year. Our interest rate spread is up to 39 basis points over this time last year, and that very substantial gain provides the major momentum for our present earnings growth."

In conformity with a 1987 S.E.C. staff accounting bulletin, the company also reported on a supplemental basis that its earnings per common share would have been $.65 for the quarter ended June 30, 1990, $1.30 for the six months ended June 30, 1990, $.60 for the quarter ended June 30, 1989, and $1.08 for the six months ended June 30, 1989, if the earnings per common share were adjusted for dividends not actually paid or accrued but imputed on its Series A Preferred Stock which was sold to the Federal Savings and Loan Insurance Corporation (now the FSLIC Resolution Fund) in connection with the company's 1986 acquisition of an Ohio savings bank. The imputed dividends are calculated as if the dividends payable on the Series A Preferred Stock were based upon a market rate dividend of 5.3 percent in both years. The company's actual earnings of $.91 per share for the quarter ended June 30, 1990, $1.82 per share for the six months ended June 30, 1990, $.98 for the quarter ended June 30, 1989, and $1.84 per share for the six months ended June 30, 1989, are based upon the actual dividends paid or accrued to the FSLIC Resolution Fund on this stock, which increased in 1990 over 1989.

Citizens Federal Bank operates 90 banking offices in five states. It operates as Citizens Federal Bank in its Florida, California and Virginia divisions; as Equitable Savings in its Ohio division; and as American Savings in its Illinois division.

#90200p6594 07/19/1990 ~PR Newswire

ATLANTA (JULY 19) PR NEWSWIRE - BellSouth Corp. (NYSE: BLS) today reported second quarter income of $445.2 million, compared to $418.1 million for the same quarter in 1989. Quarterly earnings per share rose

to $0.92, vs. $0.87 per share in last year's second quarter.

Operating revenues totaled $3.6 billion in the quarter, increasing 4.3 percent compared to the same period in 1989. Operating expenses were $2.8 billion, compared to $2.7 billion in second quarter 1989.

"We're seeing steady increases in our business," said BellSouth Chairman and Chief Executive Officer John L. Clendenin. "In particular, the results are reflecting an increasing earnings contribution from our U.S. cellular operations, which continue to experience significant growth," added Clendenin. BellSouth connected 62,355 new customers to its domestic cellular networks during the second quarter, bringing the number of total U.S. subscribers served to more than 537,000.

Earnings growth, however, continues to be dampened by rate reductions in effect in several southeastern states where BellSouth subsidiaries provide local telephone service. "The increase in business volumes is being offset to some degree by the continuing impact of rate reductions ordered by state regulatory authorities," said Clendenin.

"Some of these reductions are coupled with new, incentive-based regulatory plans that will help us better respond to an increasingly competitive marketplace," added Clendenin. During the second quarter, for instance, Mississippi adopted an incentive regulatory plan that included a $22.8 million annualized rate reduction beginning July 1, noted Clendenin. "Such moves will impact earnings short term, but provide long-term benefits to shareholders and customers," he said. "In Alabama and Kentucky, we already have begun sharing profits with our customers."

BellSouth is an Atlanta-based international telecommunications holding company. Its subsidiaries offer local telephone service in nine southeastern states and mobile communications service worldwide, provide advertising and publishing services, and market and maintain stand-alone and fully integrated communications systems.

SEATTLE (JULY 19) PR NEWSWIRE - Canadian Airlines International has converted options to firm orders for an additional 747-400 and two more extended range (ER) variants of the 767-300, Boeing Commercial Airplane Group confirmed today. The orders are valued at approximately $350 million.

In 1988, Canadian ordered three 747-400s and secured options on four more. The carrier announced yesterday it sold to American Airlines two of its 747-400s.

The airline also had ordered 12 767-300ERs, two of which - valued at more than $160 million - had not been announced by Boeing. Canadian now has ordered 14 767-300ERs.

By May 1991, Canadian officials say, the carrier will begin service between Vancouver and Tokyo with its first 747-400 which has about 50 percent more passenger capacity than the DC10s it will replace. In Canadian's configuration, the 747-400 will seat 392 passengers in a tri-class arrangement. Canadian's 747-400s and 767-300ERs will be powered by General Electric engines.

Boeing Commercial Airplane Group has recorded orders for 336 747-400s and 491 767s of all types. Orders for 247 aircraft valued at about $23.2 billion have been recorded by Boeing this year.

NEW YORK (JULY 19) PR NEWSWIRE - Citibank said today that it has signed an agreement to acquire certain assets of the merchant credit card processing business of Houston-based First City Bancorporation of Texas.

Citicorp Card Acceptance Services (CAS) has purchased First City's credit

card processing contracts with some 14,000 merchant locations and 140 banks throughout the Southwest.

The largest issuer of Visa and MasterCard in the United States, Citibank is also one of the largest processors of MasterCard, Visa, Diners Club and other credit and charge card transactions through its CAS unit.

As part of the transaction, Citibank has also entered into an interim processing agreement with First City to ensure that its customers have uninterrupted transaction and authorization services. Also, as part of a separate agreement, First City will maintain an ongoing sales and account management presence in the merchant credit card processing business on behalf of Citibank's CAS unit.

"We consider these aspects of the transaction to be very important," said Bruce M. Weber, president of CAS. Both First City and CAS will work together with the clients to ensure the best product is delivered to them in the most efficient manner possible."

Weber also noted that CAS had already begun building a solid foundation of clients in the Texas area and that the First City agreement further reflects Citibank's commitment to the Southwest in general.

"The state of Texas has substantial consumer buying power and we are convinced that this market will grow significantly in the future. First City has developed a high quality regional client base and we are committed to this market," said Weber.

Citibank's CAS unit delivers credit card processing services to the full spectrum of card acceptors including thousands of local and regional companies across the United States, as well as to high volume national accounts.

Established in 1967, CAS is a full-service provider of credit card processing support services, including its own voice authorization center, host-to-host computer connections to high volume clients and its own transaction delivery system, CitiNet. CAS has operations and customer service centers in Hagerstown, Md., and Sioux Falls, S.D.

#90200p6600 07/19/1990 ~PR Newswire

BOISE, ID (JULY 19) PR NEWSWIRE - Morrison Knudsen Corp. (MK) (NYSE: MRN) managing partner of the international Texas TGV consortium organized to design, construct, finance and manage the operation of a very high speed rail system in Texas, today announced that the consortium has achieved

another important step: formal filing of a letter-of-intent with the Texas High-Speed Rail Authority and the payment of a $100,000 non-refundable fee.

Other firms associated with the Texas TGV consortium to build the 200 MPH system linking five Texas cities include GEC Alsthom, manufacturer of the TGV "Atlantique," the world's fastest passenger train in commercial service, Bombardier Corp., and a number of Texas-based engineering and design firms. Texas businessmen Ben Barnes and Brad Corbett are members of the consortium. Merrill Lynch, of New York, and Credit Lyonnais, of Paris, are providing financial advice to the consortium.

"Our letter of intent and deposit advances our commitment to the State of Texas and makes evident our belief in the viability of this project," said William Agee, chairman and chief executive officer of Morrison Knudsen. "Very high speed rail is rapidly gaining national recognition as an important transportation option in the United States, and Texas is an ideal location to pioneer its use."

If awarded the franchise, the Texas TGV consortium will utilize an advanced model of the TGV technology that has been so well received in France. The environmentally sound, energy efficient TGV "Atlantique" operates at speeds of 186 MPH in complete safety and comfort. In Texas, the TGV will operate at 200 MPH and the trip between the business centers of Dallas and Houston will require approximately 90 minutes.

MK has been a major contractor in the State of Texas for many years. Since 1975, Morrison Knudsen has completed nearly $2 billion in work in the state and recently MK and a joint venture partner were selected to negotiate a contract for the architecture, design and construction management of the Superconducting Super Collider near Dallas in Ellis County.

Morrison Knudsen is an engineering, design, construction, environmental, rail systems, and mining company.

#90200p6603 07/19/1990 ~PR Newswire

BINGHAMTON, NY (JULY 19) PR NEWSWIRE - New York State Electric & Gas Corporation today reported earnings applicable to common stock of 69 cents per share for the quarter ended June 30, 1990, up from last year's second quarter earnings of 64 cents per share. The increase in earnings is primarily due to lower production expenses during the second quarter of 1990 caused by certain maintenance work being rescheduled until later in the year.

"The company's financial outlook continues to be encouraging. We continue to experience customer growth within our service territory; however, a slowing economy, warmer weather, and certain natural gas customers using alternate fuel during the second quarter of 1990 caused only a 2 percent increase in electric retail sales while natural gas retail sales declined 10 percent when compared to the second quarter of 1989," stated James A. Carrigg, chairman and chief executive officer.

Total revenues rose to $367,009,000 for the three months ended June 30, 1990, an increase of 6 percent from the three months ended June 30, 1989. Electric revenues increased 8 percent, of which 4 percent represents the recording of unbilled revenues. Unbilled revenues are the estimated revenues attributable to energy which has been delivered to our customers but for which the metered amount has not been read and billed to the customer. The company started to phase-in the recording of unbilled revenues in Feb. 1990, in accordance with the rate stabilization plan approved by the Public Service Commission of the State of New York in March 1989. In addition, electric revenues increased as a result of a 64 percent increase in kilowatt-hour sales to other utilities, including the New York Power Authority. Natural gas revenues decreased 4 percent, due to lower retail sales partially offset by higher purchased natural gas costs being passed on to customers.

Earnings available for common stock were $40,124,000 in the second quarter of 1990, compared with $36,309,000 for the corresponding period last year.

Earnings available for common stock were $2.63 per share for the twelve months ended June 30, 1990 and $2.68 per share for the twelve months ended June 30, 1989. Excluding the effects of a December 1989 adjustment to the 1987 Nine Mile Point Unit No. 2 (NMP2) write-off, earnings were $2.53 per share for the twelve months ended June 30, 1990.

Total revenues for the twelve months ended June 30, 1990 were $1,475,173,000, a 5 percent increase as compared to the corresponding period last year. Earnings available for common stock were $151,415,000 and $151,902,000 for the twelve months ended June 30, 1990, respectively. Excluding the effects of the 1989 adjustment to the 1987 NMP2 write-off, earnings available for common stock were $145,634,000 for the twelve months ended June 30, 1990.

#90200p6607 07/19/1990 ~PR Newswire

WILMINGTON, Del. (JULY 19) PR NEWSWIRE - Hercules Inc. (NYSE: HPC) today reported second quarter net income of $30.2 million, equal to $.64 per share.

This includes a nonrecurring charge of $5.1 million, or $.11 per share, the result of a loss from the shutdown of a facility, net of a gain realized on the sale of an affiliate.

For second quarter 1989, the company reported net income of $41.6 million, equal to $.88 per share, including net nonrecurring gains of $2.5 million, or $.05 per share.

Sales for second quarter 1990 were $795.8 million vs. $791.5 million in the comparable period a year ago.

First-half 1990 net income, including the net nonrecurring charge noted above, was $63.9 million, or $1.36 per share. This compares with 1989 first-half results of $86.4 million, equal to $1.84 per share, exclusive of a $15 million credit, or $.32 per share, for the cumulative effect on prior years of changes in accounting. The 1989 six-month results include net nonrecurring gains of $8.6 million, or $.17 per share.

Sales for the first six months of 1990 were $1.567 billion, compared with $1.531 billion in the same period of 1989.

In elaborating on the company's performance for the quarter, David S. Hollingsworth, chairman and chief executive officer said, "We are pleased with the strengthening of a number of our businesses. In Aerospace, the Aircraft & Electronic Products unit demonstrated substantial improvement over the second quarter of 1989. In Aqualon, the water soluble polymer business improved, and Absorbent & Textile Products had better results. Paper Technology continued its strong performance. Although most of our businesses performed satisfactorily, some did not. Advanced Materials & Systems results were lower, and both the Resins and Packaging Film Groups are addressing their problem areas to improve profitability."

He noted, "Although the pretax operating performance of our combined businesses on a segment basis improved over the same period last year, net

income was adversely affected by a number of factors, including the shutdown of the Culver City, Calif., facility. In addition, while a gain was realized on the sale of an affiliate in Europe, it was reduced by a high effective tax rate. Taxes on this gain, as well as higher foreign tax rates, resulted in a second-quarter effective tax rate of 49 percent (vs. 38 percent a year ago). Interest expenses also increased."

#90200p6609 07/19/1990 ~PR Newswire

BELLEVUE, WA (JULY 19) PR NEWSWIRE - Puget Sound Power & Light Co. (NYSE: PSD) today reported slightly improved earnings for the second quarter ended June 30, 1990.

The company reported per share earnings of 42 cents, an increase of 2 cents over the same reporting period a year ago. Earnings were based on operating revenues of $208.4 million and income available for common stock of $23.2 million. They compare with 1989 second quarter figures of $186.7 million and $22.1 million, respectively.

For the 12 months ended June 30, 1990, the company reported per share earnings of $1.91 compared with $2.14 a year ago. During the past 12 months, $11.3 million of accumulated deferred investment tax credits were credited to income compared to $20.6 million a year ago for the same period. Because these credits ceased to be available to the company as a credit to income as of Dec. 31, 1989, the company expects virtually all of 1990 earnings to be reported as cash earnings.

Kilowatt-hour sales for the three and 12 month periods increased to 4.5 billion and 19.2 billion, respectively, from 3.9 billion and 18.1 billion a year ago. The increased sales reflect increased customer growth on the company's system, and sales to other utlities. A summary of financial results follows:

#90200p6614 07/19/1990 ~PR Newswire

JOHNSTOWN, PA (JULY 19) PR NEWSWIRE - Johnstown Savings Bank, FSB (NASDAQ: JSBK) today announced consolidated earnings of $152,000 or $0.08 per share for the quarter ended June 30, 1990. This compares with a net loss of $718,000 or $0.37 per share for the second quarter of last year.

Consolidated earnings for the six months ended June 30, 1990 amounted to $263,000 or $0.14 per share as compared to a net loss of $108,000 or $0.06 per share for the same period of last year.

The net earnings increase of $371,000 over the corresponding six-month period in 1989 was due to reduced additions to the allowance for loan losses and other reductions in overall operating expenses. Net interest income for the quarter was $1,737,000, which is a 5.96 percent decrease from the $1,847,000 reported for the second quarter of 1989.

At June 30, 1990, total assets were $273,913,000, compared to $295,324,000

on June 30, 1989, which reflects a planned decrease in certificates of deposit to reduce the bank's cost of funds and a $7,000,000 decrease in borrowed funds.

The bank's equity to assets ratio at June 30, 1990 was 7.16 percent, compared to 9.25 percent at June 30, 1989. The bank's current equity to assets ratio increased 0.68 percent during the first six months of 1990. At June 30, 1990, the bank's capital position remained well above regulatory requirements.

Non-accural loans, restructured loans and real estate owned decreased by $3,169,000, or 15.0 percent from $21,180,000 at June 30, 1989 to $18,011,000 at June 30, 1990.

The bank continues to strategically increase its provisions for loan losses with the addition of $273,000 in the second quarter of 1990, compared to additions of $1,181,000 in the same quarter of 1989. At June 30, 1990, the bank's allowance for loan losses stood at $4,445,000, or 2.40 percent of the total loan portfolio.

The bank also has an allowance for losses on real estate acquired through foreclosure of $1,264,000 as of June 30, 1990. This compares to an allowance of $513,000 at June 30, 1989.

Patrick J. Coyne, president and chief executive officer, stated that the bank is continuing in its "back-to-basics" mode of operations in order to further improve profitability and enhance stockholder value.

In addition, Coyne announced that as part of the bank's effort to explore various means of enhancing stockholder value, it will also consider the possible sale of the bank. He stated that, "A possible sale of the bank is one of several methods of enhancing stockholder value which the board of directors believes merits exploration."

#90200p6616 07/19/1990 ~PR Newswire

DETROIT (JULY 19) PR NEWSWIRE - General Motors announced today it is voluntarily conducting safety recalls on certain 1988-90 vehicles.

Affected owners are being notified by letter, and GM dealers will perform the necessary repairs free of charge. The campaigns include:

-- Approximately 616,000 midsize passenger cars are being recalled to

strengthen the anchorage of the front seat shoulder belt guide loops. In a severe accident, the upper guide loop could separate from its door-mounted anchor plate. If this happens, the shoulder belt would not properly restrain an occupant. GM dealers will install a larger flanged nut to strengthen the attachment. Vehicles involved include 1988-90 two-door Buick Regal, Pontiac Grand Prix and Oldsmobile Cutlass Supreme models, as well as 1990 two-door Chevrolet Lumina cars.

-- Nearly 40,000 model year 1988-90 Pontiac Firebird and Chevrolet Camaro models will be inspected for possible fuel hose connection problems. On 1988-89 models equipped with 2.8-liter V6 engines, the fuel feed hose could separate from the engine. On 1990 models equipped with 5.0- and 5.7-liter V8 engines, a fuel return hose may break. In both cases, fuel could leak into the underhood area. If an ignition source is present, this could result in an engine compartment fire. Dealers will install new fuel hoses on all involved vehicles.

GM is unaware of any injuries resulting from the above conditions.

DALLAS (JULY 19) PR NEWSWIRE - American Airlines Inc., and AMR Corp. announced today they filed with the Securities and Exchange Commission a proposed offering of zero coupon, convertible subordinated notes with anticipated principal amount at maturity in 2005 of $700 million.

The securities, called LYONs (Liquid Yield Option Notes) are convertible into AMR common stock and American will have the option of satisfying any conversions in either cash or stock at the time of conversion.

The net proceeds to American from the sale of the LYONs will be used for general corporate purposes, among which may be the financing of capital expenditures by American, including the acquisition of aircraft and related equipment. Merrill Lynch Capital Markets will act as underwriter.

A registration statement relating to these securities has been filed with the Securities and Exchange Commission but has not yet become effective. These securities may not be sold nor may offers to buy the accepted prior to the time the registration statement becomes effective.

This communication shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of these securities in any state in which such offer, solicitation, or sale could be unlawful prior to registration or qualification under the securities laws of any such state. Prospectuses can be obtained from Merrill Lynch

Capital Markets, World Finance Center, North Tower, New York, N.Y., 10281.

#90200p6620 07/19/1990 ~PR Newswire

ALLENTOWN, PA (JULY 19) PR NEWSWIRE - Mack Trucks Inc. (NASDAQ-NMS: MACK) announced today a consolidated net loss of $63,321,000 for the second quarter of 1990, or $2.13 per common share compared to a net loss of $19,620,000, or 66 cents per common share for the 1989 second quarter.

The 1990 results continued to be adversely impacted by significantly lower sales and gross margin levels, as well as the impact of lower production operating rates. In addition, the current quarter included a special warranty provision of $21.7 million to reflect continued unfavorable experience.

Second quarter 1990 net sales were $400,921,000, a 23 percent decline from the comparable 1989 second quarter net sales of $518,848,000. This sales decline principally reflects the overall softening North America industry demand encountered in both the heavy- duty and medium-duty truck markets. Unit sales of Mack's heavy-duty Class 8 trucks and medium-duty Class 6 & 7 vehicles declined by 28 percent and 31 percent, respectively, compared to the 1989 second quarter. Parts and service sales declined by nearly 6 percent from the comparable 1989 quarter.

For the first six months of 1990, Mack's net loss amounted to $97,246,000 or $3.27 per common share compared to a net loss of $18,417,000 or 62 cents per share for the same period in 1989. This is about $7.2 million higher than previously estimated primarily due to volume shortfalls in June. Consolidated net sales for the first six months of 1990 were $793,938,000, a decrease of 22 percent from the 1989 period sales of $1,012,488,000.

Vehicle order input continues to be soft and the anticipated second half market strengthening, partially based on pre-buying related to 1991 emission standard changes, is not yet evident and may not materialize.

The second quarter results have caused a violation of current ratio, cumulative net result (total losses) and, gross profit margin requirements under the terms of Mack's Credit Agreement, dated as of April 27, 1990, with a syndicate of commercial banks and Citibank, N.A. and Credit Lyonnais New York Branch, as co-agents. This violation, if not eliminated or waived, will permit the acceleration of the outstanding principal amount due under such facility. In connection with a condition in the previously announced tender offer by a wholly owned subsidiary of Renault Vehicules Industriels S.A. to acquire the publicly held share of common

stock of Mack Trucks Inc., par value $1 per share, the company has requested waivers of the existing, as well as anticipated future, violations of the Credit Agreement through Dec. 31, 1990. It has also requested an extension of tomorrow's scheduled maturity of Mack Financial Corp.'s Revolving Credit Agreement with a syndicate of banks and Chemical Bank, as agent, until Dec. 31, 1990. Such waivers and extension have not to date been obtained but discussions are continuing.

Ralph E. Reins, chairman of the board, president and chief executive officer of Mack Trucks Inc., also announced that the special committee of the board appointed to evaluate the Renault Vehicules Industriels tender, is studying the offer and will report to the full board in due course.

Mack Trucks Inc., a publicly held company traded on the NASDAQ National Market System, is one of North America's largest producers of heavy-duty diesel trucks, in addition to major product components. Mack also markets a line of medium-duty diesel trucks throughout North America, parts of Central America, Australia, and New Zealand. Mack vehicles are sold and serviced in more than 65 countries around the world.

CALGARY, ALBERTA (JULY 19) PR NEWSWIRE - The Board of Directors of NovAtel Communications Ltd. is pleased to announce the appointments of John W. Burrows as chairman and chief executive officer, and S.W.R. Moore (Sandy) as president and chief operating officer of the company.

Burrows has served as a founding director of NovAtel since January 1983, and as chairman of the board since January 1987. As well, he has been a member of the Alberta Government Telephones Commission since February 1980.

Moore joined NovAtel as executive vice president in March 1988 after 16 years' service in senior marketing, sales and general management positions with a major telecommunications equipment supplier. His extensive experience in systems and subscriber equipment production and marketing strategies will be of great value as Moore undertakes his new responsibilities as president and chief operating officer of the company.

Headquartered in Calgary, Alberta, Canada, NovAtel Communications Ltd. is a subsidiary of Alberta Government Telephones. A leader in cellular technology, NovAtel currently employs more than 1,500 people in the research, development, manufacture and sales of cellular telephones and cellular systems worldwide.

ALEXANDRIA, VA (JULY 19) PR NEWSWIRE - PHP Healthcare Corporation (NASDAQ-NMS: PHPH) achieved record revenues of $81 million and record net earnings of $1.87 million for fiscal 1990 ended April 30.

When compared with the prior year, revenues increased 15 percent while net earnings increased 29 percent. Net earnings per share increased to 51 cents per share compared with 40 cents for the prior year. In addition, earnings before extraordinary items increased 88 percent to $2.62 million or 71 cents per share over the prior year. This significant growth was due to new projects commenced during the year.

Charles H. Robbins, the company's president and chairman stated "1990's financial results are the culmination of the company's long term commitment to provide innovative, effective solutions to our nation's healthcare problems which resulted in the successful commencement of new diversified managed care projects during the year."

ATLANTA (JULY 19) PR NEWSWIRE - Lipsey Mountain Spring Water is introducing a new concept to Atlantans - home delivery of pristine bottled water from a natural spring source.

The premium bottled water company is offering a superior water product in 19-liter containers, which are delivered to homes or offices by professional company representatives.

The water is from an untouched source in the Blue Ridge Mountains' Nantahala Forest between Highlands and Cashiers, N.C. It has been tested and found pollutant- and contaminant-free by a renowned independent national testing agency. The water continues to be meticulously tested daily by the company at its source for over 100 impurities and pollutants.

Lipsey Mountain Spring Water is piped directly from where it bubbles to the surface at its source into sanitized glass bottling. The water is then injected with heavy oxygen to assure continued purity, and shipped directly to Atlanta.

Lipsey offers its unique water product in a state-of-the-art designer cooler and dispensing system. The system automatically opens the Lipsey Mountain Spring Water bottle as it is placed on the dispenser.

Using this new technology, it eliminates the introduction of any airborne impurities to the water. Protective tamper-proof caps on each of the bottles allow for easy, spill-proof installation.

Lipsey Mountain Spring Water is available from the company's Atlanta headquarters at P.O. Box 32, Norcross, 30091. The company's phone number is (404) 449-0001.

CONTACT: Mary Sorrel of Fitzgerald & Co., (404) 239-0468 for Lipsey Mountain Spring Water.

#90200p6633 07/19/1990 ~PR Newswire

GAITHERSBURG, MD (JULY 19) PR NEWSWIRE - Scientists at the National Cancer Institute and Genex Corportion (NASDAQ: GNEX), reported the first successful in vivo targeting of tumors using a novel bio-engineered molecule called a single-chain, antigen-binding (SCATM) protein.

Published in the July 18 issue of the Journal of the National Cancer Institute (JNCI), the report describes the use of a Genex radiolabeled, recombinant SCA protein to target human tumors that had been transplanted

into mice.

The SCA protein used in this study was designed to act as a specific carrier for the delivery of imaging and therapeutic agents to cancer sites in the body. SCA proteins provide the binding capabilities of monoclonal antibodies but overcome many of their drawbacks and are only one-sixth their size. The published study demonstrates the following:

- the affinity of the SCA protein for its tumor antigen is sufficient for in vivo targeting of cancer cells;
- the SCA protein, unlike monoclonal antibodies and antibody fragments, is not retained in the blood or normal tissues to any large extent, and
- the SCA protein reaches optimal tumor-to-normal tissue ratios in hours, compared to days for antibody fragments or weeks for monoclonal antibodies.

In an accompanying editorial in JNCI, Dr. Steven M. Larson, chief of nuclear medicine at the Memorial Sloan-Kettering Cancer Center in New York said: "The ability to manipulate the genetic code to produce a novel single-chain, antigen-binding protein patterned after a biologically active antibody is a major advance.

"Apparently, we don't have to be satisfied with what nature has provided us in the way of immune proteins for the purpose of antibody-directed delivery to tumors. Through genetic engineering, we can make a tailored molecule that has more desirable features."

Additional advantages predicted for SCA proteins over monoclonal antibodies and antibody fragments include lower immunogenicity, less expensive production and the ability to engineer further improvements.

In addition to their potential use in cancer imaging and therapy, SCA proteins may also have applications in the treatment of cardiovascular disease and certain infectious diseases, for in vitro diagnostics and in the practical use of catalytic antibody technology.

Genex Corporation utilizes its proprietary expertise in protein engineering to design and produce specialized pharmaceuticals, surgical bioadhesives, and other products for health care applications.

CALABASAS, CA (JULY 19) PR NEWSWIRE - Lockheed Corp. (NYSE: LK) today reported second-quarter earnings of $81 million, or $1.28 per share, on sales of $2.42 billion. For the same period of 1989, earnings were $80 million, or $1.24 per share, on sales of $2.56 billion.

For the first six months of 1990, earnings were $150 million, or $2.37 per share, on sales of $4.67 billion, compared with earnings of $142 million, or $2.29 per share, on sales of $4.65 billion during the comparable 1989 period.

Daniel M. Tellep, Lockheed chairman and chief executive officer, said the second-quarter figures are in line with the corporation's expectations.

Tellep noted that Lockheed continues to take aggressive actions to strengthen its competitiveness in the changing defense environment. In May Lockheed realigned and downsized its aeronautical systems group to reduce operating costs and improve manufacturing efficiencies. Corporate-wide employment declined by 5,500 during the first half of 1990 to 77,000 on July 1.

During the first six months of 1990, 76 percent of Lockheed's sales were for defense-related U.S. government work, while 13 percent was for nondefense work for the U.S. government. Sales to foreign governments accounted for two percent of the total, and sales to commercial customers, 9 percent.

Funded sign-ups of new and follow-on orders during the first six months of 1990 totaled $4.7 billion, compared with $4.6 billion in 1989's first half.

Funded backlog was $7.2 billion on July 1, 1990, compared with $7.1 billion at year-end 1989. Not included in the 1990 backlog were unfunded programs under contract with U.S. and foreign governments valued at $6.3 billion. At year-end 1989, unfunded backlog was $5.9 billion.

#90200p6636 07/19/1990 ~PR Newswire

DETROIT (JULY 19) PR NEWSWIRE - After a variety of introductory events around the country, Lincoln-Mercury Division's all-new Mercury Capri convertible is officially on sale in the United States.

Although the car officially goes on sale today, dealers have already ordered more than 14,000 Capri convertibles.

"Initial reaction to the Capri has been outstanding," said Ross H. Roberts

Ford vice president and Lincoln-Mercury general manager. "We believe it is going to have strong appeal to young professionals who want a fun car that also is affordable and practical for everyday use."

The first shipment of Capris arrived from Australia at the port of Benicia Calif., June 5. Two bands and a crowd of well-wishers greeted the ship and watched as Lincoln-Mercury executives and Australian government officials drove the first cars on shore. A series of regional introductory events followed, including participation in the annual Independence Day Parade in Washington D.C., where 25 Capris carried VIPs along the route as an estimated 400,000 people looked on.

The new Capri also has been warmly welcomed at Lincoln-Mercury dealerships across the country.

John VanHoozier of Dave Pyles Lincoln-Mercury in Annadale, Va., said the new Capri is drawing crowds and selling well.

"Public acceptance has been outstanding," VanHoozier said. "We are getting a lot of younger buyers in our store. We have sold all six Capris that we had in stock, and taken deposits on 24 more."

Other dealers around the country are encountering the same reaction to Capri. According to one dealer in New York state, "Public reaction has been nothing short of phenomenal. We've had 23 demo rides since our first Capri arrived. It's almost to the point where we're taking appointments to schedule demo rides."

The new Capri is a culmination of an international design and engineering effort spearheaded by Ford of Australia. A design developed by Ford's Ghia Studios in Italy was selected for the car's exterior, while Ital Design SpA of Turin, Italy, created the interior. The powertrain and chassis were developed in conjunction with Ford's Japanese partner Mazda. The Capri is built at Ford's Broadmeadows Assembly Plant outside of Melbourne, Australia, and is that country's first major automotive export to the United States.

A front-wheel-drive 2 + 2 convertible, Capri features as standard equipment a supplemental driver-side air bag, power steering, power four-wheel disc brakes, power windows, reclining cloth bucket seats, a folding rear seatback for easy trunk access, interval windshield wipers, dual-remote-control mirrors and an AM/FM stereo radio.

The manufacturer's suggested retail price for Capri is $12,588. The sporty turbocharged Capri XR2 has a suggested retail price of $15,222.

#90200p6643 07/19/1990 ~PR Newswire
ROSEMEAD, CALIF. (JULY 19) PR NEWSWIRE - SCEcorp, (NYSE: SCE) parent company of Southern California Edison Company, today reported second quarter 1990 earnings of 67 cents per share, 2 cents per share more than the second quarter of 1989. For the 12-months-ended June 30, earnings were $3.83 per share, an increase of 37 cents per share over the same period last year.

As previously reported, a recent California Public Utilities Commission (CPUC) decision shifted some of the company's earnings to the first, second and fourth quarters from the third quarter, with no impact on annual earnings. As a result of this change, quarter-to- quarter earnings comparisons are distorted. When earnings are adjusted for this change to provide a more meaningful comparison, earnings increased 1 cent per share for the second quarter of this year and 8 cents for the 12-months-ended June 1990.

SCEcorp's nonutility earnings for the second quarter were 9 cents per share compared with 10 cents for the same period last year. The decline is principally the result of a previously reported dispute between Mission Power Engineering and a client over recovery of costs for a substantially completed construction project. Mission Power Engineering has initiated legal action to collect the amounts owed it. Mission Energy, Mission First Financial and Mission Land continue their strong performances, with a combined 16 percent second quarter earnings increase over the same period last year.

For the 12-months-ended June 30, SCEcorp's nonutility earnings rose to 41 cents per share, a 3 cents per share increase over a year ago.

SCEcorp net income for the second quarter of 1990 was $146 million, compared with $141 million for the second quarter of 1989. Total revenues for the quarter were $1.59 billion compared with $1.57 billion for the same period a year ago.

AUSTIN, TX (JULY 19) PR NEWSWIRE - Motorola's (NYSE: MOT) Microprocessor Products Group has received General Motors' (NYSE: GM) "Mark of Excellence" award in recognition of its outstanding supplier systems.

Motorola supplies the 68HC11 microprocessor that Delco Electronics uses in electronic engine control modules (ECMs). These computerized ECMs control a vehicle's engine, transmission, brake and steering systems, supplemental inflatable restraint (air bag) system, theft-protection system, and other electronics systems. Delco Electronics is the world's largest producer of on-board automotive computers, building more than six million annually.

"The quality and reliability of the electronic devices supplied by Motorola is critical to the performance of the engine management systems on GM vehicles," said John Stark, director, supplier and purchasing development for Delco Electronics Corp.

Motorola's "Mark of Excellence" is based upon a full-business assessment conducted by Delco Electronics of Motorola's Microcontroller Division's fabrication facilities here. The overall score indicated the operation has "a state of high capability with continuous improvement programs in place " according to Stark.

The "Mark of Excellence" award, a supplier assessment and development process, was unveiled at GM in 1987 and applies to suppliers of productive materials and service parts.

The Motorola assessment was conducted by a Delco Electronics team from purchasing, product engineering, and supplier development. The team assessed Motorola as a supplier in five areas: quality, cost, delivery, management and technology.

DETROIT (JULY 19) PR NEWSWIRE - The board of directors of Sport Connection, Inc., an inactive Utah public corporation, and Bonal Technologies, Inc., a Michigan private corporation, jointly announced today their approvals of a final agreement and plan of reorganization whereby Bonal will become a wholly owned subsidiary of Sport.

Separate shareholder meetings are scheduled for July 31, 1990, and Aug. 1, 1990, respectively, to approve the plan.

Under the agreement, Bonal shareholders are to be issued 5,999,706 shares of Sport. Sport will be the parent corporation with Bonal shareholders owning 75 percent of Sport after the agreement approval. Sport will also redomicile to Delaware and change its name to Bonal International, Inc.

Bonal Technologies of Detroit was incorporated in 1984 to engage in the manufacture and marketing of non-thermal mechanical stress relieving equipment. Also in 1984, Bonal Technologies acquired the patents to the META-LAX sub-resonant process and displacement transducer used in the process.

The META-LAX equipment and process is used by various metalworking industries as a fast, low-cost alternative to energy-intensive furnace heat treating to relax residual internal stresses in metal structures. The cost for sub-resonant stress relieving is neglible and it can be accomplished in minutes compared with hours or days for heat treating.

In addition to stress relieving, the META-LAX sub-resonant process is used to improve and strengthen welded components. Mild vibrations applied to components as they are being welded accelerate the atomic activity in the metal to condition the welds to prevent cracking and embrittlement, which cause major problems in welded structures.

Bonal Technologies' executives estimate that the total industrial market

for META-LAX is over $800 million in the U.S.

Bonal Technologies, with 12 employees, 13 U.S. manufacturers representatives, and six overseas agents, reported net income of $127,637 on gross revenue of $1,117,122 for its fiscal year ended March 31, 1990.

Sport Connection, Inc. is traded in the over-the-counter market.

UNIVERSAL CITY, CA (JULY 19) PR NEWSWIRE - Thomas P. Pollock, chairman of the MCA Motion Picture Group, Fred Bernstein, senior vice president of the MCA Motion Picture Group, and Jeffrey A. Montgomery, chairman of Harvey Comics Entertainment, announced that an agreement in principle has been reached whereby MCA Inc. (NYSE: MCA) will acquire a minority interest in Harvey, a Santa Monica, Calif.-based publisher of such famous cartoon and comic book characters as Casper, the Friendly Ghost; Richie Rich, and Baby Huey.

Harvey Comics Entertainment was acquired last year by 25-year-old entrepreneur Montgomery and his holding company, HMH Communications Inc. While under HMH control Harvey has reclaimed its position as a major supplier of family entertainment.

The agreement focuses on the exploitation of the Harvey characters in such areas as motion pictures, television, home video and theme parks, as well as strategies to support HMH's aggressive growth plans.

In making the announcement, Pollock said, "Classic characters such as these are a rare and valuable commodity. It takes a fresh, entrepreneurial vision and substantial resources to full realize their potential. We look forward to a long and successful relationship that will allow us to pursue a wide range of opportunities in the entertainment industry."

Montgomery said, "We've put the company back on the track, and with MCA's superb marketing muscle behind us, we'll switch into high gear."

MCA Inc., a diversified entertainment and leisure time company, is the parent of Universal City Studios, Universal Pictures, Universal Television MCA Home Entertainment Group, MCA Music Entertainment Group, Merchandising Corp. of America and MCA Recreation Services.

CONTACT: Alan Sutton of MCA-Universal, (818) 777-4598; or Susan Fitzsimons of Harvey Comics Entertainment, (213) 451-3377.

AKRON, OH (JULY 19) PR NEWSWIRE - Telxon Corporation (NASDAQ/NMS: TLXN) today announced the appointments of several executives:

John M. Popa has been named vice president of finance and chief financial officer for the company. He will be responsible for the finance, accounting, audit, management information systems, facilities and purchasing functions.

Popa has 19 years of experience with international manufacturing and major public accounting firms. Popa is a 1971 graduate of Kent State University where he received his bachelor's degree in business administration. He earned his MBA from the University of Miami, Fla., in 1974 and is a Certified Public Accountant.

Gerald J. Gabriel has been named corporate controller. Gabriel has been with Telxon 10 years, serving in a variety of accounting positions. In his new position, he will oversee the general accounting, accounts payable and receivable, planning and budget functions.

Gabriel is a 1971 graduate of Cleveland State University, where he earned his bachelor of business administration degree in accounting. He is a Certified Public Accountant.

Frederick L. Graf has been named corporate treasurer. In addition to his treasury responsibilities, Graf will be responsible for the company's world-wide tax administration.

Graf has been with Telxon since 1987. He was previously associated with Donn Inc. and Price Waterhouse, Cleveland. He was graduated from Ohio University in 1970 with a bachelor's degree in business administration and received his juris doctorate from the Cleveland State University College of Law in 1979. He is also a Certified Public Accountant.

Telxon portable tele-transaction computers (PTCs) gather, process and store on-site, real-time data which is communicated to a host computer. These systems incorporate the company's proprietary operating and applications software, associated peripheral equipment and communications devices.

Telxon's executive and engineering offices are located in Akron, Ohio, and its manufacturing facility is in Houston. Telxon customers are served by 41 sales and service offices worldwide.

LAWRENCEVILLE, NJ (JULY 19) PR NEWSWIRE - Reflecting the previously announced increase in its reserve for possible credit losses, First Fidelity Bancorporation (NYSE: FFB) today reported a second quarter 1990 loss of $150.4 million or $2.61 per common share on a primary basis.

In the second quarter, the company's provision for possible credit losses was $300 million and $13.9 million was added to a reserve for other real estate owned.

The company had net income in the second quarter of 1989 of $63.2 million or $1.03 per share on a primary basis, and net income of $21.1 million or $.30 per share on a primary basis in the first quarter of 1990. The credit loss provision in the second quarter of 1989 was $19.2 million and in the first quarter of 1990 it was $65 million.

The company had announced in May that there would be an increased credit loss provision based on an internal loan review. At that time, the company said that new management believed that deterioration in the real estate market and a general softening of the economy in recent months as well as a change in the regulatory environment made a comprehensive asset quality review necessary. The loan review has now been completed using current regulatory standards and practices as the company understands them.

"The 1990 second quarter was an important one for First Fidelity," Tony Terracciano, chairman and chief executive officer, said.

"First, the loan review was completed and new, corporate-wide loan policies were put in place. Secondly, our productivity program continued to lower non-interest expense levels. Thirdly, the power of our distribution system was demonstrated in a highly successful corporate-wide drive for consumer deposits, with all of our banks participating in a coordinated marketing campaign. Finally, the internal generation of capital was enhanced as we brought our dividend payment ratio in line with industry norms," he said.

"First Fidelity should begin to return to a more normal level of profitability in the second half of the year as credit loss provisions decline," Terracciano concluded.

In addition, the company said that it expected to realize one-time gains in the third quarter from the sales of two subsidiaries, Fidelcor Business Credit Corp., an asset-based lender headquartered in New York City, and Latimer & Buck Inc., a Philadelphia-based commercial mortgage banking company. The company said it also anticipates a special gain from the settlement of certain pension obligations made possible because of the excess of pension plan assets over projected pension benefit obligations.

First Fidelity, a leader in providing financial services to the New Jersey-Pennsylvania region, operates through some 500 offices and is among the nation's 25 largest banking organizations.

CLEVELAND (JULY 19) PR NEWSWIRE - Thursday's high humidity and warm weather prompted Cleveland Electric Illuminating Company (NYSE: CVX) customers to use more electricity to keep cool than on any previous day this year.

From 1-2 p.m. today, CEI customers set a year-to-date record for electricity use -- 3,586,000 kilowatt hours.

Today's record beat this year's previous peak of 3,578,000 kilowatt hours set June 18.

Heavier than normal usage by all customers, especially stores, offices and residences, boosted today's demand for electricity to the highest level of the year. Industrial customers use approximately 41 percent of CEI's electricity; stores, offices and hospitals about 28 percent; and residences 25 percent.

CEI's all-time peak demand record of 4,067,000 kilowatt hours of electricity was set on Aug. 17, 1988.

CEI serves 740,000 customers in a 1,700-square-mile area encompassing Cleveland-Northeast Ohio.

WELLESLEY, Mass. (JULY 19) PR NEWSWIRE - EG&G, Inc. (NYSE: EGG) reported that for the second quarter for 1990, sales rose 49 percent to a record $612,151,000, compared to $410,719,000 a year ago. Income from operations was $26,434,000 compared to $25,870,000 last year, while net income reached a record $19,874,000, or 69 cents per share, compared to $17,459,000 or 60 cents per share in 1989. The company's cumulative net income at midyear totaled $34,528,000 or $1.20 per share, compared to $34,169,000 or $1.16 per share for the first six months of 1989.

Commenting on the results, EG&G Chairman and Chief Executive Officer John M. Kucharski said the strong increase in sales is due in large part to the contribution from our new government contract activities at Rocky Flats. Although net earnings and EPS were up for both the quarter and six month

periods, which is good, we do expect third quarter and year-end results to reflect even greater improvement.

EG&G, Inc., an international Fortune 300 company, manufactures scientific instruments and electronic and optical components. The company also offers security engineering services, airport security screening systems, and automotive testing services. EG&G also provides systems engineering, precision manufacturing and product testing, and test-site management and operating support, including waste management and environmental safety matters, to many agencies and laboratories of government.

LINCOLN, NEB. (JULY 19) PR NEWSWIRE - The University of Nebraska Foundation today announced that a $100,000 gift from the McGraw-Hill Foundation in New York will establish a Fund for Excellence to honor Campbell R. McConnell. His classic economics text, published by McGraw-Hill, has exposed more students to introductory economics than any other textbook on the subject.

McConnell retired from the economics faculty at the University of Nebraska-Lincoln (UNL) this spring after spending his entire 37-year teaching career there. Reflecting McConnell's balanced instructional approach, income from the Fund will be used for a variety of economic-education programs, including scholarships, on-campus seminars, research fellowships and recognition awards.

The endowment will make awards in a manner that echoes the philosophy of McConnell. He drew on many different economic thinkers and theories to explain the principles of the discipline to students in his classes and to those who read his textbook, "Economics: Principles, Policies and Practices," which he has authored for McGraw-Hill since 1960.

"Professor McConnell's talent was not a formulation of a particular economic theory or government policy, but a remarkable ability to reduce an arcane science to understandable concepts," said Craig MacPhee, chairman of the economics department at UNL's College of Business Administration. "He is, first and foremost, an educator."

More than 3-1/2 million copies of the McConnell text have been sold since it was first issued 30 years ago. It continues to command about 20 percent of the total number of introductory economics texts sold annually. The book sells well abroad, too, in English as well as French, German, Portuguese, Spanish and Russian.

McConnell received his Ph.D. in 1953 from the University of Iowa, after having received his M.A. from the University of Illinois and his undergraduate degree from Cornell College in Mount Vernon, Iowa.

#90200p6689 07/19/1990 ~PR Newswire

CLEARWATER, FL (JULY 19) PR NEWSWIRE - Fortune Financial Group, Inc. (NASDAQ: FORF) today reported net income of $660,000 or 15 cents a share for the quarter ended June 30. This compared with a loss of $2.7 million or 59 cents per share in its fiscal third quarter a year earlier.

The company attributed the improvement primarily to an increase in the net interest income and a drop in loan loss provisions for Fortune Savings Bank, the company's principal subsidiary. "Net interest income climbed to $13.3 million from $9.8 million in last year's third quarter, while the provision for loan losses fell to $1.4 million from $4.3 million," said John R. Torell III, Fortune Financial chairman.

"Pretax earnings totaled $1 million, compared with a loss of $6 million for the 1989 period. Income tax expense amounted to approximately $350,000, compared to an income tax benefit of $3.3 million in 1989.

"Fortune's net interest rate spread improved to 1.66 percent for the quarter just ended from 1.09 percent in the June quarter of 1989 and from

1.62 percent in the March quarter of this year," Torell said. "Interest income benefited from upward repricing of the bank's adjustable rate mortgage portfolio, while conservative deposit pricing and lower market rates helped to reduce our cost of funds."

The company's assets totaled $3.1 billion as of June 30, down from $3.3 billion a year earlier. The reduction is in line with the bank's strategic approach to meeting the fully phased in capital requirements that become effective at the end of 1992. Fortune Savings Bank continues to exceed all present capital requirements under the federal regulations established last year.

General and administrative expenses declined to $11.8 million in the June quarter from $11.9 million a year ago.

During the June quarter the bank completed the sale of its former headquarters building in downtown Clearwater. The sale, which had been pursued for several years, produced a $1.2 million gain.

Fortune has signed a contract to sell a Hillsborough County motel, acquired in a foreclosure action. The bank booked a loss of $1.3 million in the June quarter as a result of the pending transaction.

Fortune Savings Bank registered net operating income of $1.6 million during the quarter, compared with a $309,000 loss in 1989. However, the holding company incurred a loss of $911,000 from the operations of Golf Car Systems, Inc., an unconsolidated subsidiary, compared with a $589,000 loss a year earlier.

For the nine months ended June 30, Fortune Financial had a net loss of $372,000 or 9 cents per common share. That compared with a loss of $1.6 million or 36 cents per share in the nine months ended June 30, 1989.

Stockholders' equity improved to $29.95 per share from $28.92 at the end of the previous fiscal year. Fortune Financial's common stock is traded on the NASDAQ National Market System under the symbol "FORF."

Freiman announced today that the company had a meeting with an Advisory Committee to the United States Food and Drug Administration (FDA) in May regarding the development and marketing approval of an over-the-counter formulation of Naprosyn(R) and that the outcome was favorable.

"Our joint venture with Procter & Gamble Company to develop and market

Naprosyn (naproxen) over-the-counter is progressing well," Freiman said, in addressing a securities analysts meeting in New York City. "We are on track for introducing the over-the-counter formulation of Naprosyn well in advance of the compound's United States patent expiration in December 1993."

Discovered, developed and marketed by Syntex, Naprosyn is currently the largest-selling prescription nonsteroidal anti-inflammatory drug in the United States for the treatment of arthritis and related musculoskeletal conditions.

With regard to the company's performance for the fiscal year ending July 31, 1990, Freiman told the analysts he expects a "good" year, due in part to the contribution of new product sales.

He said Syntex is very pleased with early sales of Synarel(R), prescribed for the management of endometriosis, and Toradol(R) IM, a non-narcotic, injectable analgesic used to treat post-operative pain. Both products were introduced in the United States in the second half of fiscal 1990.

In June 1990, combined sales in the United States of new products introduced since March 1989 were $11 million, Freiman reported. The new products include Cardene(R), for the treatment of angina and hypertension, and Cytovene(R) for sight-threatening cytomegalovirus retinitis in immunocompromised patients, as well as Synarel and Toradol IM.

Freiman noted that in May 1990, the oral formulation of Toradol was introduced in Italy, the first country in which the oral form is being marketed.

In discussing independent market-share data, Freiman said Naprosyn's share of new prescriptions for anti-arthritic drugs in the United States increased to 18.3 percent in May 1990 from a recent low point of 16.0 percent in March 1989.

He noted that one of the company's key priorities over the past two years has been to improve Naprosyn's market share. The market for anti-arthritic prescription drugs, measured by the total number of new prescriptions, has declined approximately four percent, however, in the quarter ended May 1990 compared with the quarter ended May 1989.

#90200p6702 07/19/1990 ~PR Newswire

LONG BEACH, CA (JULY 19) PR NEWSWIRE - JAT Yugoslav Airlines converted one of its McDonnell Douglas (NYSE: MD) MD-11 options to a firm order,

bringing its total firm orders to four. The national carrier also has one additional option, for a total of five tri-jet commitments. Delivery of JAT's wide-cabin airliners will begin in fall 1991. The newest firm order is scheduled for delivery in early 1993.

"The MD-11s will be used as replacements for the DC-10-30," said Tomislav Stojcic, deputy general director of JAT. "The advancements in the MD-11, such as improved operating efficiencies and extended range, will allow us to enlarge our route structure.

"With the MD-11, we will be able to overfly some current en-route stops to South East Asia and Australia and to the Americas," he said. "We would also like to introduce new point-to-point service in the Far East."

A two-class interior will be introduced on JAT's MD-11s. The seating arrangement will be a combined business class, or "Adriatic" class, and an economy class capable of seating up to 325 passengers.

JAT was the 14th airline to select the MD-11 long-range aircraft. The Belgrade-based airline first began operating McDonnell Douglas aircraft in 1947 with the acquisition of DC-3s. JAT began flying DC-9s in 1969.

As of July 1, 1990 McDonnell Douglas had received 371 orders and other commitments for its new advanced, long-range tri-jet from 31 customers in 24 countries. The MD-11 is built by the company's Douglas Aircraft division in Long Beach.

GREENVILLE, SC (JULY 19) PR NEWSWIRE - Walter E. Bartlett, Chairman of the Board and Chief Exeuctive Officer of Multimedia, Inc., (NASDAQ-NMS: MMED) announced today operating results for the second quarter ended June 30, 1990. Revenues for the second quarter totaled $123,919,000 compared with $121,020,000 for the second quarter of last year, an increase of 2.4 percent. Operating profit for the second quarter was $45,720,000, a 3.9 percent increase over the 1989 second quarter operating profit of $43,992,000.

The Company had net earnings of $9,607,000 for the second quarter, compared with net earnings of $10,787,000 for the second quarter of 1989. The second quarter net earnings include a net extraordinary loss of $3,078,000 resulting from the Company's refinancing of its long-term debt of $718 million on June 29, 1990. For the quarter, net earnings before extraordinary loss increased 17.6 percent from $10,787,000 in 1989 to $12,685,000 in 1990. The earnings per share for the quarter were $.77

compared with $.87 for the second quarter of 1989. The extraordinary loss resulted in a $.25 per share reduction in earnings per share. Earnings per share before extraordinary loss were $1.02, an 18.0 percent increase over the second quarter of 1989.

For the quarter, newspaper revenues decreased 1.0 percent from $34,984,000 to $34,648,000. Broadcasting revenues were $38,051,000, compared with $39,452,000, a decrease of 3.6 percent. Cablevision revenues increased 8.1 percent from $27,366,000 to $29,585,000. Entertainment revenues gained 12.6 percent from $19,218,000 to $21,635,000. Operating cash flow(a) for the quarter totalled $53,999,000, a 4.1 increase over the 1989 second quarter amount of $51,852,000. Newspaper cash flow(a) increased 3.3 percent to $13,308,000; broadcasting cash flow(a) decreased 10.6 percent to $15,586,000; cablevision cash flow(a) increased 10.9 percent to $14,938,000; and entertainment cash flow (a) increased 26.8 percent to $11,885,000.

The newspaper revenues are behind last year principally due to the continuing sluggish retail and automotive advertising environment. The broadcasting revenues and operating cash flow(a) are down due to a sluggish retail advertising environment, as well as a very depressed local automotive advertising environment.

The Company had year-to-date net earnings of $15,658,000 compared with $15,427,000 for 1989. Earnings per share for the first six months were $1.26 compared with $1.24 for 1989. Year-to-date earnings per share before extraordinary loss were $1.51, a 21.7 percent increase. Revenues for the period were up 2.8 percent from $227,317,000 to $233,745,000. Operating profit for the first six months was $81,171,000 compared with $77,817,000, a 4.3 percent increase. Year-to-date operating cash flow(a) increased from $93,572,000 to $97,896,000.

Multimedia, Inc. is a media communications company which publishes 13 daily and 49 non-daily newspapers, owns and operates 4 television and 8 radio stations, operates more than 100 cable franchises in four states, and produces and syndicates quality television programming, including the Phil Donahue and Sally Jessy Raphael shows.

(a) Operating cash flow, as defined by the Company, is operating profit plus depreciation and amortization, and amortization of stock awards and stock options.

BETHPAGE, NY (JULY 19) PR NEWSWIRE - Renso Caporali has been elected chairman, chief executive officer and president of Grumman Corporation (NYSE: GQ), succeeding John O'Brien who has resigned for personal reasons. Caporali, formerly vice chairman-technology, will assume the duties of the chairman, chief executive officer and president while the board considers candidates for these positions from both inside and outside the company.

Speaking for the board, Caporali stated: "My job will be to maintain the course we've set, which includes restructuring the company into a more efficient and cost-competitive form, building on our relationships with our major customers and continuing to develop the technologies that make sense for our rapidly changing markets. An indication of the progress we are making is that the company today is achieving or exceeding the major financial and operating objectives in our business plan."

O'Brien also resigned from the board of directors but will be available to help achieve an orderly transition.

As vice chairman-technology, Caporali has directed the office of corporate technology and is responsible for all of Grumman's technical resources, including research, development, engineering and advanced systems functions.

His 31-year Grumman career has included engineering, development and general management assignments; from 1985 to 1988 he was president of the Aircraft Systems division, which is Grumman's largest business unit. He holds a Bachelor of civil engineering degree (with highest honors) and a Master of mechanical engineering degree from Clarkson College of Technology, and earned three degrees from Princeton: Master of aeronautical engineering, Master of Arts in aeronautical engineering and Doctor of Philosophy in aeronautical engineering.

He served as a U.S. Navy pilot from 1954 to 1958.

NEW YORK (JULY 19) PR NEWSWIRE - The Turner Corporation (AMEX: TUR), the nation's leading general builder, today announced that Turner Construction Company has secured contracts from two of the country's leading pharmaceutical companies. The awards, from Ortho Pharmaceutical Corporation, a member of the Johnson & Johnson family of companies, and Merck & Co., Inc., reaffirm Turner's increasing presence in the pharmaceutical construction market.

Turner's New Jersey office is handling the construction management contract for the 79,000-square-foot R.W. Johnson Pharmaceutical Research Institute Protein Development Center on Ortho's grounds in Raritan, N.J. It includes a two-story laboratory wing, clean rooms, administrative space and a basement and penthouse with mechanical and electrical support services.

In West Point, Pa., Turner's Philadelphia office is performing preconstruction consulting services in connection with a project for Merck & Company Inc., including a new office building and an employee services building which involves expansion of an existing cafeteria. Each building is approximately 200,000 square feet.

In addition, Turner's Atlanta office continues work on the SmithKline Bio-Science Laboratories in Tucker, Ga.

"We continue to increase our share of the pharmaceutical construction market," said Turner President Harold J. Parmelee, "which is totally in keeping with our corporation's strategic goals,"

Based in New York City, The Turner Corporation, through Turner Construction Company and other construction subsidiaries, is the nation's largest diversified builder of commercial, industrial, hospital and health care, institutional, government building and multi-unit housing projects. Operating through more than 35 offices, Turner has construction projects underway throughout the United States and abroad.

#90200p6710 07/19/1990 ~PR Newswire

SHAMOKIN, PA (JULY 19) PR NEWSWIRE - Central Pennsylvania Financial Corp. (NASDAQ: CPSA) will opt out of the major anti-takeover provisions of Act 36 which amended the Pennsylvania Business Corporation Law.

Under the new law, all Pennsylvania corporations must accept or opt out of the three major provisions of the act affecting control share voting restrictions, directors' responsibilities and disgorgement provisions.

Control share voting restrictions would limit voting powers when a shareholder acquires voting power which amounts to at least 20 percent of all shares entitled to vote. By opting out of this section, Central Pennsylvania shareholders will continue to have voting rights as outlined in the company by-laws.

The disgorgement provision of the Act is an effort to discourage greenmail

and allows a Pennsylvania corporation to recover profits realized as a result of a sale where an individual or group attempts to acquire at least 20 percent of the voting shares.

These two anti-takeover sections of the law have been criticized by numerous groups including the Securities and Exchange Commission, Federal Trade Commission and analysts who refer to it as the "Incompetent Management Protection Law."

A third provision of the law was adopted by the board of directors. This section deals with directors' responsibilities and allows directors to make decisions pertaining to the company based on evaluating the effects upon not only the shareholders but also customers, employees, suppliers and the communities in which offices are located. This provision is regarded as a clarification of the existing laws and gives the directors the legal authority to plan long term.

Central Pennsylvania Financial Corp. is the parent company of Central Pennsylvania Savings Association. The association is the 18th largest federally insured savings institution in Pennsylvania.

Originally chartered in 1873, Central Pennsylvania conducts business through offices in Williamsport, Danville, Lewisburg, Shamokin Dam, Sunbury, Camp Hill, Mount Carmel, Shamokin and Hershey, Pa. Its Hamilton-Reliance division conducts business from offices in Norristown, Wayne, Warminster, West Point, Pa., and Philadelphia. CONTACT: Frank J. NORTHVALE, NJ (JULY 19) PR NEWSWIRE - ADM Tronics Unlimited, Inc. has announced today that its common stock is now traded on the National Association of Securities Dealers Automated Quotation Systems, commonly referred to as NASDAQ, under the symbol ADMT.

ADM Tronics is a diversified, research oriented company involved in two exciting but distinct product areas - non-toxic water based chemicals and medical electronics. Water-based chemicals are environmentally safe replacements for hazardous chemicals used in food packaging, printing, graphic arts and many other industries. ADM Tronics' water-based products cause no hazards to the environment, workers or consumers.

ADM Tronics has also developed and patented a therapeutic medical electronic device, called the Sonotron, used for the treatment of inflammatory conditions such as arthritis. The company is in the process of gathering data in support of an application which it plans to submit to the U.S. Food and Drug Administration to allow marketing of the Sonotron

device in the United States. The company has begun marketing efforts in certain foreign countries, including Canada.

"Today's listing of our common stock on NASDAQ is an important event in the history of our company," stated Dr. Alfonso Di Mino, president and founder of the company, "I look forward to entering an exciting period of growth with all of our faithful shareholders."

RACINE, WI (JULY 19) PR NEWSWIRE - Johnson Worldwide Associates Inc. (NASDAQ: JWAIA) today reported that for the third quarter ended June 29, 1990 sales increased 28 percent to $82.0 million from $63.8 million in last year's third quarter. Net income from continuing operations increased 25 percent to $6.5 million or $.81 per share from $5.2 million or $.65 per share in the third quarter of last year.

For the nine months ended June 29, 1990 net sales increased 21 percent to $213.3 million from $176.0 million in the same period last year. Net income increased 18 percent to $15.2 million or $1.91 per share from $12.9 million or $1.62 per share in the first nine months of last year.

Terence S. Malone, president and chief executive officer, commented, "We are pleased with our third quarter performance. About two-thirds of the sales increase in the quarter came from sales gains of companies acquired in the last year. Also sales of our diving and marine products, excluding sales of the newly acquired businesses, continued at a record sales level, representing an increase of over 25 percent in the third quarter."

Malone continued, "However, we are still experiencing a softness in the sales of our fishing and camping business, with sales only slightly higher in the third quarter than in the corresponding period last year."

The company also announced that in July it acquired Carlisle Paddle of Greyling, Mich., and Whites Diving Equipment of Victoria, Canada. Carlisle Paddle will complement the company's Old Town Canoe operations and Whites will strengthen the distribution of the company's Scubapro products in Canada.

Johnson Worldwide Associates Inc. is engaged in the manufacture and marketing of recreational products as well as inking and stamping products for commercial and industrial use.

WEST BEND, WI (JULY 19) PR NEWSWIRE - The Ziegler Company, Inc. (NASDAQ: ZEGL), a financial services holding company, announced today results for the second quarter and the first six months of 1990.

In the three months ended June 30, 1990 total revenues were $9,092,000 compared with $9,387,000 in the second quarter of 1989. Net income for the quarter was $902,000 compared with net income of $1,166,000 in the second quarter of 1989. Earnings per share in the second quarter of 1990 were 34 cents compared to 44 cents in 1989.

Total revenues and net income for the six months ended June 30, 1990 were $16,748,000 and $1,178,000, respectfully, compared to $16,352,000 and $1,280,000 in 1989. Earnings per share in the first six months of 1990 were 44 cents versus 48 cents in the same period last year.

Net income and earnings per share from operations for both the second quarter and first six months of 1990 were ahead of the comparable periods of 1989 after netting out the non-recurring insurance settlement of $500,000 recorded in the second quarter of 1989.

Peter D. Ziegler, president and chief executive officer, said, "B.C. Ziegler and Company operating results in the second quarter and first half of 1990 were improved over the same period in 1989, excluding the above mentioned settlement.

"These results reflect increased underwriting activity at B.C. Ziegler and company during the second quarter. B.C. Ziegler and company continues to rely much more heavily on its underwriting activity for a major source of its revenue than other brokerage firms. It is our strength in competing for new business and our weakness in an industry that's beset with excess capacity and severe margin pressure." Ziegler added, "We believe the future is strong for a firm with the unique underwriting capabilities such as ours. To profitably weather the conditions present in our business we

are focusing intensely on other sources of revenues in related financial services."

HONOLULU (JULY 19) PR NEWSWIRE - First Hawaiian Inc. (NASDAQ: FHWN), holding company for First Hawaiian Bank, today announced 1990 second quarter net income of $17,433,000, an increase of 17.9 percent, compared to the $14,785,000 earned during the second quarter of 1989. On a per share basis, net income was $.65, compared to the $.55 earned during the second quarter of 1989, an increase of 18.2 percent.

For the six months ended June 30, 1990, First Hawaiian's net income increased 19.1 percent to $33,285,000, compared to the $27,950,000 earned during the comparable period of 1989. Per share earnings were $1.24, an increase of 19.2 percent, compared to the $1.04 earned during the year earlier period.

First Hawaiian Chairman and Chief Executive Officer Walter A. Dods, Jr., attributed the company's showing to "strong loan growth brought on by the buoyant economies of Hawaii and Guam, and a relatively stable interest rate environment. All three of our primary subsidiaries -- First Hawaiian Bank, First Hawaiian Creditcorp and First Hawaiian Leasing -- increased their contribution to earnings over the comparable period of 1989."

As for the status of the previously announced acquisition of First Interstate of Hawaii Inc., Dods said that First Hawaiian is currently awaiting approval of the acquisition from the Federal Reserve Board in Washington D.C. and other regulatory agencies. First Interstate of Hawaii Inc. is the holding company for First Interstate Bank of Hawaii, the state's fourth largest commercial bank with approximately $858 million in total assets. On Tuesday, the company had announced that it was offering 4.6 million shares of First Hawaiian Inc. stock, priced at $23.75 per share, to help finance the planned acquisition. If all regulatory approvals are received, Dods said, he expects the deal to close during the latter half of this year.

As of June 30, 1990, First Hawaiian Inc.'s total assets were up 23.2 percent to $5,533,885,000; total loans and leases outstanding rose 17.7 percent to $3,015,123,000; total deposits increased 24.4 percent to $4,994,114,000; and total stockholders' equity was up 16.2 percent to $304,044,000, as compared to June 30, 1989.

Company highlights during the second quarter included the naming of Dr. Julia Ann Frohlich, president of the Blood Bank of Hawaii, to the boards of First Hawaiian Creditcorp Inc. and First Hawaiian Leasing Inc. Also during the second quarter, the bank named Dr. Leroy O. Laney, a former member of Gerald Ford's Council of Economic Advisors, vice president and chief economist.

First Hawaiian Inc. is a one-bank holding company whose principal

subsidiary is First Hawaiian Bank, one of the two largest financial institutions in Hawaii with more than $5 billion in total assets.

#90200p6732 07/19/1990 ~PR Newswire

HARTFORD, CT (JULY 19) PR NEWSWIRE - The Travelers Corporation (NYSE: TIC) has been awarded part of what is believed to be the largest managed care contract ever written for any employer. American Telephone & Telegraph (AT&T)(NYSE: T) has contracted with The Travelers to provide managed health care coverage for 23,800 non-management employees in seven cities.

AT&T divided the contract among three insurance carriers: The Travelers, Prudential and Empire Blue Cross/Blue Shield.

Travelers will provide its managed care plan to non-management AT&T employees in Los Angeles, San Francisco, Denver, Phoenix (with a Jan. 1, 1991 effective date) and Miami, Cleveland, and Greensboro, N.C. (with a July 1, 1991 effective date).

Travelers has provided health care coverage to AT&T employees since 1978 including both active and retired AT&T employees. Since 1978 Travelers has maintained a dedicated claims administration office in Greensboro to handle AT&T business. The Greensboro office has 300 employees and processes in excess of 13,000 AT&T claims daily

"By asking us to help set up the country's largest Managed Care Network, AT&T has endorsed our top-tier managed care status," said Joseph Brophy, president of The Travelers Managed Care and Employee Benefits Operation.

"We are enlarging our managed care network daily, and have established 60 networks in 120 cities providing coverage to more than 1,400,000 employees nationwide. Many of the Fortune 500 companies are among our clients," he added.

According to John Barry, AT&T benefit manager, "Because of the magnitude of this undertaking and the fact that our employees have a right to expect top quality health care we were most particular in choosing carriers and selected ones whose networks tracked with our workforce, and could be depended upon to provide top-quality service. We chose The Travelers because they did meet our stringent standards.

"Another reason we selected Travelers was because of the aggressive performance-guaranteed contract they offered. This is an additional way we plan to contain and manage our health care costs," Barry added.

MINNEAPOLIS (JULY 19) PR NEWSWIRE - Nash Finch Company (NASDAQ: NAFC) today reported higher revenues and net earnings for the fiscal second quarter and first half ended June 16.

Total revenues for the 12-week second quarter were $562.0 million, up 9.7 percent from $512.5 million last year. Net earnings for the quarter rose to $4.5 million, or $.41 per share, compared with $1.1 million, or $.10 per share, in the second quarter of 1989.

For the 24-week first half, revenues increased 7.3 to a record $1.073 billion compared with $999.3 million in 1989. Net earnings totaled $6.4 million, or $.59 per share, compared with $2.9 million, or $.26 per share, in the first half last year.

Net earnings for the quarter and first half were the highest in the company's history, exceeded only by the record results posted for the comparable periods in 1988. In 1989, second-quarter and first-half earnings were adversely affected by non-recurring charges related to store closings and a reduction of gross margins at one of the company's Southeast subsidiaries.

Nash Finch Chairman Harold Finch said the company was pleased to report improved quarterly sales and earnings. "Sales gains reflected continued increases in market share throughout our trade areas. The earnings reflected gross margin and expense control improvement, resulting in higher operating profits for wholesale operations and continued profit

progress for retail operations," said Finch.

Finch also said that second-quarter results include the first full quarter of very satisfactory operations by Timberlake Grocery Company of Macon which was acquired in January 1990. Timberlake supplies independent retail grocery stores in Georgia and northern Florida.

Nash Finch is one of the largest food wholesalers in the country, supplying products to approximately 600 affiliated supermarkets and some 5,000 independent retailers in 24 states. The company also owns and operates supermarkets, warehouse stores and mass merchandise stores in 12 states and produce marketing subsidiaries in California.

WILSON, NC (JULY 19) PR NEWSWIRE - John A. Allison IV, Chairman and Chief Executive Officer of BB&T Financial Corporation (NASDAQ-NMS: BBTF), and W. Jerry Rapp, President and Chief Executive Officer of Albemarle Savings and Loan Association, today jointly announced the approval by the respective Boards of Directors of an Agreement and Plan of Reorganization to provide for the acquisition of Albemarle by BB&T

Terms of the agreement and related Plan of Conversion provide for the conversion of Albemarle from a mutual to a capital stock savings bank, and for the simultaneous acquisition of Albemarle by BB&T. The conversion and acquisition transaction is subject to a number of conditions, including approval by applicable regulatory authorities and the affirmative vote of a majority of the eligible members of Albemarle Savings and Loan Association. The conversion and acquisition will have no effect on Albemarle's customer relationships. Upon completion of the transaction, Albemarle will become a wholly-owned savings bank subsidiary of BB&T.

In connection with the conversion and acquisition, shares of BB&T common stock will be offered in a subscription offering to eligible account holders as of February 28, 1990 and voting members of Albemarle and a community offering to individuals who are residents of Pasquotank and Dare Counties. Shares not sold in the subscription and community offerings will be offered to the public in an underwritten offering.

The Plan of Conversion as adopted by Albemarle currently provides that the subscription and community offering price will be equal to 95 percent of the public offering price or, in the event that there is no public offering, 95 percent of the last sale price of the BB&T common stock on the day following the expiration of the subscription and community

offerings. The provision in the Plan of Conversion relating to the purchase price discount is subject to receipt of appropriate waiver by the Office of Thrift Supervision and the N.C. Savings & Loan Administrator whose approvals are required in connection with the conversion and acquisition. There can be no assurances that such waiver will be received.

The failure to obtain the waiver will result in amendment to the Plan of Conversion to eliminate the subscription and community purchase price discount. The number of shares to be offered in the subscription and community offerings will be determined by dividing the pro forma market value of Albemarle, as determined by an independent appraiser, by 95 percent of the public offering price or, in the event that there is no public offering, 95 percent of the last sale price of the BB&T common stock on the day following the expiration of the subscription and community offerings. The offerings will be made only by means of a prospectus.

BB&T estimates that the acquisition will be anti-dilutive in terms of earnings per share to BB&T shareholders on a pro forma basis.

BB&T is the oldest bank in North Carolina having been organized in 1872.

CONTACT: B. Gloyden Stewart, Jr., Investor Relations, 919-399-4219, or Scott E. Reed, Senior Executive Vice President and Treasurer, 919-399-4418, both of BB&T Financial Corporation, or W. Jerry Rapp, President and Chief Executive Officer of Albemarle Savings and Loan Association, 919-335-0888

#90200p6744 07/19/1990 ~PR Newswire

NORWALK, CT (JULY 19) PR NEWSWIRE - Leon C. Hirsch, chairman of United States Surgical Corporation (NYSE: USS), announced today that, "Reporting by certain news services on July 18, 1990, of USSC's second quarter 1990 net income and net income per share comparisons was incomplete."

In the second quarter of 1989, net income and net income per share included receipt of $10.0 million from the settlement of a patent infringement claim (less applicable legal expenses) and a $4.5 million writedown of certain assets. Excluding these special items, net income and net income per share in the second quarter of 1989 would have been $7.2 million and $.32, respectively. USSC reported net income and net income per share of $10.8 million and $.42 per share in the second quarter of 1990, respectively. Accordingly, net income and net income per share in the second quarter of 1990 would have been up 50 percent and 31 percent respectively, if the special items had been excluded, rather than up 13 percent and unchanged.

As the Wall Street Journal reported today in its Positive Quarterly Earnings Surprises section, USSC's net income per share was 7.69 percent higher than the average of analysts' estimates.

United States Surgical Corporation is the world's largest manufacturer and marketer of surgical staplers.

#90200p6751 07/19/1990 ~PR Newswire

PORTLAND, OR (JULY 19) PR NEWSWIRE - Oregon Steel Mills Inc. (NYSE: OS) reported record net income of $8.1 million ($1.01 per share on 8 million common shares) for the second quarter of 1990 on record sales and shipments of $78.3 million and 123,200 tons, respectively.

This compares to net income of $6 million (76 cents per share on 7.9 million common shares), on sales of $60.5 million from shipments of 103,100 tons in the second quarter of 1989.

Second-quarter operating income increased 40.2 percent to $12.7 million in 1990 from $9.1 million in 1989 as sales increased 29.4 percent to $78.3 million from $60.5 million on the 19.5 percent increase in tonnage shipped.

The operating profit margin for the second quarter of 1990 was 16.3 percent as compared to 15 percent in the second quarter of 1989.

For the first six months of 1990, net income increased 43.4 percent to $15.1 million ($1.90 per share on 8 million common shares) from $10.6 million ($1.35 per share on 7.8 million common shares) for the similar period in 1989. Sales for the six month period increased 29.6 percent to $153.1 million from $118.1 million in 1989 as shipments of the company's steel products increased to 246,000 tons from 209,000 tons. Net income, sales and shipments for the first six months of 1990 were the highest in the company's history.

Operating profit margin for the first six months of 1990 was 15.5 percent as compared to 13 percent in the first six months of 1989.

Contributing to the above increases were continued demands for the company's heat treated plate and large diameter line pipe products and increased production and lower costs at the company's Portland steel mill. In addition, margins for the first six months of 1989 were negatively impacted by export orders for lower commodity grades of steel plate.

Increased shipments for the first half of 1990 were the result of the company's start up in December 1989 of the newly acquired Fontana plate mill. Prior to the Fontana plate mill start up, the company's steel plate finishing capacity was limited to the output from the company's Portland steel mill.

Oregon Steel Mills Inc. owns and operates a steel minimill in Portland, and a steel plate rolling mill in Fontana, Calif., which produce hot-rolled carbon, high-strength low alloy, heat treated and alloy steel plate, and a steel pipe mill in Napa, Calif, that produces large diameter

oil and natural gas transmission line pipe.

#90200p6753 07/19/1990 ~PR Newswire

WASHINGTON (JULY 19) PR NEWSWIRE - The following statement summarizes remarks by Freddie Mac (NYSE: FRE) Chairman and CEO Leland C. Brendsel about the Treasury/Office of Management and Budget proposal regarding government-sponsored enterprises (GSEs). The remarks were made in a speech today at the California League of Savings Institutions' Western Secondary Mortgage Market Conference in San Francisco.

Freddie Mac Chairman and CEO Leland C. Brendsel today criticized the Treasury/OMB effort to promote legislation that would restrict the activities of Freddie Mac and Fannie Mae (NYSE: FNM) in the secondary mortgage market.

Brendsel called the action a "major and significant" proposal that poses a challenge to Freddie Mac's progress, one that could virtually result in Freddie Mac and Fannie Mae being placed under Treasury/OMB control.

Brendsel cited at least three adverse results that could occur: 1) A negative impact on housing that could soften housing prices nationwide.

2) Raise the cost of the S&L bailout because a weakened housing market would have an adverse impact on assets currently held or being acquired for disposal by the Resolution Trust Corporation.

3) Significantly restrict Freddie Mac's capacity to provide affordable mortgage credit, especially to renters and first-time homebuyers.

Brendsel pointed out that the legislative proposal would have these and other effects while doing nothing to help reduce the federal budget deficit.

Brendsel said he was opposed to the totality of the Treasury/OMB proposal, which includes requirements for a triple-A rating by Treasury-approved, nationally recognized rating agencies and comprehensive business plans acceptable to Treasury if two ratings cannot be obtained.

The legislative proposal calls for GSEs to obtain a triple-A rating without any implicit or explicit federal guarantee within three months of passage of the legislative proposal.

Brendsel said the Freddie Mac and Fannie Mae, under this provision, would be held to a much higher rating standard than any other shareholder-owned

corporation. Also, he questioned the accountability of the rating agencies. There would be no obligation or accountability on the part of the private rating agencies, he said, which could serve to interrupt Freddie Mac's mission to support housing.

He also pointed out that Treasury and the General Accounting Office are currently considering the risk posed by Freddie Mac and Fannie Mae and are doing it in an orderly, deliberate manner according to a congressional mandate.

HIGHLAND PARK, MI. (JULY 19) PR NEWSWIRE - In response to press inquiries concerning comments made by Robert A. Lutz, president of Chrysler Motors, at a meeting of automotive journalists yesterday in Detroit, Chrysler indicated that earnings for the second quarter of 1990, which the company anticipates reporting on July 31, are generally in line with the average of outside analysts' estimates of approximately 78 cents per share.

Further, the company indicated that it anticipates a substantial loss for the third quarter, during which key plants, including those producing the popular minivan and Jeep vehicles, will be closed for new model changeovers.

#90200p6760 07/19/1990 ~PR Newswire

KANSAS CITY, MO (JULY 19) PR NEWSWIRE - DST Systems Inc. (NASDAQ: DSTS) reported earnings of $4,945,000, or 26 cents per share, for the second quarter ended June 30, 1990, a 71.5 percent increase in earnings over the reported net income of $2,883,000, or 15 cents per share, for the quarter ended June 30, 1989. Year to date earnings increased to $8,761,000, or 46 cents per share, as compared to $5,789,000, or 30 cents per share, for 1989. Revenues for the quarter increased 18 percent to $37.2 million over second quarter 1989.

The increase in earnings for the current quarter over second quarter 1989 and the first quarter of 1990 is primarily due to increased earnings from shareowner processing operations. Revenues increased over first quarter 1990 and significantly over the prior year due to an increased account base and elimination of certain costs associated with 1989 new business acquisitions. Expenses have risen from the prior year due to increased

EDP equipment costs and personnel additions necessary to service the increased account base. However, second quarter 1990 expenses declined from the first quarter of 1990 due to the elimination of most contract programming costs associated with the FLEX project which was substantially completed in the second quarter.

The initial production conversions of the FLEX project have commenced and the company is scheduled to complete its FLEX conversions by the fourth quarter 1990. In addition, the company recognized its first revenues from its image-based Automated Work Distribution System (AWD) in the current quarter.

Results for all other business units were essentially in line with the prior year, but trailed first quarter 1990 primarily due to lower software sales by Policyholder ServiceCorp. and a non-recurring gain by First of Michigan recognized by the company in the firstquarter 1990 as a result of a merger of an equity investment of First of Michigan.

As previously announced, Kansas City Southern Industries (KCSI) has accepted for payment approximately 2.2 million shares tendered in response to KCSI's tender offer for any and all shares of DST not already owned by KCSI. The shares tendered will increase KCSI's ownership percentage to over 98 percent, and KCSI will acquire any remaining shares at the tender price of $15.85 per share in a second step merger.

#90200p6762 07/19/1990 ~PR Newswire

DALLAS, (JULY 19) PR NEWSWIRE - Centex Corp. (NYSE: CTX) today announced record revenues, net earnings and earnings per share for the quarter ended June 30, 1990, the first quarter of the company's 1991 fiscal year. The announcement was made during the company's annual meeting of stockholders held in Dallas.

Revenues for the current quarter reached $565,914,000, a 22 percent increase from $464,628,000 for the same quarter last year. Net earnings of $16,470,000 this year were 8 percent higher than $15,265,000 for the similar quarter in fiscal 1990. Earnings per share totaled $1.05 this year, a 5 percent increase from $1.00 for the same quarter in fiscal 1990.

Centex Corp., listed on the New York Stock Exchange under the symbol CTX, is based in Dallas. Its operations include home building and mortgage banking, general construction, construction products and savings and loan.

Revenues from Centex's home building and mortgage banking business were

$277.4 million for the current period, 36 percent higher than $203.4 million for the same quarter last year. Operating earnings from home building and mortgage banking rose 29 percent to $25.9 million from $20.1 million for the similar quarter a year ago.

Home closings for the quarter totaled 2,021 units this year, a 23 percent increase over 1,649 units for the same quarter last year. The backlog of homes sold but not closed at June 30, 1990, totaled 3,166 units, 8 percent higher than 2,935 units at June 30, 1989.

Centex's general construction revenues were $235.1 million for the current quarter, a 12 percent increase over $210.1 million for the same quarter last year. Operating earnings from general construction were $3.0 million 23 percent below operating earnings of $3.9 million for the same quarter a year ago. The backlog of uncompleted construction contracts at June 30, 1990, was $1.04 billion versus $1.09 billion at June 30, 1989.

Construction products revenues were $40.5 million for the quarter this year, 14 percent higher than $35.4 million for the same quarter in the prior fiscal year. Operating earnings from construction products were $2.6 million, a 30 percent decline from $3.7 million for the same quarter a year ago.

Revenues from the savings and loan were $13.0 million for the current quarter, 17 percent less than $15.7 million for the same quarter last year. Operating earnings from the savings and loan were $269,000 for the current quarter compared to $56,000 for the same quarter last year.

Centex said that the quarter's improved financial results were due to gains in its home building and mortgage banking business, offset to some extent by lower earnings in general construction and construction products. Home building closings increased this year and the average home sales price for the quarter was 11 percent higher than the comparable price a year ago. In addition, the company said its mortgage banking operation reported record quarterly earnings. General construction earnings declined due to certain lower-margin projects in the later stages of construction. Construction products operations in Texas and the gypsum wallboard operation continued to be negatively affected by low demand and pricing, and there have been start-up and operational difficulties at Centex's new gypsum wallboard plant and Wyoming cement plant.

The company said that the high backlog levels in both home building and general construction and a strong performance by the mortgage banking operation should favorably affect the company's financial results during the remainder of the year.

#90200p6763 07/19/1990 ~PR Newswire

DALLAS, (JULY 19) PR NEWSWIRE - Central and South West Corp. (NYSE: CSR) reported a decrease in consolidated earnings for the three and 12 month periods ended June 30, 1990. These decreases were due to the inability to recognize equity cost deferrals associated with the South Texas Project (STP) nuclear power plant and to various non-recurring items during the prior periods. These decreases were offset by interim rate increases at Central Power and Light Co.

Consolidated earnings per share for the second quarter decreased to 54 cents from 75 cents on 94.1 million average shares outstanding. Net income for common decreased to $51 million for the three month period from $70 million during the same period in 1989.

For the 12 months ended June 30, 1990, earnings per share were $2.63 on 94.1 million average shares as compared with $3.40 on 94.3 million averags shares for the same period a year ago. Net income for common decreased to $247 million from $321 million.

Earnings for the first and second quarters of 1990 will be restated if the Public Utility Commission of Texas (PUC) approves Central Power and Light Co.'s stipulated agreement to settle all issues in its rate request to recover its investment in STP. The settlement would allow recognition during the first quarter of 1990 of $110 million of income related to deferred interest charges, to the extent actual interest charges were

incurred during the period between commercial operation of STP Units 1 and 2 and March 1990. The settlement would also allow recognition of an additional $49 million of income related to deferred interest, to the extent it was incurred, on STP Unit 2 for the balance of 1990. A Texas PUC order is not expected until the third or fourth quarter of this year.

Central and South West Corp. is a Dallas-based public utility holding company with four electric subsidiary companies that provide service to portions of Texas, Oklahoma, Louisiana and Arkansas.

#90200p6767 07/19/1990 ~PR Newswire

ZEELAND, MI (JULY 19) PR NEWSWIRE - Gentex Corporation (NASDAQ NMS: GNTX) a Zeeland, Mich.-based manufacturer of automatic rearview mirrors for the

automotive industry, today reported decreased revenues and income for the second quarter ended June 30, 1990, due to a 65 percent decrease in unit sales of its older, motorized mirrors. Unit sales of the company's patented electrochromic mirror, a rearview mirror which automatically dims in response to the level of headlight glare from following vehicles, increased by 39 percent, despite the slowdown in the automotive industry.

Gentex reported net income of $153,000, or 2 cents per share, on sales of $4,927,000 for the second quarter of 1990, as compared with net income of $553,000, or 9 cents per share, on sales of $5,743,000 for the same period in 1989.

Net income for the first six months of 1990 was $583,000, or 8 cents per share, on sales of $10,728,000, compared with net income of $1,060,000, or 17 cents per share, on sales of $11,822,000 for the six months ended June 30, 1989.

"Sales of the Gentex Motorized Mirror decreased more than we had anticipated for the second quarter," said Gentex Executive Vice President Kenneth LaGrand. Gentex sold approximately 60,000 Motorized Mirrors to automotive manufacturers in the second quarter of 1989, and approximately 21,000 for the same period in 1990.

"The decrease in sales of our Motorized Mirror is partially attributable to the decreased demand for certain model domestic automobiles that utilize this product," LeGrand said, "and also because of the change-over from our Motorized Mirror to the new Electrochromic Mirror. People want the newest technology available, and the Electrochromic Mirror has been widely accepted by the automotive companies." Gentex sold approximately 60,000 electrochromic mirrors in the second quarter of 1990 compared with approximately 43,000 for the same period in 1989.

LaGrand is disappointed by the first six months of the year, but he expects the second half of the year to gradually improve with the start of the 1991 model year and the increased production predicted by the U.S. automotive industry. "We're pleased with the increasing sales of our electrochromic mirrors, and the progress we're making in marketing our new exterior mirror and the interior/exterior mirror systems to both domestic and foreign original equipment manufacturers. It is likely that new purchase orders will be issued within the next 12 months."

Gentex Corporation develops, manufactures and markets proprietary electro-optical products; patented electrochromic and motorized automatic mirrors for the automotive industry and an extensive line of fire protection products for commercial applications. Shares of Gentex common stock are traded in the NASDAQ National Market System under the symbol GNTX.

ALBUQUERQUE, NM (JULY 19) PR NEWSWIRE - Horizon Healthcare Corp. (NYSE: HHC) today announced that not earlier than 10 days from today it plans to close a private placement of 421,567 units consisting of two shares of its common stock and a warrant to buy one additional share of common stock. At the same time it has retained Gruntal & Co. Inc. to raise up to an additional $2 million of equity in August through a separate private placement of its stock. These transactions will result in the addition of approximately $3 million of equity capital into the company. The company

noted that under the Shareholder Approval Policy of the New York Stock Exchange the transactions require shareholder approval. However, the transactions will occur without such approval because the company applied for an exception from this approval policy. This exception was expressly approved by the Audit Committee of the company's board of directors and was granted by the NYSE on the ground that the delay in obtaining such approval would seriously jeopardize the financial viability of the company because it would create a default under the terms of the company's $28 million Credit Agreement.

Commenting on the upcoming private placement, the company's president, Neal Elliott, stated as follows: "We have been trying for the last several months to raise additional equity for the company in order to meet our working capital needs. It is our belief that this additional equity, when combined with our new banking relationship, will posture the company for growth and financial success as we enter Fiscal 1991."

ST. PAUL, Minn. (JULY 19) PR NEWSWIRE - Anthony L. Andersen, president and chief executive officer, H.B. Fuller Company, today named Walter Kissling to the new position of executive vice president and chief operating officer. The appointment takes effect immediately.

Most recently senior vice president, International Operations, Kissling, 59, now assumes worldwide operations management responsibility for the company. Global area managers, as well as John Ray, senior vice president and general manager of the company's U.S. Adhesives, Sealants and Coatings Division, and Robert Odom, senior vice president and general manager of the U.S. Specialty Divisions and Subsidiaries, will report to Kissling. Support functions related to customer service and operations also will be his responsibility.

Kissling's appointment will lead to additional realignment of responsibilities within the company. Andersen and Kissling will finalize these plans before the close of the year.

Andersen described the expansion of Kissling's responsibilities as organizational streamlining that will help H.B. Fuller Company achieve its financial goals and continue to develop as a worldwide specialty chemical company. "While our company has achieved significant sales growth in the most recent decade -- from $287 million in 1980 to $753 million in 1989 -- and our operations now include 32 countries, we have not changed our basic structure. We are a different company today than we were in 1980 and our organization needs modification," he said.

"Since joining H.B. Fuller in 1957, Walter has proven his capabilities as a manager of multinational operations. With his guidance, our international operations have grown to provide half of the company's total sales," Andersen added. "Walter knows the company and its people and understands the complexities of international business. It is appropriate that his skills be directed to all of our operations, worldwide."

Kissling came to Fuller with its 1957 acquisition of Kativo Chemical Industries, Costa Rica. Since 1968 he has served on the H.B. Fuller Company board of directors and will continue in that capacity. A native and life-long resident of Costa Rica, he will relocate to St. Paul and establish his primary residency in the area, while continuing to maintain a secondary office and home in Costa Rica.

In accepting the appointment, Kissling noted, "I'm confident we can grow H.B. Fuller Company faster by using organizational concepts already proven effective in our international operations. Those concepts include a direct personal involvement by managers in P&L and strategic decision-making processes. The success of my new assignment depends on my ability to integrate these types of changes effectively."

H.B. Fuller Company is a worldwide manufacturer and marketer of specialty chemical products, including adhesives, sealants, coatings, paints, waxes and sanitation chemicals, with Fiscal 1989 sales of $753 million.

#90200p6771 07/19/1990 ~PR Newswire

WASHINGTON (JULY 19) PR NEWSWIRE - The board of directors of the Student Loan Marketing Association (Sallie Mae) (NYSE: SLM) today appointed Lawrence A. Hough as the corporation's new president and chief executive officer.

Hough succeeds Edward A. Fox, the first and only previous chief executive officer of Sallie Mae, who announced in May that he is resigning to assume a post in academia.

The board today also named Albert L. Lord as executive vice president and chief operating officer, a new position.

"Larry brings to the chief executive's post vast knowledge and experience " said Chairman of the Board Harry R. King. "He is sensitive to the company's social mission and is aware of the financial success required of the company to accomplish that mission.

"The company, its stockholders, personnel and the end user of its product, the student, will be well served by Larry Hough."

Hough has been Sallie Mae's executive vice president for marketing, servicing and systems since 1984. He joined the corporation in 1973 and had served Sallie Mae in a variety of capacities since then.

Hough holds a bachelor's degree in engineering from Stanford University and a master's degree from the Sloan School of Management at the Massachusetts Institute of Technology. He was twice world champion and a silver medalist in international rowing in the 1968 Olympics and has served on the board and been treasurer of the U.S. Olympic Committee. He is presently vice chairman of the board of trustees of the Shakespeare Theatre at the Folger Library in Washington.

Lord, too, had served in his former capacity as executive vice president and chief financial officer of Sallie Mae since 1984. He joined the corporation three years prior to that as vice president and controller. Lord previously was treasurer of First Pennsylvania Corporation and several of its subsidiaries; prior to that association, he managed accounting and auditing engagements of financial institutions for Peat, Marwick, Mitchell in Philadelphia.

Together with Fox and Ronald F. Hunt, former executive vice president and general counsel who also resigned in May, Hough and Lord have been part of the senior management team that has led Sallie Mae for the last six years. During that time, Sallie Mae grew from a $12 billion to a $39 billion corporation. It is the largest single provider of funds for education loans and one of the 20 largest non-bank financial services companies in the country.

Sallie Mae, a federally chartered, stockholder-owned corporation, is the major financial intermediary serving the education finance market. By buying insured student loans and providing other financial services to financial and educational institutions, Sallie Mae replenishes local supplies of student credit. The corporation owns nearly 30 percent of all guaranteed student loans outstanding today.

NEW YORK (JULY 19) PR NEWSWIRE - Renault Vehicules Industriels S.A. (RVI) and Mack Trucks, Inc. (NASDAQ: MACK) announced today that the special committee of the Mack board of directors appointed to evaluate the tender offer that has been made by ITM Acquisition Corp., an indirect wholly

owned subsidiary of RVI, to purchase all of the outstanding shares of common stock of Mack not beneficially owned directly or indirectly by RVI, at $6 per share, net to the seller in cash (the offer), was contacted by Navistar International Transportation Corp. (NYSE: NAV) yesterday regarding Navistar's possible interest in acquiring Mack.

In a letter to the special committee, Navistar stated that it might be prepared to make a firm offer to acquire Mack at a price that would exceed the offer after Navistar had been provided with confidential information and conducted a comprehensive due diligence review of Mack.

Navistar stated it believes that it would be able to conduct such review and make a decision whether or not to make a firm offer "subject to the usual conditions as set forth in the Renault Offer" within 10 days.

Navistar also stated in its letter that it would not be possible to effectively proceed with an offer without a decision by the "Renault Group" (which includes RVI) to dispose of its investment in Mack.

RVI has advised Mack's board of directors and the special committee that it has no interest in disposing of its investment in Mack. RVI owns approximately 44.5 percent of the currently outstanding shares and could own, upon exercise of a warrant and conversion of convertible debentures of Mack owned by RVI, approximately 61.1 percent of the issued and outstanding shares.

Mack also announced that the special committee is studying the offer and will report to the board in due course.

The offer is scheduled to expire at midnight, New York time, on Wednesday, Aug. 8, 1990.

#90200p6782 07/19/1990 ~PR Newswire

PLYMOUTH, Minn. (JULY 19) PR NEWSWIRE - In Home Health, Inc. (NASDAQ: IHHI), today reported record revenue for the three months ended June 30, 1990, and its fifth consecutive profitable quarter. For the three months ended June 30, 1990, revenue of $4,969,000 increased 40 percent over the $3,538,000 reported for the same period last year. Net income was $147,000, or 3 cents per share, versus net income of $4,000, $.00 per share, for the three months ended June 30, 1989.

Net income was down slightly from the prior quarter largely due to $55,000

of non-recurring legal costs related to the company's defending its use of the name "Home Care Plus" at seven of its branch locations. Settlement of the action in June 1990 resulted in the company changing the operating name of these locations to "Home Health Plus."

For the nine months ended June 30, 1990, the company had revenue of $13,406,000 versus $8,231,000 for the same period a year earlier, an increase of 63 percent. Net income for the nine-month period was $448,000 or 11 cents per share versus a loss of $(199,000), or $(.05) per share for the same period last year.

Excluding the California operations acquired during fiscal year 1989, revenue for the nine months ended June 30, 1990, has increased 42 percent over the same period of a year earlier.

As previously announced, the company has filed a registration statement with the Securities and Exchange Commission relating to a proposed $2,500,000 public offering of units consisting of common stock and warrants. This registration statement has not yet become effective. The proceeds of the offering will be used primarily to finance the company's expansion into new geographic areas and its entry into the home infusion pharmaceuticals and supplies market.

Judy Figge, the company's president/CEO said, "We are, of course, most pleased with the continued profit performance. The company's consistent revenue growth from quarter to quarter of 7 percent for the first quarter to 8 percent for the second quarter to 14 percent for the third quarter, all coming from the existing nine branches in five markets, shows real strength in those markets. The opportunity to add infusion products to the existing base of business will enhance the services currently offered and provide more opportunity for growth."

In Home Health, Inc., specializes in providing high-quality home health care services to people of all ages. The company currently operates nine branch offices in five regional markets.

#90200p6784 07/19/1990 ~PR Newswire

SILVER SPRING, MD (JULY 19) PR NEWSWIRE - Running late? Car broken down? You rush to a pay phone, dial -- and no one answers. Now, if you're calling from 250 Bell Atlantic pay phones in Washington and suburban Maryland, you'll be able to leave a message.

Bell Atlantic's six-month trial of its Send-A-Call messaging system starts today at 30 Union Station pay phones and, within two weeks, at selected

Metro stops, Giant and Safeway supermarkets, 7-11 and High's convenience stores, restaurants, Lake Forest Mall and a variety of other locations in the District of Columbia and Bethesda, Lanham and Gaithersburg.

With Send-A-Call service, customers calling from Bell Atlantic public phones who get a busy or no answer can leave a 30-second message for an additional 25 cents. A voice prompt will help them through the steps. If the line is busy, the phone system will attempt to deliver the message every 15 minutes for up to two hours; if there is no answer, every 30 minutes for up to four hours.

"Once we have tested the technology and customer interests, we will decide whether to expand the service," said Joe O'Hara, assistant vice president, Bell Atlantic Public Communications. Permission from the Federal Communications Communications will be required for full deployment.

Philadelphia-based Bell Atlantic is the parent company of New Jersey Bell, Bell of Pennsylvania, Diamond State Telephone of Delaware and the Chesapeake and Potomac Telephone Companies of Maryland, Virginia, West Virginia and Washington, D.C.

The corporation is also the parent company of businesses that provide mobile communications in the mid-Atlantic region as well as computer maintenance and financial services in national and international markets.

#90200p6786 07/19/1990 ~PR Newswire

TROY, Mich. (JULY 19) PR NEWSWIRE - Standard Federal Bank (NYSE: SFB) today reported net income of $9.9 million, or $0.32 per share, for the three months ended June 30, 1990, compared to $13.4 million, or $0.43 per share, for the comparable period in 1989. The second quarter results brought earnings for the six months ended June 30, 1990 to $19.6 million, or $0.64 per share, compared to $26.3 million, or $0.85 per share, for the comparable period in 1989.

The comparative reduction in earnings for both the three and six months ended June 30, 1990 is primarily attributable to:

-- lower levels of gains and fees recognized from the sale of the Bank's originated loans,

-- lower levels of average earning assets, and -- higher costs associated with FIRREA. Costs associated with FIRREA, which include lower dividends on FHLB stock, relatively higher examination and supervisory fees and higher deposit insurance premiums, reduced the Bank's after-tax earnings by

$1.0 million and $2.2 million, during the three and six months ended June 30, 1990, respectively. These reduced levels of earnings represent $0.03 and $0.07 per share, respectively.

For the third consecutive quarter, the Bank's single-family loan origination volume established a record when compared with the same quarter in any previous year. Originations for the three months ended June 30, 1990 totaled $277.5 million, bringing total originations for 1990 to $537.6 million. The volume originated during the first half of 1990 represents an increase of over 50 percent, when compared to the $356.4 million of single-family mortgage loans originated by Standard during the comparable period in 1989.

During the first half of 1990, deposits decreased $362.4 million, from $6.2 billion at December 31, 1989, to $5.8 billion at June 30, 1990. This reduction is attributable to the repayment of all of the Bank's $386.5 million of relatively high-cost brokered deposits.

Nonperforming assets continued at low levels, representing only 0.32 percent of assets at June 30, 1990, compared to 0.38 percent of assets at December 31, 1989.

Separately today, the Bank's board of directors declared a regular $0.10 per share quarterly dividend to stockholders of record on Aug. 17, 1990, payable Aug. 31, 1990.

Standard Federal Bank, with assets of $9.75 billion, and 113 branch offices in Michigan and Indiana, is listed on the New York Stock Exchange under the symbol SFB.

#90200p6793 07/19/1990 ~PR Newswire

WINDSOR LOCKS, Conn. (JULY 19) PR NEWSWIRE - The Dexter Corporation (NYSE: DEX), a leading specialty materials producer, today reported that sales for the second quarter of 1990 were $224.8 million compared with sales of $221.5 million for the second quarter of 1989. Quarterly earnings were $12.1 million, or $.50 per share, compared with earnings of $12.6 million, or $.51 per share, for the same period last year.

Sales for the first half of 1990 were $451.4 million, a 4 percent increase over sales of $436.1 million in the first half of 1989. Earnings for the first six months of this year were $22.1 million, or $.91 per share, an 8 percent decrease from 1989 first half results of $24 million, or $.97 per share.

Operating results in the second quarter of 1990 were reduced by a restructuring charge of $0.7 million, or $.02 per share, including the estimated costs of an early retirement program at the company's nonwovens division and severance costs resulting from the decision to downsize the molecular diagnostics business at majority-owned Life Technologies, Inc. Included in second quarter 1989 results was a $0.7 million, or $.02 per share, capital gain on the sale of a warehouse made redundant as a result of 1988 restructuring steps.

The 1 percent increase in sales for the second quarter of 1990 compared with the second quarter of 1989 comprises a 2 percent increase in unit volume, a 2 percent increase due to the effect of higher currency exchange rates on international sales, and price increases averaging 1 percent. These increases were virtually offset by a 4 percent decrease in net sales owing to the effect of acquired and divested businesses and the formation of the joint venture with Solvay & Cie, S.A., which resulted in the elimination of the thermoplastic polyolefin business' sales from consolidation effective April 1, 1990.

Products with strong sales performance in the second quarter of 1990 include food and beverage container coatings, molding powders serving the computer and electronics markets, water management services, and products for molecular biology at Life Technologies.

Consolidated gross margin of 36.2 percent of sales for the second quarter of 1990 improved substantially compared with both the 33.6 percent in the first quarter of 1990 and the 33.4 percent in the second quarter of 1989. Included in cost of sales for the current quarter was a $1.5 million provision for the cost to release Dexter's cogeneration facility, which became operational in April of 1990, from a 20-year operating and maintenance contract with a third party. This facility will now be operated by personnel at the company's nonwovens division.

Completely offsetting this charge in cost of sales were the proceeds from the settlement of a 1989 business interruption claim. Gross margin for the quarter as a percent of sales improved compared with the same period last year in all four product groups due principally to favorable product mix changes and an overall decrease in raw material costs combined with an increase in average selling price. Gross margin as a percent of sales was unfavorably impacted by a net decrease in LIFO income of $1.3 million in the second quarter of 1990 compared with the same period last year, principally due to fetal bovine serum costs at Life Technologies.

The Dexter Corporation is a Fortune 500 company producing specialty materials. Founded in 1767, Dexter is the oldest company listed on the New York Stock Exchange.

#90200p6794 07/19/1990 ~PR Newswire

DALLAS (JULY 19) PR NEWSWIRE - Central and South West Corp. (NYSE: CSR) said today it will realign its corporate organization and the organizations of its four electric operating subsidiaries on Sept. 1.

Merle L. Borchelt, chairman and chief executive officer of Central and South West, said the changes will help standardize the organizational structures and business practices of the company's electric utility system.

Harry D. Mattison will be promoted to executive vice president and chief operating officer of Central and South West. He will report to E.R. Brooks, president of Central and South West. Reporting to Mattison will be the presidents of Central and South West's four electric operating subsidiaries. Mattison currently is president and chief executive officer of Southwestern Electric Power Co., a Central and South West operating subsidiary.

Richard H. Bremer, vice president of operations for Southwestern Electric Power Co., will be promoted to president and chief executive officer of SWEPCO, succeeding Mattison.

Thomas V. Shockley III, senior vice president of Central and South West, will be promoted to executive vice president. Reporting to Shockley will be Central and South West's two major non-utility subsidiaries: Transok, Inc., and CSW Energy, Inc. He also will have corporate responsibility for marketing and business development, engineering, corporate services and governmental affairs.

Glenn D. Rosilier, vice president of finance for Central and South West, will be promoted to senior vice president and will become the corporation's chief financial officer.

Ferd. C. Meyer Jr., vice president and general counsel for Central and South West, will be promoted to senior vice president and general counsel.

In addition to these corporate changes, Central and South West's four electric operating subsidiaries will make executive changes to standardize their organizational structures. Reporting to each subsidiary's president and chief executive officer will be five vice presidents: marketing and business development; engineering and production; finance; division operations; and corporate services.

Central and South West Corp. is a Dallas-based public utility holding

company.

#90200p6800 07/19/1990 ~PR Newswire

VANCOUVER, BRITISH COLUMBIA (JULY 19) PR NEWSWIRE - Fletcher Challenge Canada Limited (Toronto, Montreal, Vancouver: FCC) today announced first half 1990 earnings of $53 million, or $.88 per common share, on sales of $581 million. The results compare with earnings of $71 million, or $1.20 per common share and sales of $702 million reported for the same period of the previous year.

Consolidated net earnings for the three months ended June 30, 1990 were $37 million or $.62 per common share compared with earnings of $32 million or $.54 per common share for the second quarter of 1989. Sales declined to $299 million from $366 million in the comparative period of the previous year.

Net earnings include the after-tax gain of $20.7 million, or $.35 per common share, from the sale of the company's oriented strandboard plant in Minnesota.

Ian Donald, president and chief executive officer, said the company's first half revenues were affected by difficult market conditions for pulp, lightweight coated paper and wood products.

''While slower economic growth in our major trading areas reduced first half sales and earnings, newsprint markets performed much better than expected,'' Donald said.

Donald said the company's outlook for the third quarter is for a modest improvement in newsprint and coated paper demand. Markets for wood products are expected to remain flat while further downtime will be necessary to keep pulp inventories at present levels, he said.

''Higher interest rates and the strong Canadian dollar are also factors that will continue to limit profitability in 1990,'' Donald said.

#90200p6817 07/19/1990 ~PR Newswire

CALGARY, ALBERTA (JULY 20) PR NEWSWIRE - NOVA Corporation of Alberta (NYSE, Toronto, Montreal, Alberta: NVA) reports today that the unaudited consolidated net income for the six months ended June 30 was $92 million on revenue of $2.4 billion in 1990, compared with $205 million on revenue of $2.5 billion in 1989.

Basic and fully diluted net income per common share for the first half were 28 cents and 27 cents in 1990, compared with 80 cents and 76 cents, respectively, in 1989. The basic per share calculations are on a total of 299 million average common shares outstanding in 1990, compared with 245 million average common shares outstanding in 1989. The increase in average common shares outstanding was due to a common share rights offering in the fall of 1989.

Unaudited consolidated net income in the second quarter was $56 million or 17 cents basic and 16 cents fully diluted per common share in 1990, compared with $76 million or 29 cents basic and 28 cents fully diluted per common share in 1989. The second quarter of 1990 includes an after-tax gain of $30 million, or 10 cents per common share, recorded on the sale of NOVA's wholly owned valve manufacturing subsidiary, Grove Italia S.p.A., which closed in early July 1990. This gain is net after NOVA's reinvestment to hold a 32 percent interest in the new owning group for that company.

A general downturn continued for many commodity prices within the Petrochemicals, Plastics and Rubber segment, offset partially, however, by higher production volumes. NOVA's profits were reduced also by higher interest rates in Canada and the corresponding high price of the Canadian

dollar versus the United States dollar.

Pipeline net income contribution is increasing with the continuing expansion of the Alberta Gas Transmission Division's pipeline system to meet customer demand for service. The return earned on the 32 per cent equity component of the division's rate base was increased by one-quarter of one per cent to 13 3/4 percent by agreement with customers effective June 1, 1990.

Funds from operations for the first six months, before changes for non-cash items, were $229 million in 1990, compared with $454 million in 1989.

Capital expenditures for the first six months of 1990 were $383 million, up $123 million from the comparative period in 1989. Expenditures in the Pipelines segment, principally for the expansion of the Alberta Gas Transmission Division's pipeline system, were $291 million in 1990 compared with $124 million in 1989.

The corporation announced on May 21, 1990, that it had agreed to sell to Bayer AG of West Germany the equity in NOVA's Rubber Division for a purchase price in U.S. dollars which approximated Canadian $1.25 billion. In addition to the payment for equity, NOVA will be released from debt obligations associated with the rubber business of approximately $100 million and all trade and other liabilities of the Rubber Division. NOVA is entitled to all 1990 earnings of the Rubber Division as well as any net additional investment in operating assets until the date of closing.

The transaction, which is subject to approval of various regulatory authorities in Canada, the United States and Europe, is expected to close by the end of the third quarter of 1990. NOVA expects that the accounting treatment for the sale transaction will result in a relatively small after-tax gain or break-even. Proceeds from the sale will be used to reduce non-cost-of-service debt.

On June 22, 1990, NOVA announced that it had arranged debenture financing of U.S. $130 million with an effective interest rate of 9.84 percent to mature in August 1997. The net proceeds to be received on July 30, 1990, will be used to repay bank loans and notes issued to finance capital expenditures of the Alberta Gas Transmission Division's pipeline system.

On June 22, 1990, the NOVA board of directors declared a quarterly dividend of 13 cents per common share, payable Aug. 15, 1990, to shareholders of record at the close of business July 27, 1990.

NOVA is a widely held, shareholder-owned company operating internationally from world headquarters in Calgary, Alberta, Canada.

NEWPORT BEACH, CA (JULY 19) PR NEWSWIRE - Agnew Tech-II, a Woodland Hills-based foreign language translation and cross-cultural consulting firm, today announced the expansion of its audio-visual services to include production of original industrial, marketing, training, and technical videos, specifically for multi-lingual use, according to Irene Agnew, president Agnew Tech-II.

Due to the capabilities expansion, Sheila Epstein, Agnew vice president will now oversee this new audio-visual service. She will be responsible for marketing and supervision of original productions and the original creation of foreign language soundtracks for Agnew's many customers, which include Lockheed, Fluor Daniel, Rockwell International, National Geographic, and Northrop Corp.

Agnew Tech-II has also added Kathy McMahon as production manager, who brings over ten years of video production experience. Formerly with ITT Gilfillan, she has a strong background, which includes writing, producing and directing videotape programs for international marketing, training and technical audiences.

Agnew Tech-II formed an alliance with Galusha & Associates, a full-service advertising, public relations and marketing agency in August 1989 to provide an efficient, cost-effective way for clients to focus marketing efforts to meet local ethnic markets, the European community challenge of 1992 and the burgeoning Pacific Rim markets.

This venture expands both companies' international communications services to include: multi-language advertising and public relations programs; audiovisual production and adaptation to a variety of international markets; customized language instruction and cross- cultural training; and consecutive and simultaneous interpreters for meetings, conferences and training sessions both in the United States and abroad. The services include translation to or from all of the widely-used languages such as English, Russian, Spanish, Japanese, French, German, Chinese and Arabic to less common ones such as Greek, Farsi, Cambodian or Turkish -- a total of 31 languages in all.

For more information contact Irene Agnew, president, Agnew Tech-II, 6269 Variel Avenue, Suite D, Woodland Hills, Calif., 91367; telephone 818-703-5197; fax 818-703-6962 or Rolf C. Rudestam, sr. vice president, Galusha & Associates, 1401 Dove St., Fifth Floor, Newport Beach, Calif., 92660; telephone 714-476-1009; fax 714-476-1003.

NEWTON, MA (JULY 19) PR NEWSWIRE - Stardent Computer today reported that a subcommittee of outside directors appointed to investigate the validity of claims made by co-chairmen Allen H. Michels and Matthew Sanders III against Stardent's major investor, Kubota Corp., had found the claims to be without merit. According to the subcommittee, comprised of William Hambrecht, Charles Waite, Russell Planitzer and Thomas Cable, a San Francisco-based law firm retained by the group to fully investigate the validity of the claims detailed in a law suit filed last week by Michels and Sanders found no legal grounds for this action.

The extended partnership, which includes distribution, manufacturing, financial and technology agreements, received the approval of the board of directors at today's meeting. While final contracts remain to be signed, and certain government approvals are required, the approved letter of intent paves the way for the recently formed United States Kubota subsidiary, Kubota Pacific Computer, to begin operations in Santa Clara, Calif., in approximately 30 days. This subsidiary will have complete manufacturing responsibility for Stardent's products, as well as responsibility for completion of and continued engineering on several products based on Stardent's existing technology.

Stardent also announced that the valuation advisers Houlihan, Lokey, Howard & Zukin Inc., had, at Stardent's request, evaluated the technology which Kubota will receive from Stardent as a result of the extended agreement and had ensured Stardent's Board that its value is consistent with the price which Kubota will pay for this technology. As a result of the new agreement, and based on the requirements of Stardent's product and operating plans through 1991, which also have received the board's approval, Kubota has committed to in excess of $50 million in additional financing to Stardent over the next two years.

Naohisa Matsuda, vice president of business development for Kubota Computer Inc. and a Stardent director commented on the extended relationship, "We have always been, and continue to be, committed to a long-term partnership with Stardent. Our new commitment of significant financing is a reflection of the value we place on this partnership, and the enthusiasm we feel for the exciting new products Stardent will be developing." Kubota will continue to have exclusive distribution rights in the Far East for all products developed by Stardent.

Stardent Computer Inc. is the leading developer, manufacturer and marketer

of visualization systems, departmental supercomputers and 3D visualization software. Stardent's systems are used in mechanical computer-aided engineering, computer aided molecular design, computational fluid dynamics geophysical analysis, animation and visual simulation, econometric modeling, scientific research and image processing.

BOULDER, CO (JULY 20) BUSINESS WIRE - Every year countless millions of dollars are lost to damage caused by the sun's ultraviolet (UV) rays.

In the home, the fading of draperies, furnishings, artwork and floorcoverings is caused by a number of different factors including heat, humidity and visible light -- but the most common and widely recognized source of fading is caused by the sun's ultraviolet radiation.

Boulder-based Alpen Inc., the Rocky Mountain region's largest insulating glass fabricator, has created the first residential and commercial insulating window glass that blocks nearly all of the harmful ultraviolet rays from the sun. The new generation of high performance superwindow, called Alpenglass XUV, is entering the worldwide window market with shattering impact.

The new technology incorporates enhanced coated films suspended midway between the inner and outer panes of glass resulting in significantly higher performance in UV blockage, thermal insulation, radiant comfort and summer solar rejection. The XUV also is condensation free and even reduces noise levels significantly better than conventional windows.

Although UV comprises only about two percent of the sun's energy, it accounts for an estimated 60 percent of the fading damage to in-home fabrics and furnishings. To suppress the fading damage, homeowners often install lined draperies and curtains, shutters, tinted or reflective glass or dark stick-on window films. These solutions however negate much of the value of having windows in the first place.

XUV fading protection permits less than one-half of one percent of the UV radiation to reach inside of the home. Conventional ''low-e'' insulating glass lets in about 50 times more UV radiation and ordinary double pane glass lets in 100 times more. The XUV concept is called wavelength filtering. Instead of using two pieces of standard glass, the hightech window maker produces a high performance, multi-layered sandwich of invisible materials utilizing exotic metallic coatings.

Alpen's success with the XUV product has them working against an

approximate $1 million backlog of orders. To date, there has been more than one million square feet of Alpenglass installations ranging from the Arctic Circle to southern Florida, including the San Jose Convention Center and the Art Institute of Chicago.

#90201b0025 07/20/1990 ~Business Wire

ENGLEWOOD, COLO. (JULY 20) BUSINESS WIRE - U S WEST (NYSE:USW) Friday reported net income of $276.4 million and earnings per share of 72 cents for the quarter ended June 30, 1990 -- an increase of 6.9 percent and 1.4 percent, respectively, over the second quarter last year when the company earned net income of $258.6 million, or 71 cents per share.

Sales and other revenues totaled $2.4 billion, a 1.0 percent decrease from second-quarter revenues last year. Sales were negatively affected by a rate refund and lower revenues from building sales in 1990. Return on equity was 12.9 percent, compared to 13.4 percent in the second quarter of 1989. During the quarter, U S WEST issued 16.1 million shares of stock in a new equity offering.

Second-quarter 1990 results include a rate refund in the state of Iowa, which reduced net income and earnings per share for the quarter by $12.9 million and 3 cents, respectively.

For the six months ended June 30, 1990, U S WEST reported earnings per share of $1.45 on net income of $548.3 million, compared to earnings per share of $1.39 on net income of $508.2 million during the first six months of 1989.

''I'm pleased with our results this quarter,'' said Jack MacAllister, chairman and chief executive officer. ''We expected lower revenues at U S WEST Communications primarily because of the rate refund in Iowa. However, our telephone company earnings increased due to expense reductions, including the benefits of the special early retirement offer concluded earlier this year.''

(The per share amounts reflect a two-for-one stock split distributed by the company on May 2, 1990.)

U S WEST owns U S WEST Communications and other companies involved in communications, data solutions, marketing services and financial services.

LOUISVILLE, CO (JULY 20) BUSINESS WIRE - Storage Technology Corp. (NYSE:STK) said that in view of the unusual activity in its stock, the New York Stock Exchange has contacted the company to request that the company issue a statement.

The company said that it knows of no corporate development that would account for the unusual activity in its stock. The company released its second quarter earnings report yesterday and it said it has no further information beyond what was stated in that release that would account for the movement in the stock price. Earnings for the second quarter increased on a year-over-year basis, and were in line with expectations.

WILLOUGHBY, OHIO (JULY 20) BUSINESS WIRE - Figgie International Inc. has announced the appointment of Joseph J. Skadra as senior vice president and controller. Formerly vice president-controller, Skadra will continue to report to Chairman Harry E. Figgie, Jr.

Skadra began his Figgie International career in 1970 as assistant controller for the ''Automatic'' Sprinkler division and the following year was promoted to division controller.

In 1970 Skadra was named group controller at Figgie International. A year later he advanced to special projects controller and took on added duties in 1979 as director of mergers and acquisitions.

Skadra was named corporate treasurer in 1980 and group vice president in 1983.

Skadra graduated from Case Western Reserve University, Cleveland, in 1964 with a degree in business administration.

Figgie International is a diversified Fortune 500 operating company serving consumer, industrial, technical and service markets worldwide. Sales in 1989 were $1.3 billion.

#90201b0033 07/20/1990 ~Business Wire
REDWOOD CITY, CA (JULY 20) BUSINESS WIRE - Fafco Inc., the nation's oldest and largest manufacturer of solar heating systems, reported a net income of $379,900 (13 cents per share) for the second quarter of 1990, compared to a net income of $181,700 (6 cents per share) for the comparable period in 1989.

For the six months ended June 30, 1990, the company reported a net income of $417,400 (14 cents per share), compared to a net income of $220,300 (8 cents per share) for the comparable period in 1989.

Sales increased 29.6 percent to $2,485,500 for the quarter ended June 30, 1990, from $1,918,200 in the prior year, and for the six month period ended June 30, sales increased 28.0 percent to $4,356,700 in 1990 from $3,404,500 in 1989.

The increase in sales is due primarily to increased unit sales of pool panels and thermal energy storage products combined with a price increase for pool panels.

The company moved out of two separate facilities in March 1990, and consolidated all of its operations into a brand new 42,000 square-foot facility in Redwood City, Calif.

Non-recurring expenses were incurred in connection with termination of the old leases that amounted to $103,100 (3 cents per share) in the first six months of 1990. The company expects that it will be able to operate more efficiently and to handle a larger volume of business in the new facility.

#90201b0043 07/20/1990 ~Business Wire

SUNNYVALE, CA (JULY 20) BUSINESS WIRE - Advanced Micro Devices Friday reported lower second-quarter revenues of $267,700,000 which resulted in a net loss of $5,921,000.

The net results also included a gain of $6.1 million from the sale of a long-term investment. After the preferred stock dividend, the loss amounted to 10 cents per common share.

The results reflect a slight revenue decrease from the immediate-prior quarter. In the prior quarter, AMD reported revenues of $271,472,000, and a net profit of 13 cents per common share after the preferred stock dividend. The first-quarter results, however, included a one-time gain equivalent to 12 cents per common share realized from completion of a sale leaseback and technology transfer agreement with Sony USA.

Sales declined by 2.6 percent from the second quarter of 1989 when AMD reported revenues of $274,884,000 and a net profit of $12,073,000, or 12 cents per common share after the preferred stock dividend.

For the first six months of 1990 the company reported revenues of $539,172,000 with a net profit of $7,198,000, or 2 cents per common share after the preferred stock dividend. In the first six months of 1989 AMD reported revenues of $544,504,000 and a net profit of $22,144,000, or 21 cents per common share after the preferred stock dividend.

The company's operating loss for the quarter amounted to $15,176,000. ''We had a disappointing quarter,'' said W.J. Sanders III, chairman and chief executive officer. ''We could not grow sales in our core businesses in light of continuing significant pressure on average selling prices.

''Our cost-reduction efforts actually added to expenses in the quarter in the form of severance pay for terminated employees of approximately $2.6 million.

''Our single-minded determination to survive the current chip wars as a prominent member of the emerging international oligopoly of integrated circuit makers demands a level of investment in technology development and

manufacturing competitiveness that makes consistent quarterly profitability elusive,'' Sanders continued.

''We have streamlined our operations and focused our development efforts on those areas where we can offer leadership products to our worldwide customers over the long term. The current competitive environment for AMD's core businesses is producing disappointing revenue levels even as unit volumes continue to grow.

''We are on the right course to grow our sales and achieve improved operating results as our product portfolio evolves to more advanced technology and proprietary products for personal, and in particular, networked computing,'' Sanders said.

''Bookings were well in excess of billings, but experience cautions against expectations of significant sales growth in the traditionally slow summer quarter,'' Sanders concluded.

#90201b0060 07/20/1990 ~Business Wire

HOUSTON (JULY 20) BUSINESS WIRE - Santa Fe Energy Resources Inc. (SFR) reported a second quarter net loss of $5.6 million, or 9 cents per share, compared with net income of $10.2 million, or 20 cents per share in the second quarter of 1989.

Primarily because of increased production by Middle East OPEC members, oil prices dropped precipitously during the second quarter, averaging $12.20 per barrel compared with $15.06 per barrel in the second quarter of last year and $16.67 per barrel in the first quarter of this year.

Gas prices also declined, averaging $1.50 per thousand cubic feet, compared with $1.69 in the second quarter of 1989 and $1.74 in the first quarter of 1990.

Total revenues of $70.4 million for the second quarter of 1990 were approximately 16 percent lower than the previous year.

Second quarter oil and gas production were both higher in 1990, averaging 51,700 barrels of oil and 105.3 million cubic feet of gas per day, compared with 50,700 barrels of oil and 78.3 million cubic feet of gas per day last year.

Operating expenses of $68.4 million were essentially the same as the $68.2 million recorded in the second quarter of 1989 with higher production

expenses due to the higher production levels, being offset by lower depreciation and depletion and taxes other than income.

The lower depreciation was a result of higher estimated reserves and the lower taxes reflect a settlement of prior year windfall profit tax which was recognized in the second quarter of 1990.

Interest expense of $13.4 million was $11.3 million higher than the second quarter of last year because of the additional debt that was incurred in early 1990.

Also included in interest expense was approximately $4 million in costs relating to the refinancing of such debt in April of this year.

Santa Fe Energy Resources Inc. is a large independent oil and gas exploration and production company with headquarters in Houston. Its stock is traded on the NYSE under the symbol SFR.

HOUSTON (JULY 20) BUSINESS WIRE - Santa Fe Energy Partners L.P. (NYSE:SFP) reported a second quarter net loss of $4.1 million, or 8 cents per unit, compared with a $1.7 million, or 4 cents per unit, loss reported in the second quarter of 1989.

Oil prices during the second quarter averaged $14.63 per barrel, down $2.80 from $17.43 reported in the second quarter of last year. Gas prices during the quarter averaged $1.52 per thousand cubic feet compared with $1.59 in the second quarter of 1989.

Oil production was slightly lower than last year, averaging 12,500 barrels of oil compared with daily production of 13,000 barrels of oil in the second quarter of 1989. Gas production was higher than last year, averaging 102.7 million cubic feet of gas per day, up 26 percent from the 81.2 million cubic feet of gas reported in the second quarter of 1989.

Second quarter revenues were $27.9 million, compared with the $31.2 million recorded in the comparable 1989 quarter. Operating expenses for the quarter were $32.0 million compared with the $32.6 million reported in the second quarter of last year.

A cash distribution of 20 cents per unit was paid to unitholders on May 15 1990. Another cash distribution of the same amount will be paid on Aug. 15, 1990, to unitholders of record on June 29, 1990.

Santa Fe Energy Partners L.P. is an affiliate of Santa Fe Energy Resources Inc., a Houston-based, independent oil and gas company. The partnership units are traded on the New York Stock Exchange using the symbol SFP.

#90201b0076 07/20/1990 ~Business Wire

SAN FRANCISCO (JULY 20) BUSINESS WIRE - First Republic Bancorp Inc. (ASE PSE:FRC) Friday reported its quarterly results for the second quarter of 1990.

Net income in the second quarter of 1990 was $1,046,000, an increase of 242 percent over net income of $306,000 in the second quarter of 1989. Quarterly earnings per share were 30 cents in 1990 compared with 9 cents for the like quarter in 1989.

The number of common stock share equivalents outstanding was 3,408,752 for the quarter ended June 30, 1990 and 3,376,073 for the second quarter of 1989. For the quarter ended June 30, 1990, net interest income was $3,734,000, compared to $1,975,000 for the second quarter of 1989.

For the six months ended June 30, 1990, First Republic reported net income of $1,318,000 up from $492,000 in 1989. For the six month period, earnings per share were 38 cents in 1990, compared to 15 cents a year ago.

The company originated $70 million of loans in the second quarter and has originated a total of $152 million for the six months ended June 30, 1990. In 1989, loan originations in the second quarter were $89 million and $136 million for the first six months.

The total portfolio of real estate loans serviced for secondary market investors was $484 million at June 30, 1990, a 27 percent annualized increase from $426 million at Dec. 31, 1989.

Consolidated assets were $615,494,000 at June 30, 1990. Substantially all of the company's $483,381,000 loan portfolio consists of adjustable rate, first trust deed, California real estate secured loans. As of June 30, 1990, assets over 90 days delinquent were less than 1 percent of total assets.

The company's two California industrial banking subsidiaries offer investment certificates which are insured by the FDIC. At June 30, 1990 total certificates were $501,385,000.

The company continues to maintain a strong capital base. At June 30 total capital of $54,500,000 and reserves of $3,006,000 represented over 9.3 percent of total assets. Intangible assets are minimal with net goodwill of only $120,000 at June 30.

First Republic Bancorp Inc. functions as a mortgage banker and direct lender through its California-chartered industrial banking subsidiaries, First Republic Thrift & Loan (San Francisco and Los Angeles) and First Republic Thrift & Loan of San Diego.

ENGLEWOOD, CO (JULY 20) BUSINESS WIRE - Medical Dynamics Inc. (NASDAQ:MEDY), a provider of micro-invasive surgical and diagnostic camera systems, Friday announced that Van. A. Horsley, formerly chief financial officer, has been named president and chief executive officer and has been elected to the company's board of directors.

Dr. Edwin L. Adair, chairman of the board of Medical Dynamics, said the elevation of Horsley is prat of the management realignment strategy designed to take advantage of the particular strengths of various members of the management team. As part of that strategy, Jo Brehm, former president, has been shifted to the position of vice president of sales and administration.

''With the growing opportunities associated with the new Model 5960 camera system -- particularly in the area of laparoscopic surgery -- and the Models 5990 and 5995 Optical Catheter System, the board felt that an expansion of our senior management staff was necessary,'' Adair said.

''Ms. Brehm, who in the past has made enormous contributions in the area of sales and administrative support, will continue fulfilling those functions while Mr. Horsley will focus his energies in the areas strategic planning, negotiation of OEM and license agreements and the day-to-day operations of the company.''

Adair noted that Horsley's election to the board of directors is the first step in the board's plan to increase its size over the next several months. ''We're in discussion with several other board member candidates and hope to add additional members with experience in the areas of management, production and marketing,'' he said.

Adair also announced that Medical Dynamics has retained a marketing consultant to evaluate the company's existing sales and marketing programs and staff, and assist management in implementing new marketing strategies. The agreement includes an option for the consultant to join the company's senior management team once his current assignment has been completed.

#90201b0083 07/20/1990 ~Business Wire

WEST BEND, WI (JULY 20) BUSINESS WIRE - Gehl Co. (NASDAQ:GEHL), a leading manufacturer of agricultural and light industrial and construction equipment, today reported a 47 percent increase in second quarter net income and a 7 percent increase in net sales from the same quarter in 1989.

Second quarter net income increased to a record $2.8 million from $1.9 million in the same period a year ago. The niche capital goods manufacturer posted sales of $46.5 million for the second quarter ended June 30, 1990, compared to $43.4 million in 1989.

The net income increase of 47 percent over 1989 enabled the company to post earnings per share for the period of 46 cents, equal to the 46 cents per share earned in the second quarter of 1989, even though outstanding shares increased 49 percent over the prior year. Outstanding shares increased to 5.8 million from 3.9 million a year ago as the result of the company's initial public offering in November of 1989.

For the six months ended June 30, 1990, Gehl Co.'s net income increased 49 percent to $4.1 million from $2.7 million during the same period in 1989. Sales rose 11 percent to $85.9 million compared to $77.7 million in 1989. Earnings per share were 68 cents, slightly higher than the 67 cents a year earlier.

''Gehl Co. is taking advantage of the healthy U.S. agricultural economy by marketing a broad line of products targeted to the stable dairy and livestock market segments,'' said Bernard L. Nielsen, president and chief executive officer.

''Our strategy is to build market share by penetrating key geographic markets and exploiting selective product niches, and the second quarter's results show that our plans are on target. Second qyarter results were bolstered by strong sales of agricultural equipment in Canada, an important agricultural market, as well as in the U.S. sales of our light industrial and construction equipment were strong in Europe.''

Nielsen noted that, while the construction market was somewhat soft, the company's Industrial/Construction Division made strides in establishing new equipment dealerships in key markets, including the addition of 15 outlets in the Southeast and Texas. The company also introduced a new, larger model telescoping-boom forklift in the second quarter.

Nielsen added, ''During the second quarter we put in place a number of programs which will strengthen our dealer and employee relationships, and, over the long-term, improve our competitive posture and profitability.'' These programs included special marketing and discounting programs for dealers, and employee involvement programs where employees as a group receive financial rewards for overall improvements in productivity.

''We are a company that believes in investing for the future. While these programs increased our operating costs in the quarter, they will give us a critical competitive advantage. And we were able to invest in them while achieving improvements in profit margins and in net income as a percent of sales,'' said Nielsen.

Looking ahead, Nielsen commented, ''We expect strong gains in sales and earnings and continued improvements in margins against last year's record results.''

Gehl Co. designs, manufacturers, distributes, sells and finances equipment used in the agricultural and light industrial and construction industries.

Gehl is the largest non-tractor agricultural equipment manufacturer in North America and distributes its products worldwide. Its Agricultural Division markets a broad range of equipment used primarily in the dairy

and livestock industries. Products include equipment for haymaking, forage harvesting, materials handling (skid loaders and attachments), manure handling and feedmaking.

The company's Industrial/Construction Division markets products used primarily for residential and commercial constrtuction and repair of infrastructure including roads, bridges and utility and industrial facilities. Products include skid steer loaders, rough-terrain telescoping-boom forklifts, a special purpose road grader and mini-excavators used by construction contractors, municipalities and industry.

Gehl Co., founded in 1859 is headquartered in West Bend, with manufacturing facilities in West Bend; Yankton and Madison, S.D.; and Myerstown, Pa.

WESTLAKE VILLAGE, CA (JULY 20) BUSINESS WIRE - Delphi Information Systems Inc. (NASDAQ:DLPH) Friday reported record sales and profits for the first quarter ended June 30, 1990.

Revenues for the period were $6,673,000, compared with $6,255,000 for the same period in the prior year, a 7 percent increase. Net income for the

period was $1,131,000, or 25 cents per share, compared with a loss of $1.37 million, or 33 cents per share, for the first quarter of the prior year.

The prior year's results were restated to reflect the change in revenue recognition method adopted on April 1, 1989.

After the restatement, the prior year's first-quarter income before the cumulative effect of the accounting change was $342,000, or 8 cents per share. The prior year's first quarter net income included an adjustment for the cumulative effect of the accounting change of $1,712,000.

The RS/6000 is built on the RISC architecture and is the price/performance leader in a multi-user environment. The system provides enough power to efficiently support over 250 active users with an extraordinary processing capability easily handling the heavy transaction-oriented environment of the insurance user without a heavy price tag.

The RISC System/6000 also allows access to DOS-based rating software from both terminals and attached PCs as well as added performance for applications such as document image processing.

With headquarters in Westlake Village, Delphi is the largest independent developer and marketer of turnkey automation systems for insuarnce agents and brokers in the property and casualty insurance field.

The Delphi system provides proven agency productivity and profitability increases through total agency automation, encompassing integrated functions of policy information, accounting, financial reporting, prospect management and cross selling, claims administration, management reporting, office administration, integrated rating and electronic interface with insurance carriers.

#90201b0117 07/20/1990 ~Business Wire

CLEVELAND, OH (JULY 20) BUSINESS WIRE - Cleveland-Cliffs Inc today reported earnings of $14.1 million, or $1.21 per common share, for the second quarter of 1990. Comparable earnings, excluding special items, in the second quarter of 1989 were $15.9 million, or $1.38 a share.

For the first six months of 1990, the Company recorded earnings before special items of $20.7 million, or $1.77 a share, versus comparable earnings of $23.5 million, or $2.03 a share in the first half of 1989.

The decline in second quarter and first half earnings was primarily due to lower sales and production volumes and higher operating costs, partially offset by decreased net interest expense. Higher operating costs were mainly incurred at the Tilden Mine where performance has been below expectations.

Cliffs' quarterly results are not necessarily representative of annual results due to seasonal and other factors. Based on current shipment schedules, second half sales volume is expected to be substantially higher than the first half of 1990.

Including the special items, 1990 second quarter net income was $14.1 million or $1.21 per share, versus $17.9 million or $1.55 a share in 1989, and 1990 first half net income was $19.6 million or $1.68 a share, versus $30.8 million, or $2.66 a share in 1989.

Cliffs-managed mines in North America produced 18.0 million tons of pellets in the first six months of 1990 versus 20.3 million tons in the first half of 1989. Second quarter production was 8.9 million tons in 1990 versus 10.3 million tons in 1989. Lower production was primarily due to a programmed decrease in first half production at the Tilden Mine and the closing of the Sherman and Adams Mines in Ontario, Canada on March 31, 1990. The Tilden Mine produced 2.9 million tons in the first half of 1990 versus 4.2 million tons in the first half of 1989.

Cliffs' total operating revenues from continuing operations were $86.9 million and $142.7 million for the second quarter and first half of 1990, respectively. These compare with revenues of $99.6 million and $167.6 million in the corresponding 1989 periods. The revenue decreases mainly reflect lower iron ore sales volume. Pellet sales in the first half of 1990 were 2.8 million tons compared with 3.6 million tons in 1989. Second quarter sales were 1.7 million tons in 1990 versus 2.1 million tons in 1989.

Pellet sales for the full year 1990 are expected to be about 7.0 million tons versus 7.5 million tons in 1989, including sales of purchased ore. Full year 1990 production from Cliffs' North American mines is expected to approximate 36.5 million tons, or 2.8 million tons less than 1989, of which 1.6 million tons is attributable to the Ontario mine closings and .9 million tons is due to lower Tilden production.

Tonnage estimates are subject to changes in production nominations by mine partners and any work stoppage resulting from labor contract negotiations at Empire and Tilden Mines in Michigan and at two Canadian steel companies.

Subsidiaries of Clevlenad-Cliffs Inc manage six iron ore mines in North America and Australia. The Company holds a major iron ore reserve position in the United States and is a substantial iron ore merchant.

#90201b0129 07/20/1990 ~Business Wire

FORT COLLINS, Colo. (JULY 20) BUSINESS WIRE - Home Federal Savings Bank Friday announced financial results for the second quarter and the six months ended June 30, 1990.

Net loss for the quarter ended June 30, 1990, was $135,000, or 25 cents per share, on revenues of $6,952,000. This compares to net income of $72,000, or 13 cents per share, on revenues of $7,563,000 in the same period of 1989.

For the six months ended June 30, 1990, the company's net loss was $198,000, or 36 cents per shae, on revenues of $14,122,000. This compares to earnings of $221,000, or 40 cents per share, on revenues of $15,295,000 for the same period of 1989.

The bank's assets and deposits were $271.2 million and $189 million, respectively, as of June 30, 1990. This compares to $286.3 million and $191 million for assets and deposits respectively, as of Dec. 31, 1989. Home Federal's shareholders' equity was $12 million as of June 30, 1990. The bank exceeds regulatory capital requirements.

President Thomas J. Flanagan attributed the loss primarily to a combination of the poor condition of the Front Range commercial real estate market and the difficult regulatory environment created by the Financial Institutions Reform, Recovery and Enforcement Act of 1989 (''FIRREA'').

''Although significant progress has been made during the first half or 1990 in reducing the amount of real estate owned (REO), the level of nonperforming assets continues to have a negative effect on our net interest margin,'' Flanagan said.

''The operating environment created by FIRREA forces us to dispose of some of our more profitable assets in order to maintain compliance with the stricter regulatory capital requirements. FIRREA also drastically reduced the maximum loan permitted to any one borrower and assigned a high level risk-based capital requirement to commercial real estate loans.

''This not only reduced the availability of credit, but has also made it more difficult for Home Federal to generate assets at attractive yields. This, combined with high deposit rates paid by competitors that are either insolvent or, in effect, government subsidized, continues to erode the net interest margin.''

Flanagan noted that FIRREA not only restricted the investment activities of thrifts, but also mandated a higher premium for deposit insurance. ''We, along with the taxpayers, are paying dearly for the FSLIC insurance fund bailout. Management of problem assets, control of operating expenses and reduction in the cost of funds will be the focus of our future efforts.''

Flanagan also stated that the stockholders had approved a name and charter change at the annual meeting in May 1990. Formerly known as Home Federal

Savings and Loan Association of the Rockies, the company is now Home Federal Savings Bank. The change to a savings bank will more accurately reflect to the general public the full range of services offered by Home Federal.

Home Federal is a public stock company currently being traded on the NASDAQ National Market System under the symbol HROK. -0- T

#90201b0140 07/20/1990 ~Business Wire

AMERICAN FORK, UT (JULY 20) BUSINESS WIRE - TEL electronics inc. (NASDAQ:TELS) Friday reported on the results of its annual meeting of shareholders held on July 9, 1990, in Salt Lake City.

Dr. John L. Gunter was elected by 85 percent of shareholders to serve a three-year term as a director of the company. Scott Woodland was also elected by 85 percent of shareholders to serve a two-year term as a director.

A motion to modify and exchange the company's securities was approved by 84 percent of shareholders, providing for a reverse stock split of 1:40. As a result, one share of new TEL stock will be traded for 40 shares of currently held stock, as the stock is bought and sold. Fractional shares resulting from the split will be purchased by the company.

During vote counting, officers gave brief talks on TEL activities.

''Impending NASDAQ changes forced the stock split matter to be brought before our shareholders. We are pleased that shareholders agreed to the stock split,'' said re-elected TEL President and Chief Executive Officer Gunter. ''We continue to build our company on a sure and steady basis, and we think new stock prices will more clearly follow TEL's record and style.''

Steve Nelson, vice president of finance, reviewed the company's financial results and status. ''The company has very little long-term debt and has excellent ratios and working capital. Management has improved operations while growing revenues and maintaining a long record of profits - and the improvement from $63,000 in sales per employee to $68,000 per employee is an excellent indication that our personnel are becoming stronger and more effective, as well,'' said Nelson.

Vaughn Moulton, vice president of special projects stated, ''TEL's opportunities for 'partnering' with telecommunications manufacturers and

for selling into international markets are excellent, particularly since several large telecommunications companies with which TEL is in serious discussions and/or negotiations have very strong ties to international markets. TEL's outstanding products make our future very bright.''

Tracy Tolbert, vice president of sales announced, ''The number of TEL sales personnel was doubled in May and June. This expanded organization now includes even more talented personnel, and provides for greater coverage of the many sales opportunities we face.

''TEL has been adding 15 to 20 new dealers a month, and our network now includes over 650 dealers located in every state in the union. With an increased staff, we will have over 800 dealers by year-end, resulting in significantly increased sales in the future. Our ever-improving and maturing current dealer network is boosting revenues, too.''

LaVell Kennington, recently appointed vice president of marketing stated, ''We continue to look for strong 'partnering' possibilities, so we don't have to invent everything here at TEL. We expect to sign an excellent partnering agreement this week to expand and improve TEL's marketing efforts.

''We also seek to improve our marketing methods so we can reach even more dealers, hotel/motel chains, government agencies and organizations, professional offices, etc. TEL has the products the world needs -- and we are committed to better marketing methods to make our story known wide and far so we can increase sales even more.''

Jim Taylor, vice president of operations stated, ''TEL Production improved product quality while increasing capacity by over 50 percent. TEL doubled its customer service department during 1989 to provide better support to dealers. Materials, formed in 1989, has improved incoming parts quality and reduced inventory levels.

''Media, another new group in '89, upgraded TEL documentation, to include the excellent annual report for 1989, and improved the sales response to company advertising and trade shows. Research and development greatly improved existing products, while introducing four brand new products during the last year and designing and implementing the TEL internal computer-based network Decision Support System (DSS).

''R&D has also provided key support to the new marketing efforts with telecommunications manufacturing companies, the international marketing efforts and the partnering work carried out by special projects and marketing.''

Gunter, then summarized and expanded on other reports, noting the many positive signs and results from TEL's first nine years as a corporation.

''Our primary and key strengths lie in the excellent people involved -- from the many TEL owners -- our shareholders -- who have believed in and supported TEL, to our fine TEL employees, who have become increasingly more effective and efficient, to TEL dealers, who have been loyal and who sell more per dealer, on average, every year.

''TEL is building and building -- its personnel, its revenues, its capacities, its reputation, its products, its dealer network -- all facets of the company. For our first nine years, we have been profitable in eight of those years, have increased revenues in eight, and have increased profits in seven.

''We are convinced that the future will see even more and bigger successes and that all of the fine people involved with TEL -- whether they be shareholders, personnel, dealers, end-users, or suppliers, will find the future with TEL to be exciting and profitable,'' stated Gunter.

TEL electronics inc. designs, produces and markets microprocessor-based telecommunications systems, to include telephone call accounting, line scanner, telephone management, voice processing, property management and other systems for use by the lodging industry, general business firms, professional organizations, and government and military agencies.

SAN JOSE, CA (JULY 20) BUSINESS WIRE - KLA Instruments Corp. (NASDAQ/NMS:KLAC) announced Friday that a management reorganization has been made to support the company's planned growth.

Robert J. Boehlke, formerly executive vice president and chief operating officer, has been appointed chief financial officer and vice president of administration with responsibility for KLA's financial affairs, Human Resources, Corporate Administration and Business Development. Boehlke will report to Robert R. Anderson, KLA chairman.

Anderson, who has assumed the position of executive vice president and Kenneth Levy, KLA president and chief executive officer, have assumed chief operating responsibilities.

The company also announced several promotions and the return of a board member. Patrick H. Lamey, vice president, has been appointed general manager of the KLASIC division reporting to Anderson. Arthur P. Schnitzer, a twelve year employee and general manager for the WISARD division, was appointed a vice president.

William I.M. Turner, a seven year employee and corporate controller, was also appointed a vice president. Samuel Rubinovitz, executive vice president and a director of EG&G Inc. who previously served as a director of KLA from 1979 to 1988, has rejoined the company's board of directors.

In announcing these changes, Anderson stated ''We have restructured our management to best meet the demands of our multi-national operations.''

KLA Instruments Corp. is a leading innovator of industrial image automation systems.

TOLEDO, OH (JULY 20) BUSINESS WIRE - The directors of Health Care REIT Inc. (AMEX:HCN) voted to continue the quarterly cash dividend at the rate of 43 cents per share.

The dividend will be payable Aug. 20, 1990, to shareholders of record on Aug. 1, 1990. This will be the REIT's 77th consecutive dividend distribution.

For the quarter ended June 30, 1990, net income per share of 48 cents was up 7 cents of 17.1 percent from the second quarter of 1989. For the first

half of 1990, net income per share was 96 cents compared to 90 cents for the first half of 1989, an increase of 6.7 percent.

Gross income of $6.9 million for the three months ended June 30, 1990 was up 5.5 percent from the second quarter of 1989. Total assets of $188.6 million at June 30, 1990, reflect a .5 percent decrease from a year ago.

Funds provided from operations for the three months ended June 30, 1990, were $3.9 million (63 cents per share) compared with $2.4 million (39 cents per share) for the three months ended June 30, 1989. For the first half of 1990, funds provided from operations were $7 million ($1.13 per share) compared to $5 million (84 cents per share) for the first half of 1989.

The second quarter per share increase in funds provided from operations was primarily due to two items: (1) collection of approximately $450,000 in previously recorded interest income; and (2) a net year-to-date change over last year of approximately $740,000 of cash collected for fees and lease income in excess of income recognized. These two items collectively increased funds provided from operations by 20 cents per share.

The following chart highlights the information presented above.

	Three Months Ended June 30 (Unaudited)		Six Months Ended June 30 (Unaudited)	
	1990	1989	1990	1989
Gross income	$6,888,225	$6,529,421	$13,624,342	$13,395,338
Net income	2,973,622	2,510,146	5,891,429	5,425,039
Net income per share	48 cents	41 cents	96 cents	90 cents
Funds provided from operations	3,927,552	2,377,549	6,959,637	5,048,534
Funds provided from operations per share	63 cents	39 cents	1.13	84 cents
Average number of shares outstanding	6,141,646	6,038,468	6,131,880	6,019,150
Total assets as of June 30			$188,552,337	$189,579,997

At the 1990 annual meeting of shareholders held on June 13, 1990 in Toledo the shareholders of Health Care REIT Inc. approved management's proposals. Re-elected to the board of directors for three-year terms were George Chopivsky Jr., Bruce Douglas and Frederic D. Wolfe.

SIMI VALLEY, CA (JULY 20) BUSINESS WIRE - Rexon Inc. (NASDAQ/NMS:REXN), a leading producer of 1/4-inch cartridge tape drives, tape drive subsystems, software for file back-up and archival systems for personal computers and computer related products, Friday announced unaudited results of operations for its third fiscal quarter ended July 1.

For the three month period ended July 1, the company reported revenues of $41.6 million, compared to $34.3 million reported for the like period a year ago.

Net income of $2.6 million, or 25 cents per share was achieved, compared to net income of $2.3 million, or 22 cents per share, reported in the third quarter of fiscal 1989.

Results for the third quarter include a non-recurring insurance refund of approximately $210,000.

For the nine months ended July 1, 1990 the company reported revenues of $117.2 million, compared to $114.0 million reported for the like period a year ago. Net income of $6.2 million, or 60 cents per share, was achieved compared to net income of $8.3 million, or 73 cents per share, reported for the like period a year ago.

The company also announced that it has been selected by two major OEMs, as the vendor of choice to supply its 525MB tape drive product.

Michael O. Preletz, chairman and chief executive officer, stated that sales of the Tecmar multi-media product of OEM customer IBM, continued to be strong in the third quarter.

Rexon operates three independent subsidiaries, including is Wangtek, which manufactures and markets 1/4-inch cartridge tape drives and tape drive subsystems through its operations in Simi Valley, Calif., and Ponce, Puerto Rico; the Tecmar subsidiary produces personal computer enhancement products through its operations in Solon, Ohio; and the Sytron subsidiary develops and markets software for file back-up and archival systems for

personal computers through its operations in Westboro, Mass.

JACKSON, MI (JULY 20) BUSINESS WIRE - In the second quarter of 1990, Deposit Guaranty Corp. (NASDAQ:DEPS) strengthened its reserve for possible loan losses in the Mississippi subsidiary, Deposit Guaranty National Bank, with a special $10 million addition, primarily to cover credit risk in the real estate lending portfolio.

This extra provision was in addition to normal amounts. The company decided the provision would be prudent in view of the upcoming regularly scheduled examination by the Office of the Comptroller of the Currency and the well-publicized, more stringent approach that federal banking regulators are taking toward the industry's credit procedures. In addition, a specific weakening in certain markets Deposit Guaranty National Bank serves affected several commercial real estate loans.

Increasing the reserve resulted in a decline in earnings from normal levels.

Deposit Guaranty Corp.
Financial Highlights

	Three Months Ended June 30		Six Months Ended June 30	
	1990	1989	1990	1989
Net income	$ 529,000	$ 8,291,000	$ 8,656,000	$16,434,000
Earnings per share:				
Primary	7 cents	$ 1.04	$ 1.10	$ 2.06
Fully Diluted	7 cents	99 cents	$ 1.07	$ 1.95

''We believe that this is a prudent action and anticipate that results for the last two quarters of 1990 will be in line with normal operating levels '' said E.B. Robinson Jr., chairman of the board and chief executive officer of Deposit Guaranty Corp.

Deposit Guaranty Corp.'s other major subsidiary, Commerical National Bank in Shreveport, continued to show improvement, with earnings well ahead of plan, and the trends for further earnings growth in Louisiana are favorable.

Total assets were $4.70 billion at June 30, 1990, up from $3.61 billion at June 30, 1989. Stockholders' equity was $256 million at June 30, 1990, compared to $245 million at June 30, 1989.

SANTA CLARA, CA (JULY 20) BUSINESS WIRE - Peter Pribilla, group president Private Communication Systems, Siemens AG, and chairman of the board of ROLM Systems, has assumed additional responsibilities as president and chief executive officer of ROLM Systems.

He succeeds Ray AbuZayyad who will return to IBM.

Juergen Wuesteney, executive director of Private Communication Systems, Siemens AG, who is responsible for the worldwide development of private communication systems and networks, has been given the additional responsibility for development activities within ROLM Systems in Santa Clara.

Both appointments become effective August 1.

Today's appointment of top Siemens executives indicates the increasing importance of the U.S. market for the private telecommunications business in Siemens.

''Increasing headquarters operation in the U.S.,'' said Pribilla, ''is simply a reflection of the fact that we now have a third of our employees, a third of our revenue and a substantial portion of our installed base here in the United States.''

This move marks the second time this year that senior Siemens telecommunications executives have transferred from Germany to the United States.

In April, Dr. Jost Hammerschmidt, vice president, Siemens AG and a member of the board of Siemens Private Communication Systems, was given responsibility for coordinating the financial activities of Private Communication Systems in the United States. He transferred from Siemens' headquarters in Munich, West Germany, to its U.S. headquarters in Boca Raton, Fla.

''We are here,'' said Pribilla, ''because the United States is the driving force in our business. It may be far from Munich to Santa Clara, but we think it is a move that brings us closer to our customers -- and to the future we want for both us and them.'' ROLM is well positioned for that future, according to Pribilla, as a result of a completely renewed product line and an employee population renowned for its innovation. ''ROLM has

long been recognized,'' said Pribilla, ''as a technological and market leader.

''Today's announcement underscores our intent to further develop ROLM's outstanding product line and suppport ROLM's thousands of customers with additional new and advanced voice/data capabilities.''

Pribilla also praised AbuZayyad for his technological leadership. ''Ray AbuZayyad introduced a completely new generation of CBX technology,'' said Pribilla, ''and he accelerated the convergence of the telephone and the computer with such voice-data solutions as CallPath.

''We are very grateful to Ray for all he has contributed during ROLM's transition from IBM to Siemens, and we wish him well as he returns to his former company.''

Today's appointments, said Pribilla, are designed to reinforce the IBM-Siemens relationship, capitalize upon the strengths of Siemens' resources in Europe and the United States by facilitating closer collaboration between them, and ensure that the future products now under development provide customers with the best technology that both ROLM and Siemens have to offer.

''Juergen Wuesteney has a key role to play in that endeavor,'' said Pribilla, ''as do all the innovative people at ROLM Systems.''

Wuesteney joined Siemens in 1957 and has held various engineering and management positions within Siemens, mostly in the development of private branch exchanges and networks. In addition to the new ROLM Systems responsibilities, he is responsible for the worldwide development of private communications systems and networks for Siemens.

Pribilla joined Siemens in 1968 and has held various engineering, sales, marketing, and management positions. He was named head of the Private Communication Systems division in 1983 and appointed Group President in 1989.

In addition to his new ROLM Systems responsibilities, he is also a member of the boards of ROLM Company Norwalk, Conn., and Siemens Information Systems and Tel Plus Communications Inc., both of Boca Raton, Fla.

Pribilla and his family will relocate to this area and he will oversee the worldwide operation from his new base in Santa Clara. He will retain his European headquarters in Munich, West Germany, and his U.S. headquarters in Boca Raton.

ROLM Systems, a wholly owned subsidiary of Siemens AG, has development and manufacturing responsibility in the United States for business

communications such as PBX systems, digital telephones, voice messaging products and call processing products. It employs approximately 2,200 people at its Santa Clara location and more than 300 people at its Austin, Texas location.

In October 1989, ROLM Systems was acquired from IBM by Siemens, the world's largest supplier of private communications systems. The Private Communication Systems Group in Siemens is headed by Pribilla and employs more than 30,000 employees serving 400,000 customers throughout the world.

It had worldwide revenue last year of approximately $3 billion.

SEATTLE (JULY 20) BUSINESS WIRE - David J. Taylor, 39, has been named chief operating officer of the Frederick and Nelson department store chain.

In his new role, he will be responsible for the day-to-day management of the company.

In making the announcement of Taylor's appointment, David Sabey, chairman of Frederick and Nelson, said, ''We've made great progress in the year since we bought the company. As we've gotten farther into the business and more familiar with the company, we've come to realize the incredible size of the opportunities that lie ahead for F&N. By asking Dave Taylor to focus more of his time and energy on F&N, we expect to make the most of those opportunities.''

Since Sabey acquired the company, Taylor has been a member of the executive committee of Frederick and Nelson in his capacity as chief operating officer of The Sabey Companies, Frederick and Nelson's parent organization. His move to chief operating officer for the company is a reflection of his growing direct involvement in their management.

Although Taylor's primary focus now will be on the daily operations of Frederick and Nelson, he will continue to be involved with other aspects of The Sabey Companies, Sabey said.

Taylor has served in a number of senior management positions with Sabey Corp. and its general contracting arm, Berkley Construction, and is a member of the board of directors of Sun Sportswear, the publicly traded screen printed apparel firm of which Sabey is majority stockholder. Prior to joining the Sabey organization, Taylor served as vice president of P.J Taggares Co., an integrated agribusiness firm in Othello, Wash.

Taylor, a graduate of Gonzaga University, serves on the board of directors of the Association of Washington Business, as a regent of Gonzaga University, and as chairman of The Private Bank (in organization).

He lives in Bellevue with his wife, Kathy, and their daughter, Alexis.

Frederick and Nelson, which is celebrating its hundredth year of service to the Pacific Northwest, was acquired by David Sabey in July of 1989.

DENVER (JULY 20) BUSINESS WIRE - TransColorado Gas Transmission Co. Friday filed for Federal Energy Regulatory Commission (FERC) approval to build 310 miles of open-access pipeline from Colorado's Piceance Basin to near Bloomfield, N.M.

In the filing, TransColorado is seeking construction approval under the FERC's optional certificate procedure. In addition, the filing requests an open-access transportation certificate and a blanket certificate to allow construction of future ancillary facilities.

The proposed 22- and 24-inch TransColorado pipeline would move proven reserves of natural gas from western Colorado and the Rocky Mountain region to markets in California, the Southwest, Midwest and points east.

TransColorado would tie to existing and proposed pipeline systems belonging to El Paso Natural Gas Co., Transwestern Pipeline Co., Questar Pipeline Co., WestGas and Rocky Mountain Natural Gas Co. Construction is estimated to cost $152 million and is planned to begin in 1991, with start-up scheduled for mid-1992.

TransColorado has asked the FERC to ''dual track'' the application, a procedure allowing granting of a certificate subject to compliance with environmental requirements. An environmental report was completed as part of the FERC filing. Work on the environmental impact statement is under way with public scoping meetings in communities along the proposed route scheduled in late July and early August.

TransColorado is a partnership comprised of affiliates of KN Energy, Inc.; Questar Pipeline Co.; and WestGas. Questar Pipeline is a subsidiary of Questar Corp., and WestGas is a subsidiary of Public Service Co. of Colorado.

PHOENIX (JULY 20) BUSINESS WIRE - Pinnacle West Capital Corp. income from continuing operations for the quarter ended June 30, 1990 was $2.1 million or 2 cents per share of common stock, compared to $38.3 million, or 44 cents per share for the same period in 1989, Chairman Richard Snell said Friday.

Snell said earnings were impacted in part by expenses incurred at the Palo Verde Nuclear Generating Station, loss of revenues from Unit 4 at the Cholla Power Plant, the cost of Arizona Public Service Co.'s early retirement program which was recorded in the second quarter and higher property taxes resulting from actions of the Arizona legislature.

All three Palo Verde units are now back in operation. The loss of revenue from Cholla resulted from the expiration of a 350-megawatt sales agreement between APS and Southern California Edison. A portion of the agreement expired June 1, 1989, and the balance on June 1, 1990.

''With all three units operating at Palo Verde, APS will be able to meet the peak summer-month demands of its customers,'' Snell said. ''In addition, the full operation of Palo Verde will improve earnings in the future by reducing APS' reliance on high-cost purchased power.

''The full and consistent operation of Palo Verde was a major item on my personal agenda for Pinnacle West's recovery,'' he said. ''Our focus is now on cost-containment and the impact of those savings in reducing the amount of our rate filing with the Arizona Corporation Commission.''

Snell said that Pinnacle West earnings also were impacted by $13.3 million in interest expense resulting from a $465 million capital infusion into MeraBank in March, which terminated all obligations to the federal government. Both MeraBank and Malapai Resources Co. have been recorded as discontinued operations since Dec. 31, 1989.

APS earnings for the quarter were approximately $18.4 million compared to approximately $44.7 million for the same period in 1989. SunCor Development Co. recorded a loss for the quarter of $181,000 and El Dorado Investment Co. earned approximately $2 million during the three-month period. During the same period in 1989, SunCor recorded a loss of approximately $2.2 million and El Dorado earned approximately $626,000.

For the six months ended June 30, 1990, Pinnacle West income from continuing operations was $15.2 million, or 18 cents per share, compared to $79.1 million, or 91 cents per share in 1989.

For the 12-month period ended June 30, 1990, Pinnacle West income from continuing operations was $60.6 million, or 70 cents per share, compared to $142.6 million, or $1.64 per share for the same period in 1989.

Pinnacle West is a Phoenix-based holding company with consolidated assets of more than $7 billion.

TEMPE, AZ (JULY 21) BUSINESS WIRE - J.S. Whang, president of Amtech Systems Inc. (NASDAQ: ASYS), Friday announced that negotiations for the planned acquisition of Tystar Corp. have ended.

In commenting on the discontinued talks, Whang said, "While we have a high regard for Tystar and its employees, both our company and Tystar have been hurt by the weak condition of the semiconductor equipment market and, as a result, we mutually agreed to discontinue discussions at this time. The equipment market is expected to rebound next year and at that time the company may consider reactivating acquisition plans."

Amtech Systems Inc. manufactures the ATMOSCAN, an automated environmentally controlled process system which improves the yields of semiconductor

manufacturers.

In addition, through its wholly owned subsidiaries, RTS Inc., Echelon Service Co., and Martec Services, Amtech provides technical temporary employment services to major aerospace, defense, computer, and high technology companies throughout the Southwest, Baltimore/Washington and Southern California areas.

SUNNYVALE, CA (JULY 21) BUSINESS WIRE - Kubota Corp. Friday announced the formation of a new subsidiary to manufacture graphics supercomputer products for its strategic partner, Stardent Computer Inc.

The new company, Kubota Pacific Computer Inc., will provide all phases of the manufacturing process, including those previously accomplished by Kubota in Japan, and the final assembly and test which had been handled by Stardent in its Sunnyvale facility.

In addition, Kubota Pacific will support the development and porting of new third party software for Stardent products and will continue development activities to enhance current Stardent products. Kubota Pacific will develop new products and technologies as well.

Last month, Stardent announced the closure of its Sunnyvale facility and the consolidation of operations at its headquarters in Newton, Mass. Stardent stated that the move was designed to improve operational efficiency, centralized management functions and reduce the high cost of operating a bicoastal organization.

Kubota manufactured substantially all of the products of Ardent, one of Stardent's predecessor companies, since 1986; and since the merger of Ardent and Stellar to form Stardent, has continued in this role.

Yesterday, July 19, Stardent announce that its board approved a new series of agreements between Kubota and Stardent which cover distribution, manufacturing, financial and technology issues. Although the definitive agreements remain to be signed, it is anticipated that Kubota Pacific will begin operations within the next 30 days.

Naohisa Matsuda, vice president of business development for Kubota Computer, has been named chief executive officer of the new Kubota subsidiary. Matsuda said that Kubota Pacific hopes to employ many of Stardent's talented engineers and software developers who wish to remain

on the West Coast. He said a site for the new facility will be announced shortly.

Kubota Corp. established in Osaka, Japan, in 1890, is a global enterprise with more than 2,000 products - ranging from tractors, pipes, and housing materials to sophisticated electronics equipment - sold in over 130 countries. Kubota has strategic investments in several high-technology companies.

In addition to a 22 percent ownership of Stardent, Kubota has equity investments in MIPS Computer, Exabyte Corp. and Mycogen Corp., among others.

#90201b0282 07/20/1990 ~Business Wire

TEMPE, AZ (JULY 21) BUSINESS WIRE - C. Zane Close, president and chief executive officer of CerProbe Corp. (NASDAQ: CRPB) Friday announced revenues and results from operations for the second quarter ended June 30, 1990.

Revenues for the quarter were $1,239,580, a 10.6 percent increase compared to the second quarter 1989 revenues of $1,120,952. Revenues for the six month period ended June 30, 1990 were $2,226,250, a decrease of 10.6 percent from comparable period 1989 revenues of $2,490,518; however, the amount of new orders booked was up 15.7 percent.

The second quarter 1990 net income of $36,860, or two cents per share, compares to a loss of $164,392, or seven cents per share, for the comparable period in 1989. For the six month period, the loss was $102,759 five cents per share, compared to a loss in 1989 of $158,532, or seven cents per share.

"We have increased revenues $118,830 while improving the net income by $201,252," commented Close in reference to the company's performance during the second quarter of 1990 compared to the same quarter a year earlier.

"We believe our improved performance is explained by the refocusing of our marketing effort at a favorable time which has allowed us to benefit from an upswing in the semiconductor market. Also, we continue to closely manage our cost structure, especially costs not directly relate to the production process.

"Revenues for the first six months are less than for the same period a year

ago; however, our new order bookings this year are nearly 16 percent higher than for the earlier period.

"Because we entered 1990 with a low backlog (which significantly influenced our financial performance for the first quarter) and because of the lag time between booking and billing an order, the full impact of the growth in new orders booked this year was not reflected in the income statement until the second quarter."

Close also commented on the company's newest probing technology. "As part of such efforts to explore new ways of meeting customer needs, CerProbe introduced its newest wafer probing technology, the BetaProbe, at the SEMICON WEST '90 trade show in May of this year. This technology offers performance and capabilities not formerly available, and customer reception of the product has been good."

CerProbe develops and manufactures products for the high-performance testing of state-of-the-art integrated circuits and microelectronics components. The company markets its products worldwide to major semiconductor manufacturers.

CONTACT: CerProbe Corp., Tempe, Allen Vaughan, (602) 967-7885.

#90201b0285 07/20/1990 ~Business Wire

MILPITAS, CA (JULY 21) BUSINESS WIRE - Cirrus Logic Inc. (NASDAQ: CRUS) Friday announced that net revenues for the first quarter of fiscal 1991, ended June 30, 1990, were $31 million, up from $14.8 million for the corresponding quarter a year ago and up from the last quarter's revenues of $28.5 million.

Income before income taxes for the quarter was $6.5 million as compared to $2.8 million for the like quarter last year and $6.2 million for the previous quarter.

Net income for the quarter was $4.2 million, or 27 cents per share, as compared to net income of $2.5 million, or 19 cents per share, for the like quarter last year and net income of $5.3 million, or 34 cents per share, for the previous quarter.

The provision for income taxes was 35 percent of pre-tax income for the quarter as compared to 12 percent for the like quarter last year because of the complete use of operating loss carryforwards in the previous fiscal year.

"Demand for our mass storage products has continued to grow in line with the industry growth of intelligent PC AT compatible drives," stated

Michael L. Hackworth, president and chief executive officer.

"Our CL-SH260 hard disk drive controller continues to be well accepted for both 3-and-1/2 inch and 2-and-1/2 inch drives. This quarter we introduced two products for the PC AT drive market and two products for the SCSI (Small Computer System Interface) market. We believe these products are important to maintain our position in the Winchester drive market.

"In display graphics, the market transition away from add-in cards based on our older technology is being offset by growth in demand for our LCD (Liquid Crystal Display) VGA (Video Graphics Array) products for notebook and laptop computers.

"While the transition from laptop to notebook may cause some delay in our display graphics ramp-up, we believe the market acceptance of our products for monochrome LCD panels and today's announcement of our controller for color LCD, position us well in this market.

"To address the transition from add-in cards to embedded VGA graphics for desktop systems, we recently introduced a highly integrated product requiring ony two DRAMS (as against eight for today's products). This product has already achieved several design wins."

#90201b0288 07/20/1990 ~Business Wire

MILPITAS, CA (JULY 21) BUSINESS WIRE - A revolutionary integrated circuit announced Friday by Cirrus Logic Inc. (NASDAQ: CRUS) brings to the IBM-compatible portable, laptop, and notebook computer world a new level of graphics quality and capabilities approaching those only previously available only with desk-top, color cathode ray tube (CRT)-based systems.

Optimized for use in IBM PC-compatible computers, the new chip - the CL-GD6340 Color LCD Interface Controller - gives color liquid crystal display (LCD) systems the full spectrum of colors required by the Video Graphics Array (VGA) standard.

Michael L. Hackworth, Cirrus Logic president and chief executive officer, said, "Recent advances in active-matrix LCD technology have produced displays with superior brightness, color saturation, and response times compared to the previous best flat panels.

However, life-like 3-dimensional imaging requires a greater choice of colors than even the latest panels directly provide. The CL-GD6340 represents an enabling technology that takes the capabilities of these new

panels where they cannot go by themselves, into the realm of full-color, 3-dimensional VGA imagery."

Using proprietary techniques, the CL-GD6340 can expand by orders of magnitude the number of colors available for display on active-matrix color LCD panels. It is the only device on today's market with this capability.

The absolute number of colors produced is determined in large part by panel type. Without the new chip, available LCD panels can only produce and display from eight to 512 colors, which is inadequate for true life-like color images.

With the CL-GD6340 the number of colors available for display increases to many thousands. From this spectrum, in accordance with the VGA standard specifications, up to 256 colors can be chosen for simultaneous display. This produces a richness and depth of image that were previously attainable only with a CRT, and that cannot be directly produced on an LCD panel or by any other device.

Theoretically, a CRT is capable of creating an infinite number of colors. Mode 13 of the VGA standard specifies that 262,000 of these colors be available, with 256 being displayed at any given time. "Our goal," said George Alexy, vice president of marketing, "is to approach the level of CRT quality called for by the VGA standard. With the CL-GD6340, we effectively achieve that goal."

#90201b0320 07/20/1990 ~Business Wire

PROVO, UT (JULY 21) BUSINESS WIRE - Novell Inc. (NASDAQ:NOVL) intends to call for redemption on Aug. 24, 1990, all of the company's 7-1/4 percent convertible subordinated debentures due 2013. The aggregate principal amount of debentures outstanding is $52 million.

Prior to 5 p.m. EDT, on Aug. 24, 1990, holders may convert their debentures into shares of the company's common stock at a price of $36 per share, or approximately 27.778 shares of common stock per $1,000 principal amount of debentures if such conversion is effected prior to the effective date of the previously announced 2-for-1 stock split of the company's common stock to become effective on July 31, 1990 (or $18 per share and 55.556 shares post split).

Cash will be paid in lieu of fractional shares. On July 20, 1990, the last

reported sale price of the common stock on the NASDAQ National Market System was $50.75 per share.

Holders may elect to have their debentures redeemed at a total redemption price of $1,097.27 per $1,000 principal amount of debentures, consisting of $1,000 principal, plus $65.25 premium, plus accrued interest of $32.02.

Any debentures not converted on or before 5 p.m. EDT, Aug. 24, 1990, will be automatically redeemed on Aug. 24, 1990. So long as the market price of the common stock is at least $39.625 per share ($19.875 post split), a holder of the debentures who converts will receive common stock with a market value, plus cash in lieu of any fractional share, greater than the amount of cash a holder would be entitled to receive upon redemption.

A Notice of Redemption and a Letter of Transmittal (which may be used to surrender debentures for conversion or redemption), are being mailed to all registered holders of the debentures.

Copies of the Notice and the form of the Letter of Transmittal may be obtained from the conversion and redemption agent, Banker Trust Co., Corporate Trust and Agency Group, 1st Floor, 123 Washington St., New York, N.Y., 10008, telephone (212) 250-6792 or 250-6580.

Novell is the leading independent provider of open, high performance network computing software products. The company's NetWare network operating system has become a worldwide standard for personal computer-based local area networks.

#90201b0608 07/20/1990 ~Business Wire

LAWRENCEVILLE, N.J. (JULY 20) BUSINESS WIRE - Megamation Inc. (NASDAQ Symbols: MEGI, MEGIW) Friday announced that it has recently been granted a patent (U.S. Patent No. 4,890,241) for its anti- collision software package, which is fundamental to the high productivity capability of the Company's MEGA 1 multiple-head automated light assembly system.

The Company also noted it has applied for a patent for its 3D obstacle avoidance system. The system is an enhancement to the anti-collision software and takes into account obstacles placed in the work envelope by the user, e.g. tall parts, feeders and other peripherals.

Commenting on the announcement, Fred Jacobs, Chairman of Megamation, Inc. stated, ''Our patented anti-collision software permits us to offer an automatic flexible assembly system in which up to four robotic heads can operate at high speeds anywhere within the same work envelope, with

extreme accuracy and repeatability, and are guaranteed not to collide.

''The 3D obstacle avoidance system enhances the software by ensuring the heads will not collide with items placed in the work envelope by the user. In addition, it prevents injury to workers as well as damage to the workcell, tooling and the workpiece.''

In a separate announcement, the Company noted it has leased an additional 5,000 square feet of additional manufacturing space.

Megamation Inc. manufactures, markets and sells automated multiple head robotic assembly systems known as MEGA 1. The Company designed and developed the MEGA 1 System primarily for small parts assembly and handling applications in the electronics, light manufacturing, automobile and other industries.

#90201b0613 07/20/1990 ~Business Wire

SAN DIEGO (JULY 20) BUSINESS WIRE - Cohu Inc. (ASE:COH) Friday reported that sales for the first half of 1990 were $19,923,000, with net income of $1,389,000, or 70 cents per share.

This compares to year-earlier sales of $16,934,000, with net income of $1,353,000, or 68 cents per share.

Second-quarter sales totaled $10,080,000, with net income of $697,000, or 35 cents per share, compared with year-earlier sales of $8,454,000, with net income of $676,000, or 34 cents per share.

Six months order input totaled $23,100,000, which compares with year-earlier orders of $16,906,000. Backlog at the end of the second quarter was $17,052,000, which compares with year-earlier backlog of $10,981,000 and year-end 1989 backlog of $13,875,000.

James W. Barnes, president and chief executive officer, said that improvements in sales for the first six months were mostly due to increased shipments of pick-and-place test/handling systems and solid-state-imager television cameras. Earnings for the six-month period, while lagging the improvement in sales, were slightly higher than those of the prior year.

Both business segments showed significant improvements in orders and ending backlog for the six-month period, compared with the prior year. The increased orders were primarily due to improvements in orders for

test/handling systems in the test and detection business segment and for microwave radio systems in the television products business segment.

These two product areas also accounted for most of the increase in backlog.

Quote activity remains high in all of the company's operations. This activity, along with the high backlog level, places the company in a favorable position for improvements in sales and profits.

COHU INC.
Summary of Financial Data

	Quarter Ended June 30	
	1990	1989
Sales	$10,080,000	$8,454,000

CUPERTINO, CA (JULY 20) BUSINESS WIRE - The board of directors of Apple Computer, Inc. Friday declared an $0.11 per share dividend for the company's third fiscal quarter ended June 29, 1990.

The dividend represents Apple's fourteenth consecutive quarterly dividend and is payable September 14, 1990 to shareholders of record as of the close of business on August 24, 1990.

Apple announced on July 18, 1990 earnings of $119.8 million, or $0.96 per share, for the quarter ended June 29, 1990, on net revenues of $1.365 billion.

The board of directors also approved the repurchase of up to an additional

5,000,000 shares of its common stock in the open market from time to time. Since July 1986, Apple has completed four share repurchase programs and repurchased a total of 25,000,000 shares of common stock.

PHOENIX (JULY 20) BUSINESS WIRE - Aztar Corp. (NASDAQ/NMS:AZTR) Friday reported that its three casino hotel properties turned in solid operating profit performances in the second quarter, led by TropWorld Casino and Entertainment Resort in Atlantic City, N.J.

Revenues in the quarter ended June 28, 1990, were $131.3 million, down 6.7 percent from $140.7 million a year earlier. Operating profit before net rent was $22.6 million, nearly triple the $8 million reported in the 1989 quarter.

The improved operations were offset by the effect of a provision of $33.6 million as the result of a Nevada court judgment relating to a 10-year-old contract dispute. The company reported a second-quarter net loss of $25.2 million, or 62 cents per share, compared with a net loss of $8.1 million, or 20 cents per share, for the second quarter of 1989.

TropWorld, the second largest gaming property in Atlantic City, reported $12.9 million in operating profit before net rent, up substantially from

$7.4 million a year earlier, on a decline in revenues to $78.2 million from $84.3 million. The 1989 quarter included the write-off of $2.6 million of previously deferred pre-opening expenses.

TropWorld's operating profit was up a respectable amount despite the lower revenues and in the face of substantial expansion of casino capacity in Atlantic City, noted Paul E. Rubeli, Aztar president and chief executive officer.

''We believe the increase in profits, in spite of the opening of the Taj Mahal, was a highly commendable performance for TropWorld,'' Rubeli said.

He pointed out that TropWorld bused nearly 262,000 fewer customers in the quarter than last year, a reduction of 55 percent. Reduced busing costs were one of the factors in the increased profitability.

''Our continuing strategy of substantially reducing the number of our bus customers and eliminating other marginal business was the principal reason for TropWorld's revenue reduction; the opening of the Taj Mahal was a secondary factor,'' Rubeli said. ''We remain committed to strict discipline on the cost side, and we will not chase revenues in the midst of very tough market conditions.''

#90201b0630 07/20/1990 ~Business Wire

VAN NUYS, CA (JULY 20) BUSINESS WIRE - Martin S. Blinder, chairman of the board and chief executive officer of Martin Lawrence Limited Editions Inc. (NASDAQ:MLLE), Friday announced the company's second-quarter revenues and earnings for the three-month period ended June 30, 1990.

Total revenues decreased 12 percent to $11,326,000, compared with $12,935,000, for the same period a year earlier.

Net income decreased 75 percent to $506,000, or 6 cents per share, on 8,488,000 weighted average shares outstanding, compared with net income of $2,016,000, or 24 cents per share, on 8,509,000 weighted average shares outstanding for the comparable period last year.

Total revenues for the six months ended June 30 increased 8 percent to $24,965,000, compared with $23,198,000, a year earlier.

Net income for the six months ended June 30 decreased 29 percent to $2,511,000, or 30 cents per share, on 8,496,000 average shares outstanding compared with net income of $3,560,000, or 46 cents per share, on

7,815,000 average shares outstanding, for the comparable period last year.

Retail sales accounted for 64 percent of the company's net sales during the second quarter, compared with 52 percent, in the same period last year.

Retail sales on a same-store basis (26 stores) during the second quarter decreased 20 percent, compared with the same period in 1989.

The company stated that the primary reasons for the decrease in sales and earnings are attributable to a softening in the art market as well as a continued decline in overall consumer retail spending. The company believes that the slowdown in the art market is primarily the result of the disappointing art auctions held in early May at the major New York auction houses, Sotheby's and Christie's.

The failure of these auctions to generate the anticipated selling prices for contemporary works of art has resulted in continuing negative media publicity, which has further adversely affected the art market.

The second-quarter results were also affected by the decision to close three retail galleries located in Marley Station, Glen Burnie, Md.; Mission Valley Center, San Diego; and Broadway Plaza, Walnut Creek, Calif. All costs associated with the closure of these locations have been expensed in the second quarter.

The company's retail gallery expansion plan includes the opening of five new galleries during the second half of 1990, which will bring the number of Martin Lawrence Galleries in operation to 45 by the end of this year.

Martin Lawrence Limited Editions is an integrated publisher, retailer and wholesaler of limited-edition serigraphs, lithographs, sculpture and other works of fine art created by internationally renowned and emerging artists.

The company also purchases, for resale, original works of art as well as limited-edition works by recognized artists not published by the company.

#90201b0633 07/20/1990 ~Business Wire

CAMARILLO, CA (JULY 20) BUSINESS WIRE - Alpharel Inc. (NASDAQ/NMS:AREL) Friday announced results of operations for the three months ended June 30, 1990.

The company reported second-quarter 1990 revenues of $1,318,000 compared with $1,142,000 a year ago. The net loss for the three months ended June

30, 1990, was $70,000, or 1 cent per share, a $2,412,000 improvement from a net loss of $2,482,000, or 27 cents per share, for the three months ended June 30, 1989.

For the six months ended June 30, 1990, revenue and net loss was $2,421,000 and $390,000, or 4 cents per share, respectively, as compared with 1989 results of $2,358,000 in revenue and a net loss of $4,665,000, or 51 cents per share.

Gross profit for second-quarter 1990 was $646,000 as compared with a loss of $277,000 for second quarter 1989. Operating expenses for the quarter decreased $1,625,000 to $704,000 in 1990 from $2,329,000 in the prior year. The $704,000 operating expense includes $200,000 for accrued severance expense associated with certain management changes.

The company's gross profit for the second quarter was positively impacted by the sale to AT&T of a non-exclusive license to certain technology relating to a past contract with AT&T.

The license was part of an agreement with AT&T which resolved certain outstanding disputes by providing a mutual release of all claims between the parties and a basis for future business between the companies. In addition, second-quarter 1990 revenue includes spare-parts orders from AT&T.

Bob Bruce, chairman and chief executive officer, stated: ''The company has made significant progress in the second-quarter 1990 demonstrated by results of operations which showed a loss of only $77,000, and this loss includes the $200,000 severance accrual.

Alpharel Inc. is a leading supplier of software-based system solutions for document management applications at both the departmental and enterprise (corporate) levels. The company, which was founded in 1981, has headquarters in Camarillo.

HADDONFIELD, NJ (JULY 20) BUSINESS WIRE - United Medical Corp.'s (ASE: UM) income from continuing operations for the quarter ended June 30 was $490,000, or 18 cents per share, versus $98,000, or 3 cents per share a year ago.

Revenue for the quarter increased 20 percent to $10,634,000 in 1990, compared to $8,841,000 in 1989. Included in 1989 results was income from discontinued oeprations of $510,000, or 18 cents per share, resulting in net income for the second quarter of 1989 of $621,000, or 21 cents per share, versus net income in 1990 of $490,000, or 18 cents per share on 2,934,000 shares and 2,778,000 shares, respectively.

Income from continuing operations for the first six months of 1990 was $895,000, or 32 cents per share, compared to $356,000, or 12 cents per share in 1989. Revenue for the same period was $21,178,000 in 1990, versus $18,367,000 in 1989, an increase of 15 percent.

Income from discontinued operations for the first six months of 1989 was $8,834,000, or $2.97 per share, and reflects the gain on the sale of Renal Care Centers Corp. Net income through June 30 was $895,000, or 32 cents per share in 1990, compared to $8,813,000, or $2.96 per share for the same period in 1989.

The quarter ended June 30 marks the eighth consecutive period that income from continuing operations has increased, compared to the previous year, and the 10th consecutive quarter of profitability.

Arthur Hicks, chief financial officer of United Medical, stated, ''this trend is a result for the consistent earnings results of UM's five operating units. We are well-positioned to take advantage of prospective opportunities in our industry and plan to continue growing and developing our existing businesses.''

As previously announced, UM declared a quarterly dividend of 5 cents per share of common stock payable Aug. 15 to holders of record as of July 30.

#90201b0657 07/20/1990 ~Business Wire

PORTLAND, ME (JULY 20) BUSINESS WIRE - Peoples Heritage Financial Group (NASDAQ: PHBK) today announced second-quarter earnings of $437,000, or $.05 per share, for the three months ended June 30, 1990, representing a profitable rebound from its first quarter loss of $9.8 million. Earnings for the comparable period in 1989 were $5,664,000, or $.67 per share. Year to date, the company's losses have been reduced to $9,383,000, or $1.16 per share, compared with a first six months profit in 1989 of $11,626,000, or $1.37 per share.

Second-quarter profits were reduced significantly by management's decision to make a provision of $7.6 million to the company's loan loss reserves in a continuing effort to buffer against potential future losses in its loan portfolio. Earnings were further affected by the loss of interest income from non- accruing loans, and an increase in administrative and legal expenses associated with these loans.

At June 30, 1990, non-performing loans totaled $101.6 million, or 4.79 percent of total loans, compared to $76.5 million, or 3.59 percent, at March 31, 1990.

Non-performing assets, which include other real estate owned, totaled $107.1 million, or 3.72 percent of total assets, at June 30, 1990 compared to $80.4 million, or 2.75 percent, at March 31, 1990.

Weston L. Bonney, president and chief executive officer of the company, said, ''In spite of the continued earnings pressures associated with the non-performing loans, I am gratified that the company's core business remained profitable.''

At June 30, 1990, Peoples Heritage Bank, the company's principal subsidiary, had originated $75 million of residential mortgages, a 21 percent increase over its performance for the comparable period a year ago.

During the six months ended June 30, 1990, the bank also originated $133.8 million of consumer loans, representing a 44 percent increase from the comparable period in 1989.

In addition, during the second quarter of 1990, the bank purchased the servicing rights on $317 million of residential mortgages in Maine, bringing its total servicing portfolio to over $1 billion, an important move in its strategy to improve fee income.

Financial results for 1990 reflect the acquisition of First Coastal Banks, Inc. and the seven branches purchased from Casco Northern Bank, which

were acquired in the second half of 1989.

These two acquisitions accounted for a substantial portion of the increase in the company's operating expenses during the first six months of 1990 compared to the first six months of 1989.

Given the uncertainty of the economy and the continued growth of the company's non-performing loans, Mr. Bonney said that it was prudent to adopt a more conservative posture regarding the company's dividend policy until more positive trends are discernible.

Management has, therefore, decided to recommend to the company's board of directors at its upcoming meeting scheduled for July 24 that the quarterly dividend for the second quarter of 1990 be reduced to $.125 per share.

Payment of future dividends will have to be reassessed quarterly until conditions stabilize. Mr. Bonney said the entire company will continue its intense focus on four critical areas: non-performing loans, expense controls, fee income enhancement and quality of service.

The company continues to be strongly capitalized, with a primary capital ratio of 8.94 percent. Shareholders' equity at June 30, 1990 totaled $225.5 million, with 8,119,886 shares outstanding, resulting in a book value of $27.77 per share.

Peoples Heritage Financial Group, Inc. is the largest Maine- based, bank holding company with assets of $2.9 billion as of June 30, 1990. The holding company is composed of three FDIC- insured banking subsidiaries: Peoples Heritage Bank which operates 47 banking centers located throughout Maine and its principal subsidiaries Heritage Investment Planning Group, Inc. and Northeast Leasing Co.; Oxford Bank and Trust Co. with five offices located in western Maine; and First Coastal Banks, Inc., a New Hampshire bank holding company which includes First National Bank of Portsmouth and Merchants National Bank, Dover and their 11 offices in the Portsmouth/Dover area.

FORT LAUDERDALE, FL (JULY 20) BUSINESS WIRE - MODCOMP announced it has received a contract valued at more than $3 million to supply real-time computer systems to SIDOR (Siderurgica del Orinoco, C.A.), one of the largest steel manufacturers in the world.

MODCOMP will supply 11 Tri-Dimensional (Tri-D) real-time computer systems

with its PACE/32 process control software for use in supervisory process control at SIDOR's steel plant at Puerto Ordaz, Venezuela. Ten Tri-D Model 9230 systems will be used for process control and one Tri-D Model 9250 will act as a database server for the other ten systems.

All 11 machines will be networked through TCP/IP. The TCP/IP communications network hardware and integration will be provided by AEG Kabel, a unit of AEG Frankfurt, West Germany.

PACE/32 software will be used to manage all of the various hardware systems and to monitor and control the processes. SIDOR's plant produces approximately 1200 metric tons of steel a day.

"Latin America represents significant market potential for us, especially in the industrial automation sector," commented Orontes Aviles, general manager of MODCOMP's Latin American and Caribbean operations.

"SIDOR is considered the largest steel producer in the world with an outstanding reputation in the industry. This sale not only gives us valuable credibility in Latin America's industrial market but also significant market penetration," he said.

"In light of the recent positive developments in economic reform there, Latin America will offer unlimited opportunities, especially in industrial automation." Shipment of the systems is scheduled to begin this December.

MODCOMP, founded in 1970, is a worldwide supplier of high-performance computer systems, products, and services for real-time applications. MODCOMP is a subsidiary of AEG AG, a member of the Daimler-Benz group.

MODCOMP, Tri-Dimensional, Tri-D are registered trademarks of Modular Computer Systems Inc. Pace/32 is a trademark of Modular Computer Systems Inc.

#90201b0679 07/20/1990 ~Business Wire

NEW YORK (JULY 20) BUSINESS WIRE - Fred Anton has been named to the newly created position of vice president-international finance and administration for Time Warner Inc., it was announced Friday by Time Warner Chief Financial Officer Bert Wasserman.

Anton, previously executive director of taxes for Warner Communications Inc., will head a newly formed international finance and administration department which will coordinate all financial activities of Time Warner's international operations.

Anton joined Warner Communications in 1983 as director of taxes. From 1981 to 1983 he was tax manager at Coopers & Lybrand. Prior to that, he was a partner in the public accounting firm of Mahoney, Cohen & Company for seven years, and before that, a senior accountant at Price Waterhouse.

He has an A.B. degree in economics from Clark University in Worcester, Mass., and an M.B.A. degree from Washington University in St. Louis, Mo. He is a member of the American Institute of Certified Public Accountants and the New York State Society of Certified Public Accountants.

Anton was born in New York City and lives in Chappaqua, N.Y.

SOUTH WEYMOUTH, MASS. (JULY 20) BUSINESS WIRE - The Software Developer's Company Inc. (NASDAQ:SDEV) (BOSTON STOCK EXCHANGE:SDC) announced Friday the operating results for the first quarter ended June 30, 1990.

According to chief executive officer Bruce Lynch, ''Sales and earnings for the first quarter are up significantly over the year-ago quarter. But what I am most pleased with is the continuing trend of improving operating margins. Operating income grew 190 percent over the year-ago quarter while sales grew 103 percent.

''However, because of the investment in new marketing programs, margins for the second quarter ending September 30 may not be improved over those for the first quarter ended June 30.''

Separately, the company announced the promotions of two officers.

Steve Underdown, formerly vice president and general manager of the Programmer's Shop division has been appointed executive vice president and chief operating officer of The Software Developer's Company Inc.

Underdown has a solid background in operations including three years with the company and experience with large companies including Gulf + Western, McGraw Edison and Walt Disney Productions.

The Software Developer's Co. Inc. develops, publishes and distributes software development tools for the PC programming community through three divisions: Solution Systems, publisher of development tools for PC programmers; The Programmer's Shop, a retail and wholesale mail-order distributor of more than 1,500 products for PC programmers, and SDC Communications which publishes The Programmer's Shop Catalog and utilizes SDC's substantial mailing list of programming product buyers in other marketing endeavors.

HOPKINTON, MA (JULY 20) BUSINESS WIRE - EMC Corp. (NYSE:EMC) announced earnings of $2,024,000, or $0.08 per share on revenues of $42,705,000 for the quarter ended June 30, 1990.

These results represent significant improvements over the $0.01 per share on revenues of $34,616,000 reported for the second quarter of 1989.

For the six months ended June 30, 1990, earnings were $3,037,000, or $0.12 per share on revenues of $83,173,000 compared to a loss of $7,410,000 on revenues of $58,726,000 in 1989.

EMC's chairman and chief executive officer, Richard J. Egan commented, ''Obviously we are happy to be able to report this continuation of improved financial results which has come about from our strong product offerings, improved quality, and broadening of relationships with both large customers and distributors.''

This most recently completed quarter represented the company's third consecutive quarter with revenues in excess of $40 million dollars. Additionally, the second quarter of 1990 was the highest revenue producing quarter in the company's history.

EMC Corp. manufactures high performance central and expanded storage products and storage subsystems for IBM mainframe and midrange, DEC VAX, Hewlett Packard and Wang VS computer systems.

MUNCIE, IN (JULY 20) BUSINESS WIRE - The Combined Release and Radiation Effects Satellite (CRRES), built by Ball Corporation's aerospace systems group in Boulder, Colo., will be launched at 3:33 p.m. (EDT) today from Cape Canaveral.

Ball designed, built and tested the spacecraft and its payload adapter under an $87 million contract from NASA/Marshall Space Flight Center.

A joint NASA and U.S. Air Force Space Division program, CRRES will study the Earth's invisible magnetic and radiation belts and their effects on satellite instrumentation and communications. CRRES will travel through the inner and outer Van Allen Radiation Belts monitoring the natural radiation environment and how it affects the performance of delicate microelectronic components. These zones of intense radiation can disable spacecraft electronics systems or trigger false readings in space instruments and equipment.

CRRES will also study the effects of active chemical releases on the ionosphere and magnetosphere, and study low altitude ionospheric irregularities.

The mission payload has five major experiments utilizing a total of 55 instruments. The 16 chemical release experiments use 24 canisters containing lithium, barium, calcium and strontium. Nine of these will be released into the upper ionosphere 250 miles above Earth. These elements which become ionized and luminous when they interact with sunlight, will act as tracers briefly ''painting'' invisible magnetic field lines so they can be studied by ground instruments and specially-equipped aircraft.

The chemical releases will provide spectacular displays over the South Pacific next September and over the Caribbean one year after launch. Soviet scientists are cooperating with NASA's observations at the Caribbean releases. Seven other high altitude chemical releases will be made this winter which should be visible throughout the entire Western Hemisphere.

Ball designed CRRES to operate for at least one year with a goal of three years. Information gathered by the CRRES mission will be used to help scientists design new satellites that can better survive the magnetic, electrical and high-energy particle environments that surround the Earth. During the latter stage of its mission, CRRES will become part of NASA's constellation of Global Geospace Science satellites.

Ball Corporation manufactures and markets packaging, industrial and consumer products, and provides aerospace systems and professional services to the federal sector. The company participates in the domestic glass container industry and the Canadian packaging market through two joint venture companies, Ball-InCon Packaging Corp. and Ball Packaging Products Canada, Inc. The company reported 1989 sales of $1.2 billion.

UPPER SADDLE RIVER, N.J. (JULY 20) BUSINESS WIRE - Western Union Financial Services, Inc., announced Friday that its instant money transfer service is now available for money transfers between the United States and the Republic of the Philippines.

As a result, funds transferred to Manila from any Western Union location now can be paid out within 15 minutes.

Bringing the same instant money transfer service that is available in the United States to Manila is one more step in the globalization of Western Union's financial services, according to Marcus Cudina, Western Union Financial Services' vice president - worldwide marketing.

''Our continuing expansion overseas demonstrates Western Union's commitment to serving its core market of United States citizens and foreign nationals who work in the United States and need to send money abroad,'' he said.

''As we extend instant money transfer service to more worldwide locations, we are able to do two important things: first, we provide our customers with much faster, more efficient funds transfer. Second, by eliminating the surcharges associated with most overseas funds transfer arrangements, we can lower our overseas rates to the price level for domestic U.S. transfers.''

Formerly, money transfer service between the U.S. and the Philippines was provided only to Manila and only on the basis of 48- to 72-hour delivery. That service carried a $12 overseas surcharge. Now, through special banking arrangements, in addition to providing instant service to Manila, Western Union is offering money transfer service with 24- to 48-hour delivery throughout the 7,000 Philippine Islands.

Western Union Financial Services, Inc., a separate, wholly owned

subsidiary of Western Union Corporation, provides a broad range of financial and messaging services to consumers and businesses. Its principal offerings are Western Union Money Transfer Service, Western Union Quick Cash (sm), Western Union Quick Collect (sm) and Easy Pay (sm) bill-payment services, and Western Union Mailgram (r), telegram and cablegram message services for individual consumers.

#90201b0705 07/20/1990 ~Business Wire

PROVIDENCE, RI (JULY 20) BUSINESS WIRE - Old Stone Corp., a Providence-based $3.7 billion asset diversified financial services company Friday announced second quarter consolidated net income of $4.4 million for the period ending June 30, 1990.

Net income applicable to common stock was $3.7 million for the second quarter of 1990 and fully diluted and primary earnings per share were 44 cents. Book value at June 30, 1990, was $14.39. Year-to-date 1990 net income was $7.4 million.

Net income for the second quarter of 1990 compares to $8.1 million for the same period of 1989. The year-over-year variance is attributable to a $900 million smaller asset size, a higher level of non-performing assets and losses on real estate development joint ventures.

Additionally, the corporation's earnings reflect a number of non-recurring items including a $10 million pre-tax gain on the sale of Old Stone Bank's Washington division on May 31, 1990, a $10 million recapture of reserves on Mexican debt and $8.8 million in valuation losses relating to real estate development projects.

Old Stone Corp. announced its intention in 1989's fourth quarter to sell its Washington-based retail network, along with other measures, to improve Old Stone Bank's capital ratio. With the sale of the Washington division and a $24 million capital contribution from Old Stone Corp., as of June 1, 1990, Old Stone Bank, a Federal Savings Bank, was able to meet all minimum regulatory capital standards.

The corporation's other two banking subsidiaries already were in compliance with capital standards.

Net interest income (spread) of $21.2 million for the second quarter of 1990 was 22.6 percent lower than the same period in 1989 on the $900 million smaller asset base and a $45.3 million higher level of non-performing assets.

Non-interest income of $12.9 million for the second quarter of 1990 was $3.7 million or 22.4 percent lower than the previous year due to $12.2 million higher net partnership losses related to real estate development joint ventures within Old Stone Development Corp.

This amount includes the aforementined $8.8 million valuation losses which resulted from projections of leasing activity which are not as favorable as previously forecasted. Non-interest income for the second quarter of 1990 also included a $10 million pre-tax gain on the sale of Old Stone Bank of Washington.

Non-interest expense (excluding provision for loan losses) increased $0.9 million or 2.8 percent from the second quarter of 1989 and included a net loss of $1.4 million on the planned sale of three foreclosed properties in July and August. Salaries and employee benefits were $1 million lower during 1990's second quarter than the same period last year.

Old Stone's provision for loan losses during the second quarter of 1990 includes a $10 million recapture of reserves previously established to protect Mexican principal repayment. The principal repayment is guaranteed by zero coupon United States Treasury Securities. The corporation also added $5 million to its domestic loan reserves during the second quarter.

Additionally, Old Stone is in compliance with a regulatory mandate directing financial institutions with debt to Argentina and Brazil to write down an additional 20 percent of the original contractual debt. Old Stone Bank charged off $9.1 million of the foreign debt against its foreign reserves. Old Stone has $21 million of Brazilian and $7.9 million of Argentinian debt remaining.

These factors along with domestic net chargeoffs of $5.1 million resulted in a net reduction to reserves of $18.1 million for the second quarter of 1990. The total reserve for loan losses at June 30, 1990, was $54.4 million or 1.82 percent of total loans.

As of June 30, 1990, non-performing and restructured loans increased $27.4 million to $249.2 million when compared to year end 1989. The restructuring of Mexican debt this year accounts for $20.1 million of the increase. Old Stone also had $119.3 million of other real estae owned as of June 30, 1990, up $24.8 million from Dec. 31, 1989. Anticipated sales of other real estae owned in July and August represent over $15 million of non-performing assets.

Old Stone Corp. operates 172 offices in 25 states. It engages in retail, mortgage banking, commercial lending as well as money management and trust services. Its stock is traded on the NASDAQ National Market System (Symbol: OSTN).

NEW BEDFORD, MA (JULY 20) BUSINESS WIRE - Robert McCarter, chairman, chief executive officer and president of NBB Bancorp Inc. (NYSE:NBB), parent company of New Bedford Institution for Savings (NBIS), announced Friday that the board of directors has declared a dividend of 23 cents per share to stockholders of record as of July 30, 1990.

The dividend will be payable on Aug. 10, 1990.

The chairman released the following statement: ''Net income for the quarter ended June 30, 1990 totaled $2.6 million or $.29 per share as compared to $3.9 million or $.42 per share for the same quarter in 1989. The decline in income was primarily due to the costs related to the increase in nonperforming loans resulting from the slowed real estate market.

''As of June 30, 1990, nonperforming loans totaled $21.4 million, an increase of $7.1 million from the previous quarter. This increase includes a loan of $6.6 million which was anticipated and reported in the

first quarter report.''

''Because of the real estate problem in Massachusetts, the bank increased its quarterly provision for possible loan losses. During the quarter, $600,000 was provided as compared to $250,000 for the same quarter a year ago.

''For the six months ended June 30, 1990, the provision for possible loan losses totaled $1.1 million as compared to $565,000 for the same period in the previous year. The allowance for possible loan losses was $7.0 million, including $1.7 million in specific reserves, as of June 30, 1990.''

''We have continued to purchase stock under the stock repurchase program authorized in October 1989. There were 8,859,895 shares outstanding with a book value of $23.46 per share as of June 30, 1990. This compares to a book value of $22.73 per share as of June 30, 1989.''

CINCINNATI (JULY 20) BUSINESS WIRE - First Savings Bancorp, parent of First Financial Savings Association, F.A., reported net earnings for the first quarter ended June 30, 1990, of $481,000, or 74 cents per share, a decrease from the $561,000, or 82 cents per share reported for the comparable quarter in 1989.

The decrease in earnings resulted primarily from a change in the method of accounting for income taxes which enhanced the prior year's quarterly earnings by $93,000. Earnings before the cumulative effect of the accounting change were slightly higher during the current quarter. Additionally, net interest income - core earnings - amounted to $1,212,000 for the quarter ended June 30, 1990 as compared to $1,077,000 for the same quarter in 1989.

DAYTON, Ohio (JULY 20) BUSINESS WIRE - The Standard Register Co. (NASDAQ:SREG) Friday announced results for the second quarter and first half of 1990.

In his report to shareholders, John K. Darragh, president and chief executive officer Standard Register, reported the company's record first half revenue of $352,928,000 compared with $347,650,000 in 1989. Net income for the first half of 1990 increased to $18,355,000 or 62 cents per share over 1989 first half net income of $18,039,000 or 61 cents per share.

Darragh cited effective manufacturing cost control and lower effective income tax rates as factors which contributed to the improved net income for the first half.

Standard Register also established a new quarterly revenue record. Revenue reported for the second quarter 1990 was $178,459,000 compared with the $176,020,000 for the same period in 1989. Second quarter net income was $8,873,000 or 30 cents per share compared with $9,514,000 or 32 cents per share reported one year ago.

Darragh said Standard Register's net income for the second quarter reflects the severely competitive environment in the business forms industry. He added that given the very low growth in the general economy and the resulting imbalance in supply and demand, Standard Register's increase in revenue was not adequate to offset the company's budgeted increase in selling and administrative costs. Thus, the second quarter reduction in margin is directly attributable to lower-than-anticipated revenue.

Darragh said he does not anticipate a paper price increase during the third quarter and that the company's incoming orders for June were within expectations. Darragh believes that third quarter results will exceed those recorded for the third quarter in 1989.

In closing, Darragh said, ''The realization of our anticipated third quarter results will reinforce our belief that we can record new highs in revenue and net income for the year.''

The board of directors, on July 19, 1990, declared a regular quarterly cash dividend for 14 cents ($0.14) per share to be paid Aug. 31, 1990 to shareholders of record Aug. 17, 1990.

EAST HARTFORD, CT (JULY 20) BUSINESS WIRE - KCR Technology Inc. (NASDAQ:KCRT), an East Hartford based manufacturer of electronic printing systems, Friday announced the establishment of the company's product leasing program.

The program is designed to include both full payout leases and operating leases to KCR's credit worthy customers.

The first transaction to be concluded under the product leasing program is an operating rental agreement entered into by Simon & Schuster, Southern New England Telephone Credit Inc. and KCR Technology Inc. under which Simon & Schuster has agreed to rent three KCR 7601 printer systems for a period of 36 months with provisions for termination in the event of non-performance on KCR's part for either equipment performance or service.

In exchange, KCR will receive approximately 66 percent of the purchase price of the equipment initially with the balance scheduled in two equal payments over the next 12 months.

The transaction was financed by Southern New England Telephone Credits Inc. as part of a newly established relationship between SNET Credit and KCR.

DAYTON, OH (JULY 20) BUSINESS WIRE - Richard P. Rossetti has been named president of Mead Containerboard, a division of the Mead Corporation based in Atlanta.

''We are delighted to have a person with Dick's experience in packaging and converting systems head up this key division,'' said Steven C. Mason, president of Mead Corporation.

Formerly vice president of worldwide business development for Mead Packaging, another Atlanta-based division, Rossetti joined the corporation in 1985 as general manager of soft drink packaging.

Before joining Mead, Rossetti was director of marketing and sales for the Autosleeve Division of Automated Packaging in Twinsburg, Ohio. He has held a variety of sales and marketing management positions with packaging companies in Massachusetts, New Hampshire, Illinois, Maryland and Florida.

Rossetti graduated with a bachelor of science degree in political science from Gannon University in Erie, Penn. He is a member of the National Beverage Packaging Association.

Mead Containerboard manufactures shipping containers and corrugating medium. The division operates a corrugating medium mill at Stevenson, Ala., and eight box plants throughout the U.S.

The Mead Corporation, based in Dayton, is a world leader in forest products, electronic publishing and color imaging.

CARLSTADT, NJ (JULY 20) BUSINESS WIRE - Trilling Medical Technologies (NASDAQ:BURN) generated record revenue and an operating profit for the nine months ended May 31, 1990.

Revenues for the nine months reached $3,284,561, an increase of 94 percent over the $1,696,361 reported last year during the same period.

The company reported a profit of $68,590, or $.0026 per share, as opposed to a loss of $382,925, or 2 cents per share for the first nine months of 1989.

Revenues for the third quarter reached $1,094,538, which represents a gain of 163 percent compared to the $416,906 reported for the third quarter of fiscal 1989. The company showed a net loss of $47,330, or $.0018 per share, as opposed to losses of $267,428, or $.0103 per share, in the prior year.

''Our substantial sales gains are an outgrowth of our emphasis on increased domestic and overseas marketing,'' explained Trilling's president Peter Cohen. ''The breakdown between international and domestic sales for the nine months of 1990 and 1989 respectively, was $1,987,000 domestic and $1,174,000 international, as compared with $800,000 domestic

and $539,000 international.

''We continue to aggressively expand our sales and marketing efforts including an ambitious 1990 exhibition show schedule. Our strong performance for the nine month period is consistent with our long-term strategy and further demonstrates our ability to successfully penetrate new markets.

''The increase in international sales is due to our efforts to introduce Water-Jel to overseas markets and to broadening our customer base. We are very proud to announce the Spanish National Police Department ordered 1,000 Fire Blankets to equip every police vehicle used in fire rescue and burn care.

''Additionally, the Norwegian army place an initial order for Water-Jel products during the third quarter for its United Nations Peace Keeping Forces stationed in Lebanon,'' said Cohen.

''The Canadian, Italian and French militaries are also utilizing our products. This business is a direct result of work performed by our newly organized international distributor network.''

''On the domestic front,'' Cohen continued, ''Pfizer, which has licensed the Water-Jel Burn Dressings for the U.S. consumer market, has been test marketing since the first week in May. The four test cities: Portland, Ore.; Houston, Louisville, Ky.; and Indianapolis each reported sales trends that exceed projections, according to Pfizer. Reports from our distributors in these areas indicate that the substantial advertising campaign immediately facilitated sales efforts to their commercial and industrial accounts,'' Cohen concluded.

Water-Jel products are used to provide emergency first aid for burns, shield against heat and fires and, in larger sizes, help facilitate escape from a fire situation. They are currently used by consumers, industrial and manufacturing companies, police, fire, EMS and rescue squads, and the military, including many branches of the United States defense forces.

BIRMINGHAM, AL (JULY 20) BUSINESS WIRE - Bruno's Inc. (NASDAQ/NMS:BRNO) Friday announced that the board of directors has declared an increase in

the regular quarterly cash dividend to $.045 (four and one-half cents) per share, up 28.5 percent from the previous quarterly rate of $.035 (three and one-half cents) per share.

The dividend is payable Aug. 17, 1990, to shareholders of record as of the close of business on Aug. 3, 1990. This marks the 16th consecutive annual increase in the quarterly dividend. During the past five years, the cash dividend has grown at a compound annual rate of 18 percent.

Bruno's Inc. is a leading regional food retailer, operating a total of 237 supermarkets and combination food and drug stores in Alabama, Georgia, Mississippi, Florida and Tennessee.

YONKERS, N.Y. (JULY 20) BUSINESS WIRE - Loral Corp. (NYSE:LOR) announced the on-time delivery of the first production unit of the ALR-56M advanced radar warning receiver, which will modernize the electronic combat capability of the U.S. Air Force fleet of F-16s and other aircraft.

The first system was accepted by the Air Force Aeronautical Systems Division, Wright-Patterson AFB, Dayton, Ohio.

It has been shippped to General Dynamics Corp. in Fort Worth, where it will be installed in a new F-16 Block 50 aircraft. The ALR-56M will become operational in February 1992 at MacDill Air Force Base, Tampa, Fla.

''The on-time delivery of this first system is the result of a strong partnership among the Air Force, Loral, General Dynamics and our major suppliers to streamline the development, testing, production and integration of advanced technology systems,'' said Bernard L. Schwartz, chairman and chief executive officer. ''The continuing success of this program shows that cooperation between the military services and industry can yield on-time delivery of complex systems.''

The ALR-56M is based on the proven architecture of the ALR-56C, the advanced radar warning receiver that currently flies on all new and most existing F-15 fighters. Designed to handle next-generation radar-guided threats, Loral's ALR-56M provides the most advanced tactical warning and situational awareness capability available today.

Loral expects that the advanced radar warning receiver program will be among the largest electronic combat programs in U.S. Air Force history, worth about $2 billion, including significant export potential.

''The ALR-56M advanced radar warning receiver is the most important program in the history of Loral Corp.,'' Schwartz said. ''To date the system has met or exceeded all schedule and performance requirements--tangible tributes to the men and women, both military and civilian, who are making this program a success.''

Loral will deliver 18 additional systems during the company's fiscal year that ends March 31, 1991.

Loral Corp. is high-technology company that primarily designs and manufactures defense electronics.

#90201b0780 07/20/1990 ~Business Wire

SCOTTSDALE, ARIZ. (JULY 20) BUSINESS WIRE - The General Partner of Prime Financial Partners L.P. Friday announced plans to complete the restructuring of the partnership which began with the write down of its real estate assets in 1989 and was followed by the sale of $2.5 million of unregistered Class A Units this spring.

Revenue from the partnership's Welfare Benefit Trust, the partnership's primary product, is up approximately 250 percent for the first six months of this year compared to the same prior year period.

As of June 30, 1990, Prime had marketing agreements with 13 major insurance companies, the number of companies has expanded from five as of this date last year. The partnership is head of its business plan for Prime Financial Benefit Trust sales for the first six months of the year and anticipates this trend to continue through year-end.

However, due in part to the expenses associated with a nationwide marketing campaign, the partnership expects to report a loss in the second quarter.

Restructuring plans include: 1. Filing a Registration statement with the SEC to cover the approximately 4.4 million currently unregistered Class A Units (including the 3.4 million Class A units sold in the spring offering); 2. Undertaking a repurchase program by exchange of Class A Units or otherwise, for preferred units (AMEX:PFPpr) on terms to be determined at a later date; and 3. Adopting an annual distribution policy to more accurately correspond to cash flow from operations since most of the partnership's cash flow is generated from fourth quarter Welfare Benefit Trust sales activity each year. The partnership will not

distribute cash to unitholders of record as of the July 31 record date.

The partnership has modified the method used for accounting of administrative fee income and certain professional fees. Particularly, adminstrative fees and certain fixed costs associated with the administration of the Prime Financial Benefit Trust.

The partnership originally reported a net loss of $10,704 or 2 cents per Class A Unit for the three months ended March 31.

#90201b0788 07/20/1990 ~Business Wire

BRAINTREE, MA (JULY 20) BUSINESS WIRE - Grossman's Inc. (NASDAQ:GROS) announced that a dissident stockholder group led by real estate investors Jay H. Shidler and Robert W. Holman Jr. made filings with the Securities and Exchange Commission on July 18 naming nine Shidler/Holman nominees for election to the Grossman's board.

The Shidler/Holman group nominees include Robert Harrow, a former executive vice president of Grossman's who was terminated by the company in July, 1989. According to the Shidler/Holman group SEC filings, after being terminated by Grossman's, Harrow was employed as president and chief executive officer of Rickel Home Centers but lasted in that position for only eight months until his departure in March, 1990.

The Shidler/Holman group SEC filings also disclosed that if the group is successful in taking control of the Grossman's board, it would seek to have appointed as the new chief executive officer of Grossman's W. Allen Doane, a Hawaiian real estate executive affiliated with various Shidler/Holman businesses.

The Shidler/Holman group initially made filings with the SEC in May, 1990 indicating their intent to solicit stockholder consents to remove Grossman's current board in favor of Shidler, Holman and other unnamed nominees to be selected by Shidler and Holman.

The Shidler/Holman group's May SEC filings were made just two days after Grossman's rejected a Shidler/Holman proposal under which, among other things, most of Grossman's owned properties would have been sold to a Shidler/Holman affiliate and leased back to Grossman's on terms which Grossman's believed were highly unfavorable.

Grossman's said that although the Shidler/Holman group has now named its nominees to the Grossman's board, the Shidler/Holman group had not yet begun to solicit Grossman's stockholder consents. Grossman's stated that once the Shidler/Holman group distributed consent solicitation materials and began to solicit Grossman's stockholder consents, the company would send to stockholders a complete response to the Shidler/Holman group's solicitation materials.

Grossman's, a major retailer of lumber and building materials, operates 157 stores in nine Northeastern states and in California.

#90201b0795 07/20/1990 ~Business Wire

EL SEGUNDO, Calif. (JULY 20) BUSINESS WIRE - Aura Systems Inc. (NASDAQ:AURA), a leader in magnetic suspension technology, had lower first quarter revenues which generated a widened operating loss in the period ended May 31, 1990, compared with the prior year, Harry Kurtzman, president and chief executive officer, announced Friday.

Revenues for the period amounted to $1,573,652 and the reported loss was $1,757,805. In the comparable first quarter a year ago, Aura had revenues of $2,077,334 and a net loss of $396,249.

According to Kurtzman, the revenue decline resulted principally from government delays in the start up of two military contracts which are now in progress. ''Despite the deferred sales, we continued to spend heavily on research and development projects,'' he said.

''R & D expenses increased by $533,000 in the quarter, focusing on commercialization and industrial applications for our unique magnetic technology. During the quarter we also incurred higher marketing and selling costs associated with initial commercial sales of high force actuators and marketing analysis and surveys for high definition display systems.

''While these costs are necessary for our future business growth, they are temporarily impacting the company's operating results,'' Kurtzman added.

Commenting on business prospects in the months ahead, Kurtzman looks for revenues in the second quarter to improve significantly over the initial three months with operations at or close to break-even. He stated that the company's order backlog continues at $15 million. Overall, the company expects profitable results for the fiscal year which ends in February 1991.

#90201b0797 07/20/1990 ~Business Wire

BIRMINGHAM, Ala. (JULY 20) BUSINESS WIRE - Vulcan Materials Co. (NYSE:VMC) Friday announced record second quarter sales of $295,682,000, up slightly from the $293,717,000 reported in the second quarter of 1989.

Pretax earnings of $60,074,000 were 9 percent lower than last year's second quarter result of $66,251,000. Net earnings and earnings per share were $39,664,000 and $1.02 down 9 percent and 5 percent, respectively, from the $43,554,000 and $1.07 earned in the second quarter of 1989.

The second quarter effective tax rate was 34.0 percent, down slightly from last year's second quarter rate of 34.3 percent.

Sales of $527,702,000 for the first six months of 1990 were at a record first half level, up 3 percent from comparable 1989 sales of $511,227,000. Pretax earnings of $88,248,000 were 2 percent below the $89,935,000 earned in the first half of 1989.

Net earnings before the cumulative effect of accounting changes totaled $58,341,000, down 2 percent from comparable 1989 earnings of $59,240,000. Earnings per share before the cumulative effect of accounting changes were $1.49, improving 3 percent over the $1.45 earned last year and equaling the all-time high reported in 1988.

The company adopted two accounting changes in the first quarter of 1989, which resulted in after-tax income of $1,490,000 referable to the cumulative effect of these changes.

With that income included in last year's first half results, comparable 1990 net earnings reflect a decline of 4 percent and earnings per share equaled the $1.49 recorded in 1989.

Construction Materials sales reached a record second quarter level of $190,155,000, improving 6 percent over sales of $179,421,000 in the same quarter of 1989. Virtually all of the improvement related to higher volume, most notably a 7 percent increase in shipments of crushed stone.

Sales of the Chemicals segment totaled $105,527,000 in the second quarter of 1990, down 8 percent from last year's sales of $114,296,000. This decline was due to lower prices and volume, reflecting the impact of market pressures on chlorine and chlorine-based products.

Construction Materials segment earnings were $43,236,000 in the second quarter of 1990, up 3 percent from the $41,821,000 reported for the same quarter of last year. This increase related mainly to higher sales volume offset in part by higher costs and reduction in other income.

The decline in other income reflects mainly the effect of lower gains on sales of surplus land. Chemicals earnings were $17,834,000, down 28 percent from last year's second quarter record level of $24,805,000 due primarily to the impact of lower sales and, to a lesser extent, the effects of plant outages at the Geismar, La., facility.

These factors were partially offset by lower raw material prices and the absence of unusual charges comparable to the $1,200,000 write-off of engineering costs recorded in the second quarter of 1989.

Vulcan is a producer of industrail materials and commodities with

significant positions in two industries. It is the nation's foremost producer of construction aggregates and a leading chemicals manufacturer, producing a diversified line of chlorinated solvents and other industrial chemicals.

#90201b0802 07/20/1990 ~Business Wire

HAVERHILL, MA (JULY 20) BUSINESS WIRE - Family Bancorp (NASDAQ:FMLY) Friday reported second quarter earnings of $58,000, or 2 cents per share, versus earnings of $346,000, or 11 cents per share, in the year earlier period.

During the first six months of 1990, the company had a net loss of $965,000, or (37 cents) per share as compared with net income of $1,661,000,, or 51 cents per share during the first half of 1989. The company's board of directors voted to maintain the regular quarterly dividend of $.125 per share in recognition of bancorp's strong capital position, and confidence in the future performance of the company. The dividend will be paid on Aug. 15, 1990 to stockholders of record on Aug. 1 1990.

''Earnings continue to be under pressure as a result of the weak real estate market and regional economy,'' noted David D. Hindle, president and chief executive officer. ''We believe we have identified and dealt firmly with our most serious asset problems through a combination of charge-offs and increased reserves.'' During the second quarter the company charged-off $3.2 million in balances on non-performing loans and other assets, and made a provision for possible loan losses of $1.5 million.

For the first half of 1990, charge-offs and provisions were $4.3 million and $4.5 million, respectively. At June 30, 1990, non-performing loans and other assets were $21.5 million equivalent to 5.76 percent of total loans, down from $23.3 million, or 6.16 percent of total loans at March 31 1990. The allowance for possible loan losses was $6.1 million at June 30 1990, equivalent to 47.79 percent of non-performing loans.

The company realized net gains on sales of securities and mortgage loan sales of only $8,000 in the most recent quarter versus $823,000 in the year earlier period. For the six months ended June 30, 1990, net securities and mortgage gains were $143,000 versus $1.3 million in 1989.

At June 30, 1990, total assets were $480.8 million as compared with $494.3 million at March 31, 1990 and $485.0 million at Dec. 31, 1989. The company's capital ratio remains strong at 9.83 percent of total assets.

Family Bancorp is the parent company of The Family Bank, a Mass. state chartered savings bank with nine banking offices serving Essex County, Mass. and southern Rockingham County in N.H.

NEW YORK (JULY 20) BUSINESS WIRE - Investment Technologies Inc. announced that it completed Thursday a $1.2 million private placement of units (temporarily trading on the pink sheets) at $500 per unit.

The company expects the units to trade shortly on NASDAQ under symbol IVES.

The company, in association with Frank Cappiello, has in registration a 1933 Act Filing for a closed-end multi-asset security (proposed NYSE symbol:CCF); and is in negotiation with proposed lead underwriters for such fund. Regulatory approvals for such fund have been sought since last year.

Investment Technologies Inc.'s common stock (NASDAQ:IVES) had been included recently for quotation in the National Association of Securities Dealer's Automated Quotations Systems (NASDAQ) via an exception from the capital and surplus requirements, under current NASDAQ symbol IVESC; but should shortly resume trading again as NASDAQ:IVES.

''The company believes that computer models will play an increasing role in the future of asset management; further, the Company believes that it leads the field in this technology now,'' according to Invest-Tech's President, Lawrence Silberstein. The company's multi-asset computer models are known as COLLEAUGE and as VESTOR. The terms ''Multi-asset,'' COLLEAUGE, and VESTOR are service marks of Investment Technologies Inc.

The company recently concluded pass-through contracts with Compuserve (NYSE:HRB), Quotron/Citibank (NYSE:CCI), the Charles Schwab Company (NYSE:SCH), Merrill Lynch (Citation Group), Salomon Brothers, McGraw Hill Securities (S & P Securities), Investments, Autranet, Lynch Jones & Ryan, Jefferies & Company (W & D Securities), Shearson Lehman Hutton (Institutional Equity Services), Jessup Josephthal, and General Electrical Information Services.

HAUPPAUGE, NY (JULY 20) BUSINESS WIRE - Eagle Telephonics Inc. common stock will continue to be included for quotation in the National Association of Securities Dealer's Automated Quotations System (NASDAQ) via an exception from the 12(g) Capital and Surplus requirements.

While Eagle Telephonics Inc. failed to meet this requirement as of March 7 1990, the NASD has granted a temporary exception from this standard, subject to Eagle Telphonics Inc. filing its FORM 8K.

For the duration of the exception the company's NASDAQ Symbol will be EGLAC.

Eagle Telephonics Inc. produces business electronic telephone keyset systems that are unique in their compatibility with standard ''1A2'' type telephone equipment (traditional electro-mechanical style electronic business phones), and unique in their ability to interface with Centrex services networks of the Regional Bell Operating Companies as well as switchboards that handle conventional phones.

#90201b0805 07/20/1990 ~Business Wire
HAUPPAUGE, N.Y. (JULY 20) BUSINESS WIRE - Eagle Telephoncis Inc., (NASDAQ:EGLAC) Friday announced results of operations for the second quarter and six months ended April 30.

For the second quarter ended April 30, net sales were $4,406,446 compared to net sales of $5,143,777 for the previous comparable quarter.

The company reported a net loss of $247,957, or 2 cents per share, for the latest second quarter, compared to a net loss of $547,388, or 4 cents per share, for the second quarter of fiscal 1989.

Net sales for the six months ended April 30, were $10,168,755 compared to

$10,005,821 for the comparable six month period of fiscal 1989. The company reported a net loss of $230,014, or 1 cent per share, for the six months ended April 30, compared to a net loss of $1,097,170, or 7 cents per share, for the first six months of fiscal 1989.

Commenting on the results, Myron W. Landin, president, stated, ''While market conditions impeded our progress in Eagle phone system sales during the current fiscal year, our interconnect revenues increased by 25 percent for the six months ended April 30. This strength resulted primarily from increased new system sales and increased fee income under agency agreement with certain of the Regional Bell Operating Companies.''

Landin further commented, ''We continue to invest in our future with the development of our products for the new CLASS telephone service and the advanced Eagle II system. During the second quarter, Bell Atlantic Business Supplies signed as an Eagle distributor for our CLASS products.

''Further, we reiterate our belief that the U.S. Government's approval of our new 'Safe Set' electronic on hook voice secure telephone opens expanded markets to the military, defense industry and related government agenices. We are optimistic that these factors will contribute to our future growth.''

Eagle Telephonics Inc., produces business electronic telephone keyset systems that are unique in their compatibility with standard ''1A2'' type telephone equipment (traditional electro-mechanical style electronic business phones), and unique in their ability to interface with Centrex services networks of the Regional Bell Operating Companies as well as switchboards that handle conventional phones.

WESTBOROUGH, MA (JULY 20) BUSINESS WIRE - New England Electric System (NEES) Friday reported earnings for the first six months of 1990 of $1.05 per average share.

This compares to $1.08 earned in the corresponding period last year on fewer average shares. NEES earnings for the six months ended June 30, 1990 were decreased by approximately $.04 per share due to a new seasonal rate design, which was implemented by its wholesale electric utility subsidiary in 1989. This seasonal rate design involves higher rates during peak months and lower rates during off-peak months. It was designed not to have a significant impact on earnings over a full year.

Earnings for the 12-month period ended June 30, 1990 of $2.32 compare to earnings of $2.08 per average share for the corresponding period ended June 30, 1989.

CAPE CANAVERAL, Fla. (JULY 20) BUSINESS WIRE - Johnson Controls Inc. has been selected by the Department of the Army for award of a contract to provide installation support services at Fort Gordon, Ga., Paul V. Roundy III, president and chief operating officer of Pan Am World Services Inc., announced Friday.

Pan Am World Services is a subsidiary of Johnson Controls.

Pan Am World Services has held the Fort Gordon installation support services contract since 1980; the company was awarded a contract for facilities engineering functions at the post in 1986. This latest award consolidates requirements of the previous contracts.

J. Stephen Simpson, vice president Base Support Division, which will be responsible for performance of the contract, said the cost-plus-award-fee type contract will be effective Oct. 1, 1990 through Sept. 30, 1991.

The award includes four one-year option periods which could continue contract performance through Sept. 30, 1995. Estimated costs to the Army under the contract will be approximately $145.5 million over the five-year period.

The contract consists of 19 functional areas including Engineering, Logistics, and Housing services.

Johnson Controls, headquartered in Milwaukee, Wis., is a leader in facility management and control systems, automotive seating, batteries and plastics. Founded in 1885, it operates in 350 locations worldwide. Johnson Controls securities (JCI) are listsed on the NYSE.

#90201b0819 07/20/1990 ~Business Wire

DALLAS (JULY 20) BUSINESS WIRE - Medical Care International Inc.

(NASDAQ:MEDC) Friday announced significantly improved results for the second quarter ended June 30, 1990.

Highlights of the quarter included record revenue, operating income and earnings, primarily attributable to internal case growth along with acquisitions.

Net income on a fully taxed basis nearly doubled in the second quarter to $7,590,000 compared with $3,842,000 in the year-earlier period. On a per share basis, earnings rose 50 percent to 36 cents compared with 24 cents last year. Net revenue for the period totaled $58,356,000 vs. $34,645,000 in the second quarter of 1989, representing an increase of 68 percent.

For the first six months of 1990, Medical Care reported net income before extraordinary items of $14,071,000, up 100 percent from $7,048,000 in the first half of 1989. Earnings per share on a fully taxed basis increased 51 percent to 68 cents vs. 45 cents in the same period last year. Net revenue for the first half increased 68 percent to $111,613,000 vs. $66,251,000 last year.

''Clearly, the company's earnings momentum remains very strong,'' remarked Donald E. Steen, chairman and president. ''These results reflect steady internal growth in our caseload as well as the contribution of surgery centers acquired or developed within the last year.

''We are also very pleased to note that our recently acquired MediVision centers continue to demonstrate improving operations, accounting for approximately 2 cents of the quarter's fully taxed earnings.''

Steen noted that Medical Care's caseload increased 38 percent to over 60,500 cases in the second quarter of 1990. Same-unit cases for the general surgery centers rose 8 percent. For the first half of 1990, the company's case load increased 37 percent to nearly 117,000 cases while same-unit cases for the general surgery centers increased 9 percent.

''Considering the rapid technological advances now being made in outpatient surgery, and the company's internal capacity for growth, we are comfortable that Medical Care is well-situated to expand its leading role within the industry,'' said Steen. ''Moreover, the company's strong financial position will enable it to capitalize on expansion opportunities as they arise.''

Medical Care International is the nation's largest owner and operator of freestanding outpatient surgery centers. The company's facilities include 70 surgery centers and 10 specially equipped eye care practices from coast to coast, where a variety of surgical procedures are performed that do not require an overnight hospital stay.

#90201b0821 07/20/1990 ~Business Wire

BELLEVILLE, Ill. (JULY 20) BUSINESS WIRE - William S. Badgley, chairnman of the board of Magna Group Inc. announced second quarter 1990 earnings of $3.6 million or 28 cents per share compared to $5.5 million or 45 cents per share for the second quarter of 1989.

Earnings for the first six months of 1990 totaled $8.2 million or 64 cents per share compared to $9.8 million or 82 cents per share for the first six months of 1989. Badgley said, ''Loan demand has softened, interest margins have narrowed and other expenses have increased due to the completion of our previously announced enhanced retirement incentive program and the acquisition of two thrifts from the Resolition Trust Corp. in the first six months of 1990. We anticipate that 1990 results will improve, although at this time, it appears that 1989 results will not be equaled.''

During the second quarter of 1990, Magna allocated $3.2 million to the provision for loan losses, an increase of $1.2 million over the three months ended June 30, 1989. This increase was caused by deterioration in the second quarter 1990 of three large loans and an increase in non-performing loans. The provision was also affected by larger charge offs in the second quarter of 1990 when compared to 1989 and by an overall increase in loans. Badgley said, ''We do not anticipate provisions in the third and fourth quarter comparable to those in the second quarter.

''During the second quarter of 1990, we incurred a one time expense when we replaced our computer which was part of the enhancement of our program system and will position Magna for the long term. Replacement of the equipment resulted in a loss of $.5 million.''

Total assets as of June 30, 1990 were $2.35 billion an increase of 10.3 percent from $2.1 billion a year earlier. Total deposits increased 10.8 percent to $2.05 billion from $1.85 billion a year earlier. Loans net of unearned income were $1.46 billion up 7.3 percent from $1.36 billion at June 30, 1989. Stockholders' equity rose 10 percent to $180 million from $164 million a year earlier. Primary capital as a percent of total assets was 9.15 percent at June 30, 1990 making Magna a very strongly capitalized banking company.

The allowance for loan losses totaled $16.5 million or 1.13 percent of loans compared to 1.08 percent at Dec. 31, 1989. Non-performing loans (loans 90 days or more past due and accruing, non-accrual loans and restructured loans) totaled $36 million as of June 30, 1990. Net loans

charged off the first six months of 1990 were $4.1 million compared to $2.7 million charged off during the first six months of 1989.

Magna Group Inc., a multi-bank holding company headquartered in Belleville owns eight banks with 49 locations throughout central and southern Illinois, a trust company and a data processing company. The common stock of Magna Group Inc., is traded in the over-the-counter market and its quotations are reported in the National Market System of the National Association of Securities Dealers Inc. Automated Quotation System (NASDAQ) under the symbol MAGI.

#90201b0827 07/20/1990 ~Business Wire

BILLERICA, Mass. (JULY 20) BUSINESS WIRE - Davox Corp. (OTC/NMS:DAVX) Friday reported revenues of $9 million and a net loss of $640,000 for the period ending June 30, 1990.

The figures show substantial improvement over the same period of 1989 ($7.3 million in sales and a net loss of $2,126,000), but fall below results for the first quarter of 1990 ($9.9 million in sales and net income of $48,223).

Revenue and net loss for the first six months of 1990 were $19 million and $592,000, respectively. For the same period of 1989, Davox reported sales of $16.9 million and a net loss of $1,889,000. There was a net loss per share of 11 cents for the first six months of 1990 compared to a net loss per share of 37 cents for the same period of 1989.

''The major factor in the second quarter revenue and profit shortfall was lack of receipt of an anticipated $2 million in orders from a major customer,'' said Daniel A. Hosage, president, chairman and chief executive officer. ''We are confident that these orders will be forthcoming, and that this customer will place additional orders later this year.

''Despite a 47 percent improvement in new-name business compared to the first six months of last year, we were unable to compensate for this customer's delay in orders.''

Davox develops, produces and markets Computer Aided Communications systems which include predictive dialing, interactive voice response and multifunction workstation systems. These products automate and integrate telephone and data communications functions to increase productivity in applications such as collections, telemarketing and customer service.

#90201b0843 07/20/1990 ~Business Wire
INDIANAPOLIS (JULY 20) BUSINESS WIRE - The Somerset Group Inc. (OTC:SOMR) Friday reported net income for the quarter ended June 30, 1990, of $245,000, or 13 cents per share.

This compares favorably with a loss of $298,000, or 16 cents per share during the same quarter in 1989. Quarterly income from continuing operations improved dramatically over 1989 from $50,000 to $323,000, while losses from discontinued operations declined from a $348,000 loss in 1989 to a loss of $78,000 in 1990. The 1990 second quarter results included a $250,000 loss from an investment in Mid America Media Inc., the corporate general partner of a start-up weekly alternative newspaper in the city of Indianapolis. It was decided to write off this investment at this time relative to start-up losses incurred. Plans are ongoing toward bringing this venture to a profitable level.

For the six months ended June 30, 1990, net income was $1,531,000 or 84 cents per share, compared to a loss of $492,000, or 27 cents per share, for the first half of 1989. The year-to-date net income included a non-recurring gain on the sale of assets of the discontinued radio

broadcasting subsidiary of $909,000. Income from continuing operations for the year-to-date increased from $82,000 in 1989 to $700,000 in 1990, while discontinued operations posted a loss of $574,000 in 1989 compared to a net gain of $831,000 in 1990, including the non-recurring gain on sale of assets. Sales for the six months increased 33 percent from $7,503,000 to $10,003,000.

The company's equity in First Indiana Corp. (a 21.8 percent owned subsidiary) increased from $232,000 to $415,000 for the quarter, and from $448,000 to $796,000 for the six months, when compared to 1989.

In announcing the results, Robert H. McKinney, chairman and CEO, stated, ''Long-term strategic plans for restructuring our operations and the balance sheet of First Indiana Bank are beginning to have an impact on consolidated results. We anticipate continued, steady improvement as implementation of that long-range plan proceeds.''

The Somerset Group Inc. is a diversified public holding company which through its divisions and subsidiaries engages in three primary lines of business -- banking, construction products and services, and environmental testing.

Through its 21.8 percent investment in First Indiana Corp., whose principal subsidiary is First Indiana Bank, a Federal Savings Bank, the company operates retail banking and real estate mortgage leading centers in strategic metropolitan communities.

The company provides construction products and engineering services through its American Precast Concrete Division, one of the largest manufacturers, marketers and installers of precast/prestressed concrete building components in the Midwest.

The company provides analytical testing services for toxic and hazardous compounds in the environment through its 80 percent owned subsidiary, TMS Analytical Services Inc. TMS is also a participant in the Contract Laboratory Program of the United States Environmental Protection Agency.

#90201b0845 07/20/1990 ~Business Wire

WHITEVILLE, N.C. (JULY 20) BUSINESS WIRE - United Carolina Bancshares Corp. (NASDAQ: UCAR) Friday reported that net income for the three months ended June 30, 1990 amounted to $5,866,000 compared to $6,134,000 for the second quarter of 1989.

On a per share basis, net income amounted to 42 cents during the second quarter of 1990 compared to $.44 in 1989, a decrease of 4.5 percent.

For the six months ended June 30, 1990, net income totaled $11,930,000 compared to $12,204,000 in 1989. On a per share basis, net income amounted to 86 cents in 1990 compared to 88 cents in 1989, a decrease of 2.3 percent.

At June 30, 1990, total assets amounted to $2,507,852,000, a 10.3 percent increase over 1989. Total deposits increased 10.5 percent to $2,260,910,000 at June 30, 1990. Loans and lease receivables amounted to $1,671,261,000 at June 30, 1990, an increase of 8.7 percent from 1989.

At June 30, 1990, stockholders' equity totaled $181,682,000, which represented a book value of $13.04 per share, an increase of 8.9 percent over 1989.

Rhone Sasser, chief executive officer, stated that: ''Operating results for the first six months of 1990 have been negatively affected by lower net interest margins and an increase in the provision for possible credit losses.

''The decrease in net interest margins has been the result of a generally declining rate environment together with competitive market conditions which have caused earning asset yields to decline proportionately more than rates paid on deposits.''

Sasser further stated that ''foreclosed properties and loans classified as nonaccrual totalled $25.9 million at June 30, 1990, an increase of $5.25 million over the corresponding total at June 30, 1989 and $2.3 million over March 31, 1990. The levels of nonperforming assets have been an added factor that has negatively affected interest income and net interest margins.

''Management's assessment of potential losses related to these assets was the primary reason for the significant increase in the provision for possible credit losses recorded in the 1990 periods compared to 1989.

''The reserve for possible credit losses amounted to $24.5 million, or 1.47 percent, of loans and lease receivables outstanding at June 30, 1990 compared to 1.34 percent a year earlier, and was, in management's opinion, adequate to absorb anticipated losses.

''While the economy in the Carolinas generally continues to perform better than many other parts of the country, there are areas of concern which cause us to remain cautious in our outlook for the remainder of this year.''

Sasser added that ''UCB continued to realize solid growth in noninterest revenue while controlling the growth in noninterest expenses during the period, areas that have been and will continue to be emphasized.''

UCB is the parent company of United Carolina Bank, which operates 110 branch offices in 63 North Carolina communities and United Carolina Bank of South Carolina, which operates 12 branch offices in 6 South Carolina communities. UCB's common stock is traded in the NASDAQ National Market System under the trading symbol UCAR.

The board of directors Friday declared a quarterly cash dividend of 15 cents per share payable August 8, 1990 to stockholders of record July 31, 1990.

#90201b0857 07/20/1990 ~Business Wire

MILFORD, MA (JULY 20) BUSINESS WIRE - Ceramics Process Systems Corp. (CPS) (OTC: CPSX) Friday announced a net loss of $457,000, or eight cents per share, on revenues of $1.5 million for the quarter ended June 30, 1990.

This compares with a net loss of $76,000, or two cents per share, on revenues of $1.8 million in 1989. Commercial product sales increased 124 percent in the second quarter and 91 percent through the first six months over similar periods during 1989.

The 1989 results also benefitted from the final recognition of revenues under a multiyear development program with Aluminum Corporation of America (ALCOA) and the impact of expenses from discontinued operations charged to a 1988 restructure reserve.

Peter R. Loconto, president and chief executive officer, noted that the company continues to make substantial progress in its transition to becoming a leading supplier of advanced ceramic packaging and interconnect products. "With the recent completion of our rights offering, we will continue to invest in our high-growth manufacturing business."

CPS develops, manufactures and markets advanced ceramic products for the microelectronics, automotive, and defense industries and specializes in ceramic packaging and interconnecting of high-density, high-performance

electronic devices using proprietary Micro-engineering processes.

#90201b0858 07/20/1990 ~Business Wire

TORONTO (JULY 20) BUSINESS WIRE - Officeland Inc. (NASDAQ:OFLDF) Wednesday announced its financial results for the second quarter ended May 31, 1990. In U.S. Dollars

For the second quarter ended May 31, 1990, Officeland reported net income of $29,793 or $.003 per share (fully diluted) on revenue of $488,343.

This compares to a net income of $510,655 or $.04 per share on revenues of $861,923 for the second quarter ended May 31, 1989. The second quarter ended May 31, 1989 included an extraordinary gain of $374,727.

For the first six months of fiscal 1990, net income was $64,802 or $.005 per share (fully diluted) on revenue of $971,036. This compares to a net income of $352,030 or $.04 (fully diluted) including the extraordinary credit of $374,727 on revenue of $1,481,414.

Canadian dollars have been translated into U.S. dollars at the exchange rate of $1.1723 (CDN) to $1 (U.S.).

During the second quarter the company continued to concentrate its efforts and resources on its collection business and equipment brokerage businesses.

As a result of the company's current focus on its collection service operations, significant reductions in general and administrative expenses were realized.

In the second quarter of 1990, these expenses decreased $109,650 over the same period in 1989.

Per share figures give effect to a 3-for-1 stock split effective Feb. 9, 1990.

Marvyn Budd, president, commented, ''We are pleased with the continued profitability and feel that we are on track for continued success in our collection services and equipment brokerage businesses.

''During the third quarter of fiscal 1990, the company intends to raise approximately $800,000 U.S. additional funding to expand its business by acquiring and/or developing related businesses.

''In the event the company decides to proceed with such plan additional capital will be needed.

''The company is no longer pursuing the establishment or acquisition of a fast food restaurant business in Florida.''

Officeland Inc. currently provides collection and office equipment brokering services to financial institutions throughout Canada and the United States.

#90201b0859 07/20/1990 ~Business Wire

NORWOOD, MA (JULY 20) BUSINESS WIRE - Phoenix Technologies Ltd. (NASDAQ:PTEC) Friday announced a net loss of $4,652,000, or 46 cents per share, for its third quarter fiscal 1990, ending June 30, 1990, compared with a net loss of $4,587,000 or 46 cents per share, for its second fiscal quarter ended March 31, 1990.

Revenues for the its third quarter increased to $9,328,000, compared with $8,715,000 in its second quarter.

Commenting on the company's performance, Ron Fisher, president and chief executive officer said, ''While we are not satisfied to report a losing quarter, the operating loss of $1,994,000 before bad debt provisions and restructuring charges is generally in line with our expectations, having decreased in each of the last two quarters. We have added $2,426,000 to bad debt reserves this quarter - we believe this should allow us to place historical problems behind us and to focus on rebuilding the company's operations.''

''We continue to be confident that the current product plans and the policies that we have implemented over the past several quarters are consistent with building the company's value for the long term. Our revenues are up over the previous quarter and have shown steady improvement throughout the fiscal year. Ending backlog again increased, reflecting continued momentum. Furthermore, during the past quarter we maintained our solid cash position, while carrying no bank debt.''

''Our investments in next-generation system platforms are being met with strong acceptance in the marketplace. New product introductions were made by all of the company's divisions, and new BIOS and PhoenixPage contracts were announced with a number of key industry vendors.''

Fisher also pointed out by the end of the quarter a new senior management team was in place and up to operating speed. New management appointees consist of Rob Langer, chief financial officer; Jack Kay, vice president worldwide sales; and Brian Eisenberg, general manager of European operations.

#90201b0869 07/20/1990 ~Business Wire

FRAMINGHAM, MA (JULY 20) BUSINESS WIRE - Framingham Savings Bank (NASDAQ:FSBX) announced Friday a net loss for the quarter ended June 30, 1990 of $3,708,000 or 91 cents per share.

For the same period in 1989, the bank reported net loss of $1,584,000 or 39 cents per share. Operating results for the first six months of 1990 reflected a loss of $4,850,000 compared to a loss of $489,000 for the same period in 1989. Total assets at June 30, 1990 were $532.5 million compared to $586.6 million a year ago at June 30, 1989, representing a decrease of $54.1 million.

The loss for the quarter is attributable to the charge of $3,808,000 to the provision for loan losses, the $498,000 foreclosure and loan workout expense and the lost income on nonperforming assets. Based on the increase in nonperforming assets and the continued weakness in the Massachusetts economy and the real estate market, the bank decided to writedown certain loans and further strengthen its general reserves.

The bank is continually reviewing the loan portfolio and the adequacy of the general reserves and feels that the increase of general reserves is warranted. During the quarter the bank charged $1.6 million of specific loan writedowns to the general reserve and had recoveries, net of other charge-offs, of $471,000. General reserves were $20.9 million at June 30, 1990 compared to $18.3 million at March 31, 1990.

At June 30, 1990 nonperforming assets totaled $62.4 million compared with $53.8 million at March 31, 1990. A major factor in the increase in nonperforming assets in the quarter was the announced difficulties of local area real estate developers/investors whose loans became nonperforming.

The bank's capital remains within regulatory capital requirements at June 30, 1990 with a ratio of stockholders' equity to total assets of 5.12 percent and ratio of regulatory capital, which includes general reserves, to average total assets of 8.58 percent.

Net interest income for the second quarter 1990 was $2.4 million compared to $3.8 million for the same period 1989. The decrease in net interest income primarily reflects the loss of interest income on increased levels of nonperforming assets.

Total non-interest income was $577,000 for the second quarter 1990 compared to $614,000 for the same period 1989 reflecting lower gains on the sale of securities in 1990.

Operating expenses for the second quarter were $3.7 million compared to $3.5 million for the second quarter 1989. The expense of loan workout and other real estate owned disposition activities amounted to $498,000 in the second quarter 1990. No similar expenses were recognized during the same quarter 1989. The bank continues working to consolidate operations and reduce expenses wherever possible.

LITTLE ROCK, AR (JULY 20) BUSINESS WIRE - Motel Sleepers Inc., a Little Rock-based company which provides quality, low cost overnight lodging for railroad employees, has signed a two year contract to provide these services to Chicago and North Western Transportation Co., one of the nation's largest railroads.

Leon B. Catlett, president of Motel Sleepers, and Don Kane, manager of special contract development for the railroad, negotiated the agreement.

Under the terms of the agreement, effective July 10, Motel Sleepers will provide lodging for more than 3,800 employees in 57 cities and a six state area.

The company will contract for lodging in local motels, supervise the service, and bill the railroad monthly. Motel Sleepers will also provide a detailed analysis with the bill indicating the systemwide cost per stay, length of layovers, and other data to help the railroad make cost-saving operating decisions.

Motel Sleepers, which has been serving the railroad industry since 1968, offers a variety of lodging options.

Over the years, the company has focused on building custom facilities for the railroads exclusive use. With this option, Motel Sleepers buys the land, hires a local contractor to put up the building and provides its own employees to manage the facility in return for a guarantee of use by the railroad.

Where it is not feasible or desirable to build a facility, Motel Sleepers provides a turnkey service covering lodging for crews in local motels, the option chosen by Chicago and North Western Transportation Co.

Catlett said: ''When we sign on with clients, we become their lodging department which allows them to concentrate on running their railroad. Lodging is our business.''

GROUP LED BY APA EXCELSIOR II LED BY NEW YORK, NY OWNS 3,314,500 SHARES (32.70%) OF VISION SCIENCES INC (TICKER: LENZ) OF MONROVIA, CA.

ANNOUNCEMENT:

On Feb. 15, 1990 APA II acquired from Vision Sciences Inc. $216,000 principal amount of Vision Sciences Inc. 15 percent senior secured convertible debentures due Feb. 15, 2000. Also on that date, APA (Jersey) acquired from Vision Sciences Inc. $54,000 principal amount of 2000 debentures. On March 16, 1990 APA II acquired from Vision Sciences Inc. an additional $24,000 principal amount of 2000 debentures and also acquired 240,000 shares of series C preferred stock and APA (Jersey) acquired an additional $6,000 principal amount of 2000 debentures and 60,000 series C shares.

On March 30, 1990 Vision Sciences Inc. granted APA II a warrant to purchase 160,000 common shares at $.75 per share and APA (Jersey) a warrant to purchase 40,000 common shares at $.75 per share. On May 15, 1990 APA II acquired $8,700 principal amount of 2000 debentures and APA (Jersey) acquired $2,175 principal amount of 2000 debentures. In March, April and May 1990 APA II and APA (Jersey) loaned Visions Sciences Inc. $1.05 million and on June 19, 1990 they loaned Visions Sciences Inc. an additional $950,000, all in exchange for $2 million worth of 12 percent secured demand promissory notes of Vision Sciences Inc.. APA Excelsior II, Matuschka and Vision Sciences Inc. have negotiated a proposed transaction pursuant to which $1 million of new notes held by APA Excelsior II will be exchanged for $1 million of senior secured convertible debentures due 1995.

The 1995 debenture will ultimately be convertible into 10 million common shares. At the closing of the transaction, APA II and APA (Jersey) would receive warrants to purchase 5 million common shares exercisable at $.10 per share. At that time, the March 30, 1990 warrants would be cancelled. It is contemplated that pursuant to the transaction, APA II and APA (Jersey) will be given the right to designate one director and Matuschka

will also be able to designate one director of Vision Sciences Inc.

WASHINGTON (JULY 20) COMTEX - The 8-K report filed at the SEC shows on July 5, 1990, Curtis Industries Inc. announced that it had entered into an agreement for the sale of all of its business and assets to a subsidiary of Borghese Triguboff Investment Corp.

The executive office of Curtis Industries is located at 34999 Curtis Boulevard, Eastlake, Ohio 44095, and its telephone number is (216) 951-2400.

-30- 568

#90201c0453 07/20/1990 ~Comtex
WASHINGTON (JULY 20) COMTEX - The 8-K report filed at the SEC shows effective July 11, 1990, Anco Production Co. dismissed its independent public auditors of the firm of Mitchell, Londer & Co. The decision to dismiss was recommended by the board of directors and was approved by shareholders on July 11, 1990.

For the year ended Dec. 31, 1990, those former auditors' report contained opinions of substantial doubt as to the ability of the company to continue as a going concern.

Though the going concern opinion of the auditors was disputed by the company's board, the board agreed to that opinion following discussion of the matter with those auditors. A fee dispute also exists with those former auditors, and the company therefore has not as yet filed a 10-K report for its most recent fiscal year.

No limitation has been placed on a successor auditor regarding discussion of any matters with those former auditors or regarding any questions a successor might pose to those former auditors.

-30- 1155
#90201c0454 07/20/1990 ~Comtex
WASHINGTON (JULY 20) COMTEX - The 8-K report filed at the SEC shows on July 3, 1990, Kleer Vu Industries Inc.'s wholly-owned subsidiary, Main Park Properties Inc., filed for protection under Chapter 11 of the U.S. Bankruptcy Code in the U.S. Bankruptcy Court for the Southern District of Texas.

Main Park Properties is made up of a number of properties in the vicinity of Houston, Texas, as well as other properties for which Main Park holds first-lien mortgages. The filing was made primarily to allow Main Park to make refinancing arrangements on those properties. The Chapter 11 filing, Kleer-Vu believes, will allow the refinancing to proceed without jeopardizing the equity of Main Park.

WASHINGTON (JULY 20) COMTEX - The 8-K report filed at the SEC shows effective July 6, 1990, Independent Telecommunications Network Inc. dismissed the independent auditors of the firm of KPMG Peat Marwick and engaged in their stead the auditors of the firm of Ernst & Young to audit the company's financial statements for the fiscal year ended June 30, 1990.

For the previous two fiscal years, audits performed by those former auditors contained no adverse opinion or disclaimer of opinion nor were

they modified as to uncertainty, audit scope, or accounting principles.

For the previous two fiscal years, there were no disagreements between those former auditors and the company.

-30- 840

#90201c0456 07/20/1990 ~Comtex

WASHINGTON (JULY 20) COMTEX - The 8-K report filed at the SEC shows effective June 29, 1990, Sandfill Inc. acquired all oustanding shares of Campbell Wells Corp. from the shareholders of that company: Ernest L. Parker and Logan L. Nichols. Sandfill gave as a consideration for the acquisition 807,099 shares of Sandfill common stock.

Campbell, based in Jennings, Louisiana, is engaged in the business of the treatment and disposal of nonhazardous oilfield waste. It possesses treatment and disposal facilities in Jennings and Elm Grove, Louisiana, and transfer stations in Morgan City and Pass Fourchon, Louisiana. Campbell is to continue those operations following the acquisition.

GROUP LED BY APA EXCELSIOR II OF GROUP LED BY NEW YORK, NY OWNS 3,314,500 SHARES (32.70%) OF VISION SCIENCES INC (TICKER: LENZ) OF MONROVIA, CA.

ANNOUNCEMENT:

On Feb. 15, 1990 APA II acquired from Vision Sciences Inc. $216,000 principal amount of Vision Sciences Inc. 15 percent senior secured convertible debentures due Feb. 15, 2000. Also on that date, APA (Jersey) acquired from Vision Sciences Inc. $54,000 principal amount of 2000 debentures. On March 16, 1990 APA II acquired from Vision Sciences Inc. an additional $24,000 principal amount of 2000 debentures and also acquired 240,000 shares of series C preferred stock and APA (Jersey) acquired an additional $6,000 principal amount of 2000 debentures and 60,000 series C shares.

On March 30, 1990 Vision Sciences Inc. granted APA II a warrant to purchase 160,000 common shares at $.75 per share and APA (Jersey) a warrant to purchase 40,000 common shares at $.75 per share. On May 15, 1990 APA II acquired $8,700 principal amount of 2000 debentures and APA (Jersey) acquired $2,175 principal amount of 2000 debentures. In March, April and May 1990 APA II and APA (Jersey) loaned Vision Sciences Inc. $1.05 million and on June 19, 1990 they loaned Vision Sciences Inc. an additional $950,000, all in exchange for $2 million worth of 12 percent secured demand promissory notes of Vision Sciences Inc.. The APA Excelsior II , Matuschka and Vision Sciences inc. have negotiated a proposed transaction pursuant to which $1 million of new notes held by APA Excelsior II will be exchanged for $1 million of senior secured convertible debentures due 1995. The 1995 debenture will ultimately be convertible into 10 million common shares. At the closing of the transaction, APA II and APA (Jersey) would receive warrants to purchase 5 million common shares exercisable at $.10 per share. At that time, the March 30, 1990 warrants would be cancelled. It is contemplated that pursuant to the transaction, APA II and APA (Jersey) will be given the right to designate one director and Matuschka will also be able to designate one director of Vision Sciences II.

#90201d0090 07/20/1990 ~French/German News Agency

SAO PAULO (JULY 20) - The Brazilian government acknowledged for the first time Friday that the country was in an economic recession, with the gross domestic product (GDP) forecast to drop three percent this year.

The slowdown has already produced record unemployment levels in several industrial centers and escalating labor disputes.

In the greater Sao Paulo area, the nation's biggest industrial center, unemployment has soared from 4.3 percent of the work force last month to 12.1 percent, with a million workers currently jobless, according to a trade union study group.

The government, in a report released Friday, acknowledged that the GDP would drop some 12.6 billion dollars this year from last year's level of 420 billion dollars.

Brazil suffered recessions in 1981, when the GDP declined 4.4 percent, and again two years later when it dropped 3.5 percent.

Private economists believe per capita income in Brazil will show a decline of around five percent in 1990, aggravating the social malaise throughout the nation.

In a repeat of labor disputes of the past two years, some 8,000 steelworkers have occupied the premises of the state-owned National Steel Company (CSN) for the past 10 days, threatening to transform the city of Volta Redonda into the epicenter of Brazilian labor disputes.

JERUSALEM (JULY 20) - Israel is concerned that the European Economic Community (EEC) wil adopt sanctions against it as part of pressure to revive stalled Middle East peace efforts, analysts said here Friday.

Prime Minister Yitzhak Shamir told a meeting of Israeli rabbis Thursday that his country was facing many problems with the EEC ahead of a meeting in Israel Monday with European Community representatives.

He also denounced "attempts by the EEC to link political issues to economic affairs," -- in a veiled allusion to possible EEC sanctions against Israel to force it into making territorial concessions in the occupied West Bank

and Gaza Strip as part of efforts to relaunch the stalled peace process.

Israeli-EEC ties, which Mr. Shamir said were in full swing, will figure on the agenda of the talks Monday between Foreign Minster David Levy and his counterparts from Italy, Ireland and Luxembourg, a diplomat here said.

The EEC, which is moving towards the creation of a common market in 1992, has traditionally been Israel's main trading partner.

But over the past year Israel has recorded a trade deficit with the EEC worth 3.2 billion dollars.

"We are the only country in the world to have a positive trade balance with Japan and the United States and a deficit of this importance with the community," said the foreign ministry's director general for economic affairs Yaacov Cohen.

Israeli officials believe that this development is the direct result of the 1975 free trade agreement signed with the EEC that led to the elimination of duty on European imports in early 1989.

Israeli products -- except for certain agricultural produce -- imported by Europe have enjoyed similar benefits since 1987.

"We opened up our doors to the benefit of the EEC, so there is no need for the 12 to kill the goose laying the golden egg by slapping sanctions on us " Mr. Cohen said.

He recalled that the EEC froze in January scientific cooperation with Israel "in violation of past accords."

#90201d0370 07/20/1990 ~French/German News Agency

MOSCOW (JULY 20) - Soviet Prime Minister Nikolai Ryzhkov Friday announced a tightening of border controls with the West to fight increasing smuggling of goods out of the country.

Speaking on television, Mr. Ryzhkov said he had ordered a temporary return to the situation prior to September 1988 when border controls were eased for the first time in decades.

This would only be a "temporary" measure to last until border crossing posts were better equipped technically, he said.

Smuggling was increasing because of the large price differentials between goods sold in the Soviet Union and goods sold abroad, and this was worsening already existing shortages at home, Mr. Ryzhkov said.

Citing the border crossing with Poland at Mostiska, Mr. Ryzhkov said that during a recent 24-hour period, customs officers had seized 52 television sets, 144 washing machines, 12 refrigerators, 150 sewing machines, 3,000 litres of vodka, more than 600 kilos of tomato sauce and 200 kilos of chocolate.

All these goods are in short supply at home and the government banned the export of most of them last year.

Mr. Ryzhkov also promised to raise wages for some seven million poorly-paid workers as of next Jauary.

These would include some 2.7 million people working in education, 2.6 million in the health services and one million in the cultural sector, he said.

#90201d1010 07/20/1990 ~French/German News Agency

NICOSIA (JULY 20) - Libyan leader Moamer Kadhafi has accused the United States of "deliberately" introducing flesh-eating flies into Libya as part of a campaign against his country, the official Libyan news agency JANA said Friday.

"The Americans continue to wage war against us by sending us these flies that they conceal in the products that we import," the news agency quoted Colonel Kadhafi as saying in a speech in Tripoli.

Col. Kadhafi said the flies, a blowfly known as Cohliomyia hominivorax, were "introduced deliberately" in Libya to "kill all the animals that live there."

The Libyan leader, in an apparent attempt to justify his accusations, charged that the insects were not to be found neighbouring Arab countries where the United States maintained diplomatic missions or that hosted U.S. firms.

He charged that it was not the first time Washington used such methods.

"When Anwar Sadat was the president of Egypt, they (Americans) introduced 12 million rodents into Egypt to destroy it," he said, according to JANA.

"They effectively destroyed Egypt's harvest forcing it to depend on the United States for wheat and stopping it until now from becoming self-sufficient," he added.

He also renewed his accusation that the AIDS virus was "produced in the

factories of the American intelligence services."

Libya does not have diplomatic links with Washington. In February, the U.S. Congress lifted a travel ban to Tripoli for experts capable of eradicating the blowfly menace.

The blowfly was first detected in Libya in March 1989 and has since spread over a 20,000 square kilometers (8,000 square mile) area around Tripoli.

The insect has a life span of only 10 to 15 days but a female can lay up to 5,000 eggs and fly up to 300 kilometers (180 miles) in its search for a host, usually the open wounds of mammals.

Libyan authorities have warned that the fly could spread to other countries and cause large-scale human and animal damage in Africa and southern Europe unless a destruction process was found.

#90201d1360 07/20/1990 ~French/German News Agency

PARIS (JULY 20) - Western donor countries and Japan on Friday boosted their pledges of financial aid to Zambia to 500 million dollars for the current year, less than a month after food riots took a toll officially set at 26 dead and 124 seriously injured in the southern African state.

The new aid figure was announced after a day-long meeting of the World Bank-sponsored Consultative Group for Zambia, attended by officials of 12 aid donors, comprising the Group of Seven countries, the Scandinavian countries and the Netherlands, as well as several international agencies.

The sum was 50 million dollars higher than initial donor country indications given at a similar meeting here last April.

The pledges of increased aid in support of Zambia's economic reform programme came just a week after official creditors in the Paris Club granted Zambia substantial debt relief, including cancellation of some debt.

Zambia's finance minister Gibson Chigaga told reporters the Paris Club accord, on the easy "Toronto terms" reserved for debt-distressed low-income countries, covered "roughly" 1.6 billion dollars worth of bilateral debt.

That would be more than one-third of the country's debt to official creditors, which comes to just over 4.2 billion dollars.

A statement issued by the Consultative Group referred indirectly to the June 25 riots, which were triggered by a doubling of the price of maize (corn) meal, Zambia's staple food.

-30- 1662
#90201d1420 07/20/1990 ~French/German News Agency
PARIS (JULY 20) - A day-old strike of ground crew, pilots and mechanics with France's domestic airline Air Inter was set to continue Saturday, causing flight cancellations and some disruption at the country's airports union officials said here.

The strike is expected to directly affect some 83,000 passengers with domestic bookings on Air Inter flights.

The company also serves some European cities outside France, but it said that none of its services to Lisbon, Rome, Venice, London and Ibiza, and only a handful of those to the French Mediterranean island of Corsica, would be affected.

Volunteers were helping non-striking airline staff in French airports on Friday as strikers warned that they might also refuse to work again on July 27 and 28.

The three unions staging the strike are demanding increased wages and better career opportunities.

The Air Inter dispute has prolonged several weeks of disruption for thousands of French and European holiday-makers travelling daily through French air space.

Separately, flight safety electricians have said that they will repeat a 1989 action by striking from July 25 to August 7, a key period for holiday travel in France.

Over the past three weeks, various strikes involving staff categories ranging from air traffic controllers to baggage handlers have disrupted traffic here.

#90201d1490 07/20/1990 ~French/German News Agency
MEXICO CITY (JULY 20) - Japan's Economic Planning Agency Director General Hideyuki Aizawa met with Mexican ministers here Friday to search for ways to step up bilateral trade and investment in Mexico, officials said.

His discussions with his Mexican counterpart Ernesto Zedillo, Foreign Minister Fernando Solana and Commerce Minister Jaime Sierra included Mexico's efforts to privatize state-owned industries, they said.

Mexico has been trying to sell off the country's airlines, telephone

company, steel mills, mines and some of the secondary petrochemical industries -- an area of particular interest to the Japanese, sources said.

Economic relations between Japan and Mexico have picked up since Mexico's President Carlos Salinas visited Tokyo in June.

Mr. Salinas said then that Japan would invest 3.2 billion dollars in Mexico by 1991 and would extend credits to finance an antipollution project for Mexico City, one of the world's most polluted cities.

Japan buys from Mexico some 184,400 barrels of oil a month, making it Mexico's second largest petroleum buyer after the United States, according to government figures.

Mr. Aizawa arrived Thursday and was expected to leave Sunday.

#90201d1530 07/20/1990 ~French/German News Agency

OSLO (JULY 20) - Egil Aarvik, head of the Norwegian Nobel Prize Committee died on Thursday in Oslo, it was reported here. He was 77.

Mr. Aarvik, who followed a political career before being made chairman of the committee that every year awards the prestigious Nobel Peace Prize, had a reputation for fierce independence in the choice of candidates.

Under his chairmanship the Committee awarded the prize to Polish Solidarity leader Lech Walesa in 1983, and the South African anti-apartheid cleric Archbishop Desmond Tutu the following year.

He also staunchly defended the choice of the Tibetan religious leader the Dalai Lama for last year's prize, in the face of Chinese criticism.

The Committee's five members are appointed by the Norwegian parliament, but are completly independent of government supervision.

In a reaction to Mr. Aarvik's death, former prizewinner Elie Wiesel said: "many people owe him their freedom, others their lives and all of us owe him an immense measure of gratitude."

#90201d1580 07/20/1990 ~French/German News Agency

JOHANNESBURG (JULY 21) - Seventeen people Friday braved the cold and began a sit-in outside the U.S. consulate offices here Friday in a bid to get the Bush administration to intervene between the police and township residents.

The seventeen, including an 11-month old baby girl, are from the Tumahole township near Parys, about 100 kilometres (62 miles) south of here, where they say there has been "gross intimidation" of township residents by police.

They said their sit-in would continue "until the media had taken note of their plight". They want the Bush administration to pressure the Pretoria government to end the problems.

Tom Letsoenyo, co-ordinator of the action, said township residents had experienced "severe harassment and intimidation" from police, which included the detention for two days of 20-year-old Lydia Songela and her 11-month-old baby.

He listed eight people who had been either allegedly arrested or assaulted by the police in the past two weeks.

A petition handed to U.S. officials said the residents demanded an immediate end to harassment, detentions and assaults as well as the right to freedom of association and movement. U.S. officials confirmed receiving the petition.

Police action in Tumahole violated the words and spirit of agreements between the government and the anti-apartheid African National Congress in their first ever round of talks on May 2-4, he said.

"We may well have to revert to people's defence if the government does not take immediate steps to quell police action and lawlessness. We may also be forced to embark on a consumer boycott if the State President does not address our concerns," Mr. Letsoenyo said.

A short statement by the U.S. consulate said the consulate agreed to accept the petition and pass it to the appropriate South African authorities.

WASHINGTON (JULY 23) - Secretary of State James Baker will go to Mongolia in August -- the first visit by a U.S. secretary of state to the Asian country -- to show support for democratic reforms, an official said Friday.

Mr. Baker's visit will take place August 2-5 and will sign in Oulan Bator an agreement for sending U.S. Peace Corps volunteers to Mongolia, and a consular agreement, department spokeswoman Margaret Tutwiler said.

The secretary of state will also review progress made on reaching a trade agreement with Mongolia, she said.

Mr. Baker wants to "demonstrate support the peaceful democratic reform process leading to the first multiparty elections since 1921" in Mongolia, she said. Elections were slated for July 29.

Before heading for Oulan Bator, Mr. Baker will meet Soviet Foreign Minister Eduard Shevardnadze in Irkoutsk, Siberia.

LONDON (JULY 20) - A newly developed British vaccination against the AIDS virus will be tested on humans for the first time starting in September, the Medical Research Council announced Thursday.

Twenty volunteers all in good health will be injected with an agent, known as p24-VLP, which has already produced active antibodies against the AIDS virus in tests on animals.

Researchers hope it will have the same effect on the human immune system and prevent contamination if exposed to the AIDS virus. They are also hoping it will prevent the spread of AIDS in patients already infected with the virus.

The test group will be chosen from among volunteers aged between 20 and 50 and who have tested sero-negative, meaning they are not infected with the AIDS virus, according to Doctor Alan Kingsman, one of the researchers who helped develop the new agent.

He stressed that the advantage of the p24-VLP over other AIDS vaccines currently under study was that it contains no genetic material from the HIV (human immuno-deficiency) virus, which can lead to AIDS.

The announcement said researchers had used new techniques to produce particles resembling the HIV virus through genetic manipulation of yeast cells.

When injected, the agent is expected to stimulate activity in cells that produce an anti-body to destroy the HIV virus.

The experimental phase of testing will last one year and be carried out at Hammersmith Hospital in west London under the direction of Doctor Jonathan Weber.

Should testing prove successful, another three to five years will be needed to develop a reliable vaccination, the report said.

TOKYO (JULY 20) - Japan's money supply grew at an average annual rate of 12.6 percent in June, down from a 13.2 percent increase in May and April, the Bank of Japan said Friday.

Central bank officials said the June figure marked the seventh consecutive month of double-digit growth in the broad measure of money supply, measuring M-2 plus certificates of deposit.

The broadly defined figure totaled 480.7 trillion yen (3.247 trillion dollars) in June, up from a revised 479.0 trillion yen (3.236 trillion dollars) in May, they said.

#90201d6400 07/20/1990 ~French/German News Agency
TOKYO (JULY 20) - Toyota Motor Corp. Friday said it would invest 270 billion yen (1.8 billion dollars) to build a new vehicle assembly plant and two auto parts manufacturing facilities in Japan.

Toyota officials said the company's first domestic plants to be located outside Toyota City, central Japan, will be built at industrial parks in Kyushu, Tohoku and Hokkaido, all for completion in 1993.

Construction of the new vehicle assembly plant in Kyushu is to begin immediately while the auto parts manufacturing plants in Hokkaido and Tohoku will begin building in 1992.

The officials said the new vehicle assembly plant in Fukuoka Prefecture in Kyushu will employ about 2,000 workers to produce 200,000 small-sized luxury cars annually.

The Hokkaido plant, located in the Pacific coast Tomakomai industrial complex, is to produce ordinary machined items like drive train and chassis parts, castings and forgings with a workforce of 200.

The Tohoku factory, located near Sendai in Miyagi Prefecture, is to begin manufacturing electronics automobile parts, also with 200 workers.

The officials said the three plants are designed to cope with the increasing diversification and sophistication of consumer tastes, as well as changes in the labor situation, including a growing trend toward shorter working hours, an ageing work foce, and a general shortage of labor in Japan.

#90201d6410 07/20/1990 ~French/German News Agency

TOKYO (JULY 20) - Marubeni Corp., a major Japanese trading firm, said Friday it would join a European group to invest in oil refineries in the Soviet Union.

The European group, including Burmah Oil Plc., has signed an agreement with the Soviet government and has begun a feasibility study on the 300 million to 400 million dollar projects, Marubeni officials said.

They said Marubeni would invest about 10 per cent of the project cost, although shares of the group members are yet to be decided.

The group plans to begin construction of the plants in early 1991.

Under the agreement, Burmah Oil will provide expertise and licenses for the plants, while Marubeni will handle the construction and financing jointly with Chiyoda Corp., a leading Japanese enginering firm.

Thyssen Neste, a joint venture of Thyssen AG of West Germany and Neste Oy of Finland, will handle marketing of gasoline, kerosene and other oils produced at the plants on the European market.

This would recover money invested, overcoming a traditional problem encountered in doing busines with the Soviets, they said.

The Soviets will sell all lubricating oil to be produced at the plants in their domestic market under Burmah's brand name Castrol, the officials said.

#90201d6470 07/20/1990 ~French/German News Agency

NEW DELHI (JULY 20) - A day-long strike Friday to protest against the killings of Tamils in Sri Lanka by government troops brought life to a total standstill in Tamil Nadu.

The strike organised by the state's ruling Dravida Munnetra Kazagham (DMK) party shut markets, banks, schools, hotels and cinemas. Train and bus services were also halted, the Press Trust of India (PTI) said.

Stranded passengers at bus stations were ferried by police vans to their homes, while long-distance express trains from other states were stopped at railway stations just before the strike began at 6 a.m. (0030 GMT), PTI said.

Essential services at hospitals and water and electricity supplies were exempted from the strike.

State-run Indian Airlines slashed its daily flights to the southern coastal state on Friday as workers boycotted airports in the capital Madras and other towns, authorities here said.

The DMK ordered the strike to express "the anguish of the state government and the people of Tamil Nadu over the current killings in Sri Lanka," PTI said.

The local administration announced a government holiday and closed its offices, PTI said, adding only essential federal offices functioned with skeleton staffs.

The strike, the second in Tamil Nadu in seven years on the Sri Lankan Tamil issue, also demanded an end to Colombo's war with the Liberation Tigers of Tamil Eelam (LTTE) separatist group, dominant in Sri Lanka's northeastern provinces.

Hundreds have died, including Tamil civilians, since the LTTE resumed its bloody separatist campaign on June 11 after 14 months of peace talks with the Sinhalese government of President Ranasinghe Premadasa.

An estimated 16,000 Sri Lankan Tamils have fled to Tamil Nadu, which is separated from the island by the narrow Palk Strait.

Jakarta, July 20 dpa - Indonesian security forces killed four members of the so-called Security Disturbance Movement in the northern tip of the Sumatran province of Aceh in an operation recently, reports reaching here Friday said.

The regional military spokesman, Lieutenant-Colonel Achmad Soedjai, was reported as saying that one extremist was injured in the fire exchange between government troops and the extremists last Wednesday in Aluebate Menasah village.

This had brought to nine the number of extremists killed in the province in the last two months, Soedjai added.

The government has classified the extremists as mere criminals who were influenced by the feeling of envy and wanted to obtain material wealth through terrorism.

Several have been identified as former police and army members fired due to lack of discipline.

The group have so far killed seven villages who refused to cooperate with them.

President Suharto ordered last week that measures against them be intensified to ensure better security for the local people.

The army has estimated that between 30 and 50 people make up the group.

TUNIS (JULY 20) - The Tunisian Interior Ministry issued a statement Friday denying a claim by the country's human rights organization that the practice of torturing prisoners had been revived by police in Tunisia.

The ministry statement condemned what it called "excesses even when this involves actions which at the most can be classified as brutality".

Policemen found guilty of such acts would face "administrative sanctions as well as punishment according to the law".

The Tunisian League of Human Rights (LTDH) on Monday criticised what it called "the revival of the practice of torture" and urged the authorities to take action against those responsible.

TOKYO (JULY 20) - The World Bank announced Friday a seven-year bond issue for 30 billion yen (200 million dollars) with interest payable in Australian dollars.

The so-called dual currency offering is lead managed by Nomura Securities Co. Ltd. and carries a coupon of seven per cent based on a notional amount of 258 million Australian dollars, the bank's Tokyo office said.

The issue price has been discounted to 95 per cent of face value, offering an effective yield to investors of 7.37 per cent. The bank said the proceeds of the issue had been swapped into another currency.

The offering is a "daimyo" issue allowing the bonds to be sold in both Japan and the Euromarket -- unlike "samurai" issues by foreign borrowers which are restricted to the Japanese market.

The World Bank introduced daimyo bond in 1987 in response to the then-moribund market for samurai bonds.

#90201d6960 07/20/1990 ~French/German News Agency
CAIRO (JULY 20) - Egypt Friday called on all Arab states to settle their differences in a calm manner and avoid harming Arab unity.

A presidential statement broadcast by Cairo radio said the Arab world was facing ''severe challenges and fateful tests''.

The statement comes at a time of acute differences between Kuwait and Iraq. Kuwait Thursday accused Iraq of repeatedly encoroaching on its territory and rejected Baghdad's similar claims.

''The Arab Republic of Egypt has on several occasions emphasised that one of the most important elements of strength with which the Arab nation must equip itself at this peaceful stage is the preservation of the unity of the Arab fold and the enhancement of solidarity among all Arab countries'' the statement said.

''Proceeding from ... the recognition that the differences between certain Arab parties should not develop into major contradictions that could hamper the unified march or spoil relations within the same family, the Arab Republic of Egypt urges all Arab brothers to give maximum priority to enhancing arab solidarity, and to avoid any complications that may harm the cohesion and firmness of the Arab front or its capabilities to confront the challenges facing it and threatening its interests''.

The statement went on: ''Egypt asserts that the only method of settling any differences which is in harmony with the Arab nation's higher interests is that of an objective brotherly dialogue, free from an inflammatory and tense atmosphere, that would enable all parties to keep their clear vision of arab goals and aims''.

TEL AVIV (JULY 20) - Israel's Defense Minister Moshe Arens left on a surprise one-day visit to Washington early Friday for his first official meeting with United States Defense Secretary Richard Cheney.

Diplomatic sources stated that the meeting had been hastily convened to discuss the deteriorating Middle East situation and the future development of the Arrow anti-missile missile, a joint U.S.-Israeli project.

The sources stated that Iraq's recent threats against Kuwait ''lit red lights'' in Washington, and that the Arens-Cheney talks might be used to formulate a joint strategy for dealing with Iraq.

The Hadashot daily reported Friday that Israeli Premier Itzhak Shamir had asked Egyptian President Hosny Mubarak to reassure Iraq that Israel had no hostile intentions, but that it was ready to meet any Iraqi aggression. Shamir also messaged Jordan's King Hussein that Israel had no interest in destabilising his regime.

As for Syria, Shamir stated Thursday that President Hafez Assad's recent statements on his willingness to enter negotiations subject to a range of pre-conditions ''was not a breakthrough, though there was a difference in tone and the use of the words.''

Arens will also discuss with Cheney future U.S. aid levels to Israel despite the U.S. postponement of official aid talks due for next week which was interpreted by the Israeli press as a deliberate snub.

The Arrow missile venture will also be a topic for conversation, with Arens attempting to secure an American commitment for the 200 million dollar funding the project needs for its second phase. The 160 million dollar first phase of the project is nearing completion and a test launch is expected by the end of July.

#90201d7160 07/20/1990 ~French/German News Agency

MELBOURNE, AUSTRALIA (JULY 20) - Two of Australia's largest banks announced Friday that they would cut their prime corporate interest rates.

The ANZ Banking Group and National Australia Bank will cut their rates by 0.5 and 0.25 per cent to 18 per cent effective Monday.

Citibank also cut its prime rate 0.25 per cent to 18 per cent.

Brian Weeks, the ANZ chief general manager, said the cut reflected recent interest falls on the short term markets.

A spokesman for National Australia Bank said that recent financial trouble in the southeastern state of Victoria, which has seen a run on non-bank financial institutions, had caused a flight of deposits to major banks.

These extra funds had allowed the bank to lower its interest charges, he said.

Australia's two other major banks, Westpac Banking Corp. and the Commonwealth Bank, said their rates were under review.

MANILA (JULY 20) - The Philippines garment and textile exports rose 22 percent in the first half of 1990 from the same period last year, the industry-monitoring agency said here Friday.

The Garments and Textile Exporting Board (GTEB) said exports hit 939 million dollars from January to June compared with 768 million dollars in the same period last year.

The United States was the country's main buyer, taking 597 million dollars worth, a 25.2 percent increase, followed by the European Economic Community with 173 million dollars worth, up 22.85 percent, the GTEB said.

The GTEB said they could not explain why exports increased at a time when the country was suffering from power shortages and political instability caused by a failed coup last December.

The Philippines exported 1.56 billion dollars worth of garments and textiles in 1989 and is aiming to export 1.8 billion dollars worth this year.

#90201d7370 07/20/1990 ~French/German News Agency

FRANKFURT, WEST GERMANY (JULY 20) - The West German M-3 money supply rose by 4.3 percent at an annual rate in June, provisional seasonally adjusted figures from the central bank, the Bundesbank, showed on Friday.

In May the money supply grew by 3.7 percent compared with the official annual target range of four percent to six percent.

The low figure was attributed to high interest rates which encouraged investment in long-term instruments such as bonds.

Long-term investment does not register in the M-3 figure which includes cash in circulation, sight deposits, savings accounts and investments with maturity of less than four years.

In June the figure returned to the target range mainly because of a big increase in credit by banks to the private sector, which showed an increase of 22.8 billion Deutsche marks (14.25 billion dollars) during the month having risen by 5.9 billion marks (3.7 billion dollars) in May and by 19.8 billion (12.3 billion dollars) in June 1989.

The bank drew attention to the big increase in bank lending since the beginning of the year. During the first six months it rose by 8.5 percent at an annual rate on a seasonally adjusted basis.

But experts said that they did not expect the money suply to grow rapidly in July because of the effects of monetary union with East Germany.

The Bundesbank is not due to include East German data in the West German supply figures, mainly for technical reasons, experts said.

Monetary union has caused an increase of 25 billion marks (15.6 billion dollars) of cash in circulation. This was the sum which the Bundesbank introduced into East Germany on July 1 when monetary union took effect.

PAPEETE, FRENCH POLYNESIA (JULY 20) - The 20-year-old daughter of American actor Marlon Brando has been charged in connection with the murder of her boyfriend, shot by her half-brother in the actor's luxury Los Angeles home, reliable sources in Tahiti said Thursday.

Cheyenne Brando, who is said to be in hospital with depression, was released and ordered not to leave the island. Her baby, born on June 27 was being cared for in a maternity hospital.

Ms. Brando's mother Tarita Teriipia, who met Brando when they acted together in the film "Mutiny on the Bounty", was also questioned earlier in the week, sources said. She too is being treated for nervous depression a reliable Tahiti source said.

Dag Drollet, 26, was allegedly shot by Cheyenne Brando's half-brother Christian Brando, 32, in the actor's Bel Air home on May 16.

The defendant, in custody in the United States, said he shot Mr. Drollet in the head in anger after Mr. Drollet had beaten his half sister.

A Los Angeles court was expected consider a bail application Tuesday.

Cheyenne Brando's arrest came after the father of the victim, Jacques-Denis Drollet, a retired senior civil servant, filed a writ in a Papeete court.

She and Mr. Drollet, a civil servant, are said to have met last year through a common passion for surfing.

#90201d7700 07/20/1990 ~French/German News Agency

PARIS (JULY 20) - A French airline dispute on Friday prolonged several weeks of disruption for thousands of French and European holiday-makers travelling daily through French air space.

The situation for the coming weekend worsened as some pilots employed by the French domestic Air Inter airline joined a strike by Air Inter ground staff.

The airline cancelled one in four of its 378 scheduled flights on Friday and of its 291 flights on Saturday on which a total of 83,000 passengers were booked.

Separately flight safety electricians have said that they will repeat a campaign of 1989 by striking from July 25 to August 7. This is a key holiday period in France as it includes the end-of-month coming and going.

For three weeks, various strikes involving traffic controllers to baggage handlers have disrupted traffic although the situation in French airports has not become extremely serious.

Many passengers have learnt the lessons of strikes in previous years and prefer to cancel a threatened reservation rather than risk being held up by a strike.

Among the various causes of strikes given by unions are an increase in air traffic, the purchase of the Air Inter and UTA airlines by Air France, and the de-regulation of air traffic within the European Economic Community (EEC).

Airport authorities say that the problem is mainly a "crisis of growth in air traffic" which has grown at a rate of 10 per cent per year in recent years.

There is also a shortage of air traffic controllers, and newly-trained controllers will not be ready for service for another two years, officials say.

Meanwhile in Italy traffic controllers said that they would strike throughout the country on Saturday from 6:00 a.m. to 5:00 p.m. to protest against a delay in the application of new employment contracts.

#90201d7740 07/20/1990 ~French/German News Agency

ROTTERDAM (JULY 20) - Oil prices have risen on the Rotterdam free market in recent days, but this has little to do with increased tension between Iraq and Kuwait, the association of independent oil traders said here

Friday.

Association spokesman Wim Schouten said prices of oil and oil products had been rising ahead of the Organisation of Petroleum Exporting Countries meeting due to open in Geneva on Wednesday, but had stabilized at the higher level some days ago.

Brent North Sea crude, which stood at around 15 dollars a barrel on July 12 has been up to 18 dollars for the past three days, he said.

Super grade petrol was at 235 dollars a ton on July 12, but has been stable at 260 dollars a ton since Tuesday, Mr. Schouten added.

Buyers fear that the OPEC meeting will fail to reach agreement on export quotas.

In Switzerland, three oil companies -- BP, Avia and Migrol -- said Friday they were increasing petrol prices at the pump by two centimes (1.4 U.S. cents) from Monday.

The official Iraqi news agency INA revealed Wednesday that Baghdad had sent a memorandum to the Arab League accusing Kuwait of making inroads into its territory and of stealing 2.4 billion dollars worth of its oil.

The memorandum, signed by Iraqi Foreign Minister Tareq Aziz, also charged that Kuwait and the United Arab Emirates were "deliberately flooding" the international oil market in defiance of quotas set by OPEC, of which all three states are members.

#90201d7920 07/20/1990 ~French/German News Agency

KHARTOUM (JULY 20) - Sudan Friday played down the presence of Sudanese opposition groups in Egypt.

''Their presence in Cairo will not affect our relations with Egypt,'' Colonel Mohamed el Amin Khalifa told the official al Guwat al Musalaha daily before leaving for Cairo to address a conference organised by Sudanese citizens living in Egypt.

The remark followed a recent incident where pro-government supporters and the opposition clashed during a debate organized by the latter in Cairo.

At least two government supporters were reported to have been injured when chairs were hurled at them by the opposition.

''What happened in that debate could happen anywhere,'' Colonel Khalifa was quoted by the daily as saying.

Several prominent members of the Sudanese political parties banned by the military government of General Omer Beshir after the overthrow of the democratically elected civilian government of Prime Minister Sadiq al Mahdi in June 1989 have fled to Egypt.

Khalifa said his several days' visit to Cairo was part of the government's efforts to open channels of dialogue and consultations with the Sudanese nationals living abroad.

#90201d7940 07/20/1990 ~French/German News Agency

JOHANNESBURG (JULY 20) - Government officials in Pretoria are delighted that the Moscow State Circus is due to visit the country in December but South African acrobats are not applauding the announcement, newspapers reported here Friday.

A spokesman for around 300 of the country's tightrope walkers, clowns and jugglers said the presence of the prominent Soviet colleagues during the season could mean a box office fiasco for domestic circuses.

The announcement from Moscow was an important success for Pretoria in its struggle to not only dismantle apartheid but also break through international sanctions.

South Africa does not maintain diplomatic relations with the Soviet Union but the visit is seen as a political signal. The Bolshoi Ballet is also said to be pondering a visit to the Cape.

#90201d8000 07/20/1990 ~French/German News Agency

MANILA (JULY 20) - Authorities in the Philippines Friday gave up hopes of finding further survivors in the quake-striken cities of Baguio and Cabanatuan, where hunderds of people were believed still trapped under the rubble of collapsed buildings.

Authorities counted more than 700 dead in the northern island of Luzon, which was hit Monday by a strong earthquake measuring 7.7 on the open-ended Richter scale. About 250,000 people lost their homes.

The latest casualty figure included the discovery on Friday of at least 83 more people killed in a mountain province isolated by landslides.

The United States embassy in Manila said a military reconnaissance plane carrying relief goods crashed Friday in the Baguio region, leaving one U.S. pilot dead and another injured.

American troops based in the country and Filipino soldiers have been helping rescue workers since Monday.

In a related political development, President Corazon Aquino cautioned Congress against passing a measure asking foreign creditors to declare a two-year moratorium on repayments of the country's 30-billion-dollar foreign debt in order to channel funds for reconstruction and aid to quake-stricken areas.

Meanwhile in Cabanatuan, rescue teams used cranes to remove the rubble of a school which buried about 100 students and teachers.

#90201d8020 07/20/1990 ~French/German News Agency

LONDON (JULY 20) - A powerful bomb followed by a fire ripped through the London Stock Exchange Friday, in an attack on the heart of Britain's financial establishment that bore all the hallmarks of an Irish Republican Army (IRA) operation.

The bomb exploded at 8:49 a.m. (0749 GMT) about 40 minutes after an anonymous caller claiming to be from the IRA telephoned a warning to an international news agency here and police evacuated the building and sealed off the area around it 20 minutes before the blast occurred.

The head of Scotland Yard's anti-terrorist branch, Commander George Churchill-Coleman, said he believed the bomb was planted in toilets in the visitors' gallery of the Stock Exchange.

"We cannot discount this was the work of the IRA," Cmdr. Churchill-Coleman said, adding that the explosion was "very large."

Police said the explosion had caused "quite extensive" damage to the historic stock exchange building, located in the heart of the City, but said there had been no casualties.

The force of the blast scattered glass and debris on the trading floor inside the building and in the streets outside it and damaged about 10 per cent of the exchange's ground floor, fire department officials said.

"If there had been no warning, there would have been injuries and probably fatalities among the people on the trading floor," police Commander Hugh Moore said, adding that the blast was caused by "a fairly large explosive device".

Government sources said Prime Minister Margaret Thatcher had been "appalled" by the attack, but expressed relief there had been no

casualties.

Trading in shares, which has been conducted entirely by computer since 1986, was unaffected by the blast and the main electronic cable linking the exchange with share dealers throughout the City was housed in another building and was not damaged.

But options trading, which takes place on the stock exchange trading floor, was halted as a result of the blast and police said the exchange's 2,600 employees were still being kept outside the building at 1145 a.m. (1045 GMT).

The anonymous caller, who spoke with an Irish accent, told the news agency: "This is the IRA. The bomb is due to go off in half an hour at the Stock Exchange."

The caller then gave a code word and added: "Clear the building."

In past attacks preceded by a warning, the IRA has used a code word recognized by police to substantiate the warning.

Scotland Yard said it had dispatched anti-terrorist squad members to the stock exchange and that investigations of the attack were under way.

"I just heard this deep booming noise and saw smoke billowing out of the trading floor roof," said David Gibbs, 20, a dealer who works at the exchange.

"I felt shocked to say the least," Mr. Gibbs added.

Another dealer, asked if there had been panic while employees evacuated the premises, said: "Good Lord no, we're British."

Friday's bomb attack was the latest in an intensified IRA campaign during the past six months aimed at the heart of the British defense and political elite.

On June 25, an IRA bomb exploded in the entrance to the Carlton Club, an exclusive London club whose patrons include the creme of Britain's Conservative establishment including Mrs. Thatcher and other senior government members, in an attack that injured more than 20 people.

Other IRA attacks on prestigious "soft" targets include a December 1983 bomb blast at the exclusive London department store Harrods which killed six people and the killing of 11 civilians in Enniskillen, Ireland during a Remembrance Day gathering in November 1987.

#90201d8080 07/20/1990 ~French/German News Agency
NAIROBI (JULY 20) - Kenyan President Daniel arap Moi on Friday rejected mounting calls for multi-party democracy as an attempt to "overturn the government," digging in his heels against European and U.S. pressure.

Mr. Moi reiterated his stance a day after U.S. lawmakers proposed legislation to halt U.S. aid to Kenya until Mr. Moi's government frees political prisoners and introduces democratic reforms.

Kenya, sub-Saharan Africa's biggest recipient of U.S aid, was slated to get 46 million dollars in assistance this year. But 13 million dollars have been frozen by Senator Paul Simon, chairman of the subcommittee on Africa.

On Wednesday, three European Economic Community ambassadors here called for "a broader application of the democratic process" in Kenya and expressed "concern" about the detention of opposition figures."

The EEC, Kenya's biggest aid donor, has pledged at least 140 million European Currency Units (168 million dollars) in grants over the next five years.

Police repression of an anti-government demonstration in protest at the detentions without trial of six advocates of multi-party democracy sparked five days of rioting that cost 22 lives this month.

Mr. Moi, speaking at a police college in central Kenya, said: "Those for multi-parties were not even fighting for multi-party politics, all they wanted to do is overturn the government.

"Multi-party democracy should only be introduced when all Kenyans are united," said the president, who has argued that having several parties would encourage tribalism.

He also lashed out at local newspapers for "lying about Kenya to foreigners."

BANGKOK (JULY 20) - A radio broadcast by non-communist Cambodian factions fighting the Hanoi-backed government in Phnom Penh on Friday warned the United States against trusting Vietnam.

The warning came in a Voice of the Khmer broadcast monitored here, in a commentary on U.S. Secretary of State James Baker's announcement earlier this week that the United States had withdrawn support for the U.N. seat held by Cambodia's tripartite resistance and wanted to open talks with

Hanoi.

The decision "means the United States probably wants to sign a treaty with Vietnam on peace in Cambodia," the radio said, asking "why does the United States think Vietnam has stopped lying?"

"Vietnam lied many times to the United States during the talks to end the Vietnam war," the radio said, adding that Hanoi "has not yet abandoned the plan to become the emperor in Indochina."

#90201d8320 07/20/1990 ~French/German News Agency

NEW DELHI (JULY 20) - Indian Prime Minister Vishwanath Pratap Singh said Friday his young coalition government will emerge stronger from a political storm that nearly caused its downfall, and expressed confidence it would survive a full five years.

"We have learnt our lessons," Mr. V.P. Singh told a press conference here, his first after the crisis that led him to tender his own resignation last week and then retract it under pressure. "Certainly we will come out stronger."

"We now have the political sagacity to deal with any crisis that may arise " said Mr. V.P. Singh, whose government's stability fell under a cloud of doubt during a bitter factional feud in his centrist Janata Dal (People's Party).

The 59-year-old premier, whose National Front coalition took office after winning general elections last November, said dissent was natural in a democracy and should not be seen as a sign of the government's weakness.

"Democracy is a self-healing process," he said, repeating a favourite theme. "We have a perception that differences are a sign of weakness. This is not correct."

He said he was confident his minority government would "certainly" live out its five-year mandate, despite factionalism, and dismissed doubts about its stability.

"We have been tested on our stability almost continuously in the past seven months," he said, adding that "our stability is not based on numbers" but on popular support and "issue-based" backing from disparate political groups.

Appearing relaxed but combative, the prime minister laughed often and sometimes chided the press as he fielded a volley of questions on the factional feud with Deputy Prime Minister Devi Lal that caused last week's

furore.

Experienced journalists said the 150-minute news conference at a south Delhi concert hall, Mr. V.P. Singh's second since assuming office, was the longest ever by an Indian premier.

Mr. V.P. Singh used the occasion to contain damage and list his administration's achievements. He defended its record of "political management," requiring the support of mutually hostile left- and right-wing allies for survival.

He admitted that factionalism existed within the Janata Dal, the major component of the National Front, but denied the differences were serious.

"You should understand that we (the Janata Dal) are in the process of gelling," he said.

"We formed our party just a little more than a year ago. The process of conflict resolution and personality equations should be allowed to crystallise."

Last week's crisis erupted over the political rehabilitation of Mr. Devi Lal's controversial son, Om Prakash Chauthala, as chief minister of northern Haryana state.

Mr. Chauthala was forced to resign the post in May after allegations that he had engineered violence during a crucial Haryana by-election.

The 75-year-old deputy premier saw his son reinstalled on July 12, and newspaper reports said Mr. V.P. Singh had bought peace in the factional war by approving it, seriously damaging the government's credibility.

The prime minister resigned Saturday after three of his closest cabinet colleagues quit in protest, but was persuaded to stay in office under pressure from National Front constituents and allies.

The crisis blew over after Mr. Chauthala was again forced to step down Monday, but many observers believe Mr. V.P. Singh's credibility has been irreparably damaged.

At Friday's news conference, Mr. V.P. Singh denied that he knew in advance of Mr. Chauthala's reinstatement with a firm "no."

He said he had tendered his resignation because he felt he had lost the trust of the people, the National Front and its allies over the developments in tiny Haryana.

He also rejected suggestions that bickering within the government and the

Janata Dal had compromised national stability.

"You are in the trap of equating government with the country," he said. "The government is not the country. To save the country a government can be jettisoned. The country is strong enough to face any threat."

JERUSALEM (JULY 20) - The Israeli army has disciplined several soldiers from the elite Golani brigade for having forced Palestinians from the occupied West Bank town of Nablus to sing Israeli military tunes, military sources said Friday.

Witnesses have charged that a group of soldiers overnight Tuesday forced some 50 Palestinians, including women and children, out of their homes overnight Tuesday and made them clean up streets, sing the Golani anthem and insult Yasser Arafat, the chairman of the Palestine Liberation Organisation.

Military sources said soldiers involved in the incident were reprimanded and punished.

The nature of their punishment and the number of troops involved was not disclosed.

KAMPALA (JULY 20) - The Ugandan government is to dismiss 50,000 of its unskilled employees from August 1 in a bid to reduce the state's wage bill, the weekly Topic newspaper reported here Friday.

The paper said the dismissals were mentioned in a letter signed by the ministry of public service and cabinet affairs permanent secretary Martin Onech to all government ministries, except the ministry of health, directing a 50 per cent reduction in the number of their unskilled employees.

According to a 1987 public service census, the government had 240,000 employees, of whom 100,000 were classified as unskilled.

The move followed recommendations by the World Bank's Consultative Donor Conference on Uganda last December and its granting of 15 million U.S. dollars to alleviate the social cost of a programme of structural reforms.

The programme calls for a slashing of public employment.

#90201d8520 07/20/1990 ~French/German News Agency
ISTANBUL (JULY 20) - Turkey will keep to its arms modernisation programme President Turgut Ozal announced here Friday, launching two new landing craft and laying the keels for an assortment of warships.

He said Turkey, strategically placed between Europe and the Middle East, could not afford to relax efforts to have a sophisticated defence industry ''because no one knows where the breathtaking developments (in central and eastern Europe) will lead us''.

Ozal noted that Turkey was already building modern frigates, submarines, torpedo boats for its navy (under West German licence), was carrying out a vast tank-modernisation programme for its land forces and building F-16 jets for its air force.

Turkish defence projects would total ten billion dollars over the next ten years.

Turkey has issued contracts for co-producing infantry vehicles and multi-launch rocket systems to U.S. firms and is evaluating tenders for helicopter production.

FREETOWN (JULY 20) - Shell and Mobil, the principal suppliers of crude and refined oil to Sierra Leone, have cancelled 44.35 million dollars of debt owed them by the government, state radio reported here Friday.

The radio said the debt relief gesture announced by President Joseph Momoh was achieved through Ministry of State Enterprises propoals "based on Sierra Leone's implementation of an economic reform package."

It quoted State Enterprise Minister Ben Kanu as saying that as of May this year, the government owed Shell 34.5 million dollars and Mobil 16.3 million dollars in both interest and principal.

Shell agreed to write of the entire 19.1 million dollars interest due plus 70 percent of the 15.5 million dollars principal, or 10.78 million dollars.

The balance is to be paid in 16 monthly instalments from a debt amortization fund created in May 1990 for a year's supply of crude under which 1.50 cents is levied on each barrel procured from Shell.

Mr. Kanu said Mobil had agreed to cancel all 10.2 million dollars in interest due and 4.27 million of the 6.1 millionn dollars in principal. The

balance should be paid in 15 monthly instalments from the debt amortization fund.

Observers believe that the debt relief will free up fuel supplies in Sierra Leone, where gasoline (petrol) shortages are frequent.

#90201d8540 07/20/1990 ~French/German News Agency

GIYANI, SOUTH AFRICA (JULY 20) - Recent unrest in South Africa seemed part of a strategy to disrupt the negotiation process aimed at a peaceful political settlement, cabinet minister Stoffel van der Merwe said here Friday.

Mr. Van Der Merwe, who is responsible for black education, told the Legislative Assembly of the self-governing Gazankulu homeland such a strategy was in nobody's interest because all parties would suffer the negative consequences of continued violence.

Statistics show that violence in the country has increased to the highest level since 1986 and in June alone 67 people were killed in unrest-related incidents while there were 34 terrorism attacks in the country.

A stable democracy could only grow in an atmosphere of peace and harmony, Mr. Van Der Merwe said, adding that reasons put forward by the anti-apartheid African National Congress (ANC) for violence and the armed struggle had lost their justification.

ANC deputy president Nelson Mandela indicated on his return to South Africa Wednesday after a exhausting six-week tour of three continents that he wanted another meeting with the government as soon as possible, but said he was not ready to ask the ANC to declare a cease-fire.

Dr. Van Der Merwe said a wrong impression had been created that the entire education system in the country had come to a standstill through extensive disruptions earlier this year in black schools.

Most students and teachers were "still going about the business of preparing for the future".

#90201d8550 07/20/1990 ~French/German News Agency

TOKYO (JULY 20) - French Prime Minister Michel Rocard was received by Emperor Akihito on Friday and said he had spoken frankly with Japanese officials to clear the air of misunderstandings on economic relations.

Mr. Rocard told a news conference he had been "direct, even brutal" in

talks with Japanese officials. He met Prime Minister Toshiki Kaifu on Thursday and Minister for International Trade and Industry Kabun Muto on Friday.

"We must no longer act like children in a choir," he said, adding that he hoped misunderstandings had been cleared up and that the two sides would refrain from making provocative comments.

"Excessive words have been pronounced" on both sides, he said, making reference to a recent call by France's European affairs minister, Edith Cresson, for a "combat strategy" against the entry of Japanese manufacturing plants into France.

Japanese officials criticized Mrs. Cresson's statement, which came with a call on Mr. Rocard not to "kowtow" to the Japanese and after she said Japan was out to "conquer the world."

When asked if he would prevent his ministers from making inflammatory remarks in the future, Mr. Rocard said: "The human species being what it is, that is an unattainable task."

But he added: "It is me who hires the government of France."

Emperor Akihito and Empress Michiko received Mr. Rocard and his wife, Michele, in a 15-minute audience Friday at the Imperial Palace.

"It is a great honor for my country," the prime minister told the emperor after shaking his hand.

The French leader said he sought to solve problems according to the "Rocard method" which emphasized discussion and negotiation and "as little as possible the kingly authority of the state."

"It is the only way to attain good results with Japan. We do not hope to conquer Japan but to become its equal partner," he said.

"The talks were very positive and very substantial. We have an understanding and a great common wish to do things better than we did yesterday."

Earlier Friday, French Trade and Industry Minister Roger Fauroux said the two countries had agreed to raise their economic and trade relations "to a level that reflects their respective positions in the world."

He said he and Mr. Rocard told the Japanese that "there is no question of turning France into a fortress" in international trade and that France welcomed Japanese investment.

The French officials demanded the improvement of the Japanese distribution system, the end of duties on nickel imported from the French Pacific territory of New Caledonia and the development of cooperation in high technology areas, Japanese and French officials said.

Regarding quotas limiting the Japanese share of the French car market to three per cent, Mr. Rocard referred to talks between Japan and the European Economic Community to be held later this year, Mr. Fauroux said.

Mr. Rocard also met with Foreign Minister Taro Nakayama, who expressed his wish to consult with France, the former colonial power in Indochina, on economic cooperation in the region, Japanese officials said.

Mr. Nakayama also reaffirmed Japan's wish for close ties with the Conference on Security and Cooperation in Europe (CSCE), which will hold a summit meeting at the end of the year.

A French request for membership in the Asia-Pacific Economic Conference (APEC) along with New Caledonia and Polynesia was not reported by Japanese officials, suggesting that Japan does not favor a French presence in APEC.

Friday was the second day of Mr. Rocard's three-day visit to Japan.

SYDNEY (JULY 20) - Australians prominent in politics and industry Friday gave a largely unanimous, if cautious, welcome to Prime Minister Bob Hawke's call for a more modern constitution.

Most comments were, like Mr. Hawke's speech Thursday to the National Press Club, more specific about the economic benefits of reform than about the future shape of Australian politics.

Echoing the prime minister's goal of "national efficiency and international competitiveness," the Confederation of Australian Industry said it was essential to include business leaders in consultations he proposed on political reform.

Chief executive Ian Spicer said the CAI had often underlined "problems of overlap and deficiencies in the delivery of services."

Mr. Spicer also criticised duplication of regulations and standards by the federal administration and six state governments which Mr. Hawke said had "balkanised" the economy.

In a series of follow-up radio interviews Friday, Mr. Hawke warned that large numbers of civil service jobs would be cut.

His proposals nevertheless won the initial support of organised labour.

Michael Easson, secretary of the New South Wales Labor Council, said: "It is absurd that there is one national and six state industrial tribunals going their merry way of duplicating and complicating the task of sensible industrial relations."

Increasingly, he said, "employers prefer to move to the Federal Commission where one tribunal can deal with industrial awards and agreements on a national basis."

Mr. Hawke denied Friday that his proposals were an attempt to centralise power.

"This is bloody nonsense," he told Adelaide radio. "I'm not about trying to get more power. If there are areas where it looks as though it's better to give the power or the delivery of a service back to the states, well let's do it that way."

On Thursday, Mr. Hawke envisaged a national dialogue over the coming decade to produce a "more contemporary constitution" in time for the centenary of Australia's federation in 2001.

The premier of Queensland, Wayne Goss, agreed that the 1901 constitution reflected "the needs of a sparsely populated country which was evolving out of six colonies." Those needs, he said, "are not those of a fast growing country of 17 million people looking toward the 21st century."

But Mr. Hawke told Adelaide radio that he did not expect a major rewrite of the constitution.

"I think there are some things that can be done fairly quickly," he said, citing a referendum to extend the life of national parliaments from three to four years.

Even one of his harshest critics, former cabinet minister Clyde Cameron, described Mr. Hawke's proposals as "brilliant" and "the best possible method of getting the states in line."

A senior member of the governing Labor Party, Mr. Cameron was speaking at a meeting where he also warned Mr. Hawke that the party's left wing was strong enough to expel him from the party if he persisted with plans to privatise major state-owned firms.

#90201d8660 07/20/1990 ~French/German News Agency

BRUSSELS (JULY 20) - The EEC is to sponsor a major rock concert dubbed "The Wall," to be held in Berlin on Saturday to raise money for a fund for disaster victims worldwide, the European Commission said here Friday.

The concert, being organised by Roger Waters, former leader of the rock group Pink Floyd and sharing the name "The Wall" with a Pink Floyd album, is to take place in Potsdam square, which until November was divided in two by the Berlin wall.

At least 200,000 people are expected to attend, and the concert could be seen by up to a billion television viewers. Stars taking part include Marianne Faithfull and Cyndi Lauper.

It is hoped to raise 700 million European Currency Units (ECU's) (882 milion dollars) to set up a disaster victims' fund, the European Commission said in a statement.

The EEC is to give 300,000 ECU's (370,000 dollars) towards the cost of the concert.

"It seemed logical for the EEC to cooperate in this charity event which is taking place near the Brandenburg gate, a symbol of division in the past but which has today become a symbol of peace and unity in the world," the Commission said.

#90201d8670 07/20/1990 ~French/German News Agency

BONN (JULY 20) - The Bonn Foreign Ministry rejected here Friday claims by Cuba that West German diplomats helped organise last week's flight by refugees to foreign embassies.

Cuban dissidents who gave themselves up told government officials that the occupation of foreign embassies in the capital had been an action steered from abroad, the Prensa Latina news agency reported.

The statements came after the Cuban Foreign Ministry had described earlier the wave of embassy refugees as a ''planned provocation'' directed against the communist Caribbean country.

A total of 14 Cubans fled to the Czechoslovak embassy in Havana last week but all have since left. Four Cubans are currently in the Spanish Embassy and four others in the Italian mission.

The Cuban dissidents said United States and West German diplomats had spent months devising plans for oppositionists in the country to occupy foreign embassies in the capital.

First secretary of the West German Embassy in Havana, Peter Schaller, even offered dissidents money, opponents of Fidel Castro's government told their interrogators, Prensa Latina reported.

The State Department in Washington has not yet issued a statement in response to the Cuban allegations.

Bonn Foreign Ministry spokesman Hanns Schumacher said there was no foundation whatsoever in claims that a German diplomat encouraged Cuban oppositionists to occupy foreign embassies.

It was absurd to suggest that financial payments were offered to Cuban dissidents and only served to underline the implausibility of the accusations, added Schumacher.

BELGRADE (JULY 20) - Yugoslavian airline JAT plans to invest 1.5 billion dollars in a development program over the next 10 years, the Tanjug news agency said Friday.

The development program to the end of the century includes the purchase of 20 new aircraft, and negotiations are already under way with several aeronautics concerns including Boeing, Douglas, Airbus and Fokker.

The money will be raised through loans, JAT director general Miljenko Zrelec was quoted as saying.

The company has recently bought three new ATR-72 planes built in the French and Italian workshops of Aero-Spatial and Aero-Italia.

#90201d8770 07/20/1990 ~French/German News Agency

PRAGUE (JULY 20) - Czechoslovakian President Vaclav Havel Friday said he would meet his Austrian counterpart Kurt Waldheim out of ''respect for the Austrian people'' despite Waldheim's alleged Nazi past.

The Czechoslovakian news agency Ctk quoted Havel as saying that he would hold the opening speech at the Salzburg Festival on July 28 and meet Waldheim there regardless of criticism voiced by the human rights group Charta 77.

The Prague-based group recently asked Havel to scrap his Salzburg visit and cited as a reason Waldheim's alleged crimes on the side of Nazi German troops during World War Ii.

Havel had helped set up Charta 77 and was one of its leading spokesmen during the days of communist rule in Czechoslovakia.

He accepted the invitation to Salzburg more than a year ago, before he became president.

Waldheim told the Austrian daily Voralberger Nachrichten that Havel accepted in January an official invitation to visit Vienna. The exact date will be set by diplomats.

KATHMANDU (JULY 20) - Businessmen and civil servants have roundly criticized new taxes in the three-month-old Nepalese government's proposed budget for the new fiscal year.

The budget includes new tariffs, a compulsory savings plan, and a wealth tax aimed at narrowing the gap between the rich and poor in the fiscal year that began Monday, a finance ministry official said.

The 19.8 billion rupee (678 million dollar) budget, which was presented to the cabinet Friday, requires government employees including civilians, soldiers, police, and judicial workers to save five percent of their wages in a "Citizen Investment Fund."

The Nepal Civil Servants' Organization on Thursday condemned the measure as "unjustifiable and in contravention of the Civil Servants Act 1956," adding that already government employees "cannot survive on their salaries." It demanded that the coalition government offer benefits including housing, education, transport, and meal allowances.

The new budget gives pay raises ranging from 39.1 percent for lower-grade government employees to 9.2 percent for officials as one measure to close disparities in wealth.

Another measure, the wealth tax, would be imposed on couples earning more than 30,000 rupees (1,027 dollars) a year to root out black market money and boost investment, officials said.

The Nepal Foreign Trade Association (NFTA) condemned the tax and the overall budget, which it said would "add the burden of high prices on the common people" despite cuts in diesel and kerosene prices by 9.6 and 15 percent.

The association's views were echoed by former finance minister Prakash Chandra Lohani, who said the budget was "purposeless and is against the well-being of the industrialists."

The Federation of Nepal Chambers of Industry and Commerce, led by President Mahesh Lal Pradhan called on Prime Minister Krishna Prasad Bhattarai Friday and urged him to withdraw the planned wealth tax in the interest of promoting econmic growth. Pradhan also told the prime minister of businessmen's concern over restive workers who were pressing demands for better conditions.

BEIJING (JULY 20) - Shanghaiese have taken to the streets in search of relief as a record-breaking heatwave scorches China's largest city.

The heatwave began July 9 and forecasters see no end in sight to temperatures running as high as 35 degrees Centigrade (95 degrees Fahrenheit), according to a Shanghai daily received here, the New People's

Evening News.

"Glance down a street, and it looks like a beach," added the semi-official China News Service. "Thousands and thousands of people, sitting or lounging on the pavement."

Few suffer more than workers who stoke the fires at Shanghai's six crematoriums, where the New People's Evening News claimed the mercury has reached a dizzying 80 degrees Centigrade (175 degrees Fahrenheit).

"Incoming corpses now smell very bad," it added.

Extreme weather is being felt in diverse parts of China this summer, including droughts in the northwest and floods in the north, center and southwest.

More than 2,000 people have died in natural disasters in China this year. This week Beijing told the United Nations Disaster Relief Organization in Geneva that it was ready to accept international aid for flood victims.

OTTAWA (JULY 20) - The inflation rate in Canada recorded its fourth straight monthly drop in June, the government agency Statistics Canada said Friday.

The agency said inflation was running at an annual rate of 4.3 percent in June, compared to a revised figure of 4.4 percent in May.

At a monthly rate, corrected for seasonal variations, prices rose by 0.4 percent in June compared to 0.5 percent in May.

-30- 582
#90201d8980 07/20/1990 ~French/German News Agency
ISLAMABAD (JULY 20) - Pakistan has launched the country's biggest ever defence plant, defence ministry sources said Friday.

The project, costing about 1.15 billion dollars and located at Taxila, 25 kilometers (15 miles) west of here, will comprise a tank factory, a gun plant and a facility to build armoured personnel carriers, they said.

Army chief General Mirza Aslam Beg, who laid the foundation stones of the three separate units Thursday, said the factories would form "the backbone of our field army's heavy defence equipment."

Pakistan and China last month signed a long-term industrial cooperation

agreement which, besides the manufacture of T-69 and T-85-II tanks in Pakistan, also envisages transfer of technology in joint designing and development of Pakistan's main battle tank for the 21st century.

Gen. Beg, praising both Chinese and U.S. cooperation, stressed that the technology so transferred and absorbed by the Heavy Rebuild Factories at Taxila has "considerably increased our self-reliance in defence production."

"Allocations of huge funds for the gigantic projects bears testimony to the trust the nation and government have reposed in their armed forces," he said.

A U.N. Development Program report published here Friday listed Pakistan, Angola, Oman and Yemen as nations whose military expenditures are nearly three times that of health and education combined.

Pakistan considers India its greatest threat and its defence preparations are directed at its much larger neighbor, with whom it has fought three wars in 42 years.

Amid persistent mistrust between the two countries, diplomats have still not ruled out the possibility of another armed conflict on the unresolved issue of Kashmir state, which is claimed by both.

Approved in 1988, the project is already capable of manufacturing tank guns as well as medium and heavy field artillery gun barrels.

The first tank is to be rolled out in June next year. Named after a renowed Moslem saint and commander, Khalid, it will be code-named P-90 and will be "the pride of Pakistan's tank fleet," Gen. Beg said.

The factory will produce 150 to 200 tanks per year, he said.

Defence Secretary Talat Masood said the plant would have "strong export potential." Pakistan exports light weapons to some Islamic countries.

#90201d9050 07/20/1990 ~French/German News Agency

LONDON (JULY 20) - British conglomerate Lonrho said Friday it had bought a 10 percent stake in West German retail group Asko for 281 million Deutsche marks (170 million dollars).

Lonrho and Asko have already teamed up with West German store chain Metro International in a bid to take control of food retailing giant Co op.

The British company did not make any mention of this tripartite alliance in announcing the Asko purchase, but it was clearly a friendly move as Massa, which sold the stake to Lonrho, is a 5050 joint venture between Asko and Metro.

In addition, Lonrho chairman "Tiny" Rowland is to become a member of the Asko board in Auguest.

Asko is one of West Germany's largest wholesale and retail operations, with annual turnover of 16 billion Deutsche marks (10 billion dollars) and 400 major sales outlets.

Lonrho said Asko was keen to develop its activities in central Europe, and in Britain as its West German rival Aldi has done, analysts said here.

For Lonrho, the move into Asko is the latest in a series of West German investments. The group's annual sales in West Germany total some 10 billion Deutsche marks (6.25 billion dollars) thanks to joint ventures with Kuehne und Nagel and Krupp.

In addition, Lonrho has substantial property investment in Frankfurt and Bade-Wurttemberg.

Lonrho, Asko and Metro in May put forward a plan to take over troubled West German retail operation Co op, which is now in the hands of two banks.

Lonrho also said Friday it had sold its plumbing and electrical appliances operation PJH Group to an unidentified buyer for 67.5 million pounds (122.7 million dollars).

Lonrho shares were up three pence at 276 in afternoon trading in London.

#90201d9070 07/20/1990 ~French/German News Agency
BUDAPEST (JULY 20) - Hungary's trade surplus with Western countries almost tripled in the first six months of this year from the same period last year to 550 million dollars, it was announced here Friday.

Hungarian dollar-denominated exports rose 17 percent in the six months to June, to almost three billion dollars, while imports were up only 1.3 percent at 2.4 billion, the MTI news agency said, quoting figures from the ministry for foreign economic relations.

The figures were good news for Budapest, which is seeking to increase trade with the West to help pay back its almost 21 billion dollar foreign debt, the highest per capita in Eastern Europe.

Exports to the EEC, which account for 45 percent of Hungary's trade with non-members of the eastern bloc trading alliance COMECON, were up 20 percent at 1.4 billion dollars.

Some 650 million of this came in trade with West Germany, Hungary's leading EEC partner.

EEC imports accounted for 48 per cent of Hungary's hard currency imports, half of it from West Germany.

WASHINGTON (JULY 20) - The White House has moved to block the export to Iraq of three industrial furnaces that could apparently be used to make nuclear missiles, sources said Friday.

The Customs Service had imposed a temporary ban on their export that was due to expire Friday.

The White House informed Consarc Corporation, the New Jersey manufacturer of the sophisticated devices, that it would now need a federal export license to ship them.

The Pentagon and a group of Republican senators urged President George Bush this week to block the shipment, saying Baghdad planned to use the furnaces to cast titanium and other metals for use in ballistic missiles and other nuclear weapons.

Iraq has denied it is building a nuclear arsenal, but earlier in the year, a shipment of nuclear weapon triggers and other armaments bound for Iraq was confiscated at a London airport.

Iraqi authorities have said they intended to use the furnaces to make

components for artificial arms and legs for veterans of the Iran-Iraq war.

Senator Arlen Specter asked Bush to halt the shipment of the furnaces and to postpone giving Baghdad 500 million dollars in loan guarantees from the Commodity Credit Corporation until Iraq tones down its rhetoric.

Iraqi President Saddam Hussein had threatened in a speech that Baghdad would attack Israel with chemical weapons if it was provoked. Earlier this week, he threatened to use force against Kuwait unless it cuts back its oil production.

Technical experts from the Pentagon, Energy Department and U.S. agencies are to review the composition of the furnaces next week to determine whether they do in fact have advanced military applications.

LONDON (JULY 20) - The loss-making broadsheet Sunday Correspondent newspaper is to switch format in the autumn in an attempt to become the first quality tabloid newspaper, editor Peter Cole said on Friday.

The paper, which has struggled to find a market niche and adequate circulation since launch, is losing one million pounds (1.7 million dollars) per month.

The switch should enable the paper to differentiate itself from four other so-called quality Sunday papers including the Independent on Sunday which was launched in January soon after the Sunday Correspondent.

In Britain the tabloid format is associated with more downmarket popular newspapers and Mr. Cole acknowledged that his paper would have to avoid this image.

WARSAW (JULY 20) - The number of people unemployed in Poland rose by 13 percent in the two weeks to mid-July, totalling 642,000 compared with 568,000 at the end of June, the formerly Communist Trybuna daily reported on Friday.

Unemployment, which was officially unrecognised under communism, now affects 4.7 percent of the workforce, and experts forecast that it will total 1.3 million people, including 200,000 young qualified people, at the end of the year, the paper said.

During the first half of the year, output which found a market fell by 29.7

percent compared with the same period of 1989, official figures showed on Friday.

But inflation was being curtailed as prices in June were 3.4 percent higher than in May, compared with an increase for the whole of 1989 of 900 percent.

Retail prices have risen strongly since the beginning of the year however, with the price of bread rising fourfold, and of tea fivefold, while the price of meat had risen by 164 percent.

The price of coal and coke had risen by 6.6 times and of pharmaceutical products by 5.5 times. The prices of central heating and of hot water had risen by five times, of electricity and petrol by 4.6 times and of a television licence by seven times.

#90201d9200 07/20/1990 ~French/German News Agency

SINGAPORE (JULY 20) - Singapore Prime Minister Lee Kuan Yew said Friday that the U.S. withdrawal of recognition for the Cambodian resistance coalition at the United Nations was a dangerous precedent.

In an interview with the British Broadcasting Corp., Mr Lee said declaring the U.N. seat of the Coalition Government of Democratic Kampuchea vacant would signal to the Khmer Rouge, the dominant resistance coalition partner that unless they captured more ground they would be shut out altogether.

He added that it was a dangerous precedent for a nation to declare that a member of the United Nations was no longer a member.

"To prevent the Khmer Rouge from winning on the battlefield, which is the reason for the sudden shift in policy, you need more than just a vacant seat at the United Nations and discussions with Vietnam on what to do about Cambodia.

"Somebody has to go down to Cambodia and do the fighting against the Khmer Rouge, and the Vietnamese have been doing it for 11 years and didn't succeed.

"So, unless there are special plans to have an intervention force, this cannot be done by force of arms," the prime minister said in the interview reported by the Singapore Broadcasting Corp. in its late news bulletin.

Mr. Lee did not think Wednesday's shift in U.S. policy would lead to a serious rift with the Association of Southeast Asian Nations (ASEAN), comprising Brunei, Indonesia, Malaysia, Philippines, Singapore and Thailand.

ASEAN has been one of the biggest backers of the coalition. Besides the radical Khmer Rouge, the coalition includes non-communist factions led by former prime minister Son Sann and Prince Norodom Sihanouk.

Mr. Lee said that if the Khmer Rouge were to be blocked by force, then "force must be used."

He said he could not understand how the move by the United States, which has helped supply and arm the two non-communist resistance groups, could prevent the Khmer Rouge from taking power.

"My question is, who provides the force?" Mr. Lee asked.

Mr. Lee asked who the chosen representatives of the Cambodian people would be if a U.N. interim administration paved the way for a free vote. "You need the Khmer Rouge and China to be parties of that agreement," he said.

He also felt that the shift in U.S. policy has proved to the Vietnamese that it had paid to stall. The Vietnamese now have even less incentive to give ground or force the client government in Phnom Penh to make concessions.

"It is being handed over to them on a platter by the efforts of the world media, primarily the U.S. media that's been gunning for the Khmer Rouge."

Mr. Lee said the U.S. move was puzzling and added that he hoped an upcoming meeting with U.S. Secretary of State James Baker would provide some answers. Mr. Baker is due here July 30 after attending an ASEAN ministerial meeting in Jakarta starting Monday.

ANKARA (JULY 20) - Prime Minister Dervis Eroglu of the breakaway Turkish Republic of Northern Cyprus (Trnc) will arrive here Monday for a three-day official visit on an invitation from his Turkish counterpart Yildirim Akbulut, it was announced here Friday.

It will be followed by the arrival Wednesday of Foreign Affairs and Defence Minister Kenan Atakol for talks with Turkish Foreign Minister Ali Bozer, the announcement said.

The disclosure of visits coincided with the celebrations marking the 16th anniversary of the Turkish military intervention in Cyprus.

In 1974, Ankara sent troops to the strife-torn Mediterranean island and seized its northern third following a right-wing coup engineered by the

colonels' junta in Greece during the last days of their rule. Only Turkey recognises the Trnc.

Possible measures in response to the Greek Cypriot government's recent application for European Community (E.C.) membership were expected to be discussed in Monday's talks.

Both Ankara and Turkish Cypriot officials have warned the E.C. against accepting the Greek Cypriot application, saying it would bar the resumption of U.N.-mediated talks for a federal settlement.

ADDIS ABABA (JULY 20) - Ethiopian Foreign Minister Tesfaye Dinka left here Friday for the United States and Europe in a bid to win international support for government moves to revive peace talks with the country's rebel movements.

Mr. Tesfaye's first stop will be New York, the Ethiopian News Agency reported.

He is expected to brief U.N. Secretary-General Javier Perez de Cuellar on moves by the embattled Ethiopian government to reopen talks with the two main rebel movements, the Eritrean People's Liberation Front (EPLF) and the Tigre People's Liberation Front (TPLF).

The government recently announced a series of concessions in an effort to draw the rebels back to the negotiating table, after a series of victories claimed by the rebels in northern and central Ethiopia.

Former U.S. president Jimmy Carter expressed the hope earlier this month that talks would soon resume between the government and the TPLF. But he said the EPLF had rejected government proposals to reopen talks.

A rebel alliance led by the TPLF, which holds all of Tigre province, in the north, has claimed recent victories in the central province of Shoa, only 100 miles (160 kilometres) north of the capital, Addis Ababa.

More than 100,000 government troops in the garrison town of Asmara, the Eritrean capital, are under siege from the EPLF, which controls much of the northern coastal province of Eritrea.

Mr. Tesfaye will also brief the U.N. chief on a July 9 declaration by six East African nations committing them to "cooperate mutually towards peaceful solutions of internal conflicts in their countries, by supporting each other's peace and reconciliation efforts", the report said.

The declaration by the heads of state of Ethiopia, Sudan, Uganda, Djibouti, Kenya and Somalia was seen as a step towards greater stability in the war-torn Horn of Africa.

Mr. Tesfaye is also to visit West Germany and Italy.

ISLAMABAD (JULY 20) - Pakistan considers the concentration of Indian forces on its border as an ''attempt at intimidation and aggression'', a government official said here Friday.

Foreign Secretary Tanveer Ahmad said unless the troops were pulled back it would be extremely difficult, if not impossible, to build confidence between the two nations.

Ahmad was talking to journalists at Islamabad airport after seeing off his Indian counterpart Muchkund Dubey who left for New Delhi after two days of fruitless talks on defusing tensions over the disputed state of Kashmir.

India proposed seven confidence-building measures in the talks but did not agree with Pakistan's proposal that troops massed on the border by both be redeployed to their peace-time positions.

However, in his departure statement Dubey assured that India had no intention of attacking Pakistan but repeated the charge that Pakistan was fuelling the Moslem insurgency in Indian Kashmir. Ahmad asked India to produce evidence.

#90201d9300 07/20/1990 ~French/German News Agency

PARIS (JULY 20) - The former head of fashion house Chanel, Michel Pietrini, on Friday officially took over as head of Lanvin, one of Paris' oldest couture houses.

Mr. Pietrini succeeds Leon Bressler, who had headed Lanvin since September. His departure follows the purchase of Lanvin from British bank Mindland by the Vuitton family.

Mr. Bressler had turned around Lanvin's financial situation thanks to the sale of a property in Paris' prestigious Etoile district for 260 million francs (47 million dollars).

Lanvin made a loss of 100 million francs (18.1 million dollars) in 1988 on sales of 250 million (45.5 million dollars).

Mr. Pietrini headed Chanel from 1978 to 1987, when he left after a disagreement.

#90201d9330 07/20/1990 ~French/German News Agency

BONN (JULY 20) - Helmut Kohl, chancellor of West Germany, is at the height of his political career.

Following the Soviet Union's assent to integration of a united Germany in Western political and military structures, the settling of the Polish border issue and agreement on all-German elections in December, the way to national unification is open.

Nine months after the collapse of East Germany's hardline communist regime, Kohl has achieved all his ambitious goals and proved wrong the critics who predicted failure for his ''rapid march'' to unity.

Now, barring a poll-booth debacle of the sort that ejected Britain's Winston Churchill from power only weeks after victory in World War Ii, Kohl looks destined to become the first head of an all-German government since 1945 after the December 2 elections.

World media heaped prestige on the 60-year-old chancellor after his successful visit to the Soviet Union, where President Mikhail Gorbachev abandoned his long-standing refusal to allow Germany to decide for itself which alliances it will join.

Commentaries compared Kohl with Otto von Bismarck, the ''Iron Chancellor'' who welded the German Reich in 1971, and with Konrad Adenauer, West Germany's legendary first chancellor who guided the Federal Republic back into the democratic fold after the shattering wartime defeat of Adolf Hitler's Germany.

-30- 1582

#90201d9480 07/20/1990 ~French/German News Agency

BONN (JULY 20) - West German Chancellor Helmut Kohl and President Richard von Weizsaecker have no differences regarding a possible role of the Palestine Liberation Organisation in future Middle East peace talks, it was stated here Friday.

Deputy government spokesman Dieter Vogel denied recent reports saying Kohl did not agree with Weizsaecker's stance that the Plo should play a role in future Middle East peace negotiations.

Weizsaecker early this week told visiting Tunisian President Zine al-Abidine Ben Ali West Germany and its partners in the European Community

''believe the Plo should take part in the peace process''.

Vogel said Weizsaecker's words were in accordance with an E.C. resolution which was supported by Bonn.

BRUSSELS (JULY 20) - The European Economic Community (EEC) and East Germany will begin free trade in agricultural products from August 1, a Community source said here Friday.

The European Commission is to decide on Thursday to lift all import taxes on East German agricultural and fishing products from the beginning of next month, and East Berlin will at the same time lift import taxes on EEC goods, the source said.

Most export subsidies have been abolished since German monetary union took effect on July 1.

Duty on industrial products was lifted from that date.

EEC foreign ministers had on Monday authorised the Commission to lift duty on East German agricultural produce on a case by case basis.

But the Commission is to agree Thursday to lift restrictions across the board because of the "catastrophic situation" of East German agriculture, the Community source said.

PARIS (JULY 20) - France's exchange reserves fell 30.3 billion francs (5.5 billion dollars) in June from the May level to 328.78 billion francs (59.7 billion dollars), the economy ministry said Friday.

The fall was due almost entirely to the application of new accounting values for gold, the dollar and special drawing rights, which were lower

than the previous figures used, the ministry said.

The reference price of gold being used for the second half of the year is down to 66,397 francs a kilo from 77,258 francs previously, based on the average London price over the second quarter.

The new pricing saw gold reserves drop in June to 169.1 billion francs from 196.75 billion.

The dollar's value for the second half has been set at 5.5855 francs against 5.79 in the first half, while special drawing rights are down to 7.42 francs from 7.6.

LAGOS (JULY 20) - Two political parties set up by Nigeria's military regime as part of a transition to civilian rule are to elect national officers at a joint national convention opening Saturday in Abuja, the country's future capital, officials said Friday.

President Ibrahim Babangida announced the creation of the Social Democratic Party (progressive) and National Republican Convention (conservative) in October.

At the time, the government also dissolved all 13 political associations that applied to contest in future elections, saying they failed to meet government standards.

The Abuja convention, in which 2,938 delegates from each party are to participate, is the last stage of a four-part election process.

Delegates are to elect Republican party national officers Saturday and Sunday, and Democratic party leaders Tuesday and Wednesday, officials responsible for the transition to civilian rule said.

National Electoral Commission (NEC) chairman Humphrey Nwosu said Thursday the political changes underway were an experiment aimed at making political power in Nigeria "flow" from the grassroots to the "top".

"It is Nigeria's innovation to the growth of democratic concept", he said.

"People in the woods are now made to be active participants in politics", compared with the first (1960-66) and second (1979-83) republics when "they were mere objects in politics".

#90201d9750 07/20/1990 ~French/German News Agency

GENEVA (JULY 20) - Mosquitoes that found their way into airplanes during stopovers in tropical countries caused a "mini-outbreak" of malaria near Geneva airport, the World Health Organisation (WHO) said Friday.

Five malaria cases discovered here last summer lived within two kilometres (about a mile) of the Geneva International Airport, according to a report by WHO.

The five were hospitalised between July 14 and August 2 last year but recovered after quinine treatment and two weeks in hospital.

According to WHO, planes landing here from tropical countries allowed mosquitoes in the aircraft to escape and spread the disease.

Lack of regular decontamination in the planes, especially in the baggage and cargo compartments, was cited as the probable reason the insects managed to escape.

WHO also noted that the unusually hot summer in Geneva last year allowed tropical mosquitoes to survive in Switzerland longer than they might have otherwise.

GENEVA (JULY 20) - The World Health Organization (WHO) has proposed the creation of a universally applicable staging system to measure the different stages of AIDS infection, WHO announced Friday.

In its latest bulletin, WHO recommended a four-stage measurement standard to improve the clinical management of patients, make reliable prognoses, and help design and evaluate drug and vaccine trials.

WHO noted that staging systems already in use, such as that of the Walter Reed Institute in the United States, did not meet the criteria for worldwide applicability.

WHO has already tested its proposed system, using 907 HIV-infected patients in 26 clinics on five continents.

It established four distinct stages of AIDS infection, ranging from patients with no symptoms to those who were in an advanced stage of the fatal illness.

In April, the organization said between six and eight million people worldwide were carriers of the AIDS virus, while about about 600,000 were suffering from full-blown Aquired Immune Deficiency Syndrome.

#90201e0007 07/20/1990 ~Latin America New Agency
NEW YORK (JULY 20) EFE - A total of 50,000 copies of the first Russian edition of Business Week, a U.S. financial newsweekly, will be distributed free of charge in the Soviet Union, the magazine's editors have announced.

Business Week/USSR will also be sold in Soviet news stands for five rubles (dlrs eight) a copy, Stephen Shepherd, the magazine's editor-in-chief, said Thursday.

The new publication is the result of collaboration between the U.S. publishing company McGraw-Hill, which owns Business Week, and Kniga Publishers, a subsidiary of the official Soviet publishing house.

At the launching of Business Week/USSR, Shepherd said that the magazine was aimed at Soviets "hungry for information from outside" their own country.

Two Russian editions of the magazine will be published this year, and monthly editions will appear next year.

The first edition has 72 pages, 24 of which are advertising. The cover story concerns the unification of Germany.

The magazine also contains an interview with U.S. President George Bush made in the spring.

According to the agreement between the two publishers, Business Week will receive the money from the magazine's advertising pages and Kniga

Publishers the proceeds from sales.

Business Week/USSR is the third version of the magazine published in a language other than English. A Chinese edition was

Launched in 1986, and a Hungarian version in May.

#90201e0013 07/20/1990 ~Latin America New Agency

HONG KONG (JULY 20) EFE - North Korea Friday announced it would only accede to South Korea's proposal to open the border separating the two countries for the past 45 years when certain conditions are met.

The North Korean state news agency reported that the Communist government would only agree to the border opening once Seoul had torn down all the frontier's barriers, revoked laws barring its citizens from traveling north and freed all political prisoners jailed for breaking these laws.

The statement from Pyongyang came within hours of South Korean President Roh Tae-Woo's announcement that a section of the border would be opened for a five-day test period August 13.

In a television broadcast, Roh agreed to open the southern sector of the border village of Panmunjon, which lies in the demilitarized zone that has separated the two countries since the end of World War II.

Two weeks ago North Korea announced it was opening the northern sector of Panmunjon.

Contact between the two countries, which fought a bloody war in 1949, has been limited over the years to infrequent exchanges between military officials in the demilitarized zone.

#90201e0014 07/20/1990 ~Latin America New Agency

SAN JOSE (JULY 20) EFE - Leftist Salvadoran guerrillas and government officials Friday were to resume peace talks in Costa Rica aimed at ending the country's decade-old civil war as tension mounted over the rebels' threat to launch another major offensive.

Following a last-minute change of venue, the three-day peace talks under the auspices of the United Nations were scheduled to begin at 11 a.m. (1600 GMT) in a luxury hotel 12 km outside the Costa Rican capital.

The leftist Farabundo Marti Liberation Front (FMLN) rebel group has toughened the negotiating stakes by threatening an all-out attack in a bid

to pressure the government of President Alfredo Cristiani into agreeing to a purge of the Armed Forces.

The rebels' insistence on a reduction of the Armed Forces and a purge of military officers allegedly linked to right-wing death squads is the major stumbling-block in the government's efforts to reach a cease-fire agreement by September 15.

Human rights groups have accused the shadowy hit-squads of being responsible for more than half of the 75,000 killings that have taken place since the FMLN took up arms some ten years ago.

But apart from the recent FMLN killings of two military officers, there have been few signs to back up the rebels' threat to launch a "qualitatively superior" attack to last November's offensive in which some 2,000 people died.

Military officials Thursday said the situation in El Salvador was "relatively calm" but added that the Army had drawn up a "plan of full alert."

Despite the rebels' threats, Cristiani Thursday said he was "moderately optimistic" about the outcome of the talks and reiterated his government's "firm political disposition" to reach an agreement.

But the government's chief negotiator, Justice Minister Oscar Santamaria, warned that a major rebel offensive "could undermine the process of dialogue."

Meanwhile, the Army representative at the talks, Col. Mauricio Vargas, has expressed his "unconditional" support for the government's efforts to achieve peace.

"If there is political willingness, (the peace process) can advance," Vargas said.

Referring to the rebel's fears of military reprisals if they laid down their arms, Vargas said the key issue in advancing the talks was "to lay ghosts to rest."

Apart from the key issue of what FMLN leader Shafick Handel describes as, "the dismantling of the repressive military apparatus+, other items on the agenda include the rebels' demands for respect of human rights, and judicial and electoral reforms.

Handel, who heads the FMLN negotiating team, has also called for investigations into a number of human rights abuses.

The FMLN leader has taken hope from an apparent shift in U.S. policy towards El Salvador.

Under former U.S. president Ronald Reagan, El Salvador was receiving dlrs 1 million in U.S. aid daily.

But following the November murder of six Jesuit priests in El Salvador by suspected members of the Armed Forces, pressure has been mounting in the U.S. Congress for drastic reductions in the aid package.

Under U.S President George Bush, Handel said, "The United States is at a half-way stage in the revision of its policy towards El Salvador."

The San Jose peace talks are the third meeting between the FMLN and the Cristiani government this year.

Previous meetings were held in Venezuela in May and in Mexico last month.

LIMA (JULY 20) EFE - Suspected Peruvian leftist rebels Friday set fire to a bus about to pick up passengers in a shanty town located on the outskirts of the capital, officials said.

Rebels from the Tupac Amaru Revolutionary Movement (MRTA) doused the bus parked in the Villa El Salvador district with petrol and set fire to it after forcing the driver to get out.

The bus belonged to the municipal transport company ENATRU which has now had 54 buses destroyed in rebel attacks.

Guerrilla attacks have been reported to have increased since MRTA ringleader Victor Polay escaped from a Lima prison July 9 along with 46 of his followers.

On Thursday, MRTA guerrillas murdered the security guard of a textile factory in Lima but failed to set fire to the building.

Also Thursday, another group of suspected Tupac Amaru rebels broke into a clinic in the working-class Comas district of the capital and stole medicines and laboratory materials.

The MRTA is one of two leftist guerrilla groups fighting government forces in Peru. Some 20,000 people have died in political violence over the past ten years.

#90201m0001 07/20/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (JULY 20) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

IN THE NEWS:

Was there panic when the London Stock Exchange was bombed this morning? "Good Lord, no," said one trader. "We're British." Excitement aside, the FT 100 is up 10.0 to 2397.3. The IRA claims responsibility for the blast. No injuries were reported. ... The Nikkei closed down 634.1 to 32,421.52. ... The DAX index is down 10.73 to 1946.51.

AT&T reports its second-quarter earnings dropped 6%. ... CHRYSLER says it will report lower earnings in the second-quarter and a "substantial loss" in the third-quarter.

AMERICAN EXPRESS says second-quarter earnings were up 1.2% even though revenues fell slightly. ... BANKAMERICA's profits declined 12% in the second-quarter, but were still more than any other banking company in the nation. ... AMERICAN GENERAL says its second-quarter profits were up 4.2%.

WHAT'S AHEAD:

OUTBOARD MARINE stock is expected to open lower this morning; trading was halted yesterday after it announced a loss of 77 cents a share compared to a profit of 64 cents last year.

"BusinessWeek" magazine announces that it will launch a Russian-language version with an initial circulation of 50,000. ... The SECURITIES AND EXCHANGE COMMISSION is considering a proposal to limit index-arbitrage activities when the market has moved by more than 50 points.

FROM THE BULLS:

"It's not really a milestone," says LOUIS EHRENKRANTZ of EHRENKRANTZ & KING of the Dow 3000 threshold. "It's a round number and it will be penetrated eventually and there will be a lot of hoopla. The thing to remember, I guess, is that in 7 1/2 years the Dow is up 2000. We are in a bull market of mammoth proportions." (CNBC "Business View", 7/19)

"We're going to have a great market here," says ANDREW RILEY, investment

strategist at YAMAICHI INTERNATIONAL, who sees the Dow holding above 3000 in a relatively short time. "The facts are there.

Interest rates are going to go lower. Earnings have been, at least in some cases, a little better than expected. ... We've focused on the [bad] numbers ... but the numbers that have been on the mark have been the preponderance of companies." (CNBC "World Business", 7/20)

Upside acceleration will push the Dow to 3140-3150, says GLENN CUTLER of "Market Mania," who believes good support has formed around 2915. (CNBC "World Business" 7/20)

FROM THE BEARS:

"Risks of a market cataclysm - I'm talking about a drop of at least 50% within two years - are so great that you've got to be out of your mind not to protect yourself," says RANDY UPDYKE of UPDYKE ASSOCIATES money managers in Hatboro, Pa.

WILL WEINSTEIN of the GENESIS MERCHANT GROUP in San Francisco says: "The market, at current levels, makes no sense to me. The risks are high. They're being ignored. And my gut tells me we're going lower."

FRED LANGE of LANGE FINANCIAL SERVICES on Staten Island, N.Y., says: "I don't see the market falling out of bed, but I figure we could get a short-term drop in the Dow of as much as 250 points. No two ways about it - it's profit taking time." ("USA Today", 7/20)

STOCK MARKET:

"I think the market is now really getting nervous about a recession," says GAIL DUDACK of S.G. WARBURG & CO. "If it's not really a classic recession, it means poor earnings and I think that's just going to trickle down through all the stocks including those big high flyers that have carried us higher." (CNBC "Market Wrap-Up", 7/19)

Will the market raise the floor above 3000 on the Dow today? "It's only seven points, but it could be a big seven," says EUGENE PERONI JR. of JANNEY MONTGOMERY SCOTT.

He says the fact that the Dow bounced off the 2950 support level yesterday was a good omen. CHARLES SCHWAB trader SID DORR says, "There's a chance for fireworks in either direction [with options expiring] but it's more likely to be on the upside." ("USA Today", 7/20)

Yesterday's trading was dominated by the collapse in technology stocks and revival of the oil issues, according to MARC CHAIKIN, president of BOMAR SECURITIES. He thinks the Fed's unwillingness to significantly reduce

interest rates is "holding back the market," but still sees a move up.

"Short term, the market has resistance at 3000 to 3030. With the expiration of the major market index futures today, the Dow could move above 3000," says Chaikin. ("Investor's Daily", 7/20)

"We see so many other factors at work in this market that the last-minute effect of the options expirations seems to be of little significance," says MAX ANSBACHER of BEAR STEARNS. He says that the expirations may increase the volatility of the market and push the market higher. (FNN "Marketwrap" 7/19)

"The market's taking a rest after huge gains from under 2,900 to near 3,000 in a matter of a few days," says RAO CHALASANI of PRESCOTT, BALL & TURBEN in Cleveland. (NYT, 7/20)

DUDLEY EPPEL, head of equity trading at DONALDSON, LUFKIN & JENRETTE, is concerned that some individual stocks are getting hammered so hard even as the Dow flirts with 3000. "It is shades of 1974, shades of 1987, and it is the strangest thing I've ever seen," he says. "The selling is so indiscriminate; there is such a panic." (WSJ, 7/20)

"The market is being incredibly cruel to any earnings disappointment," says JOHN MANLEY of SMITH BARNEY. ("USA Today", 7/20)

"At these valuation levels, the market is more vulnerable to earnings disappointments than any time in recent history," says CARMINE GRIGOLI of FIRST BOSTON. "Any company that fails to meet expectations will be taken out and shot." (FNN "Marketwrap", 7/19)

"In this market, when they kill a stock it's not over; they beat it into a thousand deaths" says JOHN BURKE, an independent trader on the floor of the New York Stock Exchange. "Earnings momentum has overtaken fundamental valuation," says HENRY VAN der EB, manager of the MATHERS FUND. (WSJ, 7/20)

"3000 was a magical number and we got there," says JOSEPH BATTIPAGLIA, director of research at GRUNTAL & CO. He says the market has been buoyed by the "euphoria" created by events in Eastern Europe, and the surprising strength of the U.S. economy.

"But now we're running out of leadership," says Battipaglia. "What I mean by that is early on we had technology stocks very strong, we had growth retailing companies very strong, we had pharmaceuticals very strong," but these have all run out of steam. He says that without that leadership, the market cannot continue upward. (CNBC "Market Wrap-Up", 7/19)

JOHN SLOSBERG of THOMPSON FINANCIAL NETWORKS in Boston says yesterday's market "was suffering sort of a hang-over from the previous day's steep

drop." "It was tech-wreck day," says MITCHELL MEISER, head of over-the-counter trading at SHEARSON LEHMAN HUTTON. (WSJ, 7/20)

STOCK TIPS:

"USA Today" puts its "Company Spotlight" on LOTUS DEVELOPMENT CORP. this morning and concludes that "the bloom might finally be off the Lotus flower. Lotus shares plunged 2 7/8 to 31 1/4 Wednesday after the company said third-quarter earnings may be down from last year.

The stock was down 6 1/8 yesterday to 25 1/8. Analysts RICK SHERLUND of GOLDMAN SACHS and CHARLES TAYLOR of PRUDENTIAL-BACHE both are telling their clients to sell Lotus shares. DAVID READERMAN of SHEARSON LEHMAN HUTTON says, "Near term the company won't do anything appreciably, but we're not bailing out." ("USA Today", 7/20)

LOTUS DEVELOPMENT CORP. "is throwing up a lot of caution flags," says W. CHRISTOPHER MORTENSON of ALEX. BROWN & SONS INC. "They came out and said the summer is weak and competition is heating up."

Lotus has been hurt by its incompatibility with MICROSOFT CORP.'s Windows 3.0. "The Windows 3.0 announcement in May focused people on the fact that Lotus wouldn't benefit," says NEEDHAM & CO.'s BARBARA ISGUR. "That signaled a change in many people's thinking." ("Investor's Daily", 7/20)

GM is looking attractive to MICHAEL METZ, chief investment strategist at OPPENHEIMER & COMPANY who says the stock has a high yield, a low P/E and stands to be a major beneficiary of Europe 1992.

"TEXAS INSTRUMENTS is a very interesting speculation at this level," says Metz. "Earnings are going nowhere at the moment but they have the prospect of an enormous recovery from royalties - longer term I think it's a very attractive technology stock."

UPJOHN is not very cheap, says Metz, but he likes the long term outlook for the company and its products. "And, who knows, it might even be an acquisition candidate." (CNN "Business Day", 7/20)

Look for the market to broaden out and for some of the less well known names to start doing better, says ANDREW RILEY, investment strategist at YAMAICHI INTERNATIONAL. One name he likes is SCOTT PAPER: "It's half a paper company, half a consumer products company.

It's cheap like a paper company but you've got this wonderful consumer franchise." Riley is also impressed by the company's strength in Europe. (CNBC "World Business" 7/20)

GRUNTAL & CO. recommends stock in TIFFANY & CO., saying earnings should

grow 25% to 30% annually in the next two years as the company expands markets in the United States and overseas.

-30- 9604

#90201m0002 07/20/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (JULY 20) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

"The Fed has shifted the probabilities toward a further easing of policy at some point," says WILLIAM SULLIVAN JR., a senior vice president at DEAN WITTER REYNOLDS. "That is supporting the front end of the yield curve and pushing up bond yields." (NYT, 7/20)

MICHAEL BOSKIN, chairman of the White House Council of Economic Advisers, says he expects a major cut in interest rates if a credible budget deficit reduction package is achieved. "We believe the Fed can, should and will accommodate that [move] both substantially and quickly," says Boskin. Of the slight cut already engineered by the Fed, he says "all donations are welcome." (Reuters, 7/19)

"I think the credit crunch is going to be very hard to alleviate," says BILL WOLMAN, chief economist for "BusinessWeek" and "CNBC." "Once you start sort of doing the kind of rationing that has been done," the process is difficult to reverse, according to Wolman. He does, however, expect the Fed to ease once again in an attempt to reopen the flow of credit. (CNBC "Market Wrap-Up", 7/19)

"There are a lot of unanswered questions about the budget, the Fed's intentions, inflation, the debt ceiling, recession..." says JAMES KENNEY of PRUDENTIAL-BACHE SECURITIES INC. "That is an awful lot of things up in the air and it creates an appetite for short paper." ("Investor's Daily", 7/20)

"We're seeing a consolidation after the steep losses [Wednesday] in bond prices," says ROBERT McGEE, a senior vice president at TOKAI BANK LTD. (WSJ, 7/20)

"It looks like we'll see continued weakness in the long end of the [bond] market and further steeping of the yield curve," says DAVID JONES of AUBREY G. LANSTON & CO. "I'm negative on the long end of the market," says ROGER EARLY of FEDERATED INVESTORS INC. "It's hard to be a buyer of bonds. He believes the yield of the 30-year bond could climb to 8.75% by the Treasury's quarterly refunding in August. (WSJ, 7/20)

"The short end of the [Treasury] market is pricing itself to the possibility of further easing," says DANIEL SETO, economist at NIKKO SECURITIES CO. "The long end is pricing itself to the bad CPI numbers. On top of that, I suspect there is a bit of concern about the Fed's credibility." (Reuters, 7/19)

"There's no real reason to buy or sell dollars," says GABRIELE SCHMITT, a vice president in the foreign exchange department of the Bank of New York. (NYT, 7/20)

The dollar has been up against the yen this morning which is "a reflection of some of the cross-plays going on within the foreign exchanges, as much as anything to do with the dollar," says JEREMY HAWKINS, chief economist for BANK OF AMERICA in London.

"We've seen quite a large upward move in the deutschemark and on its cross-rate against the Japanese yen." That set of circumstances naturally boosts the dollar, says Hawkins. (FNN "World Business Update", 7/20)

The rise of the dollar against the yen "was kind of confusing actually," says DONALD KRUEGER of SANYO SECURITIES AMERICA. He points out that Japanese interest rates seem to be headed higher, which should make the yen more attractive, rather than helping the dollar. "All things being equal, I would expect the yen to get a little bit stronger." (FNN "World Business Update", 7/20)

THE ECONOMY:

JAMES O'LEARY, economic consultant of the UNITED STATES TRUST COMPANY, says the threat of a recession is real and the danger to the financial structure grave. He contends the Fed has stayed too long with a policy of trying to keep growth at a sustained, low level.

"This strategy, laudable as it has been, now seems in danger of tipping the economy into a recession, given the pervasive and very serious problems in our financial system," he says. (NYT, 7/20)

While prices are going up, "asset inflation" is going down as homes and real estate lose value, says DAVID JONES, chief economist at AUBREY G. LANSTON. "Eventually that's going to cause the consumer to pull back in spending because their wealth is declining due to lower home prices. ... Generally, that's going to lead to a weaker economy and lower inflation." (CNN "Business Morning", 7/20)

"We cannot take continued economic growth for granted," says MICHAEL BOSKIN, chairman of the White House Council of Economic Advisers. However, he does predict better growth later this year. (CNBC "Market Wrap-Up", 7/19)

"The Fed will not give up the fight against inflation," says BILL WOLMAN, chief economist for "BusinessWeek" and "CNBC." "I just don't think that's going to happen." He says talk that FEDERAL RESERVE BOARD CHAIRMAN ALAN GREENSPAN has given up the fight under political pressure just "press talk." He says the economy is fairly weak, but the inflation numbers look fairly good. (CNBC "Market Wrap-Up", 7/19)

JOSEPH BATTIPAGLIA, director of research at GRUNTAL & CO., says FEDERAL RESERVE BOARD CHAIRMAN ALAN GREENSPAN "is following the right tack" by being reluctant to lower interest rates without a budget agreement.

"However, he is risking a recession," warns Battipaglia. He believes that Greenspan "will be proven correct" in his fears of inflation, but by 1991 "will be able to claim victory." (CNBC "Market Wrap-Up", 7/19)

IN WASHINGTON:

SECURITIES AND EXCHANGE COMMISSION CHAIRMAN RICHARD BREEDEN warns that a proposed tax on the sale of securities could lead to an exodus of foreign investors from United States stock markets. He also says the government should consider selling bank deposit insurance to consumers at market prices as a way to help reduce the federal budget deficit. (NYT, 7/20)

The RESOLUTION TRUST COMPANY announced yesterday that it would need a new infusion of cash to continue the S&L cleanup. Without new funds, the RTC would have to significantly slow the pace of the cleanup, which, in the words of RTC OVERSIGHT BOARD president PETER MONROE, "would be most unfortunate, because these institutions that we need to resolve are losing substantial taxpayer dollars." The agency needs an additional $60 billion. (FNN "Marketwrap", 7/19)

#90201p6839 07/20/1990 ~PR Newswire

LIVERMORE, CA (JULY 20) PR NEWSWIRE - Triad Systems Corp. (NASDAQ: TRSC) today reported revenues of $35.2 million for the third quarter of fiscal 1990 compared to $37.4 million for the same period of 1989.

Triad's services revenues rose 9 percent over the same period of 1989 to $18.7 million, with the company's Information Services operation recording its 16th consecutive quarterly rise in revenues. Customer Services revenues rose 5.4 percent over the same quarter of 1989 to $15.3 million. Domestic automotive system sales increased $400,000 over the third quarter of 1989, but a soft market reflecting a slowdown in housing starts lowered Triad's Retail Hardgoods systems revenues. Sluggish economies in the United Kingdom and Canada contributed to lower International systems sales.

Triad's new LaserGuide electronic buyers' guide became available midway through the quarter, with more than 70 units shipped in slightly more than one month.

Triad's operating profit for the quarter was $4.1 million, compared to a loss of $1.7 million in the same period of 1989, when the company incurred expenses of $6.5 million related to its successful takeover defense and preliminary financing of its recapitalization. Net income for the third quarter of fiscal 1990 was $430,000 or 4 cents per fully diluted share, reflecting recapitalization-related interest expense of 14 cents per share compared to a loss of $1.3 million or 16 cents per fully diluted share in 1989.

Triad had revenues of $103.6 million and an operating profit of $12.3 million in the first nine months of 1990, compared to $105.6 million in revenues and $2.6 million in operating profit last year. Net income for 1990's first three quarters was $1.1 million, or 9 cents per fully diluted share, reflecting recapitalization-related interest expense of 45 cents per share. Net income for the first three quarters of 1989 was $4.4 million or 52 cents per share, including a gain of 34 cents per share from 1989 land sales.

Triad designs, develops, manufactures and supports computer systems which serve the automotive parts aftermarket, retail hardgoods dealers and dental practices. It also provides lease financing to a substantial portion of its customers through its TSC Leasing subsidiary.

PORTLAND, OR (JULY 20) PR NEWSWIRE - International Yogurt Co. (NASDAQ: YOCM), Portland manufacturer and wholesaler of Yo Cream frozen yogurt, reported revenues of $2,283,763 for the second quarter of 1990, an increase of 52 percent over the second quarter of 1989. Profits for the second quarter were $142,944, or 9 cents per share.

David Hanna, president of the company, said that Yo Cream is now being sold in 47 states through 153 distributors, 8 distributors having been added in the second quarter. "We also continue to expand the sales of Yo Cream to food service chains," Hanna said, "and we expect to penetrate more chain restaurants in the near future."

John Hanna, chairman of the board and chief executive officer, announced that the company has reached an agreement with a major dairy in the far east for distribution of Yo Cream. "This is a significant step for us," Hanna said, "and we are presently pursuing other opportunities in

international trade."

Last month International Yogurt Co. introduced its Yo Cream pints for the first time in five eastern states through 12 large retail grocery outlets.

Hanna observed, "Our business plan is working. The frozen yogurt market is strong, our sales continue to increase, and costs are under control. We are now enjoying the results of years of careful planning and intense effort."

#90201p6848 07/20/1990 ~PR Newswire

SEABROOK, NH (JULY 20) PR NEWSWIRE - Seabrook Station reached 100 percent full-power operation for the first time ever at 9:52 p.m., July 19, producing 1,150 megawatts of electricity -- enough for 1 million homes.

"Reaching full-power fulfills the dream we have all worked so hard to achieve," said Edward Brown, president of New Hampshire Yankee, the plant's operator. "I'm extremely proud of our whole team -- highly skilled men and women whose unshakable commitment and professionalism made this milestone event possible."

New Hampshuire Yankee senior vice president Ted Feigenbaum said Seabrook Station is playing a vital role in helping New England meet its electricity demand.

"Portions of the mid-Atlantic states have already faced serious electricty shortages this summer, and New England has faced similar situations in recent years," Feigenbaum said. "Our region's future economic growth depends on a stable supply of electricity. Seabrook Station has now become a key part of that supply."

The reactor will remain at or near the 100 percent power level for the next few days and engineers will conduct planned tests as part of the plant's ongoing startup testing program.

Upon completion of those tests, operators will reduce power level to conduct additional tests, then briefly shut down the reactor to test the response of plant systems.

After that series of tests ends, operators will restart the reactor and increase its power level back to 100 percent for a final testing phase that will conclude the start-up testing program.

#90201p6849 07/20/1990 ~PR Newswire

WORCESTER, MA (JULY 20) PR NEWSWIRE - Cambridge BioScience Corporation (NASDAQ: CBCX) today announced that it has consummated an agreement with Noctech Ltd. of Dublin, Ireland, to acquire an 18 percent equity stake in Noctech. The agreement closed on July 11, 1990.

The initial investment by Cambridge BioScience is approximately $800,000, according to Donald G. Reed, senior vice president-treasurer of the company. The establishment of an overseas facility was undertaken to enable Cambridge BioScience to supply its overseas distributors and gain more rapid entry into the European common market.

The first Cambridge products to be manufactured at Noctech will be combined HIV-1/HIV-2 EIA format, as well as an HIV-1/HIV-2 rapid test with market introduction planned for early 1991.

Additionally, an HIV-2 Western blot test developed by Biotech Research Laboratories Inc. (NASDAQ: BTRL), based in Rockville, Md., and other BTRL products are expected to be produced at the Noctech site after shareholder approval of the previously reported pending merger of Cambridge and Biotech.

Commenting on the agreement, Cambridge BioScience President Patrick J. Leonard said, "In anticipation of a rapid market growth for our products under EC92, our first manufacturing operation outside the United States will enable us to more efficiently service our customers and introduce our second-generation diagnostic products in a more timely manner."

Cambridge BioScience Corporation is a leader in recombinant technology, which it utilizes in the development and production of antigens, adjuvants and monoclonal antibodies as the basis for its lines of diagnostics, vaccines, and therapeutics for humans and animals.

#90201p6850 07/20/1990 ~PR Newswire

TACOMA, WASH. (JULY 20) PR NEWSWIRE - The Hillhaven Corp. (AMEX: HIL) announced today that for the four months ended May 31, 1990, (shortened year following the companies spin-off from National Medical Enterprises Inc. 1/8NME3/8 on Jan. 31, 1990) it had earnings of $417 thousand on revenues of $380 million. Fourth-quarter earnings totalled $342 thousand on revenues of $289 million. Earnings per share were less than 1 cents per share in the reporting periods and comparisons with the prior year periods are not comparable due to material changes in the financial structure of Hillhaven following the spin-off.

"Our operating results continue to improve," remarked Chris Marker, president of Hillhaven. "We are benefiting from favorable trends in our cost of labor, as well as certain improvements in our Medicaid, Medicare and private rate structure.

"We concluded the year with a strong cash position enabling us to purchase certain nursing centers, currently leased. The purchase of five nursing centers for a total consideration of $30 million which was previously announced is anticipated to be completed by Aug. 31, 1990," continued Marker.

The Hillhaven Corp. is a leading provider of quality long-term health care. The company owns or leases and manages 343 long-term care centers located in 37 states and 24 retirement housing communities located in 14 states. Additionally, its Medi-$ave Pharmacy subsidiary operates 116 retail and institutional pharmacies in 23 states. Hillhaven provides care for over 42,000 on a daily basis and employs more than 35,000 individuals nationwide.

On Jan. 31, 1990, Hillhaven became a public company through a spin-off distribution from its prior parent company, NME. Founded in 1946, Hillhaven had been the principal operating subsidiary of the Long Term Care Group of NME since 1979.

#90201p6851 07/20/1990 ~PR Newswire

BEAVERTON, OR (JULY 20) PR NEWSWIRE - Tektronix Inc. (NYSE: TEK) reported a loss for its fiscal year which ended on May 26, 1990, of $92,595,000 or $3.19 per share. This compares with earnings of $18,905,000 or $0.66 per share in the prior fiscal year. Sales in the latest year were

$1,408,253,000, down 2 percent from the prior year's $1,432,996,000.

In the fourth fiscal quarter, the loss was $65,700,000 or $2.26 per share. This compares with a loss of $2,126,000 or $0.08 per share in the last year's fourth quarter. Fourth quarter sales this year were $362,286,000, about equal to the $361,649,000 reported a year ago.

Both the year and the fourth quarter were significantly affected by charges against income for costs resulting from previously announced decisions to restructure certain parts of the company, including employment reductions and asset write-downs. Charges for the full year were $79,981,000, and charges for the fourth quarter were $67,781,000.

Excluding the restructuring charges, income before taxes for the fourth quarter was $8,943,000, up 10 percent from the prior year's income before taxes of $8,136,000. For the year, income before taxes excluding the restructuring charges was $9,640,000, compared with $57,330,000 in the prior fiscal year.

"Fiscal 1990 was clearly a tough year for Tektronix," said Robert Lundeen, chairman of the board and chief executive officer. "The major charges we incurred at the end of the year were aimed at getting our costs for the coming year in line with expected revenue, and at positioning the company to focus on its key businesses. Thus, with revenue plans which we believe are conservative, we are striving for improved financial performance in the coming year."

Customer orders for the year were $1,446 million, up 3 percent from $1,401 million in fiscal 1989. Customer orders in the fourth quarter were $362 million, up six percent from last year's $341 million. Unfilled orders at the end of the year were $249 million, up from $211 million at the end of last year.

Sales to United States customers were down 1 percent from last year, and made up 54 percent of sales for the year. International sales were down 2 percent. Test and Measurement sales were down for the year and the fourth quarter compared with year-ago levels, while Communications and Visual Systems sales were ahead of last year.

SYRACUSE, NY (JULY 20) PR NEWSWIRE - On July 2, 1990, Resource Recycling Technologies, Inc. (AMEX: RRT) of Binghamton, N.Y., through its subsidiary RRT Empire Returns Corp., came on line as the only material recycling facility for Onondaga County, New York's mandatory countywide curbside

recycling program. Prior to July 2 the county's recycling program had been voluntary and had delivered 10-15 tons of material a day to RRT's Syracuse, N.Y. plant. In the first few weeks of mandatory recycling the plant has been processing more than 100 tons of mixed recyclables and mixed paper per day. The amount of recyclables processed is expected to increase to more than 200 tons a day as the county acquires more hauling equipment.

The massive increase in processing volume was met easily with no reported complaints by the county's refuse haulers. The 70,000-square- foot plant is able to process 225 tons a day of commingled bottles, cans, plastics and paper. RRT charges a tipping fee for the commingled stream of material which is subject to bi-monthly adjustment.

Resource Recycling Technologies, Inc. is a leading integrated recycling company. It currently operates five material recycling facilities (MRF), two plastic recycling facilities and is constructing two additional MRFs.

SUGAR LAND, TX (JULY 20) PR NEWSWIRE - BMC Software, Inc. (NASDAQ: BMCS), today reported revenues for the first quarter of its 1991 fiscal year were $27,002,000. Revenues increased 50 percent from $18,035,000 for the same period in fiscal 1990. Net income increased 54 percent to $5,949,000 ($.24 per share) compared to $3,867,000 ($.16 per share) for the same quarter last year.

"Our first quarter results once again validate BMC Software's position as the leader in the systems software industry," said Max Watson, president and chief executive officer. "Our dedication to internal research and development and an effective worldwide sales organization continue to produce outstanding growth."

North American license revenues for the first quarter increased to $11,014,000, up 37 percent over first quarter fiscal 1990. International license revenues for the first quarter grew to $7,318,000, up 49 percent over the comparable period last year.

"I am pleased with the overall balanced performance of the entire sales organization, with healthy increases in both North American and international revenues," said Watson. "Our revenues were fueled by continued worldwide demand of all our data base products, both IMS and DB2. Today, customers recognize the value of purchasing products from a vendor that can offer high quality products for these strategic IBM mainframe data base subsystems. BMC is the only vendor that effectively addresses the complexity of operating in this dual data base environment.

"Our development teams are actively pursuing important new products. Users can look forward to high performance, high value products that solve complex problems in mission-critical environments," Watson said.

BMC Software, Inc., an international company headquartered in the Houston suburb of Sugar Land, develops, markets and supports systems software products to enhance IBM's data base management and data communications systems, principally IMS, DB2 and CICS. BMC currently markets a total of 41 products to customers in 42 markets. The firm's international subsidiaries are located in Melbourne, Australia; Copenhagen, Denmark; Camberley, England; Paris, France; Milan, Italy; Tokyo, Japan; Madrid, Spain; and Frankfurt, West Germany. BMC is represented by independent agents in Brazil, South Korea and Yugoslavia.

#90201p6859 07/20/1990 ~PR Newswire

WASHINGTON (JULY 20) PR NEWSWIRE - James Madison Limited (AMEX: JML; NASDAQ-NMS: JMLC) today reported its net income for the second quarter of 1990 and its plan for dividend distributions.

Net income for the second quarter of 1990 was $786,000, or 7 cents per share, a 20 percent increase from the $657,000, reported in the first quarter. This was a 14 percent decline from the $910,000 reported for the second quarter of 1989. In the second quarter, the company recorded a $2.1 million pre-tax gain on the sale of loan servicing partially offset by an additional provision for loan losses of $1.6 million. The increased reserve for potential losses was due to current developments in the commercial real estate market. The net effect of these transactions contributed $300,000, after tax, to net income. Non-accrual and restructured loans were $20.8 million, or 2.3 percent of total assets, compared to $22.2 million at March 31, 1990.

While earnings were sufficient to declare the normal semiannual dividend, credit quality uncertainty suggests the preservation of capital. In light of this uncertainty, the company prudently elected to suspend its dividend. This decision is also in keeping with recent comments by Federal Reserve Board Chairman Alan Greenspan. The company plans to resume the dividend program, on a more normalized earnings pay-out basis, once the credit market and economic conditions allow a return to more stable earnings.

Additionally, the company commented about the activity in its Class A common stock during the second week of July 1990. Volume for the week was an unprecedented 340,000 shares, or 5 percent of shares outstanding. A contributing factor to this occurrence was Class A common stock, previously pledged as collateral, being sold on the open market with the

resulting supply and demand imbalances creating a downward bias on the stock price. Many mid-Atlantic bank stocks have experienced similar volume and price movement in the last month.

James Madison Limited is a registered bank holding company located in Washington. The JML financial family of banking subsidiaries includes: Madison National Bank located in Washington, Madison National Bank of Virginia, Madison Bank of Maryland, and United National Bank of Washington. Non-bank subsidiaries include: James Madison Mortgage Company, James Madison Financial Corporation, and JML Systems Management, Inc. James Madison Limited's Class A common stock is listed on the American Stock Exchange (JML), and its common stock is traded on the NASDAQ National Market System (JMLC).

#90201p6861 07/20/1990 ~PR Newswire

COSTA MESA, CA (JULY 20) PR NEWSWIRE - Parker Automotive Corp. (NASDAQ: PKRA) announced today the signing of a major distribution agreement in Singapore, covering Asia, with Scott & English Limited, a division of Haw Par Brothers International Limited (Haw Par). Haw Par is a 50-year-old multi-national diversified products company with annual sales of approximately $1 billion (U.S.) Scott & English Limited is a $150 million sales company specializing in diesel engines and accessories, as well as generator sets throughout Asia.

Under the terms of the agreement Scott & English Limited will purchase a minimum of approximately $5 million annually of Parker Automotive's emission-reducing CarbonClean products over the next five years.

Michael E. Parker, chairman and chief executive officer of Parker Automotive said, "After a lengthy period of evaluation and negotiation, we reached an understanding with one of the most highly regarded companies in Asia. Scott & English Limited has been the Cummins engine distributor in Asia for over 40 years, and we fully expect them to be our master distributor for much longer than the initial five year term called for in the agreement. It is a tribute to the quality of CarbonClean that such a prestigious firm approached us, and signed on. We are elated," added Parker.

CarbonClean is a patented system that cleans harmful, power- robbing pollutants from the fuel systems of internal combustion engines. In independent tests conducted worldwide, CarbonClean has proven to reduce engine exhaust emissions by 50 to 90 percent. In addition, the cleaning process restores fuel economy and engine performance, and greatly improves

overall operating efficiency.

CarbonClean is currently distributed in more than 50 countries. Domestically, CarbonClean products are approved, and in some cases marketed by major oil companies, auto makers and tool companies.

Parker Automotive Corp. is headquartered in Costa Mesa. Manufacturing facilities are in Fountain Valley, Calif. and sales offices are maintained worldwide.

#90201p6862 07/20/1990 ~PR Newswire

BOCA RATON, FLA. (JULY 20) PR NEWSWIRE - Humagen, Inc. (NASDAQ: HUGE), has signed a lease with Soviet/American Trade Consultants, Inc., to open and operate a medical equipment display and supply distribution center in Minsk, (Belorussia) U.S.S.R., the third largest city in the Soviet Union.

The center, scheduled to open in late August, 1990, will supply durable medical equipment and hygiene products to major state industrial enterprises, government ministries (agencies), and cooperative enterprises.

Humagen anticipates first year sales volume in excess of $2 million in hard currency sales. This projected volume represents less than 0.3 percent of the hard currency amount required to be spent (by legislation) for the employees in the Republic of Belorussia alone.

"Given continued favorable political developments, the U.S.S.R. has the potential to become one of the world's most dynamic free markets over the next few years," said Roberto Riva, Humagen's president.

"The secret of securing profitable U.S.S.R. market share today, is to sell products which are already wanted and needed -- and to be paid in hard currency, principally United States dollars. The medical market niche we have set out to serve, we view as both dynamic in its potential growth and lucrative in its present needs," he said.

Humagen, Inc., is also developing and marketing practical, high-tech medical diagnostic testing products. The company's current U.S. marketing thrust is directed principally to the practicing male infertility specialist for in-office use, and includes the patented Penetrak (TM) and Tru-Trax (TM) infertility testing programs now in routine production.

HERNDON, VA (JULY 20) PR NEWSWIRE - Newbridge Networks Inc. (NASDAQ-NMS: NNCXF) announced today that Bell Atlanticom Systems, Inc., of Princeton, N.J., has signed an agreement to market the Newbridge T-1 networking product line. This agreement represents a wide range of products from low-end, narrow-band multiplexers to high-end multiplexers and network management systems.

In addition to selling the Newbridge products to support private networking, Bell Atlanticom works in conjunction with the Bell Atlantic Operating Telephone Companies to provide networks that are central office based and customer premises based.

Under the terms of the agreement, Bell Atlanticom will continue to sell the 3624 MainStreet channel bank in addition to other networking products to offer complete telecommunications and office systems integration.

Bell Atlanticom Product Manager Robert Deaven said: "We are very excited about the additional networking solutions available with the Newbridge product line. Since it is very adaptable, it will improve the efficiency and flexibility of our customer's networks."

"This contract comes after a very successful year of working with Bell Atlanticom," said Richard Smith, director of public networks at Newbridge. "We are extremely pleased with Bell Atlanticom's increased commitment and we look forward to an enduring and prosperous business relationship."

The Newbridge MainStreet products are designed to meet a wide range of digital network applications. The products support a variety of data and voice interfaces, and additional features include 8Kbps and 16Kbps voice compression and subrate multiplexing for maximum utilization of bandwidth.

The 3624 MainStreet is a wall-mountable, intelligent T-1 channel bank capable of providing up to 24 voice and/or data links over a single T-1 circuit.

Bell Atlantic Systems, Inc., is the customer premises equipment subsidiary of Bell Atlantic Corporation that sells, installs, and maintains communications systems and equipment for business, education and government customers. Headquartered in Princeton, Bell Atlanticom has 18 sales and service locations within the geographic Bell Atlantic region and offices in Chicago, New Orleans, Boston and Huntsville, Ala.

Newbridge Networks is an international company which specializes in the design, manufacture and marketing of voice and data communications equipment for global networks. Offices and manufacturing facilities are

located in the United States, Canada and Europe.

Newbridge Networks Corporation is a public company whose common shares are listed for trading on the Toronto Stock Exchange in Canada and quoted for trading on the NASDAQ National Market System in the United States.

#90201p6872 07/20/1990 ~PR Newswire

BATTLE CREEK, MICH. (JULY 20) PR NEWSWIRE - Kellogg Company (NYSE: K) announced today that net sales for the second quarter of 1990 were $1.26 billion, up 1.9 percent over the second quarter of 1989.

Net earnings were $135.7 million, up 4.6 percent, resulting in earnings per share rising from $1.06 to $1.13.

For the first six months of 1990, sales were $2.47 billion, up 4.2 percent over 1989. Net earnings were $232.0 million, down 3.8 percent from 1989 without the effect of an accounting change. With the change, which inflated six-months profits in 1989, the 1990 earnings were down 19.8 percent. Earnings per share were $1.92, compared to $1.97 in 1989 without the accounting change and $2.36 with the change.

Favorable currency exchange rates aided both second-quarter and six-months results in 1990.

William E. LaMothe, Kellogg Company chairman of the board and chief executive officer, said: "Sales volumes of ready-to-eat cereal in our international operations increased substantially during the second quarter and our results were also helped by cost-containment programs throughout the company.

"The performance of our U.S. ready-to-eat cereal business was down during the quarter. Growth of the category has slowed and competition remains intense. We are going forward with our new-product programs and we

remain strongly committed to regaining our historic market share in the United States.

"We continue to be optimistic about the long-term growth prospects for the company."

POMONA, CA (JULY 20) PR NEWSWIRE - MMI Medical, Inc. (NASDAQ: MMIM) today announced the purchase of Advanced Imaging Technologies, Inc. of Wichita, Kan., from a subsidiary of St. Francis Health Affiliates, Inc., also of Wichita. Financial details of the transaction were not disclosed.

Advanced Imaging Technologies (AIT) distributes x-ray film, processing chemicals, radiology accessories and equipment and provides maintenance services for x-ray equipment and film processors to health care providers in Kansas and parts of Missouri and Oklahoma. Revenues for the year ended Sept. 1989 were approximately $5.4 million.

Dudley A. Rauch, chairman and chief executive officer, commented, "The acquisition of Advanced Imaging Technologies extends MMI Medical's services to hospital radiology departments and physician offices. We plan

to operate AIT as an affiliate of our R Squared Scan Systems subsidiary which is the leading provider of third party maintenance services for CT scanners and x-ray equipment. While this acquisition should have good long term benefits for MMI Medical, we do not expect it to add meaningful earnings in the current fiscal year."

MMI Medical, Inc. provides hospitals, clinics and private physician offices with maintenance services for diagnostic imaging equipment and shared mobile computed tomography and cardiac catheterization services.

#90201p6882 07/20/1990 ~PR Newswire

WASHINGTON (JULY 20) PR NEWSWIRE - Danaher Corporation (NYSE: DHR) announced today that earnings for its second quarter ended June 29, 1990, were $11,549,000 or $.46 per share, compared to $12,546,000 or $.53 per share for the comparable 1989 period. These results include the operations of Easco Hand Tools, Inc., for approximately three weeks, subsequent to the June 7, 1990, merger of Easco into the company. Net revenues for the 1990 quarter were $202,999,000, which was 2 percent higher than the $198,605,000 reported in the quarter ended June 30, 1989. Net revenues on a comparable company basis were approximately 1 percent lower in 1990 adjusting for Easco and businesses divested in 1989.

For the six months ended June 29, 1990, earnings were $22,191,000 or $.92 per share, compared to $23,958,000 or $1.00 per share for the six months ended June 30, 1989. Net revenues for the 1990 six-month period were $383,553,000, which was 2-1/2 percent lower than the $393,579,000 reported in the comparable 1989 period. Net revenues on a comparable company basis were approximately 2 percent lower in 1990.

George M. Sherman, president and chief executive officer, stated: "We are pleased with our performance given the generally weak economic conditions affecting our domestic transportation segment and our operations in Brazil. The volatile political and economic environment in Brazil adversely impacted this quarter's reported results by $.04 per share. Aggressive action has been taken to reduce costs while positioning the company to respond to future growth opportunities."

The company also said it continues to incur costs associated with the implementation of its Just In Time manufacturing programs which adversely impact short-term operating results. The company stated, however, these technologies and processes will continue to improve manufacturing efficiency and enhance working capital turnover. Comparable inventory levels prior to the merger with Easco Hand Tools continue to decline.

Sherman added, "We are very pleased with the addition of Easco Hand Tools, which further positions our Tools segment for above average growth opportunities."

Danaher Corporation is a leading manufacturer of tools, process/environmental controls, and transportation products.

STATE COLLEGE, PA (JULY 20) PR NEWSWIRE - United Federal Bancorp (NASDAQ-NMS: UFBK) today reported earnings for the second quarter ended June 30, 1990.

Net income for the period was $1,944,000 or $0.38 per share vs. net income of $1,492,000 or $0.29 per share in the same quarter last year. Net interest income before provision for loan losses rose 8.0 percent to $4,748,000 compared with $4,395,000 a year ago.

Included in the results for the current quarter was a $0.06 per share benefit from the sale of the company's Beaver Avenue building. While United Federal's core earnings remain on budget, noninterest expenses increased.

The increase in noninterest expenses relate to expenses incurred in connection with the review of certain acquisition candidates which did not materialize; increases in occupancy costs resulting from the move to the new office building in August 1989; and higher depreciation expenses on data processing and platformation equipment.

For the first six months of 1990, net income rose 19.9 percent to $3,546,000 or $.69 per share compared with $2,957,000 in the same period last year. For the first half of 1990, net interest income before provision for loan losses was $9,341,000 compared with $8,559,000 last year. At June 30, 1990, United Federal had total assets of $495,877,000 and stockholders' equity of $93,976,000 or $18.22 per share.

In discussing the results for the period, Charles C. Pearson Jr., president and chief executive officer, stated, "Our performance continues to reflect strong operating trends. As of June 30, 1990, United Federal's return on average assets was 1.45 percent; net worth to total assets was 18.96 percent and our nonperforming assets to total assets was 0.45 percent."

Pearson continued, "During a period of disappointing results for both thrifts and commercial banks, United Federal has maintained its superior operating and financial capability."

United Federal Bancorp is a federally chartered savings bank. The bank conducts its operations from its home office in State College, Pa., and 11 full service offices located in Bellefonte, Centre Hall, Clearfield, Philipsburg, and Huntingdon, Pa.

CINCINNATI (JULY 20) PR NEWSWIRE - The Kroger Co. (NYSE: KR) announced today that the executives in charge of its 11 supermarket operating divisions have been named president of their respective divisions.

The change in title recognizes the substantially increased authority and responsibility placed in the hands of division executives through the further decentralization of Kroger's retail operations.

The individuals named president are (in alphabetical order): Theodore Engel -- Vice president of the Central Marketing Area since 1977. The division, headquartered in Indianapolis, operates 116 stores in Indiana, Illinois and Missouri. Engel joined Kroger in 1958.

Joel Greenisen -- Vice president of the Michigan Marketing Area since 1983 joined Kroger in 1958. The division operates 54 supermarkets in the state of Michigan.

John Hackett -- Vice president of the Louisville Marketing Area since January 1990, joined Kroger in 1963. The division operates 78 supermarkets in Kentucky, Illinois and Indiana.

J. Wayne Harris -- Vice president of the Cincinnati-Dayton Marketing Area since 1985, joined Kroger in 1957. The division operates 87 supermarkets in southwestern Ohio, northern Kentucky and southeastern Indiana.

William D. Parker -- Vice president of the Delta Marketing Area since 1988 joined Kroger in 1963. The division, headquartered in Memphis, operates 103 supermarkets in Tennessee, Arkansas, Missouri, Alabama and Mississippi.

Robert L. Shafer -- Vice president of the Columbus Marketing Area since 1986, joined Kroger in 1961. The division operates 94 supermarkets in central and eastern Ohio and West Virginia.

Edwin A. Sieveking -- Vice president of the Mid-Atlantic Marketing Area since 1977, joined Kroger in 1956. The division, located in Salem, Va., operates 114 supermarkets in Virginia, West Virginia and North Carolina, plus the eastern edges of Ohio, Kentucky and Tennessee.

Paul Smith -- Vice president of the Atlanta Marketing Area since 1985, joined Kroger in 1964. The division operates 118 supermarkets in Georgia, South Carolina and Alabama.

Mark Thompson -- Vice president of the Nashville Marketing Area since 1984 joined Kroger in 1960. The division operates 68 stores in Tennessee, Kentucky and Alabama.

Dean Winkleblech -- Vice president of the Dallas Marketing Area since 1986 joined Kroger in 1965. The division operates 76 supermarkets in Texas and Louisiana.

Robert E. Zincke -- Vice president of the Houston Marketing Area since 1986, joined Kroger in 1964. The division operates 93 supermarkets in Houston, San Antonio, the Texas Gulf Coast and Louisiana.

Kroger also said that Patrick J. Kenney, vice president of the Texas Marketing Area, has been named president of the Texas Operating Group. Winkleblech and Zincke will continue to report to Kenney.

#90201p6893 07/20/1990 ~PR Newswire

LOS ANGELES (JULY 20) PR NEWSWIRE - CalFed Inc. (NYSE: CAL), whose principal subsidiary is California Federal Bank, FSB, today reported a net loss for the second quarter of 1990 of $53.0 million, or $2.10 per fully diluted share, compared to net earnings for the second quarter of 1989 of $19.1 million, or $.73 per fully diluted share.

The loss for the second quarter of 1990 was due to a $78.3 million provision for loan losses and a $13.4 million addition to the company's allowance for losses on real estate held for investment. The provision reflects continuing weakness in certain commercial real estate markets which resulted in specific losses in the company's income-property loan portfolio during the quarter.

The company reported a net loss of $34.1 million, or $1.35 per fully diluted share, for the first six months of 1990, compared to net earnings of $36.6 million, or $1.40 per fully diluted share, for the first half of 1989.

"The commercial real estate market is under pressure at this time, with declining values that have resulted from weakened local economies, an oversupply of properties and the unavailability of credit," said Jerry St. Dennis, chairman and chief executive officer of CalFed Inc. Although the company's combined level of non-accrual and restructured loans has decreased since the end of the first quarter, from $459 million to $414 million, the decrease actually resulted from a $48 million increase in real estate acquired in settlement of loans. "With changing market conditions, it is prudent to take a more conservative view of potential future losses inherent in our real estate loan portfolio and to increase the general allowance for such losses at this time," said St. Dennis.

The allowance for loan losses in the company's banking segment was $159.5

million at June 30, 1990. In the company's banking operations, non-performing assets (non-accrual loans and real estate acquired in settlement of loans) equaled 1.81 percent of total assets compared to 1.32 percent at March 31, 1990, and 1.29 percent at June 30, 1989.

The company also announced that its board of directors declared a regular quarterly dividend of $.35 per share payable on Sept. 14, 1990, to stockholders of record at the close of business on Aug. 15, 1990.

Despite the effect of the higher loss provisions, CalFed's operating results for the second quarter and first six months of 1990 reflected improvements in the core earnings strength of the company's restructured businesses as compared with 1989.

Net interest income in the company's banking segment, a principal determinant of core profitability, grew 20 percent to $121.2 million in the second quarter of 1990 from $100.6 million in the second quarter of 1989. The banking segment's interest rate spread for the second quarter of 1990 improved to 2.30 percent from 1.82 percent for the comparable 1989 period. At June 30, 1990, the interest rate spread was 2.24 percent, 65 basis points higher than the interest rate spread of 1.59 percent reported at June 30, 1989. Net interest income for the first half of 1990 was $249.7 million compared to $201.3 million for the same 1989 period.

CalFed Inc. is a financial services holding company whose principal subsidiary, California Federal Bank, FSB, operates 200 offices in California, Florida, Nevada, Georgia and Arizona.

DES MOINES, IA (JULY 20) PR NEWSWIRE - Oliver H. Hagen, president and chief executive officer, announced today the board of directors of First Interstate of Iowa Inc. (NASDAQ: FIIA), a multi-bank holding company, declared a third quarter dividend of 5 cents per share to shareholders of record at the close of business on July 31, 1990. The dividend will be paid on Aug. 31, 1990. The board previously declared a 5 cent dividend in each of the first two quarters of 1990.

Hagen noted, "We are pleased to announce the declaration of another 5 cent quarterly dividend. The continuation of dividend payments is reflective of the company's excellent financial performance and the prospects for similar such performance in the future. Second quarter 1990 income before income taxes increased 3.6 percent to $3,960,000 from $3,824,000 for the second quarter of 1989. The decreases in net income for the three months and six months ended June 30, 1990 from the same periods in 1989 were almost entirely due to an increase in the effective income tax rate to 31 percent from 16 percent. The lower amount of income tax expense in 1989 resulted from the company utilizing its remaining net operating loss carryforward."

The company recently reported second quarter 1990 net income of $2,754,000 or 18 cents per share fully diluted, compared to $3,231,000, or 21 cents per share fully diluted, for the 1989 corresponding quarter. The company's return on average assets and return on average equity was .93 percent and 14.27 percent, respectively, for the current quarter. Net income for the six months ended June 30, 1990 was $5,216,000, or 34 cents per share fully diluted, and was $6,407,000, or 42 cents per share fully diluted, for the like period in 1989.

The market price of the common stock of First Interstate of Iowa closed at $5.88 on July 19, 1990.

First Interstate of Iowa owns the controlling interest in 13 Iowa banks, a computer services company and an insurance agency. The banks operate 33 locations in numerous Iowa cities including Algona, Cresco, Des Moines, Estherville, Fort Dodge, Greenfield, Kalona, Marengo, Mason City, Sigourney, Sioux City, Spencer and Urbandale.

#90201p6906 07/20/1990 ~PR Newswire

CHICAGO (JULY 20) PR NEWSWIRE - Midway Airlines Inc. (NYSE: MDW) today announced that it has named Thomas E. Schick as its president and chief operating officer and elected him to the board of directors for Midway Airlines Inc., according to David R. Hinson, chairman and chief executive officer. Schick is the former president of Piedmont Airlines and, subsequent to its merger with USAir, he has held the position of senior vice president of technical operations for USAir.

Schick, 49, will assume overall responsibility on Aug. 1 for the operations of the company.

"The election of Thomas Schick as a director and the chief operating officer of Midway Airlines culminates a careful six-month search. This decision brings an experienced airline executive to the team," said Hinson. "Midway Airlines is going through an exciting period of rapid growth and Mr. Schick's talents will make a significant contribution."

Schick brings to Midway Airlines a distinguished 29-year background in aviation. As president and chief operating officer of Piedmont Airlines, Schick was responsible for the overall operation of an airline having revenues in excess of $2.3 billion. Schick's responsibilities also included marketing, sales, financial, legal and administrative functions. Prior to assuming the presidency of Piedmont, Schick held positions as senior vice president of operations and vice president of maintenance and engineering during which he was involved in the FAA- approved extended overwater operation for the Boeing 767 ER aircraft, a program now recognized as an "industry standard."

Prior to joining Piedmont, Schick was employed by USAir and Pan American World Airways.

In addition, his business experience includes service with Coopers and Lybrand and J.H. Schroder Banking Corp.

Schick earned a bachelor of science degree in business administration from State University of New York at Albany. He is married with three children.

Midway Airlines offers coast-to-coast service from its hubs at Chicago's Midway Airport and Philadelphia International Airport. Midway Airlines

and its wholly owned subsidiary, the Midway Commuter, serve 59 destinations in the United States, Canada, U.S. Virgin Islands and the Bahamas.

FAIRFAX, VA (JULY 20) PR NEWSWIRE - ERC Environmental and Energy Services Co., Inc. (NASDAQ-NMS: ERCE) will be a major subcontractor on the Jacobs Engineering-headed team that has been awarded a basic ordering agreement for engineering and technical services to the Department of Energy's (DOE) Pantex Plant in Amarillo, Texas.

Pantex is the final assembly plant for the DOE nuclear weapons production complex. The estimated value of the contract is $10 million to $15 million over its three-year term, with two one-year option periods. ERCE's portion is expected to be in the $1 million to $1.5 million range or more.

The contract covers support services in the areas of safety and risk analysis, environmental and hazardous waste management, health protection, engineering for hazardous facilities, emergency planning, and fire protection engineering. While ERCE is responsible primarily for safety, risk assessment, and emergency planning tasks, it is anticipated that the contract may provide opportunities to apply ERCE's environmental capabilities as well. Other members of the Jacobs team include Radian Corporation and Professional Loss Control, Inc.

The ERCE Technical Services staff's background in safety assessment and emergency planning at DOE facilities and their extensive familiarity with the DOE nuclear weapons complex were cited by the Jacobs proposal manager as a key factor in winning the contract.

ERCE is a professional and technical services firm providing a comprehensive range of environmental, infrastructure, and energy consulting, engineering, and analytical laboratory services to industrial and commercial companies and government agencies. The company has principal operating offices in Fairfax, San Diego, and Nashville, Tenn.

#90201p6910 07/20/1990 ~PR Newswire

OLD GREENWICH, CT (JULY 20) PR NEWSWIRE - American Brands, Inc. (NYSE:

AMB) today announced that earnings per common share for the quarter ended June 30, 1990 rose 30 percent to a record $1.62 compared with $1.25 last year. Net income rose 32 percent to a record $158 million compared with $120 million.

The company also announced that its MasterBrand Industries, Inc. subsidiary has reached agreement to acquire The Moen Group, Inc. from Forstmann Little & Co. for $975 million in cash.

Moen is a leader in the manufacture of kitchen and bathroom faucets. In the U.S. and Canada, it is number one in the fast-growing single-handle faucet market. Moen also has operations in Japan and Taiwan. Worldwide earnings before depreciation and amortization, interest and taxes were nearly $97 million last year, a record. American Brands further announced that it intends to sell Waterloo Industries, which is a subsidiary of MasterBrand Industries.

For the second quarter of 1990, American Brands reported that its revenues reached a record $3 billion, up eight percent from $2.7 billion in the second quarter of 1989.

For the first six months of 1990, earnings per share rose 19 percent to a record $3.62 versus $3.05 last year. Net income was a record $354 million, up 21 percent from $292 million, and revenues were a record $6.2 billion, up three percent from $6 billion in 1989.

Fluctuations in exchange rates for foreign currencies, principally the British pound, favorably affected E.P.S. by two cents in the quarter but adversely affected E.P.S. by four cents for the six months. The average number of shares outstanding was two percent higher in both periods.

Chairman and Chief Executive Officer William J. Alley said: "Our company continues to perform very well, and we are continuing to benefit from the restructuring initiated more than three years ago. The moves we are announcing today dramatically accelerate our strategic plans and give much sharper focus to our business.

"Including Moen and excluding Waterloo, operating income last year for the MasterBrand group would have approximated $120 million. Thus, hardware and home improvement products will now attain full core business status.

"In combination, the group will have a powerful position in kitchen and bath products, a market with superior growth characteristics. Aristokraft, which is one of the largest manufacturers of kitchen cabinets and bathroom vanities, and Twentieth Century, a leading supplier of plumbing products, will be managed closely together with Moen under the MasterBrand umbrella."

NEWTOWN SQUARE, PA. (JULY 20) PR NEWSWIRE - ARCO Chemical Co. (NYSE: RCM) and Coastal Refining and Marketing Inc. have initiated work to restart the MTBE unit at the Coastal site in Corpus Christi, Texas. MTBE, or methyl tertiary butyl ether, is an octane enhancer for gasoline that also reduces automotive emissions.

The unit is expected to resume production in early August at a rated capacity of 12,000 barrels per day.

The Coastal unit, which had been operated by Coastal for ARCO Chemical from 1985 through early 1990, is being restarted as a result of the July 5 explosion at ARCO Chemical's plant in Channelview, Texas. The Channelview plant is currently shutdown but is expected to be restarted in phases over the next three months. ARCO Chemical is also importing MTBE from company facilities in Europe and pursuing other commercial arrangements to minimize customer disruptions.

Coastal Refining and Marketing Inc. is a subsidiary of the Coastal Corp., a Houston-based diversified energy company.

ARCO Chemical is a leading multinational manufacturer and marketer of intermediate chemicals and specialty products used in a broad range of consumer goods. Principal product lines include propylene oxide, tertiary butyl alcohol, MTBE, and styrene monomer.

DETROIT (JULY 20) PR NEWSWIRE - NBD Bank, N.A. will sponsor a neighborhood development workshop for church-based community groups in the Detroit area on Saturday, July 21, at the Hotel St. Regis.

Shirley Stancato, vice president, consumer loans at NBD and coordinator of the workshop, said, "The five community groups attending the workshop have spirtuality in common. They see adequate and affordable housing as part of their mission."

Stancato explained that revitalization in the City of Detroit depends upon community groups undertaking neighborhood development projects.

"The groups have had success developing their own areas of the city," she said. "Through this workshop, NBD is providing the forum to meet and exchange ideas, which will facilitate their future projects."

Community groups attending the workshop are Reach, Inc., People in Faith United Housing Corporation, Church of the Messiah Housing Corporation, Joy of Jesus and New Center North/Christ Evangelical Lutheran Church.

#90201p6922 07/20/1990 ~PR Newswire

DULUTH, GA (JULY 20) PR NEWSWIRE - Wegener Corp. (NASDAQ-NMS: WGNR) today announced an earnings (loss) of $(511,000) or $(0.07) per share for the three months ended June 1, compared to earnings of $529,000 or $0.07 per share for the three months ended June 2, 1989.

Net earnings (loss) were $(1,116,000) or $(0.15) per share for the nine months ended June 1, compared to earnings of $1,208,000 or $0.16 per share for the nine months ended June 2, 1989. The results for the three and nine months ended June 1 include pre-tax charges of $360,000 and $1,055,000 respectively related to provisions for inventory rework and obsolescence, warranty, and bad debt expense.

Net sales were $7,007,000 for the three months ended June 1, compared to $9,112,000 for the three months ended June 2, 1989. Net sales were $21,357,000 for the nine months ended June 1, compared to $24,126,000 for the nine months ended June 2, 1989. The company has two wholly owned subsidiaries, Wegener Communications Inc. (WCI) and Telecrafter Services Corp. (TSC). WCI's net sales for the three and nine month periods ended June 1 were $5,303,000 and $15,634,000 compared to $5,398,000 and $14,900,000 for the three and nine month periods ended June 2, 1989. TSC's net sales for the three and nine month periods ended June 1 were $1,704,000 and $5,723,000 compared to $3,714,000 and $9,226,000 for the three and nine month periods ended June 2, 1989. The company's sales decrease for the three and nine month periods ended June 1 is due primarily to the overall slowdown that TSC is experiencing in the cable television service market. This market slowdown is expected to continue for at least the balance of fiscal 1990.

The decrease in the company's net earnings for the third quarter and the first nine months of fiscal 1990 was caused by several factors. WCI continued to experience high costs associated with its DBS products. During the third quarter ended June 1 the inventory reserve was increased by $95,000, the warranty reserve was increased by $120,000, the reserve for bad debts was increased by $15,000, and the notes receivable reserve

was increased by $130,000. During the nine months ended June 1, the inventory reserve was increased by $250,000, the warranty reserve was increased by $120,000, the reserve for bad debts was increased by $395,000 and the notes receivables reserve was increased by $290,000. TSC's gross margin has improved in fiscal 1990 compared to fiscal 1989; however, operating profit dropped considerably due the sharp decrease in sales volume. The high manufacturing costs associated with WCI's DBS products and the slowdown in TSC's service business is expected to continue to impact the sales and earnings of the company for the remainder of fiscal 1990 and into fiscal 1991. Primary factors in determining the future growth and profitability of the company will be the volume of new orders as well as the successful implementation of the TQC and JIT manufacturing programs.

During the third quarter, WCI continued deliveries of the recently introduced Series 1800 Addressable Video Receivers to SportsCom. This product has been well received in the marketplace. SportsCom will control the distribution of its seven sports networks to local cable television systems. The addressability of WCI's video receivers allows SportsCom to honor event blackouts and to manage program distribution on a system-by-system basis.

WCI has received an order for an additional 1,000 of its Series 1800 Addressable Video Receivers for use by Whittle Communications. Several thousand of these receivers are already in service by Whittle Communications to distribute educational programming to schools. Orders for the addressable video receiver are expected to remain strong during the next fiscal year.

In April of this year, the Federal Communications Commission adopted a ruling which in effect requires all satellite video transmit stations to incorporate an identification message along with their signal. WCI, the recognized world leader in subcarrier technology, has developed the Model 1680 Automatic Transmitter Identification System with shipments expected to begin in the fall.

Wegener Corp., through its wholly owned subsidiaries, designs and manufactures equipment for the business broadcast, data communications, and broadcast radio and television industries. It is also a major supplier of both products and services to the cable television industry.

#90201p6923 07/20/1990 ~PR Newswire

DULUTH, GA (JULY 20) PR NEWSWIRE - Wegener Corp. (NASDAQ-NMS: WGNR) today announced an earnings (loss) of $(511,000) or $(0.07) per share for the three months ended June 1, compared to earnings of $529,000 or $0.07 per share for the three months ended June 2, 1989.

Net earnings (loss) were $(1,116,000) or $(0.15) per share for the nine months ended June 1, compared to earnings of $1,208,000 or $0.16 per share for the nine months ended June 2, 1989. The results for the three and nine months ended June 1 include pre-tax charges of $360,000 and $1,055,000 respectively related to provisions for inventory rework and obsolescence, warranty, and bad debt expense.

Net sales were $7,007,000 for the three months ended June 1, compared to $9,112,000 for the three months ended June 2, 1989. Net sales were $21,357,000 for the nine months ended June 1, compared to $24,126,000 for the nine months ended June 2, 1989. The company has two wholly owned subsidiaries, Wegener Communications Inc. (WCI) and Telecrafter Services Corp. (TSC). WCI's net sales for the three and nine month periods ended June 1 were $5,303,000 and $15,634,000 compared to $5,398,000 and $14,900,000 for the three and nine month periods ended June 2, 1989. TSC's net sales for the three and nine month periods ended June 1 were

$1,704,000 and $5,723,000 compared to $3,714,000 and $9,226,000 for the three and nine month periods ended June 2, 1989. The company's sales decrease for the three and nine month periods ended June 1 is due primarily to the overall slowdown that TSC is experiencing in the cable television service market. This market slowdown is expected to continue for at least the balance of fiscal 1990.

The decrease in the company's net earnings for the third quarter and the first nine months of fiscal 1990 was caused by several factors. WCI continued to experience high costs associated with its DBS products. During the third quarter ended June 1 the inventory reserve was increased by $95,000, the warranty reserve was increased by $120,000, the reserve for bad debts was increased by $15,000, and the notes receivable reserve was increased by $130,000. During the nine months ended June 1, the inventory reserve was increased by $250,000, the warranty reserve was increased by $120,000, the reserve for bad debts was increased by $395,000 and the notes receivables reserve was increased by $290,000. TSC's gross margin has improved in fiscal 1990 compared to fiscal 1989; however, operating profit dropped considerably due the sharp decrease in sales volume. The high manufacturing costs associated with WCI's DBS products and the slowdown in TSC's service business is expected to continue to impact the sales and earnings of the company for the remainder of fiscal 1990 and into fiscal 1991. Primary factors in determining the future growth and profitability of the company will be the volume of new orders as well as the successful implementation of the TQC and JIT manufacturing programs.

Wegener Corp., through its wholly owned subsidiaries, designs and manufactures equipment for the business broadcast, data communications, and broadcast radio and television industries. It is also a major supplier of both products and services to the cable television industry.

#90201p6925 07/20/1990 ~PR Newswire

LATROBE, PA (JULY 20) PR NEWSWIRE - Kennametal Inc. (NYSE: KMT) reported today that sales and earnings per share set new records during the fiscal year ended June 30, 1990.

Sales were $589 million, up 25 percent from $472 million in 1989. Net income was $32.1 million, or $3.08 per share, up seven percent from $30.0 million, or $2.90 per share in 1989. Sales set a new record for the third year in a row while earnings per share broke the record of $3.06 set in 1980.

For the quarter ended June 30, 1990, sales were $156 million, up 25 percent from $125 million in the June 1989 quarter. Net income was $8.9 million, or $0.86 per share, up three percent from $8.7 million, or $0.84 per share in the June 1989 quarter.

The increase in sales during fiscal 1990 and the June 1990 quarter resulted primarily from the acquisition of two industrial distribution companies. Kennametal acquired Garrett Industrial Supply Co. (GIS) in June 1989 and J&L America Inc. (J&L) in January 1990. Excluding these acquisitions, sales rose 6 percent in 1990 and 4 percent in the June quarter.

Quentin C. McKenna, chairman of the board and chief executive officer, stated that sales growth occurred in most of the company's traditional markets during the year and June quarter. Sales growth was particularly strong for metalworking products in Europe and coal and construction tools. McKenna added that traditional U.S. metalworking sales increased four percent in 1990 and were flat in the June quarter.

In reviewing costs and expenses for fiscal 1990, McKenna noted that the gross margin percentage remained at 42 percent, unchanged from a year ago. The percentage was adversely affected by the inclusion of GIS's lower margin sales in 1990, offset by price increases, cost containment and productivity improvements in the company's traditional businesses.

Operating expenses increased 30 percent over last year's level because of the inclusion of GIS and J&L as well as planned increases in research and development, marketing and information technology.

During the June 1990 quarter, the company continued to incur losses in its

United Kingdom operations. Progress toward profitability goals for the U.K., while slower than anticipated, is continuing.

The company recorded approximately $2.3 million, or $0.15 per share after tax, of special charges in the June 1990 quarter relating to domestic manufacturing programs and early retirement incentives in Belgium. The GIS acquisition lowered consolidated earnings per share by approximately $0.15 in the June 1990 quarter and $0.40 in fiscal 1990.

#90201p6930 07/20/1990 ~PR Newswire

CHICAGO (JULY 20) PR NEWSWIRE - The editorial, news pictures, customer service and technical operations of Reuters Information Services Inc. in Chicago moved to 311 South Wacker Drive as of July 16. They join administration, sales and marketing operations, which relocated earlier in the month.

A reorganization and expansion of staff and services in the Chicago area, and the creation of a North America Region (NorAm) of Reuters Information Services Inc., required consolidation into a single, modern, cost-efficient facility.

NorAm is responsible for all Reuters Information Services Inc. business matter in the U.S. and Canada, excluding New York City. The editorial bureau covers financial, money, general and commodity news and pictures in a 12-state Midwest area.

Reuters initially will occupy nearly 60,000 square feet of space in the 62-story Lincoln Properties skyscraper that anchors the South Wacker Drive business district. There are options for expansion to meet business and space demands over the next 15 years. Reuters had occupied several offices at the Chicago Board of Trade building over 23 years and recently had operations in nearby buildings as well.

The relocation of 180 Reuter employees to a single headquarters was initiated in early 1989 by Bruce Masterson, senior vice president for the North America region of Reuters, and by Charles J. Kershner, chief of bureau for Midwest editorial and news pictures operations.

The main telephone numbers are: NorAm Region and Central District, 312-408-8500; Customer Service, 312-408-8600; Editorial, 312-408-8700 (Corporate news releases 312-408-8787). The new address is: Reuters Information Services Inc., 311 South Wacker Drive, Chicago, Ill., 60606.

Reuters Information Services Inc. is the primary operating company in

North America of Reuters Holdings PLC (NASDAQ: RTRSY).

Reuters Holdings PLC supplies the global business community and news media with a wide range of facilities including real-time financial data and transaction services, access to numeric and textual historical databases, news and news pictures. Reuters has controlling interest in Visnews, the international television news agency, and Reuter Group companies design and install trading room systems. Reuters obtains information from around 160 exchanges and over-the-counter markets and from a network of over 1,270 journalists, photographers and cameramen. Reuters distributes information through approximately 200,000 video terminals and teleprinters. This includes information directly transmitted to clients' computers.

#90201p6932 07/20/1990 ~PR Newswire

BLOOMFIELD, CT (JULY 20) PR NEWSWIRE - Kaman Corp. (NASDAQ: KAMNA), today reported that net earnings for the second quarter of 1990 were $4.8 million or 26 cents per share primary, 25 cents per share fully diluted, compared to $6.9 million or 38 cents per share primary, 35 cents per share fully diluted in 1989. Revenues were $207.1 million compared to $204.0 million in the second quarter of 1989.

For the first six months of 1990, net earnings were $9.1 million or 50 cents per share primary, 48 cents per share fully diluted, compared to $13.7 million or 76 cents per share primary, 70 cents per share fully diluted in 1989. Revenues were $410.9 million for the first half of 1990 compared to $407.7 million for the same period last year.

"The decline in earnings for the second quarter reflects continuing pressures in defense and industrial markets," according to chairman and chief executive officer Charles H. Kaman. "Operating profits for our distribution segment's industrial business were down, on relatively flat revenues, due to a slowing manufacturing environment, notably in the Northeast. Operating income for our diversified technologies segment also declined due to a competitive defense market. While the general business environment is weak, we are encouraged by an improved performance over the first quarter of this year."

Kaman Corp. is a highly diversified Fortune 500 company with business activities in defense, industrial and commercial markets. The company had revenues of more than $800 million in 1989.

#90201p6935 07/20/1990 ~PR Newswire

RICHMOND, VA. (JULY 20) PR NEWSWIRE - Media General, Inc. (AMEX: MEG) today reported higher revenues, net income and earnings per share for the second quarter of 1990, compared with the corresponding quarter a year ago.

The second quarter 1990 profit improvement from the prior year resulted principally from an after-tax gain on the sale of the company's West Coast weekly newspapers, as well as the receipt of past-due royalty payments from the company's Mexican newsprint affiliate. Nevertheless, earnings per share from continuing operations were slightly ahead of the prior year period.

For the first six months of 1990 revenues increased modestly from the prior year, but net income declined despite the one-tie gains.

Compared with the corresponding periods a year ago, second quarter 1990 revenues rose to $158.0 million from $149.9 million in 1989. Net income for the quarter was $12.4 million, compared with second quarter 1989 net income of $6.1 million.

Earnings per share were $0.48 versus $0.23 in the year-earlier period. Revenues for first the six months of 1990 were $306.1 million, compared with $299.2 million a year ago.

Net income for the most recent six months was $15.1 million, versus net income of $17.9 million for the first six months of 1989, and earnings per share for the first half of 1990 were $0.58, compared with $0.69 for the first six months a year ago.

Second quarter and six month 1990 net income benefitted from an after-tax contribution of $6.4 million, or $0.24 per share, reflecting $0.15 per share from the sale of the Golden West/Highlander weekly newspapers and

$0.09 per share from the receipt of past-due royalty payments from its Mexican newsprint affiliate for the last seven months of 1989 and the first four months of 1990.

Media General is a diversified communications company with newspaper, broadcast and cable television, printing, publishing and newsprint operations.

#90201p6936 07/20/1990 ~PR Newswire

GAITHERSBURG, MD (JULY 20) PR NEWSWIRE - Life Technologies, Inc. (NASDAQ: LTEK) reported that for the second quarter ended June 30, 1990, net income was $3.4 million, an increase of 2 percent over the same period last year. Second quarter 1990 earnings per share of 25 cents were unchanged from last year's second quarter and included charges related to downsizing the company's Molecular Diagnostics business.

Net sales for the second quarter of 1990 were $36.0 million, an increase of 2 percent over the comparable quarter of the previous year. Sales of fetal bovine serum (FBS) were $2.3 million lower in the second quarter of 1990 versus the same period last year because of lower unit selling prices and unit sales. FBS sales in the second quarter of 1990 accounted for less than 20 percent of the company's total sales for the first time in over three years. Sales of Molecular Diagnostics products were $0.2 million, or 16 percent, lower in the second quarter of 1990 than in the previous year's second quarter. Apart from the FBS and Molecular Diagnostics products noted above and divested product lines, unit sales of LTI's other businesses increased $2.7 million, or 11 percent, when comparing second quarter 1990 sales with the same quarter a year earlier. Currency translation effects increased sales for the second quarter of 1990 by $1.1 million over the comparable period in 1989.

Gross margins improved in the second quarter of 1990 compared with gross margins a year ago largely because FBS unit costs have fallen at a rate greater than the decline in unit selling prices.

The LIFO reserve was reduced $0.3 million in the second quarter of 1990 and $2.0 million in the comparable quarter last year, primarily because of FBS unit costs declining. Marketing and administrative expenses increased 18 percent as the company strengthened its organization to exploit new business opportunities and expand its global focus. Research and development expenses were 16 percent greater than in the second quarter of 1989 primarily because of increased spending for cell biology and other new business opportunities.

Operating income of $4.6 million in the second quarter of 1990 was 1 percent higher than last year despite larger losses for Molecular Diagnostics. Also, this year's second quarter operating income was reduced $156,000, or approximately 1 cent per share, for costs related to the recently announced downsizing of the company's Molecular Diagnostics business activities. Otherwise, gross margin improvements were essentially offset by the company's increased investment in research and development and marketing and administrative programs.

Net income for the first half of 1990 was almost $7.0 million, or 51 cents per share, an increase of 4 percent over last year's first half results of $6.7 million or 49 cents per share.

Life Technologies, Inc. develops, manufactures and supplies more than 2,000 products used principally in life science research, commercial manufacture of genetically engineered products and human diagnostics. The company believes it is a leading supplier of sera, other cell growth media as well as enzymes and other biological products necessary for recombinant DNA procedures.

#90201p6937 07/20/1990 ~PR Newswire

RESTON, VA (JULY 20) PR NEWSWIRE - Lafarge Corporation (NYSE: LAF; TSE & ME), one of North America's leading construction materials and cement companies, today announced earnings for the quarter ended June 30, 1990, of $29.4 million, or 57 cents per common equity share.

This compares with second quarter earnings in 1989 of $38 million, or 76 cents per common equity share. Net sales rose 8.9 percent in the second quarter of 1990 to $429.8 million, as compared to $394.5 million last year.

Compared to the same period last year, cement shipments declined 5 percent in the second quarter. On a per-unit basis, average cement costs increased about 1 percent while average cement selling prices remained relatively unchanged.

For the first six months of 1990, the company recorded a loss of $11 million, or 22 cents per share, on sales of $669.2 million. This compares with net income of $18.3 million, or 37 cents per share, on sales of $601.9 million in the first half of 1989.

Lafarge Corporation and its Canadian subsidiary, Lafarge Canada Inc.,

which together are one of the largest manufacturers of cement and construction materials in North America, operate 13 full-production cement plants, with a combined annual rated capacity of 11 million tons. Lafarge is also a significant supplier of concrete-based construction materials particularly in Canada, where Lafarge Canada Inc. is the largest producer of ready-mix concrete and aggregates. The company operates more than 400 construction materials facilities throughout North America. In addition, Lafarge's subsidiary, Systech Environmental Corporation of Xenia, Ohio, is involved in the conversion of waste into fuels for use in cement kilns.

A Fortune 500 company owned 57 percent by Lafarge Coppee of France, Lafarge Corporation, headquartered in Reston, totaled $1.5 billion in sales in 1989.

WILKES-BARRE, PA (JULY 20) PR NEWSWIRE - Elmer J. Klimchak, chairman of the board and chief executive officer of Franklin First Financial Corp. (NASDAQ-NMS: FFFC), announced today that the board of directors voted at their regular July meeting to opt out of all of the anti-takeover provisions of Act 36, which amends the Pennsylvania Business Corporation Law.

The act contains provisions which restricts control share voting, provides a return of certain profits back to the company that were made in an attempted takeover and insulates the directors from certain liabilities attendant to their deliberations. The act also provides all Pennsylvania corporations with the opportunity to opt out of these provisions prior to July 26, 1990. Franklin has chosen to exercise this option.

Klimchak noted, "By opting out of these provisions, the board of Franklin First Financial Corp. reaffirms its commitment to its shareholders. The board is satisfied that the company's current bylaws are appropriate and need not be changed to incorporate the provisions of the act."

Franklin First Financial Corp.'s common stock is listed on the NASDAQ National Market under the symbol "FFFC." The price of its stock at the close of business on July 19, 1990, was $9.750. Franklin First Financial Corp. is headquartered in Wilkes-Barre. Its sole subsidiary, Franklin First Federal Savings Bank, is a federally chartered, federally insured savings bank which conducts operations throughout northeastern Pennsylvania through its 19 full-service offices and two lending centers.

DALLAS (JULY 20) PR NEWSWIRE - Sterling Software, Inc. (NYSE: SSW) today announced the acquisition of Asyst Case Technologies Inc., a systems software company headquartered in Montreal with offices in Ottawa, Toronto and Chicago.

Asyst, a leader in the CASE market, develops and markets a front-end Case tool called The Developer(TM), a workstation-based product for planning, analysis and design and The Integrater(TM), a companion application development repository product.

Sterling said Asyst will become the Asyst Technologies Division in Sterling's Systems Software Group. Michael J. Lyons, president of Asyst, will continue as president of the Asyst Technologies Division in Sterling Software.

Sterling L. Williams, president of Sterling Software, said, "Acquiring Asyst is a very important step for our company. Bringing the Asyst products and people into Sterling Software achieves for us a major objective of providing a full range of application development products, tools, services and support skills covering the whole application development cycle. Asyst's CASE products and education complement our other offerings which include application development systems, multiple platform 4GL's, report writers, cooperative processing and client/server technology products, and our recently announced application development testing product, TestPro. Asyst's products, methodology, and educational services are indeed important additions to Sterling Software's application development offerings."

Asyst is the fourth Canadian-based systems software operation acquired by Sterling in the past year, making Sterling one of the largest software and services companies operating in Canada and marketing Canadian-developed software products internationally.

Sterling Software, headquartered in Dallas, specializes in systems and applications software products, and in professional services for the U.S. federal government.

#90201p6943 07/20/1990 ~PR Newswire

NEW YORK (JULY 20) PR NEWSWIRE - JPS Textile Group, Inc. announced today that it has commenced a cash tender offer for all of its outstanding senior variable rate notes due 1996, senior subordinated discount notes due 1999 and 15-1/4 percent senior subordinated notes due 1999 at a purchase price of $750, $256.07 and $400, respectively, per $1,000 principal amount tendered and a separate cash tender offer for its Series A exchangeable adjustable rate preferred stock at a purchase price of $10 per share tendered. The company is also offering to exchange $1,000 principal amount of its new 6 percent (pay-in-kind) subordinated debentures due 1999 for each $1,000 principal amount of its 14-1/4 percent subordinated debentures due 2000.

As a condition to the valid tender or surrender of JPS securities, holders will be required to consent to certain proposed amendments to the indentures under which the debt securities were issued and certain related agreements and instruments relating to the senior preferred stock and the subordinated debentures.

The tender offers, the exchange offer, the related consent solicitations and withdrawal rights will expire at midnight, New York City time, on Thursday, Aug. 16, 1990, unless extended. Bear, Stearns & Co. Inc. and Donaldson, Lufkin & Jenrette Securities Corporation are acting as co-dealer managers for the debt tender offer and the exchange offer and as financial advisors with respect to the recapitalization. Offering materials with respect to the tender offers, the exchange offer and the related consent solicitations are being mailed today to the holders of record of each class of JPS debt securities and to holders of the senior preferred stock.

Manufacturers Hanover Trust Company has provided JPS with a commitment letter to arrange bank financing for the tender offers and the recapitalization.

JPS Textile Group, Inc. is one of the largest diversified domestic manufacturers of textile and textile related products principally for the apparel fabric, industrial and home fashion markets.

FORT WORTH, TX (JULY 20) PR NEWSWIRE - Texas-New Mexico Power Company, a wholly owned subsidiary of TNP Enterprises, Inc. (NYSE: TNP), today announced that the consortium of contractors for the two units of TNP ONE, the company's Robertson County electric generating project, has certified that the 150-megawatt Unit 1 has achieved the operational standards required for transfer of ownership of the unit.

As a result of such achievement, a consortium subsidiary, Project Funding Corporation, has transferred ownership of Unit 1 to the company's wholly owned subsidiary, Texas Generating Company, and Texas Generating Company has assumed the loan repayment and other obligations of Project Funding Corporation under the construction financing facility for Unit 1 pursuant to an agreement between the company, Project Funding Corporation, The Chase Manhattan Bank, as agent, and a syndicate of U.S. and foreign banks.

The current balance under the construction financing facility is approximately $305 million. Depending upon the timing of completion of additional testing, additional funds may be available under the construction financing facility for the payment of interest during the 39-month loan repayment period.

During this time, the company will operate Unit 1 and will permanently finance the unit. The company will periodically purchase undivided interests in the unit from Texas Generating Company until the company owns the unit outright when the construction financing facility loans are fully repaid. The consortium is obligated to continue testing before the unit will become commercially operational.

The continuing proceedings at the Public Utility Commission of Texas concerning the company's Certificate of Convenience and Necessity for TNP ONE have progressed through the conclusion of hearings before the administrative law judge (ALJ). The company anticipates the ALJ's report and a commission final order within the next 30 days.

As previously announced, the company has filed with the commission an application for increased rates which included Unit 1 in rate base. The hearing on the merits of the case is scheduled to begin Friday, July 20.

The application includes a proposed phase-in plan that would limit the increase requested to 13.34 percent or $43,074,934 during the first year of the plan. This plan calls for a three-step ten-year phase-in of rates to lessen the overall cost impact to customers. Without the phase-in, the company's filing requests a 17 percent rate increase, or an increase of $54,879,334, over adjusted test year revenue.

WILMINGTON, DE (JULY 20) PR NEWSWIRE - Three Delaware science teachers are among 21 national educators who will attend the 1990 DuPont Honors Workshop at the Experimental Station July 30 through Aug. 8. They are Harry Dillner of Christiana High School, William Sokol of Newark High School, and Elliot Mitchell of Tower Hill.

Representing 15 states, most of the teachers are from communities where Du Pont (NYSE: DD) has operating facilities. They are selected for their classroom successes and contributions to science education.

Du Pont scientists and technicians will introduce the teachers to polymer technology and biotechnology through lectures, hands-on laboratory experience and field trips.

This is the seventh year Du Pont has sponsored an honors workshop. The program began in 1984 as a joint effort of DuPont, the National Science Teachers Association and the National Science Foundation, but now is funded solely by Du Pont.

The workshop has a positive effect on the students and communities of attending teachers and helps build continuing programs with local DuPont plants. The teachers apply what they have learned and share their knowledge with colleagues through workshops and presentations.

The workshop is one element of Du Pont's Science Teachers Achieving Results (STAR) program, which helps teachers keep abreast of the latest developments in their fields.

"The workshop is designed as a reward for outstanding service in the teaching profession and as a program of renewal for excellence in teaching

" said John W. Collette, assistant to the vice president of the Central Research and Development Department.

"By giving science teachers a better sense of professional identity and exposing them to the most up-to-date applications of science and technology, Du Pont hopes to stimulate creative approaches to teaching 'real life' science."

"The purpose of the Honors Workshop is to reward excellence," said Peter C. Morrow, manager of corporate contributions. "Our primary goal is to stimulate new ideas and to make science teaching more interesting to both student and teacher." Six of the 1990 attendees have received the Presidential Award for Excellence in Science Teaching.

Du Pont has supported education in science and mathematics for more than 70 years. The corporate aid-to-education program annually distributes more than $15 million worldwide. In 1990 Du Pont expects to contribute more than $2 million to enhance the quality of education for pre-college students. The remaining funds are used for the most part to support colleges and universities.

SHAMOKIN, PA (JULY 20) PR NEWSWIRE - Central Pennsylvania Financial Corp. (NASDAQ: CPSA) today reported earnings for the three months ended June 30, 1990, increased by 6.4 percent to $1,099,000 compared to $1,033,000 in 1989.

Earnings for the first quarter of 1990 amounted to $.54 per share as

compared to $.51 per share in 1989. Net interest income increased by 17.5 percent when compared to the same period in 1989. Net interest income was $3,324,000.

John M. O'Brien, president, said the company's capital-to-asset ratio is 8.52 percent well above the current and fully phased in risk- based capital. He also expressed confidence in the company maintaining its leadership position in profitability when compared to peer group and industry standards.

Central Pennsylvania Financial Corp. is the parent company of Central Pennsylvania Savings Association, which is the 18th largest federally insured savings institution in Pennsylvania. Originally chartered in 1873, Central Pennsylvania conducts business from offices in Williamsport, Danville, Lewisburg, Shamokin Dam, Sunbury, Camp Hill, Mount Carmel, Shamokin and Hershey, Pa. Its Hamilton-Reliance division conducts business from offices in Norristown, Wayne, Warminster, West Point, Pa., and Philadelphia.

DFW AIRPORT, TEXAS (JULY 20) PR NEWSWIRE - American Airlines said today (July 20) it has reached an agreement with U.S. Customs designed to help keep illegal drugs off American's planes.

American will work closely with Customs in sharing information, establishing security procedures, training employees and implementing new technology to prevent the smuggling of drugs on the airline's international flights.

"We are pleased to establish a cooperative relationship with Customs to assure that every reasonable step is taken to prevent traffickers from transporting drugs aboard our planes," said Robert W. Baker, executive vice president-operations.

"This is a tough, tough problem, but with our high security standards and Custom's assistance we have everything in place to fight the battle."

Baker said American is the first major carrier to negotiate such a Super Carrier Initiative Agreement with Customs.

American, expanding rapidly into new international markets, is introducing service this summer from Miami to 20 cities in 15 Central and South American countries.

The cooperative agreement minimizes the likelihood that American's flights will be disrupted or that it will be fined if Customs discovers drugs hidden aboard one of its planes.

In the agreement, American commits itself to take a number of steps, such as restricting access to its aircraft, to discourage smuggling. Customs will assist through such measures as identifying high-risk flights, surveying American's security procedures and recommending improvements.

TOLEDO, OH (JULY 20) PR NEWSWIRE - The Champion Spark Plug Division of Cooper Industries, Inc. (NYSE: CBE) has reached an agreement with representatives of the United Auto Workers regarding the company's announced plant closure and consolidation plan.

The agreement was reached after several rounds of negotiations between the company and local, regional and international U.A.W. officials. It was ratified yesterday by union members at the company's four plants in Toledo and Cambridge, Ohio; Detroit; and Burlington, Iowa.

In April, the company announced plans to consolidate production and close its Toledo and Detroit manufacturing plants. Under the closing agreement, production will be phased out incrementally between now and the end of 1991. Domestic spark plug production will continue at the Cambridge and Burlington facilities. According to Carl J. Plesnicher, Cooper's vice president of employee relations, the agreement provides for orderly phaseout and transition of operations with minimal disruption of production.

Under the agreement, Champion will implement additional programs related to severance allowances, retraining monies, transfer opportunities and retirement benefits, Plesnicher said.

With headquarters in Toledo, the Champion Spark Plug Division is a leading manufacturer of spark plugs, spark plug insulators and ceramic components. It has 6,000 employees worldwide.

Houston-based Cooper Industries, with 1989 revenues of $5.1 billion, is a diversified, worldwide manufacturer of electrical products, electrical power equipment, tools and hardware, automotive products, and petroleum and industrial equipment.

#90201p6959 07/20/1990 ~PR Newswire

BRANFORD, CT (JULY 20) PR NEWSWIRE - Branford Savings Bank (NASDAQ-NMS: BSBC) today reported no earnings for the quarter ended June 30, 1990, as compared to $497,000 or $.32 per share earned in the corresponding period in 1989. Year-to-date earnings are $207,000 or $.13 per share versus $1,115,000 or $.72 per share earned for the same period of 1989.

The bank added $807,000 to its provision for loan losses in the second quarter ended June 30, 1990, as compared to $402,000 in the second quarter of the prior year. After a net charge-off in loans of $690,000, the balance in the allowance for loan losses at June 30 was $1,917,000, representing .69 percent of total loans. The bank is following a plan to increase the allowance to 1 percent of total loans during the current fiscal year in order to meet regulation criteria.

Foreclosed real estate increased from $1,567,000 as of March 31, 1990, to $5,117,000 as of June 30, 1990. Non-accruing loans are $15,902,000 (5.77 percent) of total loans at the end of the period.

Shareholders' equity as of June 30, 1990, was $24,963,000, which equates to $16.03 per share. The bank's equity to assets ratio is 8.71 percent including reserves and 8.09 percent without reserves.

Branford Savings Bank is an FDIC-insured, state-chartered savings bank founded in 1889. Five offices are located in Branford (2), North Branford and East Haven (2).

WORCESTER, MA (JULY 20) PR NEWSWIRE - BankWorcester Corporation (NASDAQ: BNKW) reported net income of $1.6 million or 24 cents per share of comon stock for the second quarter ended June 30, 1990. This compares to $2.2 million or 30 cents per common share for the corresponding period in 1989. Net interest and dividend income of approximately $9.7 million was virtually the same as in the second quarter of 1989. Management provided approximately $1.9 million for possible loan losses in the second quarter. At the end of the second quarter non-performing assets were approximately $47.9 million; net charge-offs during the quarter approximated $1.8 million.

On Feb. 16, 1990 BankWorcester signed a definitive agreement to merge with Citizens Financial Group, subject to a number of significant conditions. One condition is that if the level of BankWorcester's non-performing assets plus certain other items (the "specified amount") exceeds $50 million after all regulatory approvals are received, Citizens may choose not to consummate the merger. As of June 30, 1990, the specified amount was approximately $63.1 million. It is anticipated that the specified amount will fluctuate from time to time. The point in time at which the specified amount is to be measured is after the receipt of all required regulatory approvals.

For the six months ended June 30, 1990, the net loss was $6.3 million or

95 cents per share compared to net income of $5 million or 69 cents per share for the corresponding period last year.

Deposits at June 30, 1990, approximated $858 million vs. $850.4 million on the same date last year. Net loans were approximately $971.5 million compared to $1 billion last year. Assets were $1,098,663,000 on June 30, 1990, vs. last year's $1,127,510,000.

RICHMOND, VA (JULY 20) PR NEWSWIRE - Dominion Resources, Inc. (NYSE: D) today announced consolidated earnings for the second quarter ended June 30

1990, of 85 cents per share of common stock, up 33 cents from the same period in 1989.

The size of the earnings increase is affected by the fact that the second quarter of 1989 had the weakest earnings of any such quarter for several years.

Earnings for 1990 improved because of changes affecting Virginia Power, Dominion Resources' principal subsidiary. Virginia Power contributed 76 cents to total earnings, up from 41 cents in 1989.

The primary factors improving Virginia Power's earnings were lower operating expenses due to Virginia Power's cost-reduction program and completion of major nuclear maintenance activities under way in 1989 and higher base rates that took effect on May 1, 1990, under bond.

Earnings for the 12 months ended June 30, 1990, from continuing operations were $4.52 per share of common stock, up 61 cents from the same period in 1989. In addition, Dominion Resources received a one-time, first-quarter gain of 25 cents per share from the sale of Virginia Natural Gas to Consolidated Natural Gas of Pittsburgh. Earnings from continuing operations of $4.20 per share came from Virginia Power, an increase of 66 cents, while Dominion Resources' non-utility businesses contributed 31 cents, up 1 cent over the 12 months ended June 30, 1989.

Higher electricity sales, especially during the extraordinary cold of December 1989, and lower operating costs were the primary factors accounting for higher earnings in the most recent 12-month period.

HOUSTON (JULY 20) PR NEWSWIRE - Baker Hughes Incorporated (NYSE: BHI) today announced the initial public offering of nine million shares of common stock of BJ Services, a wholly owned subsidiary of BHI, at $20.00 per share in simultaneous United States and International offerings. The shares will trade on the New York Stock Exchange under the symbol of BJS.

Upon completion of the offering Baker Hughes will own approximately 31 percent of BJ's common stock. If the over allotment option granted the underwriters is exercised in full BHI will own approximately 20 percent.

The net proceeds of this offering will be distributed to Baker Hughes together with net borrowings of $25 million under a separate BJ Services credit facility. As a result, Baker Hughes will receive approximately $195 million which will be used in the near term to reduce Baker Hughes' borrowings.

Baker Hughes is a leading provider of products and services for the oil, gas and process industries. BJ is a leading provider of pumping services for the cementing and stimulation of oil and gas wells worldwide.

#90201p6965 07/20/1990 ~PR Newswire

SEATTLE (JULY 20) PR NEWSWIRE - Alaska Air Group Inc. (NYSE: PSE), today reported consolidated second quarter net profit of $9.6 million. This compares with last year's second quarter profit of $10.5 million. Fully diluted per share earnings for the quarter were $0.53 versus $0.64 last year. The number of shares used for the fully diluted earnings calculation was 19.0 million, up from 17.0 million a year ago. The increase was due primarily to the 6-7/8 percent convertible subordinated debentures issued in June 1989.

Operating revenues for the second quarter of 1990 rose 16 percent to $263.3 million from $226.6 million last year, with a 12 percent gain in passenger traffic. Operating expenses rose 18 percent to $246.4 million,

from $208.1 million last year with a 15 percent increase in available seat mile capacity. The operating expense per available seat mile was 11.0 cents, up from 10.7 cents in the 1989 second quarter. Aircraft maintenance expense increased 45 percent, or $6.4 million, due to greater repair costs associated with a maturing aircraft fleet, and the need to shift certain repair work normally accomplished in-house to outside repair agencies.

"Even though current quarter results did not keep pace with last year, positive trends were present," said Bruce R. Kennedy, chairman and chief executive officer. "During the quarter, the passenger yield remained high at 20.3 cents, 4 percent higher than last year's second quarter yield of 19.6 cents. In addition, the price for fuel declined 7 cents per gallon during the recent quarter to an average of 67 cents, down from 74 cents in the first quarter 1990. The current cost is also slightly below last year's price. While maintenance costs have risen appreciably, we anticipate that the repairs performed by outside repair agencies will decline in the second half of the year. Also, maintenance unit costs should decline with the addition of six new MD-80s later this year," noted Kennedy.

For the six months ended June 30, 1990, the company reported consolidated net income of $7.5 million, or $0.35 per share. This is down from 1989's first half net income of $16.9 million, or $1.03 per share. Operating revenues for the 1990 period were $494.1 million, 16 percent greater than the $424.3 million posted a year ago. Operating expenses were $479.9 million, a 22 percent increase over the $394.8 million for the 1989 six month period.

#90201p6971 07/20/1990 ~PR Newswire

SEATTLE (JULY 20) PR NEWSWIRE - One hundred thousand routine flights over five years of service have proven the capability of Boeing 767 twinjets to fly the long-range routes previously flown only by three and four-engined jetliners, Boeing Commercial Airplane Group said today.

The 767s, with optional equipment, received permission in May 1985 to fly routes - most of them over long stretches of water - where the nearest airport was two hours away even with one engine inoperative (called the 120-minute rule).

Until then, they had been required to stay within 60 minutes of such an airport, a rule which limited city pairs that could be connected on a nonstop basis. But statistics compiled over time, plus the addition of certain equipment to the airplanes, convinced authorities of the reliability of the big twins.

There are now six engine and airframe combinations and 17 operators of the Boeing 767 which regularly ply routes that shrink the world and make long, thin routes the speciality of the twinjet. These approved airplanes are called ETOPS aircraft for Extended Twin Operations.

The structure of aviation until the early 1980s was such that three and four-engined airplanes handled all long range routes, including those over water. Twins were relegated to intracontinental travel.

Since then, the twins' range and reliability have increased because of the improved reliability and fuel efficiency of the engines and the reliability and redundancy of systems, such as hydraulics and avionics, that are equivalent to or better than those of three-and four-engined airplanes. More than two years of fleet operating experience were accumulated before the FAA granted initial approval for 767 ETOPS service.

In May 1985, the FAA released guidelines authorizing only those 767s powered by Pratt & Whitney JT9D-7R4 engines to fly to the 120-minute rule. TWA initiated transatlantic service under the new rule. Three months later similar approval was granted the General Electric CF6-80A-powered 767.

By December 1986, 12 operators were flying 49 ETOPS-equipped 767s on long-range flights across the North Atlantic, the Tasman Sea and trans-Sahara - more than 13,000 extended twin flights.

TODAY: Less than four years later, 152 ETOPS-equipped 767s fly more than 3,000 flights per month, having added the South Pacific and Indian Ocean

to the list of long-range routes, extending the reach of the reliable twinjets.

#90201p6973 07/20/1990 ~PR Newswire

FORT WORTH, TEXAS (JULY 20) PR NEWSWIRE - Team Bank, as trustee of the San Juan Basin Royalty Trust (NYSE: SJT), today declared there would be no cash distribution to the holders of its units of beneficial interest of record on July 31, 1990.

Production expenses for the month of July exceeded revenues by approximately $1,491,300 due to increased capital costs and the low sales price of natural gas. Production expenses in May and June exceeded revenues by approximately $1,072,000, resulting in a cumulative excess of $2,563,300. The trust's portion of this excess is approximately $1,922,000.

Capital costs totaled approximately $3,037,300 for the month, primarily due to the drilling of coal seam gas wells on the properties from which the royalty was carved. Production for the properties from which the royalty was carved totaled approximately 2,023,200 Mcf. The average gas price was $1.31 per Mcf.

In accordance with the Royalty Conveyance, the excess of expenses over income must be recovered from subsequent months' royalty income. Southland Royalty Company has advised the trustee that royalty income for the next several months may be negative or negligible due to the anticipated drilling of additional coal seam gas wells, as well as the low seasonal demand for natural gas and the seasonally depressed spot market prices.

RALEIGH, NC (JULY 20) PR NEWSWIRE - The following is a letter to the shareholders of Athey Products Corporation (NASDAQ-NMS: ATPC) from company President and Chief Executive Officer James D. Cloonan:

To the Shareholders: Sales as noted below for the Second Quarter of 1990 have been off due to a slow economic situation in the municipal area, one in which equipment specification writing and budget expenditures have been delayed and put off into the last half of the year. This momentary slowdown in sales has conversely affected profits.

The Company has made excellent use of this time period to develop its production resources, and has spent development dollars in the creation of several new products which will greatly increase our position in the marketplace.

LAS VEGAS (JULY 20) PR NEWSWIRE - California Hotel and Casino today announced that it has completed a $240,000,000 financing for the construction of its new 32-story, 1,500-room tower at the Stardust Hotel and Casino in Las Vegas and for the refinancing of its existing senior debt.

Canadian Imperial Bank of Commerce, First Interstate Bank, and Security Pacific National Bank arranged the financing, which included nine other domestic and foreign banks.

"This financing allows us to complete the transformation of the Stardust into one of the finest properties on the Strip," said William Boyd, chairman of California Hotel and Casino.

When completed in the spring of 1991, the Stardust will contain over 2,500 rooms and a new conference center. The Stardust public areas and existing

guest rooms have previously been extensively refurbished.

Upon completion of the current construction, the company will have invested approximately $175 million in improvements at the Stardust since acquiring the property in 1985.

"The conclusion of this financing in today's difficult lending environment is very gratifying to us, as it demonstrates that the financial community shares our confidence in our company's future. We were particularly pleased that our offer to banks to participate in the loan was oversubscribed," Boyd stated.

California Hotel and Casino, a wholly-owned subsidiary of The Boyd Group, owns and operates four properties in Las Vegas - the Stardust Hotel and Casino, the Fremont Hotel and Casino, California Hotel and Casino, and Sam's Town Hotel, Gambling Hall and Bowling Center; and manages Sam's Town Gold River Hotel and Gambling Hall in Laughlin.

PLYMOUTH MEETING, PA (JULY 20) PR NEWSWIRE - CenterCore, Inc. (NASDAQ: CCOR) an office environments company which provides office furniture workstations and high density filing systems, today announced results for the quarter ended June 30, 1990.

Net sales for the second quarter of 1990 were $9,245,100 compared to $9,156,200 for the comparable period in 1989. The company reported a net loss for the quarter of $390,900 or $0.04 a share, compared to earnings of $96,800 or $0.01 a share, in the second quarter of 1989.

Net sales for the six months ended June 30, 1990 were $19,688,900 compared to $18,630,900 in 1989. The net loss for the first six months of 1990 was $295,900 or $0.03 a share, compared to a profit of $169,400 or $0.02 a share in 1989.

George E. Mitchell, president and chief executive officer, noted that the second quarter of 1990 reflected lower than anticipated sales and a higher level of expense related to the introduction of Airflow 2000, a revolutionary new office air filtration product.

"Preliminary tests indicate the Airflow 2000 reduces by over 50 percent the amount of contaminates normally found in the air of an average office " said Mitchell. "This includes the bacteria, viruses, pollen, dust and other submicronic particles which contribute to upper respiratory infections. These infections are a leading factor in high rates of

absenteeism, which increase costs and lower productivity. The company believes that the use of Airflow 2000 will result in a reduction of overall contaminants and will lead to improved office productivity."

Sick building syndrome and building related illness have corporate executives duly concerned. Employee well-being and the threat of litigation have surfaced as critical issues for corporate America. Airflow 2000 may well be one of the most economical ways to improve indoor air quality in today's environment.

Commenting on the outlook for the balance of the year, Mitchell noted that barring any unusual economic reversals, the company should perform well in comparison to last year.

#90201p6983 07/20/1990 ~PR Newswire

HUDSON, MA (JULY 20) PR NEWSWIRE - Artel Communications Corporation (NASDAQ: AXXX) announced today its operating results for the second quarter ending June 30, 1990. Sales for the current quarter were $1,853,000 compared to total revenues of $2,809,000 in the same period of the previous year which included contract revenues of $1 million associated with a European project marketing agreement. Net loss for the quarter was $196,000 or 5 cents per share compared to $281,000 profit or 7 cents per share during the same period of the previous year. Robert L. Bowman, Artel's president and CEO said, "These revenues were in line with

our expectations as earlier announced in a press release of May 11, 1990."

Total sales for the six months ended June 30, 1990 were $4,070,000 as compared to revenues of $6,026,000 for the same period of the previous year. During the first half of 1989, marketing and license revenues amounted to $2,800,000 with product sales of $3,226,000. Thus product sales for the first six months of 1990 were greater than for the same period of the previous year. Net loss for the current six-month period was $151,000 or 4 cents per share compared to income of $829,000 or 21 cents per share for the same period of the previous year.

Bowman stated, "While the sales level was as expected, vigorous sales activities continue. Nonetheless, longer sales cycles particularly on the part of new customers have been encountered. The company has implemented cost containment actions while maintaining the ongoing new product development programs. The company anticipates some major new product announcements by the end of the year. Such products will accommodate a variety of new standards and will strengthen the company's position in both the data and metropolitan area markets."

Bowman commented that, "While a large number of competitors have made product announcements concerning the new high speed Fiber Distributed Data Interface (FDDI), industry reports indicate that sales in the high speed data market have been far lower than generally anticipated. Nonetheless, industry sources indicate that the future growth potential of this market is significant. Such growth will be stimulated by reductions in product costs and the final adoption of a variety of new pending standards. Accordingly, the company expects level sales for the balance of the current year."

Bowman added, "The company has a strong balance sheet and very little debt. Artel's primary focus on establishing strategic alliances with major high technology companies continues."

Artel Communications Corporation is a manufacturer of high-speed fiber optic communications systems. The 100 Mbps FiberWay(R) flagship networking product provides multi-service networking capabilities and has more than 1,500 systems installed worldwide. Artel's video/graphics products provide high-quality signal transmission for broadcasting, computer graphics, and teleport applications.

The second quarter 1990 results are summarized below:

#90201p6988 07/20/1990 ~PR Newswire

ROSEMONT, IL (JULY 20) PR NEWSWIRE - Lindberg Corp. (NASDAQ: LIND) operating results for the quarter and six months ended June 30, 1990, were announced today by George H. Bodeen, chairman and chief executive officer.

Second quarter sales of $19,844,439 compare to $20,553,462 in the second quarter of 1989, while net earnings were $757,762 as compared to $976,531 last year. Earnings per share of $.16 for the second quarter of 1990 compare to $.21 for the same period of 1989.

As compared to the second quarter of 1989, results from U.S. domestic operations were ahead of the prior year, Bodeen indicated. However, the results for the second quarter of this year were adversely affected by

charges totaling $.07 per share related to the company's 50 percent-owned Brazilian subsidiary, Lindberg do Brasil. Future economic events in Brazil could result in further writedowns of the company's investment in that subsidiary.

Sales for the six-month period were $39,156,425 compared to $41,869,669 for 1989. Net earnings for the period of $1,454,346 compare to 1989 earnings of $1,918,876. First half earnings per share of $.31 in 1990 compare to $.41 for the same period last year. For the first half of 1990 earnings were unfavorably affected as well by the second quarter Brazilian results.

Lindberg is the nation's largest commercial heat treating company, serving the metalworking industry from 21 plants located in major industrial centers throughout the United States and Brazil. Lindberg also owns and operates Harris Metals, a producer of precision aluminum castings; Arrow-Acme, a producer of aluminum and zinc die castings; and Alloy Wire Belt, a producer of conveyor belting products.

DALLAS (JULY 20) PR NEWSWIRE - Business Records Corp. Holding Co.(NASDAQ: BRCP) announced second quarter earnings of $2,544,000 or 53 cents per share today. This compares to earnings of $222,000 or 5 cents per share during the same period last year. During the quarter, the company recorded revenues of $19,915,000 which reflect an eight percent increase over the revenues of $18,489,000 reported during the same period last year.

P.E. Esping, president and chief executive officer of the company, stated that the improved earnings were due primarily to increased election sales associated with the spring election season. Esping also said that, while he is pleased with the increased earnings resulting from the spring primaries, they may not necessarily be reflective of the company's

earnings expectations for the remaining half of 1990.

The Dallas-based company provides land records, election services, and other information services to governmental customers throughout the United States.

#90201p7010 07/20/1990 ~PR Newswire

ANNAPOLIS, MD (JULY 20) PR NEWSWIRE - For the six months ended June 30, 1990, Second National (NASDAQ-NMS: SNFS) earned $4.4 million or 51 cents per share on an unaudited basis, a decrease of $200,000 or 3.7 percent compared with the $4.6 million or 63 cents per share results reported a

year earlier.

The 1990 per share figures reflect the impact of a preferred stock issuance at the end of 1989.

Net operating earnings increased by $.8 million or 21.6 percent, excluding $1.9 million in pretax investment securities gains and increases to general loan loss provisions during the first six months of 1989. Total assets as of June 30, 1990, were $1.76 billion, an increase of $405 million over 1989 second quarter assets of $1.36 billion.

Net income for the second quarter of 1990 was $2.0 million or 23 cents per share, a decrease of 13.8 percent, compared to the $2.3 million or 32 cents per share 1989 results, while net operating earnings remained the same as last year.

Henry A. Berliner, Jr., president and chief executive officer, issued the following statement:

It is obvious that banks and thrifts throughout the country are being impacted negatively by weakness in the real estate markets coupled with more stringent loss reserves requirements imposed by federal examiners. Thrifts are further affected by the rapid implementation of new capital requirements mandated by the Financial Institutions Reform, Recovery and Enforcement Act of 1989 (FIRREA).

Second National's loss experience in its residential lending, both primary and second home is excellent. However, our commercial real estate portfolio is subject to the same general economic downturn facing other financial institutions in our region.

To protect against unanticipated losses, in June the board of directors doubled the monthly contribution allocated to general loan loss reserves to an annualized rate of $2 million and the board has further designated that all non-operating gains from securities transactions be utilized for additions to general loss reserves.

In addition, the company has implemented a conservative posture for the remainder of 1990 by 1) curtailing asset growth; 2) excluding new commercial real estate lending at this time; and 3) discouraging commercial real estate and banking loan renewals which add disproportionately to risk-based capital requirements. This plan will assist the company in maintaining consistent earnings, meeting capital requirements of FIRREA, and achieving greater flexibility in reacting to future regulatory reforms.

For Second National, the aforementioned internal measures cannot help but lower earnings over the next 12 months. However, such steps are necessary

if we are to maintain a prudent lending policy and meet the legal and regulatory requirements which govern our industry. Berliner also stated: As the administration and Congress continue their review of measures to cure the nation's budgetary deficit, they should also address the national downturn in the real estate industry and the obstacles impeding financing the sale of assets of the savings and loan industry acquired by the Resolution Trust Corporation. We believe restoration of limited incentives to invest are indicated. These include capital gains tax relief; restoration of full tax deductibility on Industrial Revenue Bond financings; and restoration of real estate losses offset against other income.

Second National has 37 offices in Maryland, Delaware, Virginia, Pennsylvania and the District of Columbia.

CONTACT: Harry A. Berliner, Jr., president and chief executive officer, 301-266-9200; or William T. Russell, III, chief financial officer, 301-749-8415, both of Second National Federal Savings Bank

OAKLAND, Calif. (JULY 20) PR NEWSWIRE - Safeway Inc. (NYSE: SWY) today announced the election of Paul Hazen, president of Wells Fargo & Co., to the Safeway Board of Directors. Safeway Chairman, President and CEO Peter Magowan said that "the broad experience and financial acumen of Paul Hazen will be most welcome as Safeway moves into its third quarter as a public company."

Hazen joined Wells Fargo in 1970 and became president and chief operating officer of Wells Fargo & Co. and Wells Fargo Bank in July of 1984. He is a graduate of the University of Arizona and received a master's degree in business administration from the University of California, Berkeley, in 1964.

Hazen is chairman of the California Business Roundtable and is active in a wide range of civic, educational and professional organizations. He is, for example, on the Board of Advisors to the University of California's College of Business and Public Administration at Berkeley; a director of the United Way of the Bay Area; a trustee of the San Francisco Museum of Modern Art; and a governor of the San Francisco Symphony. He serves on several corporate boards, including Wells Fargo & Co.'s.

Hazen becomes the first public member of the board elected since Safeway made its initial public stock offering on April 25, 1990.

Safeway is one of the world's largest food retailers, operating more than 1,100 supermarkets primarily in the western United States, western Canada

and the Mid-Atlantic states.

PALATINE, IL (JULY 20) PR NEWSWIRE - Suburban Bancorp (NASDAQ-NMS: SUBBA) today announced second quarter 1990 net income of $1.27 million or $0.34 per share. This compares to second quarter 1989 earnings of $1.85 million or $0.48 per share.

President Gerald F. Fitzgerald Jr. said second quarter results reflect Suburban's return to profitability after a $138,000 loss in the first quarter.

For the first six months of the year, Suburban Bancorp's net income totaled $1.14 million, compared to net income of $4.06 million for the same period of 1989. Earnings per share for the six months ended June 30, 1990, were $0.30, compared to $1.03 a year earlier.

Assets increased 13 percent to $951.01 million on June 30, 1990, from $839.2 million a year earlier. Deposits grew 13.9 percent from $754.3 million to $859.3 million, and loans rose 8 percent from $389.5 million to $421.2 million during the same time period. Growth was generated internally.

Book value per share rose 5.1 percent from $19.09 on June 30, 1989, to $20.06 on June 30, 1990.

AKRON, Ohio (JULY 20) PR NEWSWIRE - NRM Steelastic announced today that it has filed an amended registration statement on Form S-1 with the Securities and Exchange Commission containing a Prospectus for an initial public offering of 3,350,000 shares of common stock of the company, of which 2,800,000 are being offered by the company and 550,000 are being offered by selling shareholders. It is currently anticipated that the initial public offering price will be between $12 and $15 per share. The proceeds of the offering will be used to retire long-term debt.

The offering will be managed by Donaldson, Lufkin & Jenrette Securities Corporation, as representative of the underwriters. The offering will be made both in the U.S. and internationally.

NRM Steelastic is the world's largest independent producer of capital equipment for the tire industry. The company's customers include substantially all of the tire manufacturers in the world. The company designs, manufactures, sells and services tire curing presses, tire building machines, steel belt and ply machines and other tire capital equipment. The company also designs, manufactures, sells and services rubber and plastic extruders, plastic sheet lines and process control systems for tire manufacturers and other industrial customers.

A registration statement relating to these securities has been filed with the Securities and Exchange Commission but has not yet become effective. These securities may not be sold nor may offers to buy be accepted prior to the time the registration statement becomes effective. This press release shall not constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of these securities in any state in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state.

WARRINGTON, PA (JULY 20) PR NEWSWIRE - American Travellers Corp. (NASDAQ: ATVC) announced today that its board of directors voted to exclude the corporation from the control share voting restriction provisions of Pennsylvania's new Anti-Takeover Law -- Act 36.

John A. Powell, chairman of the board and president of the corporation,

stated that the provisions might unfairly deprive shareholders of their right to vote shares, and noted that other anti- takeover measures available to the corporation, including a shareholders rights plan, made the provisions inappropriate to the corporation.

The corporation remains subject to the fiduciary responsibility provisions of the act (which allows directors to make decisions pertaining to the corporation based on evaluations of the effect upon not only the shareholders, but also employees, customers, suppliers, creditors and the communities in which the corporation has offices as well as the long-term and short-term interests of the corporation) and to the disgorgement provisions of the act which are designed to discourage "greenmail."

American Travellers Corp. is principally engaged in the underwriting and sale of long-term care and supplemental accident and health insurance policies.

CLEVELAND (JULY 20) PR NEWSWIRE - Acme-Cleveland Corporation (NYSE: AMT) today reported net earnings for the third quarter of fiscal 1990 of $1.2 million, or $.17 a common share, on sales of $51.9 million. This compares to net earnings for the third quarter of fiscal 1989 of $1.7 million, or $.26 a common share, on sales of $50.0 million. Results for the third quarter of fiscal 1990 included $.2 million, or $.02 a common share, from the sale of unused land.

Net earnins for the first nine months of fiscal 1990 were $4.7 million, or $.71 a common share, on sales of $151.5 million. This compares to net earnings of $4.9 million, or $.75 a common share, on sales of $142.1 million for the same period in fiscal 1989. Results for fiscal 1990 included income of $.8 million, or $.12 a common share, from the sale of the corporation's minority investment in an affiliate company and from the sale of land. Results for fiscal 1989 included income of $1.0 million, or $.16 a common share, from the sale of a minority investment in an affiliate company and from tax refunds.

Third quarter consolidated orders booked were $50.9 million versus $51.5 million for the previous quarter and $54.9 million for the third quarter of fiscal 1989. The order backlog was $31.7 million at June 30, 1990 compared to $41.4 million one year ago.

Acme-Cleveland Corporation manufactures and sells telecommunications products, sensor devices and controls, cutting tools, multi-spindle

machine tools, quality assurance products and systems, and related parts and services.

MIAMI (JULY 20) PR NEWSWIRE - The board of directors of Southeast Banking Corporation (NYSE: STB) today announced the election of Douglas E. Ebert as president and chief operating officer. Ebert was also elected president and chief operating officer of Southeast Bank, N.A. and a director of the bank and the holding company.

Prior to joining Southeast, Ebert was a sector executive vice president with Manufacturers Hanover Trust Company in New York. During his 22 years at Manufacturers Hanover, Ebert held executive management positions in all major line areas including retail, international, U.S. corporate, and investment banking.

"We are excited to have Doug join Southeast Bank," remarked Charles J. Zwick, chairman and chief executive officer of Southeast Bank. "When we began our search, we looked for a leader who could provide the continuity needed to lead Southeast through its expansion of '90s. Doug has those leadership qualities. He is a broad-gauged banker who brings experience in all lines of banking from retail to international," added Zwick.

"I am very proud to be joining Southeast Bank and excited at the opportunities we have," commented Doug Ebert. "What attracted me to Southeast was its excellent franchise in a growth state like Florida and the bank's strong quality in people, products and service. I'm looking forward to getting to know my new colleagues and the challenges and opportunities the Florida market offers."

Southeast Banking Corporation also announced that following the completion of a first quarter examination of its real estate loan portfolio by the Office of the Controller of the Currency (OCC), the bank today has agreed to review various policies and procedures and will take measures -- many previously identified by the bank and already underway -- to strengthen operations in areas such as real estate lending, credit review and reserve methodology, and related management functions. The bank will also keep the OCC informed of its dividend plans.

Southeast and the OCC have also agreed to certain capital ratios to be attained by Southeast Bank by year-end 1990. The most restrictive of these ratios, the bank's tier-one capital to risk-weighted assets, will be 4.25 percent compared with the bank's ratio of 4.22 percent on June 30, 1990.

Southeast also has reached an understanding with the Federal Reserve Bank covering some of the same areas. Southeast will also keep the Federal

Reserve informed of its dividend plans and plans to strengthen its capital position.

Southeast Banking Corporation is the parent company of Southeast Bank, N.A. Southeast Banking Corporation had total assets of $15.8 billion and total deposits of $12.5 billion at June 30, 1990.

CAMARILLO, CA (JULY 20) PR NEWSWIRE - Siemens Solar Industries congratulates all the participants in the GM SUNRAYCE. Although the race has received much public attention, virtually no notice has been given to the largest technical difference between the various solar race cars.

The difference is in the solar cells themselves. There are "space grade" solar cells and there are "terrestrial grade" solar cells. Space cells are extremely expensive and relatively hard to come by. Space grade cells are in the efficiency range of 16 percent to 17 percent, in terms of their ability to transform photons (sunlight) falling on a square foot of surface area.

Terrestrial grade cells (in the 6-14 percent efficiency range) are now providing high grade power to much of the developing world; power for medical vaccine refrigeration, water pumping and other basic "village power" needs.

In Europe and America we use terrestrial grade solar cells for recreational vehicle battery charging, for remote home power, outdoor yard lights, and for things like emergency callboxes along the nation's freeways.

Western Washington University's "VikingXX," using Siemens Solar Industries "terrestrial" photovoltaic cells has accomplished the masterful feat of proving that "regular industrial" solar cells can actually compete toe-to-toe with their space-grade counterparts - at a cost that regular earthlings can afford!

Actually, over the ten-day, 1,650-mile cross-country race course, Western Washington's solar car finished, second overall, 56 minutes behind the first place car, University of Michigan's "Sunrunner," using space-grade cells.

The cars using space-grade cell finished first third and fourth, overall, while the cars using Siemens Solar terrestrial grade cells finished second (Western Washington U), fifth (Crowder College), sixth (MIT), seventh

(Stanford) and eighth (W. Michigan/Jordan) out of the field of 32 cars.

ST. PAUL, MN (JULY 20) PR NEWSWIRE - ZEOS International Ltd. (NASDAQ: ZEOS) today announced it has reached agreement with Marubeni Corp. (Japan) to sell ZEOS personal computer workstations in the Soviet Union.

At the same time, the company announced its intention to open a computer training center in Moscow. The training center, scheduled to open this fall, will be operated by ICC/MKK, a non-profit computer organization headquartered in Moscow. ICC/MKK will also provide service for ZEOS computer systems in the Soviet Union.

According to Greg Herrick, president of ZEOS International, "We are working to establish ZEOS as the vendor of choice for Soviet computer users. We feel there are four key elements necessary for long-term success in the Soviet market: The first is a good product which offers value to Soviet customers. The second is a strong trading partner who fully understands the nuances of finance in a shifting economy. The third is the ability to offer training for end users. The fourth is the facilities and organization to support equipment in the field. With these key elements in place we can move forward in the market.

"Our strategy is one of building a reputation for quality and service in the Soviet marketplace. We will not be competing strictly on the basis of price and our systems sales will be made in hard currency," Herrick said.

ZEOS International manufactures and markets, worldwide, ISA and EISA (Industry and Enhanced Industry Standard Architecture) personal computer systems.

FLINT, MI. (JULY 20) PR NEWSWIRE - Citizens Banking Corp. (NASDAQ: CBCF) announced that the Board of Directors has adopted a Shareholder Rights Plan under which shareholders will receive Rights to purchase shares of preferred stock. Under the Rights Plan, Citizens will distribute one Right to purchase one 1/100 of a share of preferred stock for each outstanding share of its common stock on the Aug. 10, 1990 record date.

In other action, the board declared a regular quarterly cash dividend of

$0.30 per share of common stock to shareholders of record on July 30, 1990 with a payable date of Aug. 15, 1990.

Charles R. Weeks, president and chief executive officer of Citizens, stated, "The Shareholder Rights Plan is designed to ensure that all of Citizens' shareholders receive fair and equal treatment in the event of any proposed takeover and to discourage abusive takeover techniques. While not preventing a takeover, the Rights Plan should encourage anyone seeking to acquire Citizens to negotiate first with the Board of Directors."

Weeks further noted, "The Rights Plan was not adopted in response to any specific effort to acquire control of Citizens. Rights plans have been adopted by many corporations and a growing number of banks and bank holding companies because of the existing takeover environment. The board believes that adoption of the Rights Plan as part of its overall corporate governance program will better enable shareholders to realize the long-term value of their investment in Citizens."

Under the terms of the Plan, in the event any person acquires or makes a tender offer for 15 percent or more of Citizens' common stock, all Rights holders except the acquiring person may purchase Citizens' common stock at 50 percent of the market price. If Citizens is acquired in a merger or business combination after the Rights become exercisable, all Rights holders may purchase common stock of the acquiring person at a similar discount. The initial exercise price of the Rights is $75 and the Rights expire on July 20, 2000. In making the announcement, Weeks indicated that details of the Rights Plan are outlined in a letter which will be mailed to all shareholders.

Citizens Banking Corporation is the eighth-largest bank holding company headquartered in Michigan. The corporation's common stock is traded in the over-the-counter market (NASDAQ: CBCF).

CHARLOTTE, N.C. (JULY 20) PR NEWSWIRE - Duke Power Company (NYSE: DUK) today reported second quarter earnings of $1.02 per share of common stock, down from $1.12 per share a year ago.

"The biggest factor in the earnings decline for the quarter was higher operating and maintenance expenses relative to last year's second quarter " Richard J. Osborne, vice president -- finance, said. "The higher expenses were related to extended maintenance outages at the company's power plants," Osborne said.

Overall kilowatt-hour sales for the quarter were essentially flat. Sales to commerical customers were up 5 percent but sales to residential and industrial customers were down by 3 percent and 2 percent, respectively.

Earnings for the 12 months ended June 30 increased to $5.03 per share from the $4.13 a share recorded for the same period last year.

"Two key factors were responsibe for the increase for the 12 months," Osborne said. "Earnings for the most recent 12 months were not affected by a one-time charge related to a refund ordered by the North Carolina Utilities Commission or a refund ordered by the Federal Energy Regulatory Commission, both of which reduced earnings for the 1988-89 period," he said.

"Led by a strong 5.5 percent increase in sales to our commercial customers overall sales were up slightly for the 12 months," Osborne said.

DALLAS (JULY 20) PR NEWSWIRE - Hinderliter Industries Inc. (AMEX: HND) announced today that at its recent meeting, the board of directors took a number of actions. Subsequent to the resignation of Hinderliter's chairman of the board, John Robertson, Hinderliter relocated its headquarters to Dallas, and the board of directors elected Richard H. Hughes, chairman and chief executive officer to replace Robertson.

Hinderliter plans to propose a minimum of two additional board members at the company's Annual Meeting of Shareholders to be held some time late this year.

Hinderliter's board determined the company was unable to sell its offering of convertible subordinate debentures and that it was requesting the consent of the Securities and Exchange Commission to withdraw its "best efforts offering." Richard H. Hughes, chairman of Hinderliter, stated that the battered public unsecured bond market and investor unwillingness to invest in high yield unsecured debt, caused Hinderliter to withdraw the offering, and Hinderliter's board to explore other alternatives, including a private placement, or the rescheduling, or restructuring of Hinderliter's debt.

Hinderliter also announced it expects Corken International (NASDQ: CORK) to have a record year in sales and earnings for year ended June 30, 1990. Hinderliter has contracted to sell its interest in the Corken manufacturing facility in Oklahoma City with Corken leasing back the facility. Hughes said that Hinderliter also expects to have a contract to sell its 90 percent interest in Electronic Mobile Systems Inc. prior to the end of July. Hughes stated that although the move to Dallas will substantially reduce overhead, Hinderliter is exploring other alternatives to reduce expenses,take advantage of Corken's market share potential and growth opportunities, and consequently, maximize shareholder value.

Hinderliter, through its 83 percent owned subsidiary, Corken International now headquartered in Dallas, is a leading world-wide supplier of component parts for the transfer of alternative fuels and other volatile liquids and gases, such as liquified petroleum gas (LPG), and compressed natural gas (CNG). Hinderliter's common stock is listed on the American Stock Exchange (AMEX: HND).

#90201p7045 07/20/1990 ~PR Newswire

SPRINGFIELD, MO. (JULY 20) PR NEWSWIRE - Syntex Agribusiness, the United States Environmental Protection Agency (EPA), the State of Missouri, and Syntex Agribusiness's corporate affiliates, including Syntex Corporation

(NYSE: SYN), have reached an agreement to settle 26 pending lawsuits involving dioxin contamination in Missouri.

The suits concern Times Beach and a number of other Missouri sites which were contaminated in the 1970s by wastes allegedly transported from a Verona, Mo., plant operated by a tenant of Syntex Agribusiness.

As part of the settlement, the United States and the State of Missouri will dismiss all government lawsuits involving dioxin contamination in Missouri that are pending against Syntex Agribusiness and its corporate affiliates. Lawsuits are expected to continue, however, against Independent Petrochemical Co. (the company that arranged for pickup of the wastes from the plant) and other defendants.

Under terms of the proposed settlement, Syntex Agribusiness will construct and operate a temporary incinerator at Times Beach to process dioxin-contaminated materials from Times Beach and the other Missouri sites named in the lawsuits. Syntex Agribusiness will excavate contaminated materials and demolish and dispose of uncontaminated structures at Times Beach. EPA will be responsible for remedial activities at all sites other than Times Beach, and for transporting dioxin-contaminated soil to Times Beach for incineration.

The work will be conducted in accordance with EPA's Record of Decision for Times Beach. The Record of Decision, published September 29, 1988, describes the remedial work that EPA has determined to be appropriate.

The work is expected to be completed in less than 10 years. Upon completion, Syntex Agribusiness will dismantle and remove the incinerator from the site.

As reimbursement for damages incurred, Syntex Agribusiness will pay the EPA Hazardous Substances Superfund $2 million a year for five years. Payments will commence when the incinerator permit becomes effective, or on April 1, 1991, whichever occurs first.

DAYTON, OHIO (JULY 20) PR NEWSWIRE - Hughes Aircraft Company today unveiled a new, low-cost Liquid Crystal Head-Up Display (HUD) developed for commercial aircraft and military trainers.

Hughes, a subsidiary of GM Hughes Electronics, showed the new HUD for the first time publicly during the United States Air and Trade Show, which

opened Thursday at the Dayton, Ohio, International Airport.

"This new multi-purpose HUD is an unique display device utilizing a back illuminated Liquid Crystal Matrix display," according to Scott Wood, a senior scientist with Hughes' Radar Systems Group, which developed the HUD.

"It is essentially a miniature flat panel TV display, illuminated on one side with a light source, with the image projected on a reflective see-through screen, called a 'combiner,'" Wood said.

The new HUD is driven by the aircraft's on-board computer, which can be programmed to display whatever information from the aircraft's instruments the pilot desires.

Future potential applications for the new HUD, in addition to military trainer aircraft and commercial aircraft, include farm equipment, heavy vehicles, high-speed railroad locomotives, and naval vessels.

Hughes pioneered HUD technology for the U.S. Navy's A-12, Sweden's JAS-39, and the Israeli Lavi aircraft, and automotive HUDs are presently available in the Pontiac Grand Prix and the Oldsmobile Cutlass Supreme.

#90201p7055 07/20/1990 ~PR Newswire

BRYN MAWR, PA (JULY 20) PR NEWSWIRE - Bryn Mawr Bank Corp. (NASDAQ: BMTC) today reported a net income of $573,000 for the second quarter of 1990, off 47 percent from net income of $1,091,000 in the second quarter of 1989.

Second quarter earnings per share were 53 cents compared to $1 last year.

For the first six months, net income decreased 27 percent from $2,160,000 in 1989 to $1,567,000 in 1990. Primary earnings per share for the six-month period were $1.45 for 1990 compared to $1.99 for 1989.

According to Robert L. Stevens, corporation president, "Three factors have combined to reduce the corporation's earnings. First, there has been a slight decrease in deposits as well as a movement within the deposit base from demand accounts to higher interest rate certificates of deposits.

"Secondly, there has been an increase in non-performing loans, the result of a slowdown in sales in the residential real estate market. Finally, a decline in interest rates on loans resulted in a shrinking net interest margin for us."

Total deposits stood at $245.1 million on June 30, 1990, compared to $246.3 million in 1989. Demand deposits have decreased from $67.8 million as of June 30, 1989, to $61 million on June 30, 1990. During the same time frame, certificates of deposits increased from $47.5 million to $58.4 million, while all other interest-bearing deposits decreased from $131 million to $125.7 million.

Non-performing loans, those loans on which scheduled interest and/or principal payments have not been made for 90 days or more, grew from $4,485,000 at June 30, 1989, to $8,006,000 in 1990. As of March 31, 1990, non-performing loans stood at $5,908,000. This increase was primarily in real estate-related loans, including $1,473,000 in real estate owned as a result of loan defaults. The reserve for loan losses stood at $2,646,000 on June 30, 1990, or 1.2 percent of loans, compared to $2,396,000 as of June 30, 1989, or 1.1 percent of outstanding loans.

Total loans increased by 4 percent to $222,458,000 at June 30, 1990, from $214,853,000 last year. Despite this increase in loans, an overall decline in interest rates coupled with an increase in non-accrual loans resulted in total interest income being off $588,000 from $13,969,000 in the first half of 1989 to $13,381,000 for the same period in 1990. A change in the overall deposit mix has resulted in an increase of interest expense of $150,000 from $5,378,000 in 1989 to $5,528,000 in 1990. Said Stevens, "This shrinking net interest margin, the product of lower loan rates, is the primary factor responsible for the decline in earnings being experienced in 1990."

Other income rose 12 percent during 1990 to $2,731,000 from $2,432,000 for the same period in 1989. Fees for trust services led the way with a 23 percent increase over 1989 levels.

Though occupancy expense and other operating costs are down, salaries and employee benefits were up 12 percent from $4,069,000 in 1989 to $4,562,000 in 1990.

The board of directors of Bryn Mawr Bank Corp. today voted to opt out of all the provisions of the new Pennsylvania Anti-takeover Law. The board said it believes that it is in the best interest of current and future

shareholders not to be subject to the provisions of the law.

#90201p7059 07/20/1990 ~PR Newswire

NORTHBROOK, ILL. (JULY 20) PR NEWSWIRE - Woodhead Industries Inc. (NASDAQ: WDHD) today reported lower third quarter net income and earnings per share.

Subsequent to an after-tax charge of $297,000 or 9 cents per share for the settlement of a lawsuit (as indicated in its May 2, 1990 news release), Woodhead had net income for the 1990 third quarter of $1,101,000 or 34 cents per share compared with $1,212,000 or 38 cents per share in the comparable 1989 period.

Alan Reed, chairman and chief executive officer, noted that without the settlement charge, net income for the 1990 third quarter would have been $1,398,000 or 43 cents per share representing a 15.3 percent increase over 1989 third quarter net income.

Sales for the 1990 third quarter were $17,599,000 compared with $18,316,000 in the year-ago period. Reed said the shortfall was primarily due to a weaker domestic order rate and a marked softening in the Canadian economy.

Net income for the nine months ended June 30, 1990 was $3,701,000 or $1.14 per share, representing a 16.6 percent increase over net income of $3,175,000 or $1.01 per share in the 1989 period. Sales for the same nine months of the 1990 fiscal year were $55,038,000 compared with $54,413,000 in the comparable period in 1989.

Commenting on the future, Reed said that despite the possible continuation of slow domestic orders and a soft Canadian economy, Woodhead still expects results for Fiscal 1990 to exceed the previous year.

Working capital at the end of the third quarter was $14,896,000, representing a 4.4 percent increase over $14,273,000 at the end of the 1989 period. Book value per share increased to $8.64 per share at the end of the 1990 period compared with $7.77 per share at the end of the 1989 third quarter.

Return on equity for the 52 weeks ended June 30, 1990 was 18.5 percent compared with 18.2 percent for the 52 weeks ended July 1, 1989. Return on assets for the 52 weeks ended June 30, 1990 increased to 12.4 percent from 10.4 percent for the 52 weeks ended July 1, 1989.

Woodhead Industries Inc. is headquartered in Northbrook, Ill. The company develops, manufactures and markets premium quality, Safety Yellow(R) specialty electrical devices and mechanical motion control products for industrial applications.

PHOENIX, AZ (JULY 20) PR NEWSWIRE - Callahan Mining Corp. (NYSE: CMN)

today reported that the absence of profits from Callahan's silver interests more than offset a major cutback in exploration outlays to produce a first half loss of $1,001,000, equivalent to $.13 per share, compared with a loss of $2,537,000, or $.33 per share, for the first six months of 1989. Consolidated revenues were $7,234,000 vs. $14,141,000 a year ago.

The loss for the second quarter was $102,000, or $.01 per share, compared with a loss of $1,285,000, or $.17 per share, for the same period a year ago. Comparable second quarter revenues were $3,796,000 vs. $6,984,000 last year.

The Flexaust Co., Callahan's wholly owned manufacturing division, produced a 28 percent increase in pre-tax income to $622,000, from $486,000 in 1989. First half sales were $5,884,000 vs. $5,874,000 a year ago.

WESTBOROUGH, MA (JULY 20) PR NEWSWIRE - New England Electric System (NYSE: NES) (NEES) today reported earnings for the first six months of 1990 of $1.05 per average share. This compares to $1.08 earned in the corresponding period last year on fewer average shares. NEES earnings for the six months ended June 30, 1990, were decreased by approximately 4 cents per share due to a new seasonal rate design, which was implemented by its wholesale electric utility subsidiary in 1989. This seasonal rate design involves higher rates during peak months and lower rates during off-peak months. It was designed not to have a significant impact on earnings over a full year.

Earnings for the 12-month period ended June 30, 1990, of $2.32 compare to earnings of $2.08 per average share for the corresponding period ended June 30, 1989.

NEW ENGLAND ELECTRIC SYSTEM AND SUBSIDIARIES

#90201p7074 07/20/1990 ~PR Newswire

COLUMBIA, SC (JULY 20) PR NEWSWIRE - South Carolina National Corporation (NASDAQ-NMS: SCNC) today reported net income of $13.4 million for the second quarter of 1990, compared to $15.6 million earned in the second quarter of 1989. Fully diluted earnings per share were $.60 for the second quarter compared to $.69 earned in the same quarter last year.

Net income was $29.1 million or $1.31 per fully diluted share for the first six months of 1990, versus $30.4 million or $1.35 per fully diluted share earned during the same period of 1989. Net income for the first quarter of 1990 included a one-time addition to income of $6.1 million or $.27 per fully diluted share resulting from a change in the method of accounting for income taxes and a charge of $2.9 million or $.13 per fully diluted share resulting from a tax settlement with the Internal Revenue Service.

Return on average assets for the second quarter of 1990 was .86 percent versus 1.10 percent in the same period last year. Return on average equity was 12.80 percent compared to 15.37 percent in the second quarter of 1989. For the first six months of 1990, return on average assets was .94 percent and return on average equity was 13.98 percent.

Earnings for the second quarter included a $15.2 million provision for loan losses, compared to $4.6 million in the second quarter of 1989. For the first six months of the year, the provision for loan losses totalled $28.6 million versus $9.2 million in the same period last year.

The increased provision reflects the results of the Corporation's internal review of its loan portfolio, the completion of a specialized commercial real estate examination by the Office of the Comptroller of the Currency and an analysis of economic conditions in the Corporation's primary markets. Of the $10.6 million second quarter increase in the provision for loan losses, only $3.8 million resulted from the OCC examination.

Taxable equivalent net interest income, the largest component of the Corporation's earnings, increased 5 percent to $66.0 million from $62.9 million in the second quarter of 1989. The net interest margin was 4.68 percent in the second quarter of 1990, 26 basis points lower than the same period last year, but 11 basis points higher than the first quarter of 1990. Total loans averaged $4.270 billion in the second quarter of 1990, increasing 9 percent over the same period last year, while average deposits rose 14 percent to $4.760 billion. Compared to the second quarter of 1989, non-interest income increased 7 percent to $20.3 million. Non-interest expense decreased 2 percent to $51.8 million in the second quarter of 1990 from $52.6 million in the same period last year.

Problem assets totalled $87.9 million or 2.05 percent of loans at June 30, 1990, an increase of $18.6 million over March 31, 1990. Real estate loans included in problem assets totalled $69.2 million at June 30, 1990, compared to $57.8 million at March 31, 1990. Net loan charge-offs for the second quarter were $3.1 million, equalling .29 percent of loans on an annualized basis, compared to $2.5 million or .25 percent last year. For the first six months of 1990, net charge-offs totalled $8.6 million or .41 percent of loans. At June 30, 1990, the allowance for loan losses was 1.72 percent of loans and 84 percent of problem assets.

At its July meeting, the Corporation's board of directors declared a regular quarterly cash dividend of $.20 per share. The dividend is payable October 1 to shareholders of record on September 10.

Total assets on June 30, 1990 were $6.428 billion compared to $5.828 billion one year before. Earning assets totalled $5.768 billion, compared to $5.259 billion on June 30, 1989. Shareholders' equity was $428.1 million at the end of the second quarter of 1990, or $19.99 on a per share basis.

South Carolina National Corporation is the parent company of South Carolina National Bank, Provident Financial Corporation, SCN Discount Brokerage Services, Inc. and SCN Capital Management Corporation.

#90201p7077 07/20/1990 ~PR Newswire

CHICAGO (JULY 20) PR NEWSWIRE - Boulevard Bancorp Inc. (NASDAQ-NMS: BLVD) said today it had a loss for the first six months and second quarter of 1990 due primarily to an earlier announced increase in its loan loss provision. However, a recently launched restructuring program and lower provisions for loan losses should result in improved financial performance for the second half of 1990.

Richard T. Schroeder, chairman, president and chief executive officer, said the loss was in line with the public announcement made in June -- and that the increase in the company's loan loss provision represented recognition of collection programs on a few loans and does not reflect a general deterioration of the company's loan portfolio.

In reviewing the first half results, the company announced that for the six months ended June 30, 1990, it recorded a net loss of $1.8 million, or 21 cents per share, compared with net income of $6.3 million, or 84 cents per share, in the first six months of 1989. Net interest income was $31.4 million, a 2.0 percent decrease from the $32.0 million reported in the comparable prior period. The provision for loan losses was $13.8 million versus $2.5 million in last year's first half. Non-interest income rose 11.6 percent to $7.5 million from the first six months of 1989. Non-interest expense increased 7.1 percent to $29.5 million from the first six months of 1989. Non-interest expense in 1990 includes $1.0 million in severance costs related to a work force reduction.

For the second quarter ended June 30, 1990 a net loss of $3.8 million, or 57 cents per share, was incurred, compared with net income of $2.8 million or 37 cents per share a year ago. Net interest income fell 1.1 percent to $15.6 million from $15.7 million in the second quarter of last year. The provision for loan losses was $11.8 million, compared with $1.3 million in last year's second quarter. Non-interest income was $4.0 million, a 18.7 percent gain over the $3.3 million reported last year, while non-interest expense rose 4.0 percent to $14.6 million versus $14.1 million.

Boulevard Bancorp, Inc. is Chicago's seventh largest bank holding company with assets of $1.6 billion. Its principal subsidiaries include Boulevard Bank National Association in Chicago, First National Bank of Des Plaines, National Security Bank of Chicago, Citizens National Bank of Downers Grove and Boulevard Technical Services.

#90201p7079 07/20/1990 ~PR Newswire

NAPERVILLE, IL (JULY 20) PRNEWSWIRE - First Midwest Bancorp, Inc. (NASDAQ-NMS: FMBI) today announced that it has consummated the previously reported acquisition of the $75 million Plainfield National Bank, Plainfield, Ill. The transaction was structured as an exchange of stock having an approximate value of $15,500,000 and was accounted for on a pooling of interests basis.

Located in Will County, Ill., adjacent to the fast-developing I-55 corridor, Plainfield is experiencing the rapid growth that much of southwest metro Chicago is enjoying. Commenting on the acquisition, First Midwest President and CEO Robert P. O'Meara said "the Plainfield market offers tremendous opportunity and complements well both our recently established presence in the adjoining Bolingbrook market and our overall presence in the area where we are already the largest bank. The bank has consistently ranked amongst metro Chicago's highest performing banks and for the six months ended June 30, 1990, reported income representing a return on average assets of an outstanding 1.8 percent. The bank will immediately contribute to our 1990 performance and its longer term prospects are really exciting."

The acquisition represents a continuation of First Midwest's strategic plan to primarily focus its business expansion in the fast growing markets of metro Chicago. In addition to the Plainfield acquisition, First Midwest's expansion in the last approximate six months includes the opening of two new banking offices and the acquisition of two former thrift offices, all of which have been assimilated into the company's metro Chicago banking network.

The company recently reported net income for the quarter and six months ended June 30, 1990, of $5,503,000 and $10,337,000, respectively, representing an increase on an income from continuing operations basis of 6.9 percent and 9.6 percent, respectively.

With total assets of $2.1 billion, First Midwest Bancorp is one of Illinois' largest bank holding companies, operating 35 banking offices and five trust offices primarily in northern Illinois.

CINNAMINSON, NJ (JULY 20) PR NEWSWIRE - Jerome Shulman, president and chief executive officer of Wall to Wall Sound & Video Inc. (NASDAQ: WTWS) announced today that the company had filed a voluntary petition in the U.S. Bankruptcy Court for the Eastern District of Pennsylvania seeking to reorganize under Chapter 11 of the U.S. Bankruptcy Code.

Shulman said that this step was taken in response to actions taken by the company's principal lenders against certain of the company's assets. As previously reported, the company was engaged in discussions with certain of its lenders regarding certain covenants contained in the term loan and line of credit agreement with such lenders. When the company and such lenders were unable to satisfactorily resolve these discussions, the lenders demanded immediate repayment of such term loans and lines of credit.

"As a result of disappointing sales results and increased costs and expenses due to recent expansion, the company was unable to comply with certain of the covenants contained in the loan agreement with our lenders and we did not have sufficient cash to pay off these loans after the lenders had demanded accelerated repayment," said Shulman. "We believe that the action we are taking today will give the company the 'breathing room' necessary to complete the company's phase-out of the home electronics portion of our business, to continue to close certain unprofitable stores and to make arrangements to meet our financial commitments. It is our current intention to conduct our home entertainment software business as usual now and in the future."

Wall to Wall Sound & Video Inc. currently operates 88 specialty retail home entertainment stores principally in the six state mid- Atlantic market under the "Wall to Wall Sound & Video" and "Listening Booth" names. The company traces its inception to 1959 and in its early years was primarily a record retailer and wholesaler.

POULSBO, WA (JULY 20) PR NEWSWIRE - Pope Resources, a Delaware limited partnership, reported net income of $1,325,000, or $1.13 per ownership unit on revenues of $7,708,000 for the second quarter ended June 30. This compares to a net loss of $981,000, or 83 cents per ownership unit for the same period in 1989 on revenues of $3,292,000.

For the six months ended June 30, net income totalled $2,750,000, or $2.34 per ownership unit on revenues of $13,825,000. Revenues from the corresponding period in 1989 were $11,822,000 with net income of

$3,885,000, or $3.30 per ownership unit.

"Second quarter results reflect normal performance in tree farming, land marketing, and improving results in residential development," said George Folquet, president and chief executive officer. "The twin factors of strong timber prices and keen interest in Puget Sound real estate have combined to maintain our healthy earning pace of the first quarter."

Pope Resources is a master limited partnership and owns 72,000 acres of timberland and development property in the Puget Sound area of Washington State.

#90201p7085 07/20/1990 ~PR Newswire

BRIDGEPORT, Conn. (JULY 20) PR NEWSWIRE - First Connecticut Small Business Investment Company (AMEX: FCO), a federally licensed SBIC, said today that it will amend its financial statements for the fiscal year ended March 31, 1990, to add pertinent information concerning certain participation agreements related to long-term loans and investment made by the company.

The company anticipates that its March 31, 1990, balance sheet will be amended to reflect an increase in its portfolio carrying value and the establishment of a liability for an equal amount of demand obligations preliminarily estimated at approximately $30 million.

The participation agreements give the participants the right to put loans back to the company on short-term notice. Previously, these participations were netted and not included on the balance sheet. The company said it does not anticipate any change in its previously reported statement of operations, earnings or net worth.

From April 1, 1990, through July 18, 1990, First Connecticut purchased participations totaling approximately $5 million under the above arrangements. Such purchases were funded through cash available from operations, borrowings on the company's line of credit, and funds received from new participations.

The company said the previously issued financial statements and accompanying report of Coopers & Lybrand, the company's auditors, included in the company's fiscal 1990 annual report should no longer be relied upon. Revised financial statements, disclosures and auditors' report will be issued upon completion of review of these matters.

WASHINGTON (JULY 20) PR NEWSWIRE - The Office of Thrift Supervision (OTS) today placed Commonwealth Savings Association, New Orleans, in receivership and chartered a new federal mutual institution to take its place.

The new institution, Commonwealth Federal Savings Association, will assume certain assets and liabilities of the old thrift, and will operate in conservatorship under the management of the Resolution Trust Corporation.

The receivership did not result in any interruption of Commonwealth's day-to-day operations. The institution and its one branch in Metairie, La., will remain open for business as usual. Holders of insured accounts are not affected by the action, which was taken by OTS to protect insured depositors and the interests of the thrift insurance fund. Deposits remain insured to the $100,000 legal limit.

OTS initiated the action because Commonwealth was operating in an unsafe and unsound condition and has suffered losses that have depleted all of its capital, with no prospect of replenishment without federal assistance.

Commonwealth's condition is due primarily to the unsafe concentration of up to 90 percent of its assets in loans secured by investment-type, non-owner occupied rental properties that have been adversely impacted by the severe economic downturn in the New Orleans metropolitan area.

Commonwealth has reported continuous net losses since January 1987. The institution is insolvent in that it has negative tangible, core and risk-based capital.

As of May 31, 1990, Commonwealth reported assets of $44.76 million, liabilities of $47.7 million, and tangible capital of negative $2.9 million, for a tangible capital-to-assets ratio of negative 6.64 percent.

VANCOUVER, BRITISH COLUMBIA (JULY 20) PR NEWSWIRE - Fletcher Challenge Canada and MacMillan Bloedel have signed firm agreements to purchase pulp from a newspaper recycling plant proposed for the Vancouver area by Newstech Recycling Inc., the three companies said today in a joint announcement.

The plan to build the plant for start-up in the fourth quarter of 1991 has received approval from an intergovernmental Major Projects Review Committee. It will be the first plant of its kind in Canada producing market pulp from recycled fibre.

Stuart Belkin, president of Newstech, said the pulp purchase agreements were crucial to the project's viability. Under the agreements, Fletcher Challenge Canada and MacMillan Bloedel will each buy half of the recycling plant's expected 122,500 tons a year of pulp production for use in their paper-making operations.

Jim Christensen, Fletcher Challenge Canada's senior vice president and technical director, said the arrangement with Newstech is his company's first step toward meeting its objective to include recycled fibre in its newsprint production.

A number of U.S. states where B.C. producers sell newsprint have introduced legislation that will require newspaper publishers to include specified proportions of recycled fibre in their publications.

''We are pleased to be associated as a customer of Newstech's venture, which will help us meet our newsprint marketing requirements while providing environmental benefits by reducing the amount of solid waste going to landfill,'' Christensen said.

Newstech proposes to build and operate the $80-million facility on a site near the Fraser River in Coquitlam. It would employ 70 people and utilize about 140,000 tons of old newspapers and magazines annually at full capacity.

Belkin said discussions are continuing with the Greater Vancouver Regional District seeking a long-term agreement that ensures the availablilty of sufficient quantities of waste paper from the 22 GVRD member municipalities. ''In fact the project has the potential to provide a local market for all available recyclable groundwood papers in B.C. for the foreseeable future.''

Newstech Recycling Inc. is a wholly owned subsidiary of Balaclava Enterprises, which is the management and holding company of the Belkin

family of Vancouver.

LAGRANGE, GA (JULY 20) PR NEWSWIRE - Interface Inc. (NASDAQ: IFSIA) announced today the signing of an exclusive sales and license agreement with General Polymers Corp. for incorporation of the company's unique antimicrobial agent, Intersept(R), into General Polymers' epoxy and terrazzo flooring systems.

The company's subsidiary, Interface Research Corp., and General Polymers Corp. entered into the long-term arrangement under which General Polymers will have the exclusive right to incorporate Intersept into most of its flooring systems in the United States and its territories.

Intersept, which inhibits the growth of a wide variety of bacteria and fungi, including mold and mildew, is expected to be an ideal product enhancement for General Polymers' broad range of high quality epoxy and terrazzo flooring systems.

Ray C. Anderson, chairman and chief executive officer of Interface, stated: "We are very pleased to have reached a definitive agreement of this nature with a company of General Polymers' stature. We believe both companies will realize substantial benefits from the relationship."

The company anticipates that sales of Intersept, which is manufactured by Rockland React-Rite Inc., the company's chemical manufacturing subsidiary, will be enhanced due to General Polymers' sizeable market share of epoxy flooring products.

According to Anderson: "Establishing this relationship with General Polymers has moved the company another step toward our ultimate goal of being able to provide our customers with the widest possible range of interior finish materials which incorporate a blend of functionality, aesthetic appeal and indoor environmental enhancements. The new products which will become available as a result of this cooperative effort should be of special interest to the growing number of design and environmental specialists who have begun to focus on indoor air quality concerns ('Sick Building Syndrome')."

Interface Inc. is the world's largest manufacturer of carpet tiles under the Interface and Heuga brands, and interior fabrics under the Guilford of Maine brand, for use in offices, healthcare facilities, airports,

educational and other institutions, and retail facilities. The company also manufactures carpet tiles for residential use. In addition, the company engages in the formulation and sale of chemicals used in various rubber and plastic products, and offers Intersept under a licensing program to manufacturers of other products. The company holds and has pending patent applications for use of Intersept in a wide range of products.

#90201p7094 07/20/1990 ~PR Newswire

WASHINGTON (JULY 20) PR NEWSWIRE - The Office of Thrift Supervision (OTS) today placed Mainstay Federal Savings Bank, SLA, Red Bank, N.J., in receivership and chartered a new federal mutual institution to take its place.

The new institution, Mainstay Federal Savings Bank, F.S.B., will assume certain assets and liabilities of the old thrift and will operate in conservatorship under the management of the Resolution Trust Corporation.

The receivership did not result in any interruption of Mainstay's day-to-day operations. The institution will remain open for business as usual. Holders of insured accounts are not affected by the action, which was taken by OTS to protect insured depositors and the interest of the thrift insurance fund. Deposits remain insured to the $100,000 legal limit.

OTS initiated the action because Mainstay was operating in an unsafe and unsound condition in that it had excessive levels of high-risk and non-performing assets and delinquent loans. In addition, Mainstay had incurred losses that were likely to have depleted substantially all of it capital, with no prospect of replenishment without federal assistance.

Mainstay's condition is due primarily to an overconcentration of high-risk acquisition, development and construction (ADC) loans, amounting to 46.5 percent of its assets. A significant portion of those loans are now delinquent.

Although Mainstay has curtailed the origination of these loans within the past year, the overall quality of its loan portfolio is unsatisfactory and continues to deteriorate. The consequences of this high-risk strategy have been exacerbated by the weakness of the New Jersey real estate market.

Rising delinquencies, coupled with a minimal level of local retail

deposits and a high cost of funds, exposed Mainstay to inordinate risk. Assets classified as substandard, doubtful or loss increased sharply from $9.8 million, or 4.8 percent of total assets, as of December 1988 to $52 million, or 22.5 percent of assets, as of January 1990.

Although Mainstay reported positive tangible capital as of March 31, 1990, the institution's capital position was expected to decline quickly. The institution has negative core and risk-based capital.

As of March 31, 1990, Mainstay reported assets of $230.6 million, and liabilities of $221.4 million and tangible capital of $8.4 million for a tangible capital-to-assets ratio of 3.6 percent.

#90201p7095 07/20/1990 ~PR Newswire

WASHINGTON (JULY 20) PR NEWSWIRE - Capital Bank, N.A. today reported net income of $115,000, or $.30 per share, during the first six months of 1990 compared with net income of $301,000, or $.80 per share, during the six-month period ended June 30, 1989. Earnings for the second quarter ended June 30, 1990 were $40,000, or $0.10 per share, compared with net income of $140,000, or $.37 per share, during the second quarter of 1989.

Chairman and President Abel Holtz attributed the decline in earnings primarily to an increase in the provision for possible loan losses. "The bank continues to follow a conservative policy of increasing its reserves in view of the economic downturn in the real estate markets in the Washington, D.C. metropolitan area and nationally," Holtz said.

At June 30, 1990, total assets amounted to $102.5 million, a 22 percent increase from $84.2 million a year ago, and net loans rose 11 percent from $58.7 million to $65.1 million. Deposits totaled $93.3 million, up 34 percent from $69.8 million at June 30, 1989.

Stockholders' equity, a major barometer of the bank's financial strength, grew from $7.2 million at June 30, 1989 to $7.6 million at mid-year 1990. Capital Bank, N.A.'s primary capital ratio at June 30, 1990 was 8.85 percent.

Capital Bank, N.A. is headquartered in Washington, D.C. on Connecticut Avenue, N.W., and has branch offices in Friendship Heights and Adams Morgan.

#90201p7098 07/20/1990 ~PR Newswire
WASHINGTON (JULY 20) PR NEWSWIRE - The Student Loan Marketing Association (Sallie Mae) (NYSE: SLM) today announced a third quarter 1990 dividend on its voting and non-voting common stock of 13 cents per share, the same as that paid for the previous quarter.

The dividend on the common stock will be paid on Sept. 17, 1990, to shareholders of record on Sept. 4, 1990.

The corporation also declared a third quarter 1990 dividend of 5 percent, or 62.5 cents per share, on its adjustable rate cumulative preferred stock. That dividend rate is tied to yields on certain U.S. Treasury obligations, but is never less than 5 percent nor more than 14 percent per annum. The dividend on the preferred stock will be paid on Oct. 1, 1990, to shareholders of record on Sept. 17, 1990.

At June 30, 1990, Sallie Mae's common shares issued and outstanding consisted of 12.5 million shares of voting common stock and 85.3 million shares of non-voting common stock.

The non-voting common stock is traded on the New York Stock Exchange under the symbol SLM; the voting common stock, of which ownership is restricted to certain financial and educational institutions, is traded on the NASDAQ National Market System under the symbol SLMAJ. The preferred stock, of which 4.3 million shares were outstanding at June 30, 1990, trades on the NYSE.

Sallie Mae is the major financial intermediary serving the education finance market. By buying insured student loans and providing other financial services to financial and educational institutions, Sallie Mae replenishes local supplies of student credit. The corporation owns nearly 30 percent of all guaranteed student loans outstanding today.

STAMFORD, CT (JULY 20) PR NEWSWIRE - James E. Stewart, chairman of the board and chief executive officer of Lone Star Industries, Inc. (NYSE: LCE), today reported second quarter pre-tax profits of $6.1 million, up from the $3.7 million for the same period in 1989. Last year's second quarter benefited from the recognition of $5.6 million or $.34 per share of investment tax credits. As a result, net after-tax income comparisons

for the quarter were $1.5 million or $.02 per share, versus $6.6 million or $.32 per share in 1989.

For the six months ended June 30, 1990, the net loss was $9.3 million or $.71 per share, versus $9.7 million or $.74 per share in 1989.

Net sales for the second quarter were $71.2 million versus $96.3 million last year. Net sales for the first six months were $113.3 million compared to $154.5 million in the comparable period last year. A major factor contributing to the lower sales for both periods is 1989 sales from operations held for sale which are not reported in 1990 results.

Stewart said, "We continued to make good progress with our restructuring program during the second quarter. Important reductions in costs, particularly in selling, general and administrative expenses, have been achieved, with additional cutbacks planned for the balance of the year. We continue to look for at least a $20 million reduction in overall SG&A expenses during 1990, with the full benefit of these actions felt in 1991-92.

"During the second quarter," Stewart said, "proceeds from asset dispositions totaled more than $200 million, including an agreement to sell our holdings in Tarmac America preferred stock for $147 million. Cash proceeds from this transaction will be received no later than Sept. 28, 1990," he said. "This amount, coupled with the $123 million of transactions previously completed, brings the total, thus far in our program, to approximately $325 million.

"There is still more to be accomplished in the way of asset dispositions under our program," Stewart said, "and we are aggressively pursuing each of these transactions.

"In the meantime, our basic businesses are performing in line with expectations," Stewart noted. "The Northeast construction markets continue to be weak, as has been the case in the Southwest, where several assets are slated for sale under our restructuring program.

"On the other hand, operations in northern California, Hawaii, and the Midwest continue to perform well. These are among the important assets we are retaining in the new Lone Star that will carry us into the growing markets of the nineties," Stewart said.

Lone Star Industries and its affiliates are leading producers of cement and a major source of ready-mixed concrete, sand and gravel, crushed stone and other construction materials.

BUFFALO, NY (JULY 20) PR NEWSWIRE - David N. Campbell, Chairman and Chief Executive Officer of Computer Task Group, Inc. (NYSE: TSK) (CTG) announced today that Victor E. Millar, Chairman and Chief Executive Officer of PSF Management International, Inc., has accepted a seat on CTG's Board of Directors.

Campbell said, "It is a distinct honor to have an industry expert of such magnitude join CTG's board. Mr. Millar has gained international renown as an expert on the use of information for competitive advantage. He is also one of the foremost experts on the management of professional services firms. The breadth of his expertise and experience will be a great asset to CTG and its shareholders."

From 1958 to 1986, Millar developed an international reputation in the field of information consulting through his leadership role at Arthur Andersen & Co., the world's largest consulting firm with fees in excess of $1.3 billion. Millar rose in the Andersen organization to become the firm's Managing Partner - Practice. In that capacity, he was responsible for the worldwide professional practices for Audit, Consulting, and Tax together with training, marketing, and strategic planning.

In 1986, Millar joined Saatchi & Saatchi Company PLC, the world's largest communications and advertising company, in order to build a consulting firm under the Saatchi umbrella. By 1988, the Consulting Group, called Saatchi & Saatchi Consulting Ltd., had become the tenth largest worldwide consulting firm with operations in 27 countries. Millar served as Chairman and Chief Executive Officer of Saatchi & Saatchi Consulting Ltd.

In June 1989, the parent company announced its decision to sell its consulting operation to concentrate once again on advertising.

Shortly thereafter, Millar began PSF Management International, Inc. to counsel professional services firms on critical management issues.

Millar holds an M.B.A. from the University of California at Berkeley. Computer Task Group is one of the largest international consulting, systems integration and professional services firms. CTG employs more than 3,000 professionals through a network of nearly 60 locations in the United States, Canada, United Kingdom and West Germany. Listed on the NYSE under the symbol TSK, CTG serves more than 1,400 clients in the U.S. and abroad, including 85 of the Fortune 100.

HOLLYWOOD, FL (JULY 20) PR NEWSWIRE - HEICO Corporation (AMEX: HEI) today announced that its board of directors has authorized the additional purchase of up to 250,000 shares of the company's stock.

In February 1990, the company initiated a stock buyback of up to 150,000 shares. In May 1990, an additional 200,000 shares were authorized. To date, it has purchased approximately 300,000 shares.

The additional shares bring the total authorized buyback to a maximum of 600,000 shares, out of a total of 3.2 million shares outstanding before the commencement of the buyback program. The company currently has 2.9 million shares outstanding. The shares will be purchased in the open market, from time to time, depending on market conditions and will be funded by current cash balances.

The additional stock buyback plan was approved in light of the board's continuing belief that the current share price does not accurately reflect the company's inherent value.

#90201p7108 07/20/1990 ~PR Newswire

MIAMI (JULY 20) PR NEWSWIRE - Capital Bancorp today reported second-quarter 1990 consolidated net income of $1.3 million, or $.28 per share, compared with $2.2 million, or $.50 per share, for the second quarter of 1989. Earnings for the six months ended June 30, 1990 were $562,000 or $.12 per share, compared with $4.3 million, or $.95 per share, during the first half of 1989.

Consolidated figures include the results of Capital Bank, Capital Factors, Inc. and Capital Trading Group, Inc.

The holding company attributed the decline in earnings primarily to provisions for losses on the liquidation of the holding company's export trading subsidiary, Capital Trading Group, Inc. In addition, the net interest margin and letter of credit fee income at Capital Bank declined while operational expenses increased due to acquisitions and internal growth.

At June 30, 1990, Capital Bancorp's total assets were $1.1 billion, up 14 percent from $959 million a year ago. Deposits were $817 million, up 13 percent from $721 million at June 30, 1989, and net loans were $594 million, an increase of five percent from $567 million a year ago. Stockholders' equity was $61.1 million at June 30, 1990, up four percent from $59.0 million at mid-year 1989.

At June 30, 1990, Capital Bank's primary capital ratio stood at 7.6 percent and Capital Bancorp's primary capital ratio was 6.7 percent.

Capital Bancorp, a Florida bank holding company, is the parent of Capital Bank, which has 26 South Florida offices and a factoring subsidiary, Capital Factors, Inc. Capital Bancorp is affiliated with $294 million-asset Capital Bank of California based in Los Angeles and $103 million-asset Capital Bank, N.A. based in Washington.

#90201p7110 07/20/1990 ~PR Newswire

NORTH PALM BEACH, Fla. (JULY 20) PR NEWSWIRE - FPL Group, Inc. (NYSE: FPL) today announced unaudited operating results for the second quarter and the six months ended June 30, 1990.

For the second quarter, earnings per share were $0.72 compared with $0.85 for the same period last year. Net income was $96,746,000 compared with $111,077,000 for the second quarter last year, and operating revenues were $1,575,314,000 compared with $1,530,119,000 last year. Average shares outstanding for the quarters were 135,204,054 and 131,121,667, respectively.

For the six months ended June 30, 1990, earnings per share were $1.01 compared with $1.39 for the first half of 1989. Net income was $136,136,000 compared with $181,626,000, and operating revenues were $2,932,778,000 compared with $2,895,892,000 last year. Average shares outstanding for the six-month periods were 134,741,789 and 131,121,667, respectively.

FPL Group, Inc. is a diversified holding company whose principal subsidiary is Florida Power & Light Company, one of the largest investor-owned electric utilities in the nation. FPL Group's non-utility operations include insurance, non-utility energy production, agriculture, technical services, real estate and cable television. FPL Group's common stock is traded on the New York, Tokyo and London stock exchanges.

#90201p7118 07/20/1990 ~PR Newswire

NEW YORK (JULY 20) PR NEWSWIRE - Merrill Lynch Capital Markets announced today a new municipal security underwritten for Chrysler Financial Corporation. The offering, in the amount of approximately $35 million and known as CFC-9 Tax-Exempt Grantor Trusts, is the first registered tax-exempt asset backed security issued for the municipal market. The offering was priced July 19.

Notable features of this security include:

-- The asset backed certificates provide the first opportunity for retail investors to participate in what Chrysler Capital Corporation estimates to be a $5 to $6 billion annual municipal lease market. Changes in the tax law and Chrysler Capital's success in securing a large number of municipal leases have induced Chrysler Capital to securitize its municipal leases in the form of grantor trusts.

-- Each trust is comprised of tax-exempt leases originated and serviced by Chrysler Capital Corporation. The leases were entered into with state or

local government entities. The leases primarily financed equipment -- including school buses, police cars, computers, communication equipment and energy systems.

-- The rapid amortization structure provides investors with a monthly rather than semi-annual cash flow, giving investors the ability to reinvest proceeds sooner than they could with a traditional municipal bond.

Certificates from the offering are insured by the Municipal Bond Investors Assurance Corporation (MBIA). They will be rated "Aaa" by Moody's and "AAA" by Standard and Poor's.

These securities are offered for sale solely pursuant to the prospectus, a copy of which may be obtained from Merrill Lynch Capital Markets, Merrill Lynch World Headquarters, World Financial Center, North Tower, New York, N.Y. 10281-1201,

This press release shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of these securities in any state in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state.

#90201p7119 07/20/1990 ~PR Newswire

DALLAS (JULY 20) PR NEWSWIRE - Texas Instruments Inc. (TI) (NYSE: TXN) today reported its second quarter 1990 financial results.

TI's orders for the second quarter of 1990 were $1397 million, essentially unchanged from the same period of 1989. Orders were up 28 percent in digital products and 1 percent in components; orders were down 24 percent in defense electronics and 13 percent in metallurgical materials.

TI's net revenues for the second quarter of 1990 were $1592 million, down slightly from the same period of last year. Net revenues were up 18 percent in digital products and were unchanged in defense electronics; net revenues were down 9 percent in components and 15 percent in metallurgical materials.

Second-quarter net revenues include royalties of $43 million, compared with $67 million for the same period of a year ago. Last year's second quarter included $38 million in one-time royalties.

Profit from operations for the second quarter was $19 million, down from $135 million a year ago. Compared with the first quarter of 1990, TI's operating performance improved in the second quarter. Operating performance was slightly better in components and defense electronics and was essentially unchanged in digital products and metallurgical materials. The components and digital products segments continued to operate at a loss.

The tax rate of 41 percent in the second quarter of 1990 was up from the 37 percent rate in the first quarter to adjust to the current estimate of 39 percent for the year.

For the first six months of 1990 net revenues were $3128 million, down 3 percent from the same period of 1989. The decrease was primarily because of lower memory revenues in the components segment. Included in net revenues for the first half of 1990 and 1989 are royalty revenues of $78 million and $102 million, respectively.

Profit from operations for the first six months of 1990 was $18 million, compared with $237 million in the same period last year. Lower memory prices and the effect of higher start-up costs for new products and capacity in the components segment were the major factors contributing to the decrease in operating profits.

Net income for the first half of 1990 was $24 million, compared with $191 million for the first six months of 1989. The financial results for the first half of 1990 include a pretax, nonoperating gain of approximately $15 million from the sale of a majority interest in TI's photomask operation. Earnings per common share were $0.07 in the first six months of 1990, compared with $2.04 in the same period of last year.

During the second quarter of 1990, cash and cash equivalents plus short-term investments were drawn down by $116 million to $326 million as of June 30, 1990, primarily to support capital expenditures. TI's debt-to-equity ratio at the end of the second quarter was 0.27. The company expects to increase debt by about $80 million in the second half of 1990 to supplement operating cash flow by utilizing international incentive-rate financing facilities.

TI's backlog of unfilled orders as of June 30, 1990, was $4357 million, down $273 million from the end of last year's second quarter and down $194 million from the end of this year's first quarter. Reductions in defense electronics more than offset increases in other businesses.

TI-funded R&D was $134 million in the second quarter of 1990, compared with $138 million for the same period of 1989, and was $265 million for the first six months of this year, compared with $266 million last year.

Capital expenditures for the second quarter of this year were $250 million compared with $218 million in 1989's second quarter, and were $478 million in the first half of this year, compared with $368 million in the same period of 1989. Depreciation in the second quarter of 1990 was $134 million, compared with $107 million in last year's second quarter, and was $256 million for the first six months of this year, compared with $206 million last year.

Texas Instruments Inc., headquartered in Dallas, is a high-technology company with sales and manufacturing operations in more than 30 countries. TI develops, manufactures and markets semiconductors, defense electronics systems, software productivity tools, computer systems, industrial automation and control systems, electrical controls, metallurgical materials, and consumer electronics products.

MELBOURNE, FL (JULY 20) PR NEWSWIRE - Harris Corporation (NYSE: HRS) has appointed E. Courtney Siegel as vice president-general manager of the Computer Systems Division in Fort Lauderdale. He reports to Phillip W. Farmer, president of the company's Electronic Systems Sector.

Siegel was formerly vice president of Standoff Weapons at Rockwell Corporation's Missile Systems Division in Atlanta. Prior to joining Rockwell, Siegel was vice president of Harris Government Support Systems Division operations in Orlando, where he helped build the operation from a start-up to a successful, multi-million-dollar business. He first joined Harris from General Electric, where he served in various engineering and management capacities.

Siegel holds a bachelors degree in engineering from the University of Central Florida.

Harris Computer Systems Division provides real-time computer systems and software for aerospace simulation, radar, signal processing and command, control, communications and intelligence.

Harris Corporation, with worldwide sales of more than $3 billion, is focused on four major businesses: Advanced electronic systems, communications, semiconductors, and an office-equipment distribution network.

#90201p7125 07/20/1990 ~PR Newswire

WICHITA, KS (JULY 20) PR NEWSWIRE - Fourth Financial Corp. (NASDAQ: FRTH) announced net income of $636,000 for the second quarter ended June 30, 1990 as compared with net income of $8.7 million for the like period a year earlier. As previously reported, second quarter earnings were affected by the company's decision to increase its combined provisions for credit losses and losses on other real estate and nonperforming assets by $10 million. Net earnings for the first six months of 1990 were $9.3 million compared to $17.1 million for the like period last year. Stockholders' equity grew by 11.8 percent to total $281 million of 6.8 percent of assets at June 30, 1990. The board of directors declared a cash dividend of 22 cents per share payable Sept. 1, 1990 -- its 84th consecutive quarterly dividend.

Total assets at quarter's end were $4.2 billion, a 436.8 percent increase from June 30, 1989. Deposits totaled $3.5 billion, a 51.3 percent increase from a year earlier.

The company's significant growth can be attributed to its aggressive acquisition program. During the second quarter, Fourth Financial was involved in two bank acquisitions and three savings and loan transactions which resulted in core deposit growth of $783 million. The company purchased only high quality residential loans in the thrift transactions. The corporation also merged its three Johnson County, Kansas banks during the quarter, creating the state's third largest bank.

"Fourth Financial continues to be the leading bank holding company in Kansas. The company has a strong capital base and a long history of solid financial performance. Considering the state of the real estate market, we felt it prudent to strengthen our loan loss reserve, even though it negatively affected earnings. It is anticipated that Fourth Financial's earnings will rebound in the third quarter," said Chairman Jordan L. Haines.

Nonperforming assets of $29.8 million were 1.35 percent of total loans of $2.2 billion at the end of the second quarter. This represents an increase of 15.4 percent from the prior quarter. The new level of reserves provides a ratio of loan loss reserves to nonperforming assets of 98 percent. The decision to increase reserves can be attributed primarily to deteriorating conditions in Kansas commercial real estate as well as the full realization of losses associated with a Kansas City automobile leasing company.

Headquartered in Wichita, Fourth Financial's primary business is the ownership and management of 12 commercial bank subsidiaries throughout

Kansas. The company's nonbank subsidiaries include a consumer lending company and a credit life insurance company. Its common stock is traded in the national over-the-counter market. The NASDAQ symbol is "FRTH." On July 19, 1990, the stock closed at 24 1/4.

#90201p7127 07/20/1990 ~PR Newswire

THOUSAND OAKS, CA. (JULY 20) PR NEWSWIRE - Amgen (NASDAQ: AMGN) announced today its financial results for its fiscal quarter ended June 30, 1990. Revenues for the quarter were $71,650,000 compared with revenues of $28,490,000 for the same quarter a year ago, an increase of 152 percent. Net income was $11,146,000 or $0.57 per share on a pre-split basis compared with net income of $835,000 or $0.05 per share a year ago. Primary earnings per share adjusted for the company's previously announced 2 for 1 stock split payable Aug. 10, 1990, were $0.29 compared with $0.02 for the same quarter a year ago.

Gordon M. Binder, Amgen's chief executive officer, commented on the results saying "We are pleased that the company achieved positive retained earnings for the first time since its founding in 1980. The year-to-year growth in our revenues relfects the strong sales of Epogen to approximately 65,000 patients on dialysis. Increases in total operating expenses primarily reflect Epogen's cost of sales, marketing and administrative expenses associated with Epogen sales activities, and preparation for the launch of Neupogen.

Amgen is a major biotechnology firm developing pharmaceutical products based on advances in recombinant DNA and molecular biology. The company, headquartered in Thousand Oaks with European headquarters in Lucerne, Switzerland, was founded in April of 1980.

#90201p7132 07/20/1990 ~PR Newswire

ATLANTA (JULY 20) PR NEWSWIRE - RPC Energy Services Inc. (NYSE: RES) announced its unaudited results for the six months and three months ended June 30.

RPC operates in two major segments. RPC provides rental of specialized oil field equipment, and well control and transportation services to the

oil and gas industry. In addition, RPC owns Chaparral Boats, a leading national manufacturer of powerboats.

For the six months ended June 30, revenue increased 8 percent from $56,724,000 last year to $60,992,000. Net income after income taxes increased 19 percent for the same period from $4,483,000 or 31 cents per share a year ago to $5,317,000 or 37 cents per share.

Revenue for the three months ended June 30 increased 11 percent from $29,242,000 last year to $32,515,000. Net income after income taxes increased 18 percent for the three months ended June 30 from $2,574,000 or 18 cents per share last year to $3,038,000 or 21 cents per share.

For the three months ended June 30 revenue for the boat manufacturing segment increased from $18,532,000 last year to $18,577,000 this year. The oil and gas services segment revenue increased 30 percent for the three months ended June 30 from $10,710,000 last year to $13,938,000 this year.

Cash flow for the three months ended June 30 improved $255,000 or 7 percent to $4,103,000 from $3,847,000 for the same period a year ago. The oil and gas services segment produced this improvement.

As of June 30 the active rig count increased 26 percent to 1,020 rigs from 810 at June 30, 1989. This increase in the rig count has produced some stability in the oil and gas services segment. The boat manufacturing segment continues to see an uncertain near-term future due to industry-wide problems.

#90201p7135 07/20/1990 ~PR Newswire

SUNNYVALE, Calif. (JULY 20) PR NEWSWIRE - Nanometrics Inc. (NASDAQ: NANO) today reported revenues and operating results for the second quarter ended June 30, 1990.

Revenues for the second quarter were $3.8 million, a decrease of 37 percent compared with $6.0 million for the like quarter of 1989. The company reported an operating loss of $720,000 and a net loss of $603,000 or 9 cents per share. This compares with an operating income of $63,000 and a net income of $471,000 or 6 cents per share in the second quarter a year ago. Second quarter operating results reflected a slowness in the market for semiconductor capital equipment.

Revenues for the six months ended June 30, 1990 were $8.6 million representing a 21 percent decrease from $10.9 million for the comparable

prior year period. An operating loss of $976,000 and a net loss of $729,000 or 10 cents per share for the current six month period compared with an operating loss of $80,000, and a net income of $490,000 or 6 cents per share for the like period last year. The company's order backlog on June 30, 1990 was approximately $4.1 million.

Nanometrics principal products are optical and scanning electron microscope-based measurement and inspection stations utilized in the manufacture of semiconductor circuits.

#90201p7138 07/20/1990 ~PR Newswire

IRVINE, CA (JULY 20) PR NEWSWIRE - Mazda today announced a voluntary recall covering certain 1986 and 1987 Mazda 626 models. The 102,548 vehicles affected by the voluntary action are being recalled because of a possibly faulty ignition switch.

The ignition switch, which can wear out after long periods of use, could cause inoperative windshield wipers, windshield washer, engine cooling fan heater blower and air conditioner compressor.

Owners are being asked by mail to bring their vehicles to an authorized Mazda dealer for inspection of the ignition switch. If replacement is deemed necessary, the one-half hour repair (inspection, and replacement if necessary) will be performed free of charge.

Mazda is conducting this campaign to ensure its customers continued satisfaction with, and confidence in, their vehicles.

#90201p7140 07/20/1990 ~PR Newswire

RALEIGH, NC (JULY 20) PR NEWSWIRE - For the second quarter ending June 30 1990, Carolina Power & Light Co. (NYSE: CPL) reported a loss of seven cents per share of common stock. Earnings for common stock for the quarter represented a loss of $5.7 million.

For the same period last year, earnings were 81 cents per share and earnings for common stock were $64.8 million.

Operating revenues for the second quarter of 1990 were $579.6 million

compared to $558.0 million for the same quarter last year. Net income for the quarter was $1.9 million compared to $72.6 million for the second quarter of 1989.

Earnings for the 12-month period ending June 30, 1990, were $3.39 per share compared with $2.24 per share a year earlier. Net income for the 12 months was $317.1 million compared to $212.6 million for the prior 12-month period.

For the quarter, the average number of shares outstanding increased from 80.4 million to 83.9 million. For the 12-month period, the average number of shares increased from 80.4 million to 84.5 million.

#90201p7143 07/20/1990 ~PR Newswire

BALTIMORE (JULY 20) PR NEWSWIRE - Baltimore Gas and Electric Co. (NYSE: BGE) today reported common stock earnings of $16,348,000 for the three months ended June 30, 1990, equivalent to $.20 per common share.

This compares with earnings of $36,284,000 equivalent to $.45 per share, for the three months ended June 30, 1989. For the six months ended June 30, 1990, earnings on common stock were $54,860,000, equivalent to $.67 per share. This compares with $99,240,000, or $1.24 per share, for the six months ended June 30, 1989. For the 12 months ended June 30, 1990, earnings on common stock were $199,530,000, equivalent to $2.47 per share. This compares with $262,592,000, or $3.30 per share, for the 12 months ended June 30, 1989. Earnings per share for the company's utility business and for its diversified business activities were as follows:

Periods ended	Three months		Six months		12 months	
June 30	1990	1989	1990	1989	1990	1989
Utility operations	$.19	$.38	$.69	$1.09	$2.39	$2.99
Diversified business Activities	.01	.07	(.02)	.15	.08	.31
Total	$.20	$.45	$.67	$1.24	$2.47	$3.30

The decreases in utility earnings for all periods are primarily attributable to the effects of higher operations and maintenance expenses.

Kilowatt-hour sales of electricity for the six months ended June 30, 1990, were essentially unchanged from the comparable period last year. Residential sales increased 1.4 percent, reflecting an increase in the number of customers partially offset by warmer winter weather, while commercial and industrial sales decreased 1.3 percent.

The total volume of gas sold during the current six-month period decreased 7.1 percent from the same period last year. The decrease in sales was primarily related to milder winter weather and decreased usage by the company's commercial and industrial customers.

Earnings from diversified business activities primarily represent the results of operations of Constellation Holdings Inc. and its subsidiaries. Lower earnings from diversified business activities for all periods are attributable to lower income from financial investments combined with the

timing of income earned from the alternative energy systems and real estate projects.

#90201p7153 07/20/1990 ~PR Newswire

SEATTLE (JULY 20) PR NEWSWIRE - The Boeing Co. (NYSE: BA) today announced the selection of a 500-acre parcel in the Frederickson Industrial Site southeast of Tacoma and a 20-acre site in Puyallup as locations for new facilities.

Frank Shrontz, Boeing chairman and chief executive officer, said, "We were particularly attracted to Pierce County by the availability of good sites at reasonable prices and the supportive attitude of local government toward new business.

"Boeing is already at or near capacity at all our Puget Sound locations and it is imperative that we find new facility sites that make good business sense. The new locations are close to our existing Puget Sound operations and they are in an area that is growing in economic importance."

The 500-acre site is located southeast of the intersection of 176th Avenue East and Canyon Road and will be used for a "skin and spar" facility to manufacture parts for airplane wings. The wing parts will be used on 747 and 767 airplanes and on the 777, if the program is launched.

The 20-acre site in Puyallup is located in the South Hill area on Meridian Avenue and will house a "tool grind" facility that will be used to sharpen cutting tools used to manufacture airplane parts.

Shrontz said, "The environmental review and permitting process on the 500-acre site will begin immediately to ensure that all potential remediation requirements are addressed. If that proceeds smoothly, we should be able to start construction before the end of this year and the facility could begin operations as early as mid-1992."

The 600,000-square foot building and equipment for the skin and spar operation is valued at approximately $350 million. The facility will employ approximately 300. It will be staffed by a core team of experienced workers from the existing skin and spar facility in Auburn and transfers and new hires as appropriate. There will be no change in the operations of the existing skin and spar facility in Auburn.

The tool grind operation, which is currently performed in Auburn with approximately 270 employees, will be relocated into a new $30 million, 100,000-square-foot building in Puyallup. No date has been set for the move.

#90201p7155 07/20/1990 ~PR Newswire

MORRISTOWN, NJ (JULY 20) PR NEWSWIRE - Jersey Central Power & Light Co. said it takes issue with contentions by New Jersey Public Advocate Wilfredo Caraballo that the Oyster Creek Nuclear Generating Station has outlived its usefulness and should be shut down.

"While we have not yet had an opportunity to review the details supporting the Public Advocate's position, the most definitive study done by JCP&L and filed with the New Jersey Board of Public Utilities (NJBPU) in December 1988 concluded that Oyster Creek is still the most economical source of power for our customers," said Dennis Baldassari, vice president of rates, materials and services for JCP&L.

"We know of no alternative that would allow JCP&L to supply electricity to its customers more economically than continued operation of Oyster Creek," he added, noting that both capital and operations and maintanance expenses for the plant have levelized in recent years following a five-year period of major expenditures by JCP&L to modernize and refurbish the facility.

#90201p7171 07/20/1990 ~PR Newswire

NEW YORK (JULY 20) PR NEWSWIRE - CrossLand Savings, FSB (NYSE: CRL) today reported a net loss of $40.0 million, or $3.64 loss per primary and fully diluted share, for the quarter ended June 30, 1990, compared to net income of $3.8 million, or $.47 loss per primary and fully diluted share after giving effect to the payment of dividends on preferred stock, for the prior year period. Net losses for the six months ended June 30, 1990, were $176.4 million, or $14.25 loss per primary and fully diluted share, compared to net income of $15.6 million, or $.36 loss per primary and

fully diluted share after giving effect to the payment of dividends on preferred stock, for the six months ended June 30, 1989.

CrossLand recorded in the second quarter $50 million in charges for write-downs of its portfolio of real estate assets to estimated net realizable value, write-downs of collateralized mortgage obligation (CMO) residuals to estimated fair market value and loan loss provisions. Real estate assets include acquisition, development and construction (ADC) arrangements; joint ventures and real estate owned (REO) acquired through foreclosures; deed-in-lieu of foreclosure or identified as in- substance foreclosures.

Net interest income before provision for possible loan losses was $35.4 million for the 1990 second quarter compared to $61.5 million for the 1989 second quarter. For the six months ended June 30, 1990, net interest income totaled $67.0 million (before $101.0 million provision for possible loan losses) compared to $134.6 million (before $15.5 million provision for loan losses) for the six months ended June 30, 1989.

The decreases in net interest income are primarily attributable to two factors. First, CrossLand "downsized" by $2.7 billion to improve its regulatory capital ratios required by the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 (FIRREA) and the higher capital ratios requested by the FDIC. Second, CrossLand experienced increases in delinquent loans 90 days or more past due and investments in real estate.

Other operating income was a loss of $6.4 million for the quarter ended June 30, 1990, down $21.1 million from $14.7 million income for the comparable 1989 quarter.

During the quarter ended June 30, 1990, CrossLand further reduced its high yield portfolio by more than 50 percent to $19.5 million at the end of June 1990 from $40.2 million at the end of March 1990.

CrossLand's one year interest-rate gap at June 30, 1990. is estimated to be -23 percent compared to -21 percent at March 31, 1990.

Loan originations for the quarter ended June 30, 1990, were $620 million compared to $761 million for the quarter ended June 30, 1989. Delinquent loans 90 days or more past due and REO increased to $475.9 million (or 3.73 percent of total assets) at June 30, 1990, from $455.6 million (or 3.44 percent of total assets) at March 31, 1990. The allowance for possible loan losses at June 30, 1990 totaled $124.7 million.

The real estate markets in CrossLand's New York base have become severely depressed in 1990. The bank said it will continue to monitor closely the real estate markets and their effect on its real estate assets and loan portfolio, but offered no prediction as to when or if it expects

improvement.

Total assets decreased by $2.7 billion to $12.8 billion at June 30, 1990, from $15.5 billion at June 30, 1989. Deposits at June 30, 1990, were $8.1 billion compared to $9.4 billion at June 30, 1989. The decrease in deposits is attributed to the decreases of $1.1 billion in brokered deposits in keeping with the bank's business plan and $281 million in retail deposits. At June 30, 1990, brokered deposits totaled $27.3 million.

Stockholders' equity at June 30, 1990, was $470.3 million, or 3.69 percent of assets, compared to $867.0 million, or 5.61 percent of assets, at June 30, 1989. The decrease in stockholders' equity is primarily attributable to losses reported for the six months ended Dec. 31, 1989, of $207.3 million (including goodwill reductions of $157.7 million) and losses reported for the six months ended June 30, 1990.

CrossLand announced that the field work for an FDIC regulatory examination as of Dec. 31, 1989, has been completed. CrossLand further announced that the proxy materials filed with the Office of Thrift Supervision that contain a proposal to reclassify the bank's two issues of preferred stock into common stock have not yet been cleared. Therefore it will be necessary to update the materials to take into account CrossLand's second quarter results and the results of the FDIC's written report of examination which CrossLand has not yet received.

Established in 1860, CrossLand Savings is the largest savings institution in New York, serving over one million customers through 113 retail banking offices in eight states.

EAST HANOVER, NJ (JULY 20) PR NEWSWIRE - Sandoz Pharmaceuticals Corporation today stated that it is continuing discussions initiated last January with the Veterans Administration about providing Clozaril (clozapine) to schizophrenic patients in the VA Hospital system using a system for white blood cell monitoring proposed by the VA.

"We are sorry that confusion has arisen over the past few days about our discussions with the Veterans Administration," David Winter, M.D., vice president for scientific and external affairs of Sandoz, stated.

"These discussions are extremely complex requiring the involvement of many

departments within the Veterans Administration, and we recognize that the status of various aspects of our discussions may not be fully communicated throughout the VA, or by those in the VA who are discussing Clozaril with Congressional leaders."

SEATTLE (JULY 20) PR NEWSWIRE - Airborne Freight Corp. (NYSE: ABF), which operates under the trade name Airborne Express, today reported a substantial increase in earnings, revenues, and shipments for the second quarter ending June 30.

Net earnings available to common shareholders increased 129 percent to $10,012,000, or 61 cents per share for the quarter, compared to $4,375,000 or 31 cents per share, for the same period last year. revenues for the quarter increased 25 percent to $290,625,000, up from $231,966,000 in the second quarter of 1989.

For the six-month period, earnings available to common shareholders increased 126 percent to $15,887,000, or 97 cents per share, compared to $7,035,000, or 50 cents, for the first six months of 1989. Revenues increased 25 percent to $562,654,000, compared to $450,377,000, for the same period last year.

On a fully diluted basis the 1990 results were 61 cents per share for the second quarter and 96 cents per share for the six months compared to 29 cents per share and 47 cents per share for the second quarter and six months of 1989, respectively.

During the second quarter of 1990, domestic shipments handled increased 37 percent to 21,190,000 and the corresponding revenues increased 33 percent to $242,068,000. In the international segment, while shipments increased 18 percent to 577,000, international revenues decreased two percent, to $48,557,000. The decrease in international revenues was the result of a decline in heavier weight international freight shipments.

"The results for the quarter were favorably impacted by the very strong domestic shipment growth, continued stability in pricing, and gains in productivity," said Roy Liljebeck, chief financial officer.

"Further, while international revenues decreased, the margin on international business increased approximately 11 percent over the same period in 1989," he continued.

Airborne Express is the nation's fastest growing air express company. Airborne primarily services Corporate America through the delivery of time-sensitive documents, letters, small packages and heavy freight to more than 45,000 communities and 183 countries worldwide.

RALEIGH, NC (JULY 20) PR NEWSWIRE - Firstcorp, Inc. (AMEX: FCR) announced today that it has mailed its Annual Report to Stockholders and Bondholders. The Report shows a $20.4 million loss for the fiscal year ended March 31, 1990. In its preliminary earnings release, the Company announced that it had lost $9.5 million for the year and in addition had established $11.6 million of loss reserves for regulatory accounting purposes as directed by the Office of Thrift Supervision (OTS). After further discussions with the OTS, which have resulted in a reduction of the reserves requested of 1st Federal of Raleigh, the Company has included $10.9 million of these additional reserves in its results of operations for the year. As previously reported, neither the Company nor 1st Federal agrees with the additional reserves and will appeal the directive through the appropriate regulatory channels.

After including the additional reserves, Firstcorp's loss for the year was $20.4 million compared to $15.5 million for the prior year. On a per share basis, the loss was $6.25 compared to $4.70 for the prior year. At March 31, 1990, total assets were $697 million compared to $772 million at prior year end. Stockholders' equity was $6.0 million at March 31, 1990.

Firstcorp is the parent company of 1st Federal of Raleigh, 1st Federal of Durham and 1st Security of Pinehurst. Firstcorp's subsidiaries operate twenty-two full service offices in four counties in North Carolina which include the Research Triangle and Sandhills areas. Firstcorp's Class A Common Stock is traded on the American Stock Exchange under the symbol FCR.

#90201p7187 07/20/1990 ~PR Newswire

ST. LOUIS (JULY 20) PR NEWSWIRE - Landmark Bancshares Corp. (NYSE: LBC) today announced second quarter earnings of $1.71 million, or 23 cents per common share, down from $3.56 million, or 51 cents, last year. S. Lee Kling, chairman and chief executive officer, stated, "Because of our fundamental operating strengths and recent growth in loan fundings, we had anticipated stronger second quarter earnings than we are reporting. However, as a result of our continued review of potential problem loans through the second quarter, we elected to charge a provision for loan losses against earnings, for $2.55 million of net charge-offs, rather than reduce our loan reserve. Currently, the reserve is substantially unchanged at approximately $18 million, which represents 1.23 percent of loans.

"It is important to note that bank regulators have completed routine examinations of all Landmark banks within the past three to four months. The reviews disclosed few loan problems beyond those that we had already marked for action," Kling said. "Having dealt with the higher-than-normal level of problems in the loan portfolio, and with these regulatory reviews completed, we are comfortable with the soundness of the portfolio."

Kling continued, "Prospects for improved earnings are encouraging, due in great measure to our continued sales efforts and successful overhead control. In the second quarter, we saw $58 million in new loan fundings -- the majority occurring in mid-to-late June -- and another $40 million in new loan commitments are scheduled for funding in the next three to four months. Further, increases in non-interest income demonstrate our growing ability to generate fee income from investments, insurance and trust services, as well as traditional fee-based banking services."

Loan Portfolio Review Kling said, "In recent months, Landmark has been following an even more conservative approach to loan funding. Nevertheless, within that framework, our sales and marketing efforts have resulted in significant loan growth. The existing portfolio, however, was impacted by various factors, including the softening of the economy and intensified regulatory environment."

Net charge-offs for the period were $1.1 million greater than last year's second quarter, or .70 percent of average loans, compared with .42 percent last year. In addition, expenses associated with foreclosed property were $1.7 million greater than in last year's second quarter. Non-performing assets were 3.11 percent of loans plus foreclosed property, up from 2.71 percent at the end of the first quarter of 1990 and 2.76 percent at June 30, 1989.

Kling commented on the company's long-term loan loss experience, "During the 1985-1989 period, our non-performing assets ratio averaged 2.23 percent, equaling that of a St. Louis-area bank holding company peer group. On the other hand, our net charge-offs averaged .27 percent of loans, 41 basis points below the .68 percent average of the peer group, demonstrating the effectiveness of our loan underwriting policies and recovery procedures."

Kling added, "However, in line with a conservative approach, we remain committed to ongoing expansion of the loan reserve. Over the past five years, we have increased the reserve to more than $18 million, or 1.23 percent of total loans, from $5.3 million, or .81 percent of total loans. It is our intention to continue increasing the reserve to a ratio of between 1.30 percent to 1.35 percent of loans in succeeding quarters." The loan reserve at the end of the second quarter compares with $16.8 million, or 1.20 percent, the prior year.

1990 vs. 1989 For the three months ended June 30, 1990, net interest income was unchanged at $17.5 million. The provision for loan losses increased 39 percent to $2.3 million from $1.6 million in the comparable prior period. Non-interest income, excluding securities transactions, rose 13 percent to $3.3 million from $2.9 million, while non-interest expense, excluding expenses associated with foreclosed property, increased 4 percent to $14.5 million from $13.9 million. Expenses associated with foreclosed property were $1.9 million compared with $200,000. For the six months ended June 30, 1990, net interest income was unchanged at $35.0 million. The provision for loan losses was $5.7 million, up from $3.1 million in the comparable prior period. Non- interest income, excluding securities transactions, rose 2 percent to $6.3 million from $6.2 million, while non-interest expense, excluding expenses associated with foreclosed property, increased 5 percent to $29.6 million from $28.2 million. Expenses associated with foreclosed property were $2.6 million compared with $300,000. Net income for the six months was $2.8 million compared with $7.0 million.

For the 12 months ended June 30, 1990, net interest income rose 2 percent to $70.6 million from $69.4 million. At $8.4 million, the provision for loan losses was 51 percent higher than the $5.6 million reported in the preceding twelve month period. Non-interest income, excluding securities transactions, increased 5 percent to reach $12.6 million from $12.0 million, while non-interest expense, excluding expenses associated with foreclosed property, rose only 2 percent to $58.4 million from $57 million. Expenses associated with foreclosed property were $3.4 million compared with $900,000. Net income for the 12 months was $10.3 million, or $1.41 per share, versus $13.8 million or $1.98 per share.

At June 30, 1990, total assets were $1.98 billion, up 5 percent from $1.89

billion at June 30, 1989. Total loans also gained 5 percent, reaching $1.47 billion. Long-term debt was reduced 23 percent to $38.6 million, or 30 percent of equity, from $50.4 million, or 45 percent of equity. Shareholders' equity rose 14 percent to $128.1 million from $112.2 million. Average common shares outstanding for the second quarter of 1990 increased 14 percent as compared to a year earlier. Book value per common share at June 30, 1990 was $17.37, compared with $17.04 at June 30, 1989.

Strength of Operations Commenting on net interest income, which was substantially unchanged from the prior three and six month periods, Kling said, "The benefits of the 6 percent gain in earning assets were offset by the declining rate environment and higher level of non-performing assets. However, with new loan fundings, we would expect to see increases in net interest income going forward."

Discussing gains in non-interest income, Kling commented, "Landmark has been actively marketing trust, investment and insurance products as these services have been developed just in the past one to three years. Because we have successfully cultivated the middle market segment, we have a ready niche for these new products. We expect our sales and marketing efforts to continue to produce increased fee income."

In the area of expenses, Kling said, "The second quarter 4 percent increase in non-interest expense, excluding costs associated with foreclosed property, demonstrates the success of our ongoing efforts to improve profitability through overhead control. Operating expenses for the second quarter of 1990 as a percent of assets stayed constant at 2.97 percent, compared with the same period last year. That ratio should remain stable or decline as our growing base of assets is supported by our existing operating staff and units."

Implications for the Future Kling commented, "Although we are not satisfied with the results of the past six months, we do feel that we are positioned for improved results in the quarters ahead. Positive aspects of the outlook include the actions we are taking to strengthen our balance sheet, our improved penetration in the lending and fee income areas -- all within local markets -- and our fundamental earnings power. Landmark has concentrated on the needs of the middle market, and we have developed a strong franchise in the bi-state metropolitan St. Louis market and a growing presence in the Kansas City and Springfield, Mo., markets. We believe that we will be able to garner a growing share of the available, secure business through our continued marketing efforts and sales culture implementation."

Landmark Bancshares Corp. is a St. Louis-based multi-bank holding company with 48 locations serving the Missouri and Illinois portions of the bi-state St. Louis metropolitan area, Kansas City and Southwest Missouri.

#90201p7192 07/20/1990 ~PR Newswire

WINDSOR LOCKS, CT (JULY 20) PR NEWSWIRE - The Dexter Corporation (NYSE: DEX) announced today that it has signed an agreement with Evode Group p.l.c. of Stafford, United Kingdom, for the sale of Dexter's polyvinyl chloride (PVC) compounding and extrusion businesses headquartered near Charlotte, N.C., with additional facilities located in Newark, N.J., and Orlando, Fla.

The transaction is subject to completion of financing arrangements, including approval by Evode's shareholders, as well as Hart-Scott-Rodino procedures.

It is expected that this cash sale of the PVC business, which is profitable, will result in a capital gain for Dexter, the amount of which cannot be determined at this time.

In making this announcement, K. Grahame Walker, president and CEO, said: "We believe the PVC business will be of great value to the Evode Group in that these businesses complement their current product range, and the combined technologies offer good growth potential for the current markets Evode serves."

In explaining the reasons for the sale, Walker said: "A substantial part of the PVC business serves the construction market and, although very profitable, that does not fit Dexter's market focus strategy. Evode's combined businesses will be in a good position to serve this market. This move will also free-up Dexter management resources to focus more on our major markets."

Evode Group p.l.c. is a specialty chemicals company engaged in the manufacture of adhesives and sealants, insulation materials, industrial coatings and plastics, serving the aerospace, automotive, building, construction and general industrial markets.

The Dexter Corporation is a Fortune 500 company providing specialty materials and services to six major markets: aerospace, automotive, electronics, food packaging, industrial assembly and finishing, and medical.

Founded in 1767, Dexter is the oldest company listed on the New York Stock Exchange. Consolidated net sales and earnings for 1989 were $848.7MM and

$43.0MM, respectively.

CONTACT: Robert E. McGill or Ellen M. Cook of Dexter, 203-627-9051, or Stan Froelich of Cameron Associates, 212-683-4545, for Dexter

#90201p7196 07/20/1990 ~PR Newswire

MONTREAL (JULY 20) PR NEWSWIRE - Repap Enterprises Inc. reported second quarter earnings of $4.2 million ($0.08 per share) relative to $22.1 million in 1989. Revenues increased by 12 percent to $306 million reflecting an increase in coated paper shipments and the acquisition of Repap Manitoba, partially offset by a decrease in market pulp shipments. Cash flow from operations was $32 million in the second quarter compared with $57.7 million in 1989.

Revenues for the first six months of 1990 increased by 12 percent to $599 million. Net income was $11.3 million before a $3.6 million adjustment for an unusual item. Net income (after the unusual item) for the first six months of 1990 was $7.7 million compared with $46.8 million in 1989. Cash flow from operations was $65.3 million compared with $116.1 million in 1989.

Second quarter results were impacted by a number of factors including lower pulp shipments, a competitive pricing environment in coated paper markets and increased interest and depreciation costs associated with Repap's $480 million investment in the new M-7 Coated Paper Mill in Wisconsin. An inventory-related shutdown at the Skeena pulp mill reduced kraft pulp production by 15,000 tonnes. In addition, a 3 week shutdown of the A-1 coated paper machine was taken to rebuild the press section. This rebuild will enable the A-1 to achieve its original operating objectives, resulting in an increase in operating speed from 3,300 fpm to the machine capacity of 4,000 fpm, and will allow Repap to enhance its position in the lower-basis-weight-end of the coated groundwood paper market, an area of increasing interest to magazine publishers and of rapid growth.

The overvalued Canadian dollar continues to contribute to the low earnings and reduced competitiveness of the Canadian forest products industry.

	SECOND QUARTER			SIX MONTHS (restated)		
	1990	1989	Change (pct)	1990	1989	Change (pct)
Revenues	$305.5	$272.8	+12	$599.0	$536.9	+12
Net Income Before Unusual Item	4.2	22.1	-81	11.3	46.8	-76
Unusual Item						

(Net of tax)	-	-	-	3.6	-	-
Net Income	4.2	22.1	-81	7.7	46.8	-84
Cash flow from operations	32.0	57.7	-45	65.3	116.1	-44
Earnings per Share	$0.08	$0.42	-81	$0.15	$0.90	-83

NOTE: When the new $355 million secured long-term financing of Skeena Cellulose Inc. was completed in January 1990, the Series B Bonds were redeemed and a $6 million payment was made to compensate the Series B Bondholders for the perceived loss in yield attributable to lower market interest rates prevailing at that time. The accounting treatment for this payment was not resolved prior to the release of the first quarter results. The corporation subsequently charged this payment to income as an unusual cost in the first quarter and, consequently, the results of the first quarter have been restated. Retained earnings have been reduced from $256.2 million to $252.6 million with no effect on cash from operations.

MARKET UPDATE Markets for coated groundwood paper which remained extremely competitive in the second quarter, should benefit from a seasonal increase in demand in the second half of 1990 as catalogue publishers print ''back-to-school'' and Christmas issues.

During the first six months of 1990, American, European and Japanese paper production continued to demonstrate healthy growth in the range of 2 to 4 per cent. Over the same period, however, worldwide shipments of white chemical pulps were down 9 percent illustrating the significant inventory reduction cycle taking place in world pulp markets at the present time.

Repap Enterprises Inc. is a large, fully-integrated North American coated paper and pulp company with coated paper operations at Midtec Paper Corporation in Wisconsin, U.S.A. and at Miramichi Pulp & Paper Inc. in New Brunswick, Canada, market pulp mills at Skeena Cellulose Inc. in British Columbia, Canada and at Miramichi Pulp & Paper Inc. and a brown kraft paper mill at the Pas, Manitoba.

#90201p7197 07/20/1990 ~PR Newswire

ANN ARBOR, Mich. (JULY 20) PR NEWSWIRE - J.P. Industries, Inc. (NYSE: JPI) today announced increased sales but lower earnings for the second quarter of 1990 compared to last year. Sales for the quarter ended June 30, 1990, were $115.3 million, up from $111.4 million as compared to last year.

Income from continuing operations was $2.8 million for the second quarter

compared to $3.9 million in the comparable period last year. In the quarter ended June 30, 1990, the company recorded a charge to earnings of approximately $1 million for legal costs incurred relating to the T&N Automotive Components Inc. ongoing tender offer for J.P. Industries, Inc.

Fully diluted earnings per share for income from continuing operations was 25 cents in the quarter ended June 30, 1990, compared to 33 cents per share last year. Fully diluted earnings per share for the second quarter of 1990 would have been 31 cents excluding the legal costs related to the tender offer.

The increase in sales during the quarter is due to higher sales to the automotive aftermarket and the Nov. 15, 1989, acquisition of Rolf, S.p.A., an Italian manufacturer of rubber seals. This increase in sales was partially offset by lower sales related to a reduction in rebuilding activity of locomotive engines. This change in sales mix accounted for the decline in operating margins.

Sales for the first half of 1990 were $225.9 million as compared to $219.8 million in the comparable period of 1989. Income from continuing operations and fully diluted earnings per share for the six-month period were $5.4 million and 49 cents in 1990 compared to $7.2 million and 62 cents in 1989.

Fully diluted earnings per share for the first half of 1990 would have been 54 cents excluding the legal costs related to the tender offer. The decline in sales of locomotive engine bearings for the first half of 1990, the first quarter lower sales for new car and light truck production, along with the second quarter charge for legal costs are the primary factors contributing to lower earnings as compared to 1989.

"Our continued strong sales are attributable to the diverse markets serviced by J.P. Industries," said Dr. John Psarouthakis, president, chairman and founder. Psarouthakis also stated, "The sales increase for the first half of 1990 compared to 1989 was achieved despite the decline of approximately 14 percent in the U.S. production of new cars and light trucks."

As previously announced, on March 30, 1990, T&N Automotive Components Inc. commenced a tender offer for all the outstanding shares of common stock of J.P. Industries for $17.30 per share in cash. The company and T&N Automotive Components are engaged in discussions with the staff of the Federal Trade Commission regarding a possible negotiated resolution of antitrust objections raised by the staff in connection with the acquisition. The expiration date for the tender offer is 11:59 p.m., New York City time, Friday, July 27, 1990, unless extended.

J.P. Industries is a global manufacturer and marketer of engine and

transmission components. Corporate headquarters are located at 325 E. Eisenhower Parkway, Ann Arbor, Mich. 48108-3388.

MIDLAND, TX (JULY 20) PR NEWSWIRE - P&P Equity Co. Ltd., the general partner of Parker and Parsley Development Partners, L.P. (AMEX: PDP), today declared the twelfth consecutive quarterly distribution since inception of 45 cents per unit. The distribution is payable on Sept. 15, 1990 to unitholders of record as of July 31, 1990.

This distribution represents an annual level of $1.80 per unit. The $1.80 annual distribution level is expected to be maintained through 1990 given the continuation of a favorable oil and gas price environment. However, distributions are subject to review and change on a quarterly basis.

DALLAS (JULY 20) PR NEWSWIRE - American Airlines closed on the second phase of its Central and South American route acquisition from Eastern Airlines today, spending $29 million for routes to Panama, Peru, Bolivia and Paraguay. This is part of the largest single route expansion in the airline's history, in which American obtained rights to fly to 20 cities in 15 Central and South American countries.

The acquisition also allows American extensive fifth freedom rights. This means that American can pick up passengers at these destinations for travel to other central and South American cities.

Daily nonstops beginning Saturday, July 21, include Miami-Panama City and Miami-Lima. Additional start-ups on Saturday include three trips a week Miami-Panama City-Lima-Santiago and four trips Miami-Panama City-Lima-La Paz-Asuncion.

American will use Boeing 727s on the Panama City nonstop, Airbus A-300s on the Lima nonstop and Boeing 757s on the remaining trips.

American began service to Buenos Aires, Argentina; Rio de Janeiro and Sao Paulo, Brazil; and Santiago, Chile on July 1. Subject to local governmental approvals, routes to Barranquilla, Bogota and Cali, Colombia and Guayaquil and Quito, Ecuador begin on Aug. 1. The fourth and final phase will see service start-ups on Aug. 15 and includes Belize City; San Salvador, El Salvador; San Pedro Sula, Honduras; and Caracas, Venezuela.

ST. LOUIS (JULY 20) PR NEWSWIRE - Mark Twain Bancshares Inc. (NASDAQ: MTWN) today reported record totals in all major balance sheet categories despite second quarter earnings of $3.805 million compared to $4.031 million in the like period in 1989. Fully diluted earnings per share were 46 cents compared to 49 cents for the comparable quarter last year. A lower net interest margin was the primary reason for the decline in earnings, according to John Dubinsky, president and chief executive officer of Mark Twain Bancshares.

Mark Twain reported a net interest margin of 4.27 percent for the quarter, 55 basis points lower than 4.82 percent in the like period of 1989.

Year-to-date income was $6.932 million compared to $7.723 million in 1989. Earnings per share for the first six months were 85 cents compared to 94 cents.

Expenses including salaries, occupancy and other operating costs increased 3.6 percent for the first six months. Dubinsky said that the majority of the increase was attributable to the prodution of fee income, where revenues are running 14 percent ahead of last year.

Total assets broke the $2 billion mark to total $2.039 billion, an increase of 12.8 percent from the second quarter 1989.

Loans increased by 9.6 percent from second quarter of 1989 and totaled $1.462 billion. Dubinsky indicated that Mark Twain continues its emphasis on strong loan quality as well as portfolio growth.

Non-performing assets declined for the fifth consecutive quarter and represented 1.94 percent of total loans outstanding. The net charge-off ratio was a low .13 percent and continues to be one of the lowest in the industry. However, Mark Twain decided to increase its provision for loan losses by 25.1 percent compared to the first six months of 1989.

Deposits increased 12.2 percent and totaled $1.780 billion. Shareholder equity increased 8.2 percent and totaled $112.7 million.

Mark Twain Bancshares, a 26-year-old bank holding company, operates 29 locations: 19 throughout St. Louis, St. Louis County and St. Charles County; as well as five locations in Kansas City, Mo. and five in Belleville and Edwardsville, Ill. Mark Twain also operates 37 brokerage locations in five states. Related financial services include: Mark Twain Brokerage Services Inc.; Mark Twain Mortgage Co.; Mark Twain Leasing Co.; Mark Twain International; Mark Twain Bond Department; Mark Twain Commerical Finance Division, and Mark Twain Trust Divsion.

PEORIA, IL (JULY 20) UPI - Caterpillar Inc. reported second-quarter earnings Friday of $46 million or 46 cents a share, down 67 percent from $141 million, or $1.39 a share, in the year-ago quarter. Second-quarter revenues were off three percent, to $2.95 billion, from $3.04 billion a

year ago.

The company said about half of the earnings decline resulted from an eight percent drop in sales, while another quarter of the shrinkage was due to losses in its Brazilian operations resulting from Brazil's currency devaluation.

"While the company's physical sales volume and cruzeiro prices in Brazil generally remained stable during the quarter, margins translated into significantly fewer dollars as the currency devalued," Caterpillar reported in its quarterly earnings statement. "Further correction of the overvalued cruzeiro is likely, resulting in continued unfavorable short-term effects on U.S. dollar margins," it said.

"While U.S. dollar results from Brazilian operations are expected to improve during the remainder of 1990, a loss is expected for the full year with a return to profitability in 1991," the statement said. The company attributed the remainder of its earnings shrinkage to higher costs and price pressure resulting from the weakening of the Japanese yen.

Caterpillar said its worldwide workforce was pared by about 250 employees in the second quarter and was down two percent from a year ago - to 59,905 from 60,881 at the end of last year's second quarter.

For the first half of this year, Caterpillar reported earnings of $145 million, or $1.43 share, down 48 percent compared with $282 million, or $2.78 a share, in the year-ago period. First-half revenues, however, were up - to $5.88 billion from $5.72 billion a year ago.

Last month, the company revised its earnings outlook, saying profits for the year would be substantially below the 1989 mark. The revised outlook said the most significant factor affecting earnings was devaluation of Brazil's cruzeiro.

#90201u1079 07/20/1990 ~United Press International

HOUSTON (JULY 20) UPI - Five shrimp boat captains have been arrested for allegedly failing to equip their trawl nets with controversial devices designed to protect endangered sea turtles.

The arrests Wednesday and Thursday came after the government announced it would step up enforcement of a federal law requiring shrimpers' nets to be outfitted with turtle excluder devices, or TEDs.

The devices allow turtles to escape from trawl nets before drowning, but shrimpers claim they also lead to the loss of up to a fourth of their catch.

The increased enforcement came after 31 dead sea turtles washed up on Texas shores after shrimp season reopened July 8. The turtles were all from threatened or endangered species.

The Coast Guard arrested shrimpers off Galveston and Freeport Thursday, and arrested three captains off Port O'Connor Wednesday night and Thursday.

The shrimpers, who were jailed pending arraignment before a federal magistrate, were charged with a criminal offense that carries penalties of a fine of up to $25,000 and/or six months in jail.

Ten nets valued at about $10,000 each also were seized from the five vessels, which were released along with their crews.

One captain also was arrested in Galveston earlier this week.

Federal officials earlier estimated shrimper compliance with the TEDs law at 40 to 60 percent, but said they hoped to quickly raise the rate to 80 percent.

OAKLAND, CA (JULY 20) UPI - Linda Kean, the prostitute who gained national notoriety when she was featured in a magazine as a potential AIDS carrier, is back on the streets looking for customers.

Kean, was released from jail Tuesday and returned to the notorious San Pablo Avenue stroll Thursday, looking for a $100 ''date'' to finance her drug habit.

''I'm here because I don't have anywhere to live,'' Kean told The Oakland Tribune. ''Once I get a $100 date I can get ahead.''

Kean, 36, was quoted in a June 25 issue of Newsweek as saying she had AIDS but would not tell customers because it would be ''professional suicide.''

Vice officers saw the article and an accompanying photograph of Kean, recognized the five-time convicted prostitute, and arrested her. They sought attempted murder charges.

Instead, she was charged with probation violations and released Tuesday after serving 26 days in jail. Her lawyer told reporters he did not believe she had been tested for AIDS while in custody.

Kean said she fabricated the AIDS story to get $60 from a Newsweek photographer. Newsweek conceded she was paid and said paying sources

violated its policies.

She told The Tribune she took the money to finance her use of ''speedballs '' a combination of injected heroin and cocaine she takes to blot out the experience of working the streets.

''That's why I like to get loaded - it makes me forget,'' she said.

But the need for cash at the moment has hurt her business. ''I'm having trouble already,'' she said. ''A lot of tricks recognize me.''

Kean said she realizes it is only a matter for time before she is arrested again. Police agree.

''I got nothing against her. She's probably more decent that some,'' said vice Sgt. Mike Martin, who arrested Kean after seeing the Newsweek photograph. ''But if she's out there, she's going to get arrested.''

#90201u1115 07/20/1990 ~United Press International

GENEVA (JULY 20) UPI - With just five months remaining at a key round of global trade talks, only a few minor issues were resolved Friday in preparation for a full-scale assessment of the troubled negotiations.

Draft ''profile'' or ''framework'' agreements in the 15 negotiating sectors were supposed to have been completed for a meeting next week of the Trade Negotiations Committee, which supervises the Uruguay Round of the General Agreement on Tariffs and Trade, known as GATT.

Officials at GATT, which provides the framework for the 107-nation negotiations, said there were no complete drafts ready for review.

Draft accords in all Uruguay Round sectors are not expected until October at the earliest - just two months before the December deadline for a package deal.

The negotiations, following the Kennedy Round of the 1960s and the Tokyo Round of the 1970s, are aimed at establishing an overall liberalization of some 30 percent in world trade.

Despite starting in late 1986, deep differences divide the main parties - the United States, the European Community, Japan, developing countries and the Cairn's Group of other farming countries led by Australia and Canada.

Officials said GATT Director General Arthur Dunkel, in his role as negotiations committee chairman, at this stage would not even try to referee the dispute involving the United States and the EC over the extent

of reductions of European farm export subsidies and American farm supports.

In the textiles and clothing sector, the current draft merely outlines the four conflicting positions on phasing out the protectionist Multi Fiber Agreement - those of the EC, United States, Japan and Third World producers.

In the services sector, which Washington insists must be included in an eventual package, there is a schism between the U.S. stance and that of developing nations. The United States wants free movement and installation of banks, insurance companies and similar entities. Developing countries have feared their operations would be taken by Western multinational companies.

''There are very substantial problems,'' one GATT official said.

Similarly, a text on ways to better protect intellectual property - such as patents and copyrights - runs 76 pages in simply discussing participants's views.

A text on ways to prohibit dumping - selling off goods at bargain prices in an attempt to dominate a market - is termed ''so controversial'' by officials that it probably would not be presented at all next week.

Leading delegations and the GATT secretariat are concerned negotiations on the most difficult issues such as agriculture and services would definitely not be resolved until 1991.

Only if there is a package agreement - or a partial pact or a collapse of negotiations - would participants discuss whether GATT should be radically modernized and possibly converted into a new world trade organization.

#90201u1125 07/20/1990 ~United Press International

COLOMBO, SRI LANKA (JULY 20) UPI - Dozens of Sri Lankan policemen held prisoner by Tamil rebels staged a dramatic escape from their captors, overpowering three guards and forcing two of them to swallow cyanide tablets, a senior military official said Friday.

The military source said the escape by the police officers may indicate the Tiger fighting force is being depleted, and that rebels do not have enough men to guard their prisoners.

Only about 12 of the 45 police officers thought to have escaped Tuesday had reached safety by Friday, but government helicopters were searching for the others, the military official said.

The report came as fighting continued in northern Sri Lanka, where security forces killed at least 18 guerrillas of the Liberation Tigers of Tamil Eelam, the rebel group fighting for an independent Tamil nation.

The military official said the Tigers were killed during a clash near the town of Pranthan, on the Jaffna Peninsula, where security forces were fighting to regain control of the territory.

At least 1,500 soldiers, rebels and civilians have been killed since fighting erupted in mid-June after rebels launched simultaneous attacks on four military camps in eastern Sri Lanka.

Within days of the outbreak of fighting, Tiger rebels captured more than 20 police stations and 30 army posts and took scores of police prisoner.

On Thursday, Sri Lankan officials said 500 police officers were still missing and many had been executed by the rebels.

''Forty-five of us were captured ... in the Batticaloa district on June 11 and were kept in three separate groups in their (Tiger) strongholds,'' one of the police officers who escaped said in a telephone interview.

''On Tuesday (July 17) we were brought to Eravu. Five of the Tiger rebels armed with automatic weapons were guarding us in a house. While the others were putting up a security fence surrounding the building, we grabbed one weapon and shot dead one rebel and forced two others to swallow cyanide, and then we escaped,'' he said.

He said he and the other prisoners were handcuffed, interrogated and beaten during their captivity.

After their escape, the men walked about 45 miles before locating help at a police station in Araganvila in the north-central district of Polonnaruwa, a senior military source said Friday.

''Only 12 of them had reached the bordering police station,'' he said. ''We believe the others are still walking. We have deployed helicopters in the area to spot the policemen.''

The Sri Lankan government has been fighting Tamil separatist groups since 1983 but failed to crush the movement, which wants to establish a Tamil state in Sri Lanka's northern and eastern provinces.

In 1987, Colombo signed a peace accord with New Delhi in an attempt to end the fighting. Under the terms of the accord, India sent a military peace-keeping force to maintain law and order and to supervise the surrender of arms by rebel groups that agreed to stop fighting in return for greater autonomy in Tamil areas.

Only one group, the powerful Tamil Tigers, refused to give up their arms, claiming the peace accord failed to fulfill aspirations of the Tamil people.

Their refusal to sign sparked a war with Indian troops. At least 1,100 soldiers and 600 rebels died in the fighting before India withdrew its forces earlier this year.

By then, the Tigers and the government had agreed to a cease-fire and preparations were underway to hold elections in the north and east.

The peace held until last month when fighting once again erupted.

Tiger leaders believe a separate Tamil state is necessary because of years of alleged discrimination against the predominantly-Hindu Tamil minority by the majority Sinhalese, who are mostly Buddhist and control the Colombo government.

#90201u1197 07/20/1990 ~United Press International
PARIS (JULY 20) UPI - The government called Friday for ''pitiless'' justice to be meted out to police agents who ran a lucrative trade in assault rifles and rocket-propelled grenade launchers while serving at the French Embassy in Beirut.

''I am indignant,'' Socialist Interior Minister Pierre Joxe told Europe 1 Radio. ''A police officer ought to be exemplary.''

''Discipline should be equitable but pitiless.'' Joxe said of the affair, in which 10 police officers have been charged so far. Two of them are now serving at the U.S. Embassy in Washington.

Joxe said the affair ''gravely damaged not only the honor but also the authority'' of the police forces.

In Beirut, French Ambassador Rene Ala received orders from the Foreign

Ministry in Paris Friday to open an administrative inquiry on the arms trafficking, and especially to determine if any diplomats had been involved in the embarrassing racket.

''All dispositions have been made so that the inquiry can be carried out with the speed and rigor necessary,'' said Foreign Ministry Spokesman Daniel Bernard.

At this stage ''nothing leads us to understand that any French diplomat is implicated in any way in this affair,'' said the spokesman.

State Prosecutor Olivier Dropet said in the southern port city of Marseille Thursday that 10 police officers had been accused of involvement in the smuggling.

Four ringleaders among the 10 were identified as Sgt. Jean-Claude Labourdette, a national police officer who headed embassy and consulate security in Beirut since 1985, Patrick Jacquin, a CRS riot squad officer working at the French Embassy at Washington after previously serving in Beirut, Patrick Schaller, another CRS member working in Beirut, and Philippe Nino, a former police officer who was indicted last November on charges of running a luxury car smuggling racket.

Joxe has opened an inquiry into the conditions under which police officers work outside France.

Daniel Burden, an author who wrote a book about French intelligence, said in a television interview it was surprising that officers of the French secret service, or DGSE, at the East Beirut Embassy who were responsible for vetting staff at the sensitive mission, were not aware of what was happening.

In Mulhouse, in eastern France, two other police officers were released Thursday night after being held for questioning. Jean-Pierre Schwinte, 37, and Daniel Chaudron, 42, said they had bought arms from their brother officers running the network because they were ''passionate collectors, victims of their love for weapons of war.''

#90201u1220 07/20/1990 ~United Press International

MANILA, PHILIPPINES (JULY 20) UPI - A U.S. Marine plane crashed Friday while on a relief mission for victims of a massive earthquake, killing one person aboard and injuring the other, authorities said.

The official death toll in the earthquake reached 438 but authorities feared the toll could reach 1,000 as rescuers cleared more rubble in the mountain resort of Baguio and nearby isolated areas.

President Corazon Aquino asked lawmakers to drop a proposal to suspend foreign debt payments to channel funds to quake relief efforts and a rebel leader asked the government to suspend a manhunt for him to allow officials to concentrate on the tragedy.

The U.S. military aircraft crashed 3 miles southwest of the quake-stricken mountain resort of Baguio, 120 miles from Manila, while ''supporting disaster relief efforts'' in the northern Philippines, said U.S. Embassy spokesman Stanley Schrager.

One airman was killed and the second was injured in the plane, which came from the U.S. Subic Bay Naval Base. Names of the pilots were withheld pending notification of relatives. The cause of the crash has yet to be determined.

The quake last Monday, centered in Cabanatuan, 60 miles from Manila, was the deadliest temblor to strike the Philippines since August 1976 when an earthquake and tidal wave killed more than 3,000 people on the southern island of Mindanao.

The Military Office of Civil Defense said Friday 438 people had died and more than 2,225 had been injured in the temblor. The Red Cross put the death toll at 623.

The quake, which measured 7.7 on the open-ended Richter scale, left wide areas of the main island of Luzon in ruins. Officials said it would take 10 to 15 years to rebuild the battered cities.

President Corazon Aquino appealed to the Philippine people to stop blaming the government for the quake's destruction, saying, ''What we need to do now is to help each other.''

Opposition leaders have criticized Aquino for not reacting fast enough and blamed her administration for an uncoordinated relief effort.

''I appeal to our countrymen, let us stop blaming (the government),'' Aquino said in a nationwide broadcast. ''Let us not listen to those who just criticize and do nothing but complain.''

She also opposed proposals by lawmakers, expected to be submitted to Congress Monday, calling for a two-year suspension in payments on a $26 billion external debt to divert funds to earthquake-ravaged areas.

Most of those countries which offered earthquake assistance also are the Philippines's creditors, and Aquino called the earthquake aid "very touching."

''I can only hope that we do not rush into any resolution of action which can be misunderstood to a point where it undermines the goodwill and credibility we now enjoy as well as the already on-going efforts to mobilize external financial resources for our needs,'' she said.

Meanwhile, in a statement released to news agencies, rebel leader and cashiered Army Col. Gregorio Honasan proposed a temporary truce in the government's manhunt for him and about 150 followers to allow the country to devote its energies to rebuild quake-devastated areas.

Honasan, 41, who led a December 1989 coup attempt, said a truce could set aside political wranglings and possibly lead to reconciliation.

Presidential spokesman Tomas Gomez declined comment on the statement, saying ''We have a disaster in our hands and would rather devote our time to it.''

The quake destroyed 11,522 houses and severely damaged at least 27,894 more, leaving about 671,836 homeless, the Social Welfare Department said.

Aquino declared a state of emergency in the provinces of Tarlac and Nueva Vizcaya, bringing to six the number of provinces so designated.

Philippine armed forces chief Gen. Renato de Villa, said troops were concentrating their relief efforts in Nueva Viscaya, where at least 36 vehicles were reported trapped in landslides along a 30-mile stretch of winding mountain pass.

Defense Secretary Fidel Ramos said the death toll from the temblor that rocked the northern Philippines could rise to 1,000 as rescuers pulled more bodies out of landslides and communications were restored to isolated areas hit hard by the quake.

Workers cleared landslides from Naguillan Road, one of the main arteries to the hard-hit resort city of Baguio, and restored the city's airport enough to allow U.S. C-140 cargo planes ladened with relief suppies to land.

#90201u1222 07/20/1990 ~United Press International

CHEYENNE, WY (JULY 20) UPI - President Bush relied on America's most powerful weapons of mass destruction Friday to reinforce a warning to Congress that the close of the Cold War will not automatically bring an end to the dangerous realities of the nuclear age.

Two weeks after NATO, the guarantor of Western security for more than 40 years, declared its peaceful intent toward Moscow, Bush arranged a visit to the nerve center of the nation's MX missile force to be briefed on the

doomsday weapons used to deter the ultimate war.

The stop at Warren Air Force Base was added to the tail end of a four-state Western swing Thursday as a matter of geographic and political convenience.

Already in Wyoming to mark its state centennial and to enjoy a few hours of fishing, Bush scheduled the side-trip to Warren at a time when the MX is vulnerable to congressional budget cuts and questions of political obsolescence in the post-Cold War era.

The message, according to White House press secretary Marlin Fitzwater, was that even as the United States adapts its armed forces to a reduced risk of war, ''missile systems are still a key element of our defense strategy.''

''We're not disarming. We're not abaondoning our military,'' he said.

That was the same theme Bush struck in February during a visit to Strategic Air Command headquarters in Nebraska.

Scattered throughout the vast countryside around Warren, the missiles sit in underground silos, protected from attack by hundreds of tons of steel and reinforced concrete, each capable of hurtling 10 warheads with 200 times the explosive power of the bomb dropped on Hiroshima at separate targets in the Soviet Union.

The MX, a weapon with a controversial past and uncertain future, is a backbone of the U.S. adherence to Mutual Assured Destruction, the doctrine that the United States and Soviet Union will not resort to nuclear war as long as each knows the other would be capable of massive retaliation.

But massive retaliation requires that the weapons involved be able to survive an initial nuclear attack. And in its fixed silos, many defense planners see the MX as a sitting duck that could, in the worst of all scenarios, invite rather than deter a Soviet first strike.

That prompted the Carter administration to recommend a mobile basing mode for the MX that would have shuttled the missiles among a number of real and decoy shelters. The theory was that the Soviets, not knowing one from the other, would have been forced to target all the shelters - expending an inordinate number of warheads - in any attempt to destroy the MX force.

Congress, however, balked. Environmental and financial concerns left the MX in limbo until an April 1983 report to President Ronald Reagan that recommended deploying 100 to replace older Minuteman missiles in underground silos.

The same report recommended development of a transition to reliance on a mobile single-warhead missile, since dubbed Midgetman, to reduce the

number of warheads on each side and enhance strategic stability.

Now, the MX and Midgetman are in competition for scarce resources. Bush wants the MX placed on rail cars to improve its prospects for survival while continuing development of a new-generation truck-mounted Midgetman.

His budget requests have collided with mounting doubts that the United States needs to press ahead with two mobile missiles while working with the Soviets on reductions and future limits that could render them little more than costly, short-lived bargaining chips.

The Senate Armed Services Committee voted last week to cancel the $1.3 billion Bush wanted to begin production of the MX rail-launched system and instead approved $548 million for continued research.

The Senate committee also approved $202 million in research money for the Midgetman.

The administration proposes moving the 50 missiles at Warren from silos onto 25 trains, each carrying two missiles, that would be parked inside shelters at Air Force bases in seven states and moved onto the nation's rail network in times of crisis.

The United States does not now have a mobile continent-spanning missile. The Soviets have two missiles, the rail-based SS-24 and truck-mounted SS-25.

After Congress agreed last year to fund work on both the MX and Midgetman, Bush dropped a U.S. demand for a ban on mobile missiles in the strategic arms reduction agreement now taking shape in Geneva.

Looking at the probable outcome of that treaty, the possible elements of a follow-on accord - including a ban on multiple-warhead mobile misiles - and the skepticism expressed by Congress, administration officials concede the future of the MX is uncertain, one of the issues to be addressed in a new national security directive reflecting budget concerns, progress in arms control and changed world circumstances.

#90201u1235 07/20/1990 ~United Press International

SRINAGAR, INDIA (JULY 20) UPI - Authorities clamped a curfew on the winter capital of a northern state Friday, fearing an outbreak of Moslem-Hindu communal violence in the wake of a militant attack that left five people dead, officials said.

''The situation is tense but under control,'' said one official in Jammu, where thousands of Hindu refugees have fled to escape secessionist

violence in the Kashmir Valley, home to most of the region's 4 million Moslems.

The official said authorities imposed the curfew and ordered soldiers to patrol the streets of the predominantly Hindu city, about 300 miles northwest of New Delhi, after intelligence reports warned of possible Moslem-Hindu communal riots.

Tensions were running high in the city following an incident Thursday in which Moslem militants fired on a crowd at a local market, killing five people and wounding 10 others.

Angry Hindu fundamentalists called for revenge, and the nearby Hindu town of Udhampur held a general strike Friday to protest the incident.

The Press Trust of India news agency said security forces launched a massive hunt for the culprits, arresting 10 people and locating the car used by the attackers.

The Jammu and Kashmir Liberation Front, one of the primary Moslem militant groups leading the struggle for independence from India, claimed responsibility for the attack in a statement released in Srinagar, the summer capital of Jammu and Kashmir state and the largest Moslem city the region.

Normal life in the picturesque Kashmir Valley has been disrupted since mid-January with near daily curfews, bomb explosions, anti-India demonstrations, strikes and gun battles between militants and security forces.

Moslem militants have been waging a bloody campaign for secession from India since 1988, but the campaign gained widespread popular support in mid-January when security forces opened fire in Srinagar on an anti-India rally, killing more than 35 people.

New Delhi reacted by sending hundreds of thousands of security forces to smother the separatist campaign, but the movement shows no sign of slowing.

Moslem militants in Srinagar Friday detonated three bombs and set ablaze a bridge. They also torched the homes of four Hindus in Srinagar and nearby Sopore, police said. The residents of the houses had left the state earlier because of the violence, they said.

Moslem militants claim they need a separate state because of years of discrimination by the Hindu-dominated central government. They also claim New Delhi reneged on a pledge to hold a U.N.-supervised plebiscite to determine if the region would remain part of India or merge with Pakistan.

Both India and neighboring Moslem Pakistan claim sovereignty over Kashmir, with New Delhi controlling two-thirds of the region and Islamabad the remainder.

#90201u1244 07/20/1990 ~United Press International

ST. PAUL, MN (JULY 20) UPI - A divided Minnesota Supreme said Friday that first amendment freedoms outweigh a promise made to a news source and said the news source cannot win a lawsuit for breach of contract.

In a 4-2 decision, the high court reversed a $200,000 award given to publicist Dan Cohen, who had sued the Star Tribune of Minneapolis and the St. Paul Pioneer Press Dispatch for disclosing his name as a source in a political story in the 1982 campaign.

The high court also upheld a state Court of Appeals decision, which earlier had thrown out a $500,000 punitive damage award the lower court gave to Cohen.

The court ruled that Cohen did not have a contract in the terms of ordinary commerce to keep his name confidential when he turned over documents to reporters who promised to keep his name secret. But editors at both newspapers overruled the reporters and published his name as the source.

The court also ruled that Cohen did not have a contract under the more technical claim of ''promissory estoppel,'' which the court said would interfere with freedom of speech.

Associate Justice John E. Simonett wrote for the majority.

''The potentiality for civil damages for promises made in this context chills public debate, a debate which Cohen willingly entered albeit hoping to do so on his own terms,'' Simonette wrote. ''In this contest, and considering the nature of the political story involved, it seems to us that the law best leaves the parties here to their trust in each other.''

Cohen was identified in the news stories as the source of information given in the closing days of the campaign, pointing out two court cases, including a conviction of theft, against Marlene Johnson, who was a Democratic-Farmer-Labor Party lieutenant governor candidate.

Cohen was involved in the opposing party's election campaign, working as a volunteer for Independent-Republican gubernatorial candidate Wheelock Whitney. Cohen was fired from his public relations job when he was identified as the source of the story published Oct. 28, 1982.

The newspapers' editors decided to publish Cohen's name as the source of the leak about Johnson, who was charged in 1969 with three counts of unlawful assembly, which were later dismissed, for protesting the alleged failure of a city to hire minority workers on construction projects, and a petit theft incident for leaving a store with $6 of sewing materials when she was upset about of her father's death. The theft conviction was vacated a year later in 1971.

In throwing out the contract argument, the court said a moral obligation to keep the name of a source confidential is not a legal contract.

#90201u1261 07/20/1990 ~United Press International

JERUSALEM (JULY 20) UPI - The wreckage of a missing Israeli military observation plane and the body of its pilot were found Friday in the Golan Heights, a military spokesman said.

The 33-year-old Israeli officer, whose name was not released, was on active reserve duty at an air force base in the center of the country when he took off July 13 without authorization in the ''Agur'' observation plane, a twin-engine Dornir 28.

Chief of Staff Lt. Gen. Dan Shomron and Air Force Chief Maj. Gen. Avihu Ben-Nun, together with members of a special committee investigating the incident, visited the scene of the wreckage, the military spokesman said. The wreckage was found by a military patrol conducting searches for the missing plane.

The investigation into the reasons for the pilot's actions and the cause of the crash is continuing.

#90201u1263 07/20/1990 ~United Press International

ST. ANDREWS, SCOTLAND (JULY 20) UPI - Greg Norman strung together three straight birdies to close the front side Friday, moving into the lead midway through the second round of the 119th British Open.

Norman, who shared the first-round lead with Michael Allen, was at 9-under after nine holes to hold a one-stroke lead over a quartet of golfers.

Payne Stewart carded his second straight 4-under-par 68 Friday for a two-day total of 8-under 136. Still on the course at 8-under were Masters champion Nick Faldo after six holes and Craig Parry and Ian Woosnam after seven.

Norman started slowly Friday on the Old Course, carding a bogey at the

par-4 second hole, but got back level for the day with a birdie at the par-4 fourth.

He pushed past Stewart with his birdie string at Nos. 7, 8 and 9 to complete the front side in 33.

Stewart, winner of last year's U.S. PGA Championship, began the day at 4-under-par, two strokes behind the leaders. He birdied three holes on the front side to move to the lead, then played the back side in 1-under.

''I played much like yesterday - was patient and put the ball on the greens a lot. I was trying to get my putter working for me,'' Stewart said. ''I was trying to stay out of situations where it would cost me shots, and the only way to do that is to stay away from those little bunkers.''

Stewart also managed to use the North Sea winds to his advantage both days despite playing in blustery conditions Thursday.

''I got fortunate on my tee times,'' he said. ''Yesterday I was getting help going out and then it turned and I was getting help coming in. Today we had a little wind, then it died out. On the first two days, tee times are critical to how you play.''

Next at 7-under was James Spence, whose 65 was the best round of the tournament, and Nick Price after 16 holes.

Spence, a 27-year-old Englishman who plays on the PGA European Tour, birdied three of the final four holes on the front side and added a run of four birdies in five holes after the turn in posting his 65.

''I've got good touch around the greens, and that really helped me out around this golf course,'' he said.

Spence's best showing this year has been a ninth-place finish at the Belgian Open, and he has missed the cut in each of his last four tournaments.

''When I go to my bedroom and see my name on the television, I'll probably think, 'My god, was that really me?''' he said.

Tournament Players Championship winner Jodie Mudd, Peter Jacobsen, Steve Pate, Anders Sorensen, Sam Torrance and Jose-Maria Olazabal were next at 6-under 138. Mudd fired a 66 on Friday, while Olazabal carded a 67, Sorensen and Pate each had 68s and Jacobsen and Torrance 70s.

Allen was at 5-under through three holes after teeing off in Friday's penultimate group.

Friday's round began much like Thursday's - in still air with only a slight breeze. Though moderate cloud cover obliterated the sun that beat down on golfers in the first round, the lack of wind took away some of the challenge the legendary Old Course presents in typical North Sea bluster.

Like the previous day, the wind began stiffening by noon Friday, as both temperatures and scores dropped.

That gave some of Friday morning's golfers a chance to gain ground they lost when the wind picked up Thursday afternoon.

''It was really still for the first six or seven holes, then it started to blow by No. 15,'' Olazabal said. ''That's what we need to make it fair compared to yesterday.''

Of the 78 golfers that teed off in the morning Thursday, 34 recorded scores below par. Only 15 of the 78 that began after noon could manage the feat. Eight of the first round's 13 leading players took advantage of the morning tee times.

BACOLOD, PHILIPPINES (JULY 20) UPI - Communist guerrillas Friday freed two businessmen kidnapped 19 days ago, but gave no hint on when they would release a Peace Corps volunteer and a Japanese rural technician still being held, officials said.

Businessmen Joel Tan and Wellington Uy were released early Friday to Dick Agravante, a lawyer in Calatrava, a town on Negros island, 300 miles south of Manila, said military officials who demanded anonymity.

Tan and Uy were kidnapped while on their way home from a tennis match July 8. Two others kidnapped with them were released last week.

The officials said Agravante brought with him the equivalent of $869 as ransom but the guerrillas did not accept the money.

The communist New People's Army said earlier it would free Timothy Swanson of Cheyenne, Wyo., and Japanese technician Fumio Mizuno.

However, no contact has been made with the guerrillas since they made the announcement last week and set conditions for the release, which included a three-day cease-fire.

Swanson, who celebrated his 27th birthday Thursday, was kidnapped June 13; Mizuno on May 29.

Swanson's kidnapping was discovered by U.S. officials implementing a June 27 order suspending the 29-year-old Peace Corps program in the Philippines and recalling 261 volunteers. The officials said the guerrillas waging a 21-year insurgency had threatened to attack the volunteers.

The NPA has been blamed for the killing of 10 Americans since October 1987. The guerrillas have vowed to kill Americans until Washington withdraws its troops from the Philippines.

#90201u1308 07/20/1990 ~United Press International

WASHINGTON (JULY 20) UPI - The Republican Party, struggling to regain the offensive on a host of issues, announced Friday that political consultant Charles Black will take charge as chief party spokesman while GOP Chairman Lee Atwater recuperates from a brain tumor.

And Atwater, in a statement, gave the most positive news to date regarding his condition, noting that ''doctors tell me that my tumor has stopped growing and is dying.''

Black, a longtime personal friend of Atwater, is a partner in the political consulting firm of Black, Manafort, Stone & Kelly and, since the discovery of Atwater's brain tumor in March, has been actively advising the Republican National Committee and President Bush.

However, there have been increasing grumblings within the party that, with the clever and tenacious Atwater on the sidelines, the GOP has lost the offensive to Democrats on issues such as taxes, the savings and loan disaster and civil rights.

Atwater's chief of staff, Mary Matalin, has been handling day-to-day RNC operations and most party insiders have praised her operation.

But some say Matalin lacks the clout of Atwater and that White House chief of staff John Sununu has been making too many major political decisions without enough advice from others.

The 39-year-old Atwater, in a statement released by the RNC, said that while his health is improving, ''I still must spend several hours a day in physical therapy, which does not allow me to carry out duties as the daily spokesman for the party, and that role is too important to let slip as we head toward Election Day.''

''For the last 18 years, Charlie Black has been my best friend and political eyes and ears. I've now asked him to be my mouthpiece and Charlie has unselfishlessly accepted. Charlie will serve as my designated

spokesman until I return to work on a full-time basis,'' Atwater said. ''Charlie speaks for me and the party.''

Atwater also acknowledged that the ''Democrats are turning up the political heat on a variety of issues'' and charged the opposition is forgetting the ''spirit of bipartisanship'' Bush has sought to develop.

Black, who said he would not be paid for his increased role, noted that his decision to accept the post came after talks between Atwater and Bush.

There was no immediate comment on the announcement from Bush, who was making a political tour of the West.

Black said his immediate goals are to turn the tables on the Democrats on the savings and loan issue and the tax and budget questions.

A GOP aide said party officials hope the addition of Black would give the GOP ''the 800-pound gorilla'' it needs to combat Democrats.

Regarding Atwater's health, Black said tests had shown the brain tumor had not grown and there were an increasing number of dead cells in the growth. However, it still has not receded, he said.

He said Atwater's progress was precisely what doctors had said they hoped for in April when Atwater received extremely aggressive radiation treatment.

#90201u1314 07/20/1990 ~United Press International

PARIS (JULY 20) UPI - The Boy Scouts of America will present gifts of $25,000 each to newly recognized Scout organizations from Hungary and Czechoslovakia when the 32nd World Scout Conference opens next week, a Scout spokesman said Friday.

Ben Love, chief executive of the Boy Scouts of America, will make the awards Monday at the conference, the largest in the history of the movement, the spokesman said.

French Minister for Education, Youth and Sport Lionel Jospin will open the conference with a message from President Francois Mitterrand. Also Monday, participants will attend a reception given for them by Prime Minister Michel Rocard.

The U.S. Scouts' donations of $25,000 each to newly recognized Scout organizations from Hungary and Czechoslovakia will be a high point of the gathering, which has as one of its central themes the revival of Scouting in Central and Eastern Europe.

Under many of the now defunct hard-line communist regimes of Eastern Europe, the Scout movement was frowned upon or taken over by the state to promote ideals incompatible with those of Scout movement founder Robert Baden-Powell, Scouting officials said.

Another theme to be discussed will be ways of expressing solidarity with children from regions in the Soviet Union affected by the Chernobyl nuclear disaster. Scouts working together with the U.N. Educational, Scientific and Cultural Organzation have invited groups of these children to several European countries so that they can have holidays this summer.

#90201u1326 07/20/1990 ~United Press International

LONDON (JULY 20) UPI - Stock prices closed higher in light trading Friday on the London International stock exchange despite an explosion that rocked the building housing the exchange's admininistrative offices.

The blue-chip Financial Times 100-stock index, which fell 14.7 points Thursday, closed up 12.8 points at 2,400.1.

The key index, which measures the value of Britain's largest 100 companies in terms of market capitalization, posted a gain of 17.9 points for the week.

The narrower top 30 industrial average and exchange volume were not available, due to disruption of some services. On Thursday, 412 million shares changed hands.

The blast failed to interrupt trading in ordinary shares, which is conducted on a computer screen-based system, but did cause considerable damage to the exchange's ground floor, where options trades are transacted by telephone and computer. Trading in options was suspended for the day.

The explosion damaged the visitors' gallery but caused no injuries because authorities were warned in time to evacuate the building.

Analysts said Wall Street's steady opening helped stocks stay at or near the day's best levels, while higher crude prices boosted oil stocks.

Among the day's most widely traded stocks, British Petroleum gained 12 cents to $6.

Speculators continued to buy shares of STC, which confirmed it was holding talks with Fujitsu of Japan on a sale of its mainframe computer manufacturer, ICL. STC closed 16 cents higher at $5.22 on turnover of around 9.4 million shares.

Breweries continued their summer streak. Grand Metropolitan gained 24 cents to $12.08.

Hopes of early news on the flotation of the Del Monte Fruit business helped send Polly Peck 25 cents higher to $8.14.

Berisford International, the troubled property and sugar company, lost 6 cents to 90 cents a share on an absence of bid developments.

Elsewhere in Europe, stock prices closed lower in moderate trading on the Frankfurt Stock Exchange.

The closely watched German Stock Index eased 9.81 points to 1,947.43.

Traders said prices eased amid some consolidation of the market's recent gains.

#90201u1349 07/20/1990 ~United Press International

BEAVERTON, OR (JULY 20) UPI - Tektronix Inc., Oregon's largest private employer, reported Friday a loss of $65.7 million for the fourth fiscal quarter, compared with a loss of $2.1 million in the fourth quarter of the previous year.

Sales for the quarter totaled $362.2 million, slightly better than the $361.6 million a year ago. Sales for the fiscal year were $1.4 billion, down from $1.43 billion the previous year.

Officials said the loss, which had been predicted, resulted mostly from charges for costs from restructuring some parts of the company, including layoffs and asset write-downs.

The electronics company also reported a $92.5 million loss for the fiscal year ended May 26, primarily due to stagnant sales and a major restructuring, including hundreds of layoffs.

The company announced in late May it would lay off another 1,300 workers by August, reducing overall employment to 13,000, down from a peak of 24,000 in 1981.

Excluding the restructuring charges, income before taxes for the year was $9.6 million, compared with $57.3 million the previous fiscal year.

''Fiscal 1990 was clearly a tough year for Tektronix,'' said Robert Lundeen, chairman of the board and chief executive officer.

''The major charges we incurred at the end of the year were aimed at getting our costs for the coming year in line with expected revenue, and at positioning the company to focus on its key businesses,'' he said. ''Thus, with revenue plans which we believe are conservative, we are striving for improved financial performance in the coming year.''

Customer orders for the fiscal year topped $1.4 billion, up 3 percent from fiscal 1989. But sales to U.S. customers were down 1 percent from last year and made up 54 percent of sales for the year.

Tek's original products of oscilloscopes and testing devices have expanded to include such computer-related items as color printers.

BANGKOK, THAILAND (JULY 20) UPI - U.N. and Vietnamese officials have finished interviewing more than 100 Vietnamese boat people scheduled to be the first large group of displaced Vietnamese to be voluntarily repatriated from Thailand, officials said Friday.

So far 126 Vietnamese in Thai refugee camps have confirmed their willingness to return home in interviews this week with Vietnamese and U.N. officials, said Alexander Casella, representative of the U.N. High Commissioner of Refugees in Bangkok.

''We have reached an agreement with the Vietnamese government that they (the refugees) will not be persecuted or punished,'' he said.

''We will monitor and visit them in Vietnam,'' Casella said.

Casella said the UNHCR will give each refugee $50 while he or she is in Thailand and a monthly allowance of $30 for 10 months after his arrival in Vietnam.

Casella said he expected the first group would leave for Ho Chi Minh City, formerly Saigon, next month.

''The program is the same thing we have done in Hong Kong,'' said Nguyen Quang Dy, information officer at the Vietnamese Embassy in Bangkok.

Officials hope the repatriation program will expand as refugees realize they have little chance to be resettled in the West.

Neighboring Malaysia reportedly has begun pushing refugees back out to sea because of frustration at the slow pace of resettlement in the West.

An official at the Thai National Security Council said Thailand currently

provides first asylum to about 14,000 Vietnamese boat people who are waiting for interviews to determine whether they fit the UNCHR definition of genuine refugees - those fleeing their country because of genuine fear of persecution.

The genuine refugees will be granted the right of settlement abroad while the others are to be repatriated under a program agreed to by major refugee-receiving countries.

Casella said the UNHCR plans to set up a transit center in September 125 miles northeast of Bangkok to handle the estimated 1,000 Vietnamese expected to volunteer for repatriation.

#90201u1373 07/20/1990 ~United Press International

JOHANNESBURG, SOUTH AFRICA (JULY 20) UPI - President Frederik de Klerk and black nationalist leader Nelson Mandela met Friday and agreed to a second round of talks between the government and the African National Congress Aug. 6, the president's office said.

De Klerk and Mandela, the ANC deputy president, discussed ''progress made since the first government-ANC meeting'' May 2-4 to discuss obstacles to negotiations over a post-apartheid constitution, a statement from the office said.

The next round of talks will ''further examine the obstacles on Aug. 6,'' the statement said, without giving other details, compositions of the delegations or a site.

Mandela said Wednesday on his return from a 45-day, 14-nation tour that he ''urgently'' wanted to meet de Klerk to discuss talks.

The two sides agreed at their first meeting, in Cape Town, to set up joint working groups on two of the ANC's major preconditions to negotiations: the release of some 1,500 political prisoners and the return of about 20,000 exiles.

The working groups have, according to unconfirmed reports, agreed on compromises that would leave three remaining stumbling blocks.

The ANC is demanding that the government scrap South Africa's security laws restricting civil liberties, withdraw troops from warring black townships and end a 4-year-old state of emergency in Natal province that was lifted June 8 in the rest of the country.

The government has said the rigid demands should not hold up substantive talks.

The government announced Thursday the cabinet will hold a planning session for the talks outside Pretoria July 30-31 and the ANC's leadership said in a statement it will meet July 23 and 24 in Johannesburg.

Mandela, 72, has kept in regular contact with key cabinet ministers since his release from prison Feb. 11 after 27 years and reportedly also has a good rapport with De Klerk.

#90201u1376 07/20/1990 ~United Press International

WASHINGTON (JULY 20) UPI - The Food and Drug Administration has found problems at a Pittsburgh laboratory that tests generic drugs to make sure they are equivalent to their brand-name counterparts, officials said Friday.

The agency is working with officials at Biodecision Laboratories Inc. to correct the deficiencies in tests done to ensure generic drugs are equivalent to their brand-name counterparts, said FDA spokesman Mike Shaffer.

''FDA is in the process of determining which drugs either on the market or in the process of being reviewed pending approval are involved. We're trying to find out whether any of these flawed studies were used as the basis of approval,'' he said.

The deficiencies were uncovered in January during an investigation of 14 laboratories that do so-called ''bioequivalency'' studies to ensure the quality of generic drugs.

The investigation was launched as part of an ongoing controversy at the FDA over the agency's approval process of generic drugs. FDA also received tips from former Biodecision employees.

''FDA found in checking around at these labs one in particular where there were a lot of problems,'' Shaffer said. Such problems included poorly trained personnel or a failure to follow proper instructions, he said.

''FDA is meeting with the lab. They have agreed to correct all the deficiencies,'' he said.

Biodecision President Robert Lecher said the company has worked with the FDA to correct the alleged major testing errors and improprieties.

Lecher also said he believes Biodecision has achieved compliance with FDA regulations, adding the firm's tests are valid and its data and conclusions are reliable.

#90201u1409 07/20/1990 ~United Press International
SIBIU, ROMANIA (JULY 20) UPI - A defense lawyer urged a military tribunal Friday to free Nicu Ceausescu, saying the son of the executed Romanian dictator was ill and the strain of his trial on genocide charges was ''destroying him.''

The appeal by defense lawyer Paula Jakob came shortly before the five-judge panel declared a month-long recess in the trial, which resumed Monday after a break of several weeks.

''All these hours spent under the glare of TV lights are destroying him,'' Jakob said of Ceausescu, 39, who she says suffers from hepatitis and other disorders and may not survive his trial.

''Please, sir, give Nicu a shore to land on, some place where he can come to rest. His only shore is you,'' Jakob said.

The defense contends the government has failed to prove its case against Ceausescu, who is accused of ordering security forces to open fire on demonstrators in the city of Sibiu during the December revolution that toppled his father's hard-line government.

Ceausescu, a reputed playboy and gambler, was Communist Party boss in Sibiu and his father's handpicked successor. He was arrested shortly after the elder Ceausescu was executed Dec. 25. Nicu Ceausescu has been imprisoned ever since.

Although widely hated in Romania because of his rumored extravagant life style, public opinion has began shifting in Ceausescu's favor in recent weeks. The change began after Ceausescu took charge of his own defense and grilled his accusers in a flamboyant fashion during the nationally televised proceedings several weeks ago.

A group of Sibiu residents announced Friday they were planning demonstrations to demand Ceausescu's release.

-30- 1885
#90201u1413 07/20/1990 ~United Press International
WASHINGTON (JULY 20) UPI - A third police officer assigned to guard Mayor Marion Barry testified Friday he did not see the mayor use cocaine during a 1988 trip to the Virgin Islands that witnesses characterized as a four-day party of cocaine and sex.

Officer Ulysses Walltower's testimony about the trip was in sharp contrast

to that described by government witness Charles Lewis, a former city employee and convicted drug dealer who said he, Barry and a number of women shared 24 bags of crack.

Barry played football on the beach with his young son, Christopher, during the March 1988 trip, went shopping with the boy and his friend, met with the governor of the Virgin Islands and took a day-long boat ride where no drugs were ever present, testified Walltower.

Lewis testified he and Barry smoked crack in the bathroom of the ship, called the Oceans of Fantasy.

''Did you at any time see any drugs of any sort?'' on the trip, asked defense attorney R. Kenneth Mundy.

''No, I did not,'' said Walltower.

The testimony of Walltower and two other members of Barry's elite security detail was an effort by Mundy to discredit Lewis, whose testimony forms the basis of three perjury charges, the only felony counts against the mayor.

Barry also is charged with 11 misdemeanor counts: 10 counts of cocaine possession and a single charge of conspiracy to possess cocaine.

If convicted of all 14 counts, Barry, 54, could be sentenced to 26 years in prison and fined $1.85 million.

Walltower testified he did not see drugs or paraphernalia of any kind on the trip, did not hear Barry or Lewis discussing drugs and did not see the three-term mayor in the company of women, despite entering Barry's hotel room a number of times.

Three women from the Virgin Islands testified early in the trial about the March 1988 trip, with one, Dixie Lee Hendrington, claiming she saw Barry smoke marijuana at the Morningstar Beach hotel on St. Thomas, where he made sexual comments to her. She also testified Barry and Lewis went into a bathroom and she saw smoke and smelled what she thought was crack cocaine.

Another witness, Zenna Matthias, said she saw Barry holding a vial of powder cocaine in the hotel room, lying on the bed and watching an X-rated movie before making sexual advances to her.

And witness Linda Maynard said she smoked crack with Lewis at the hotel party and that Barry later ordered Lewis from the room and sexually assaulted her.

During the prosecution portion of the trial, 10 witnesses alleged Barry had used cocaine or been supplied the drug since 1983.

The defense began presenting its case Thursday.

Walltower's testimony corroborated statements of two other members of Barry's security detail, James Stays and Warren Goodwine, who said Thursay they attended the Virgin Islands trip but saw no evidence of drug use.

But under cross-examination, Walltower conceded he was not with Barry at all times during the trip.

All three men, members of the District of Columbia police department, also testified they were in different hotel rooms from where Barry stayed and spent significant amounts of time out of his presence.

Assistant U.S. Attorney Judith Retchin claimed she has evidence that Stays once used cocaine himself during a cookout in suburban Maryland, which Stays denied under oath. The government could introduce such evidence after the defense rests.

Walltower, a 20-year police veteran, said he has been a member of Barry's 24-member executive protection unit since late 1984 or early 1985.

#90201u1450 07/20/1990 ~United Press International

MONROVIA, LIBERIA (JULY 20) UPI - Advancing rebel troops captured much of the northern part of Liberia's capital Friday and squeezed a few hundred remaining government troops into a narrow strip of land on both sides of President Samuel Doe's executive mansion.

Troops of Charles Taylor's Rebel National Patriotic Front of Liberia overran Monrovia's 2-square-mile free port in the northern suburb of Bushrod island and advanced towards two bridges linking the island to the center of the city.

Witnesses reported that the infiltrating rebel troops fought pitched battles with government troops who remained on Bushrod island.

They said the main bridge across the Mesurado river was littered Friday morning with the bodies of government troops.

Shipping sources said two Liberian Coast Guard cutters were sunk in the port by gunfire during the battle for the area.

The rebels, estimated have between 4,000-5,000 fighters, launched a full-scale assault on Thursday after laying siege to the capital for more

than two weeks.

During that time, rebel and government delegatations have met in neighboring Sierra Leone for last-ditch talks aimed at ending the 6-month-old civil war.

But the discussions in Freetown broke down Friday, with the rebel delegation leaving Sierra Leone saying further discussions were pointless.

In Monrovia, hundreds of residents gathered at the gates of the American Embassy hoping to seek refuge, while scores of others broke into a U.S. Marine compound demanding food and shelter.

In the downtown area, every shop and office was closed.

Nervous troops ordered civilians off the streets in an unofficial daytime curfew which is effective throughout the government-controlled areas and has prevented refugees from reaching Spriggs Payne airport to catch the last remaining flights out of the country.

Soldiers set-up makeshift roadblocks at intersections in the city center, firing wildly into the air to clear terrified civilians off the streets.

The fresh fighting pushed remaining loyal troops to areas flanking Doe's Israeli-designed fortified mansion, where they prepared for what seemed would be the final stand of the former master-sergeant who seized power in a bloody 1980 coup.

U.S. Ambassador Peter de Voss went in a well-guarded convoy to the president's mansion Friday morning.

An embassy spokesman said he was received by acting Foreign Minister George Wallace, but did not see Doe, who has refused visitors for the past two weeks.

''I can tell you neither what was said nor what was not said,'' the spokesman said of the meeting.

A mission of five ambassadors tried to see Doe Wednesday but only managed to meet a junior official.

Diplomatic sources said Doe was surrounded by a personal bodyguard of his own Krahn tribesmen, who were unwilling to let the president leave the capital without them.

Members of the Krahn tribe from which Doe originates form the bulk of his troops, and discussions have stalled on their demands for a safe passage through rebel-held areas to their stronghold in Grand Gedeh county.

Taylor is reported to have rejected any such safe conduct.

Many civilians of the Gio and Mano tribes which support Taylor have been slain by government troops, and the advancing rebels have similarly shown little quarter to Krahn civilians in areas they have captured.

Most Krahns expect vast amounts of retaliatory bloodletting should the guerrillas take Monrovia, and thousands of people have taken advantage of the rebel's opening a main road west to give them an escape route to Sierra Leone.

#90201u1453 07/20/1990 ~United Press International

PENSACOLA, FL (JULY 20) UPI - Six soldiers who some say came to Florida to destroy the anti-Christ may believe that a human can be impregnated by UFO "demons" and give birth to the evil one, a minister said Friday.

Barry Downing, author of "The Bible and Flying Saucers," said there is a belief in some evangelical literature that UFOs are demons and that a rash of sightings will usher in the Second Coming of Jesus Christ.

The Pensacola area, which has had some 200 UFO sightings since 1987, is so well-known that a private group that investigates UFO sightings chose the area for a symposium earlier this month.

"Fundamentalists would say that if UFOs are active and demonic, then the ultimate demonic force may be roaming around Pensacola," said Downing, a clergyman from Endwell, N.Y., who spoke at the symposium. He said one author refers to the demons as "ultraterrestrials."

A day after the symposium ended, six soldiers - five men and one woman - arrived, said the police chief of Gulf Breeze, a suburb where the majority of the purported sightings have taken place.

The six, all AWOL from their military intelligence unit in West Germany, were arrested Friday and Saturday and sent to Fort Benning, Ga., for questioning. They have been charged with desertion. The Army said indications are they were not involved in espionage.

What brought them to Pensacola has been the key question. They were staying at the home of a woman one of the soldiers had met while attending cryptology school at the Navy's Corry Station in Pensacola. A television station identified her as a psychic.

The Stars and Stripes newspaper reported the soldiers came to destroy the anti-Christ, a Biblical figure that will supposedly lead the world into

seven years of turbulence before the coming of Christ.

They left behind burned books and records and gave away possessions. There were doodled references to the "End of the World." The Army at first called it a cult but now says no such organization appears to exist. The Army said it is probably a "clique" involving the six.

Downing, who studies the impact of UFOs on religiion, said one theory about UFOs holds that they are demonic, here to torment mankind before the coming of a savior.

Downing said UFO researchers without a religious bent have long held that UFOs are kidnapping and impregnating humans. He said that for those with a Christian fundamentalist belief, extraterrestrials impregnating humans "is a good way to get the anti-Christ here."

"I think this is a serious dimension to the whole UFO phenomenon," said Downing, who himself believes that UFOs are angelic, and claims they have done more good then harm.

Ted Peters, author of "UFOs - God's Chariots?," said the idea that UFOs are demons arose in the 1970s among some fundamentalists. It holds that the devil wants people to believe in evolution by creating UFOs.

"It's in the literature. It's a general theme but I don't know of a cult or sect that would have that as a major tenet," said Peters, who teaches Christian theology at the graduate theological union at Pacific Lutheran Theological Seminary in Berkeley, Calif.

#90201u1460 07/20/1990 ~United Press International

WASHINGTON (JULY 20) UPI - Children may soon be watching new television programs they might not like as much but, like some other things, are meant to be good for them.

The good part for kids is a fixed limit on commercials. The bad part is the programs could seem like school.

The Senate passed by voice vote late Thursday a bill that would require all commercial television broadcasters, including cable, to provide programs that meet the ''the educational and informational needs'' of children.

The Federal Communications Commission would be required, when deciding on a broadcast license renewal, to consider whether a station has met certain requirements before granting an extension.

''This consensus bill paves the way for a significant contribution to the education of young children when it gets signed by the president,'' said Peggy Charren, president of Action for Childrens Television.

''Parents across the country have been waiting for this for more than 20 years. It makes children part of the television broadcasters' legal obligation to serve the public.''

Charren dismissed the limitations on advertising - 10.5 minutes an hour on weekends and 12 minutes an hour on weekdays - as not a great concession on the part of the broadcasters. But she was ethusiastic about the rest of the bill.

The House has been waiting for the Senate to develop the measure, which includes acceptance by the broadcast industry, and congressional passage could come before Congress leaves for a month-long recess early in August.

The obligation of broadcasters to program for children has been discussed among policy-makers for at least 30 years.

As far back a 1960, the FCC decided to include children as one of the groups for which programming needs had to be met, and in 1974 the FCC reported that broadcasters had a special obligation to children, including airing programs all days of the week.

Sen. Daniel Inouye, D-Hawaii, said in a statement, ''It was because of the commission's reluctance to enhance children's television that the Congress has had to step in.''

What will children be seeing?

The broadcasters are given the ''greatest possible flexibility'' to meet the proposed requirements, and Inouye said, ''We recognize that there is a great variety of ways to serve this unique audience.''

Sen. Tim Wirth, D-Colo., has has been active on the issue for some 15 years, said the purpose of the bill is to reverse the trend of the 1980s ''that has seen commercial television broadcasters virtually abandon their efforts at children's educational programming.''

General audience programs that have merit for children are not enough, Wirth said. He said what the bill requires are programs ''uniquely designed'' for children.

Wirth said the programs should ''entertain'' children to make it attractive to them, but said the ''essential element'' is to take into account the special nature of the children audience.

''No matter matter how worthwhile and educational a general purpose adult program may be for the older child, standing alone, it often does not meet the needs of younger children,'' Wirth said.

The legislation also would establish the National Endowment for Children's Educational Television, with an authorization of $10 million for fiscal 1991, to provide grants for the creation of programming directed specifically at the ''development of fundamental intellectual skills.''

Those programs would be made available to public and non-commercial television the first two years and then to commercial television.

DENVER (JULY 20) UPI - The Walt Disney Co. will pay $550,000 and institute an employee environmental training program as settlement of a federal suit for illegally disposing of waste in Utah and Wyoming, the Environmental Protection Agency said Friday.

An EPA spokesman said Disney had accepted responsibility for the illegal disposal, even though the violation was done by an independent contractor and Disney knew nothing of the disposal.

Disney said it has filed a suit against the former transporter it had hired to dispose of the waste, which consisted of paint thinners and other materials used in painting and cleaning operations at the Disneyland facility.

EPA charged Disney with waste disposal violations after the wastes were shipped in 1988 and 1989 by the contractor from Disneyland to facilities in Wyoming and Utah. Neither of the facilities was authorized to handle materials. The Disney employee training program will educate workers on how to supervise third-party contractors, the EPA said.

Robert Duprey, director of the regional EPA Hazardous Waste Management Division, said Disney had cooperated fully with the investigation and the EPA was satisfied that Disney did not act intentionally and had taken steps to correct the mistake.

Tom Deegan, a Disney spokesman in Burbank, Calif., said Disney has dismissed the contractor, Ken's Oil Co., of Garden Grove, Calif., and filed a lawsuit earlier this week against the company. He said the amount of paint thinners and solvents involved in the shipments was "no more than a truckload."

#90201u1480 07/20/1990 ~United Press International
KANSAS CITY, MO (JULY 20) UPI - U.S. Attorney General Richard Thornburgh said Friday 78 percent of the defendants sentenced in major savings and loans fraud cases have gone to prison for up to 30 years.

"Savings and loan rip-off artists are learning the hard way that the interest payments on their corrupt practices will be exacted in years behind bars in a federal prison," he said. "With the additional resources secured by President Bush ... any thrift executive who leaves the American taxpayer holding the bag for their excursions in greed will feel the full weight of federal law enforcement."

Thornburgh met briefly with representatives from Kansas City-area law enforcement and financial institution regulatory agencies after addressing judges from the 8th U.S. District.

He later told reporters he did not know the average sentence for defendants in thrift fraud cases, but said the amount of time served was not the important issue. "It's the imposition, rather than the length of jail time, that's important," he said. Thornburgh told the agency representatives that 329 individuals have been indicted, and 213 convicted, in major savings and loan fraud cases.

"Right now we have 530 thrift institutions under investigation," he said. "These complex cases often involve thousands of documents, hundreds of witnesses, and months of painstaking investigation. They are complex and take time to develop, research, investigate and prosecute. But it is time well spent - as the courts have shown us. Again and again we've seen stiff prison sentences imposed on those we've convicted."

Thornburgh said financial institution fraud cases would remain a priority for the justice department for at least five more years. Asked whether a special prosecutor should be appointed to investigate Neil Bush's role in the Silverado thrift case, Thornburgh said a special prosecutor was not warranted because there have been no allegations of criminal wrongdoing by Bush.

#90201u1504 07/20/1990 ~United Press International
HIGHLAND PARK, MI (JULY 20) UPI - Chrysler Corp.'s top labor negotiator said Friday the No. 3 automaker plans to explore with the United Auto Workers union the possibility of employee ownership and a wide range of other issues to contain soaring costs that are making the company uncompetitive.

During the first day of contract talks with the union, Anthony P. St. John vice president of employee relations for Chrysler, outlined a series of

topics that also included multi-employer health care trusts, which he said would effectively give the automaker more clout to lower what he called the highest health care costs in the industry.

St. John also said Chrysler will discuss some form of "gain-sharing" program, under which employees might receive cash compensation for reduced absenteeism and increased productivity.

"What we desperately need at Chrysler is cost parity ... cost comparisons comparable to our competitors," St. John said, adding that non achieving this over the long term "is utlimately failure."

The UAW opened contract talks Wednesday with industry giant General Motors Corp. and with Ford Motor Co. on Thursday. Existing three-year pacts at all three carmakers covering about 500,000 U.S. autoworkers expire Sept 14. Chrysler has about 55,000 UAW workers.

While declining to be more specific on most topics, St. John said Chrysler faces a $7 an hour jump in health care costs, effective Jan. 1, 1993, when accounting changes ordered by the Financial Accounting Standards Board take effect - a matter that will affect GM, Ford and other industries as well.

Chrysler, which has nearly one retiree for every active worker - the highest ratio of any domestic carmaker - will be paying its workers an average $36 an hour in total and benefit costs at the end of the current contract, St. John said.

Despite the dire scenario painted by St. John for Chrysler, UAW President Owen Bieber said predictions about the demise of the carmaker are "very premature" and that the union is determined to maintain the pattern contracts now in effect at the nation's Big Three automakers.

"This round of bargaining is on pattern and that's where it's going to stay," Bieber said. Pattern agreements, or basically identical contracts, were achieved by the union decades ago, although it allowed Chrysler to break the pattern in 1979 because it was near bankruptcy.

"Chrysler would gain nothing... by suggesting that its workers are worth less than workers performing identical jobs elsewhere," Bieber said, adding pattern agreements "have served the industry well."

St. John said, however, that the industry is "no longer a monopolistic, oligopolistic, three-company industry" and that there have been "terrific differences in the economic and competitive climates compared with what existed 30 years ago."

Job security tops the union's agenda at all three automakers this year,

while cutting production costs and seeking more flexibile work rules to become more competitive with foreign-owned U.S. auto plants are high on the wish list of carmakers.

#90201u1525 07/20/1990 ~United Press International

KANSAS CITY, Mo. (JULY 20) UPI - Defending NCAA basketball champion Nevada-Las Vegas Friday was banned from the 1991 tournament, the second national title-holder in three years to be denied a chance of repeating.

The action stems from a 1977 NCAA decision which originally barred the Runnin' Rebels from the tournament for two years and ordered the school to suspend Coach Jerry Tarkanian for two seasons for rules violations. The university fulfilled its penalty but Tarkanian waged a lengthy court battle and never left the UNLV bench.

UNLV President Robert Maxson reacted with anger at hearing of the decision aimed at his school.

''I'm shocked, absolutely shocked,'' said Maxson. ''We didn't expect any penalties. The university did everything it was asked to do 13 years ago. We were put on probation. We lost television revenues. We lost scholarships.

''I have a letter in my files from the NCAA saying we carried out their order in a model way. And now, almost 14 years later to be penalized again it violates every basic principle of justice.''

Maxson was particularly annoyed at the NCAA's order to ''show cause'' why Tarkanian should not be suspended from coaching for two years. Tarkanian won a permanent injunction in the state court system during his lengthy court battle. Despite a U.S. Supreme Court ruling backing the NCAA's right to suspend Tarkanian, the state order still stands.

''The NCAA knows he has a permanent injunction,'' Maxson said. ''How can I show cause? I live in the state of Nevada and this school is in the state of Nevada. We have to abide by Nevada law.''

The NCAA added a year of sanctions to its original sentence saying the additional postseason sanction is equivalent to the coach being suspended.

The school said it will appeal the additional penalties to the NCAA Council, which could not hear the case until its October meeting.

''Damn right we are going to appeal this decision,'' Maxson said. ''We are going to appeal it as quickly as possible. I can't wait to appeal this decision.''

The decision also comes at a time when UNLV has worked hard to clean up its athletic program.

''I'm hurt and angry right now,'' Maxson said. ''The discouraging thing is I've been here for six years and we've worked very hard to do things right. We have made mistakes but we've worked hard to correct those mistakes.''

Maxson also was saddened for the players on the team, particularly senior forwards Stacy Augmon and Larry Johnson. Both players decided to return to UNLV for their senior seasons. Many basketball observers said Johnson would have been the first player taken in this year's NBA draft had he come out early.

''This is the most wonderful group of kids we've had,'' Maxson said. ''I'm disappointed that now they are being penalized for something that happened 14 years ago. Johnson and Augmon passed up millions in the pros to stay in school.''

#90201u1537 07/20/1990 ~United Press International

ANCHORAGE, AK (JULY 20) UPI - The major oil companies that operate the 800-mile trans-Alaska pipeline resumed normal operations Friday, retreating from a threat to shut down the line and instead agreeing to reduce air pollution.

A shutdown threatened for Friday was averted but state and federal officials suggested the threat by the Alyeska Pipeline Service Co. was a bluff in a high-stakes political poker game over air quality standards.

In the end, government agencies and the pipeline consortium got key promises from each other: Alyeska won assurances against daily legal sanctions being imposed starting Friday; the state and federal government won assurances from Alyeska that it would work toward permanent resolution of air pollution problems and reduce emissions during a six-week interim.

Alyeska reduced oil flow 25 percent early Thursday to prepare for a midnight shutdown of the pipeline, which carries one-fourth of domestic crude production. Following temporary resolution of the dispute late Thursday, flow was cranked back up and was slightly below normal Friday at 1.63 million barrels, Alyeska spokeswoman Marnie Isaacs said.

The threatened shutdown was "the domestic equivalent of the Arab oil embargo," the Anchorage Daily News said in the first sentence of its page one banner story Friday.

"We viewed that threat as wholly unnecessary and it did not affect our demands or our position," said Dennis Kelso, commissioner of the the Alaska Department of Environmental Conservation.

"I think that Alyeska intended to increase its leverage," Kelso said of the shutdown threat. "I think it underestimated the resolve of the state as far as making sure people and the environment are protected by getting clean air and making sure our laws are complied with." Alyeska maintained that it had to cut oil flow to avoid penalties for violating its air standard permits.

The DEC and the U.S. Environmental Protection Agency - following a joint two-year investigation that found unauthorized pipeline facility modifications caused high, impermissible increases in emissions at 30 locations along the pipeline - said Alyeska was violating air quality standards. In findings last month, the EPA gave Alyeska 30 days, until Thursday midnight, to comply with the federal Clean Air Act or face possible criminal or civil action, including a $25,000 daily penalty starting Friday.

Alyeska and the government agencies resolved the standoff in a series of moves:

- Alyeska won a temporary restraining order from a federal judge who delayed any EPA legal action until July 27 to give Alyeska more time to comply with government mandates.

- Alyeska President James Hermiller promised Kelso in a letter to negotiate a permanent air quality agreement by Aug. 31 based on a state proposal.

- Alyeska reduced air emissions at some locations and signed a DEC document agreeing to temporary changes at pump stations and at the Valdez terminal in exchange for permit amendments making company operations legal under the Clean Air Act.

Although the crisis - which raised oil prices - had passed Friday, state and federal environmental regulators remained irritated at the threatened shutdown and questions remained about Alyeska's legal status.

EPA spokesman Bob Jacobson said government lawyers were considering challenging the restraining order, even though it expires July 27, because they felt that preventing enforcement of environmental laws set a bad precedent - especially since Alyeska had ample warning and legal action was the leverage to force resolution.

Legal action by EPA against Alyeska for past or future air quality violations was still possible but Jacobson said Alyeska's claim that it

had to shut down the pipeline to avoid sanctions was unwarranted, especially because it was within Alyeska's power to comply with air standards.

Kelso went even farther, saying, "The idea that suddenly something burst upon the scene that caused (Alyeska) to have to shut the pipeline down is absolutely bogus."

Kelso said, "This is a box Alyeska placed itself in, constructed over many years. They needed to come into compliance and these discussions go back at least two years. This is not a big surprise."

The state's top-ranking environmental official also said, "This idea that somehow ... this is either beyond Alyeska's control or in some fashion has been forced upon them so that they have to close the pipeline down is absolutely false and it should not be entertained as if it had some basis in fact."

Alyeska is 50 percent owned by British Petroleum, 20 percent by Arco and Exxon and the remaining 10 percent is shared by Mobil, Amerada Hess, Phillips and Unocal. Isaacs said all seven supported Alyeska shutdown plans and she denied that company tactics, including the shutdown threat and lobbying in Washington, were intended to win environmental concessions. She pronounced Alyeska satisfied with the outcome.

#90201u1542 07/20/1990 ~United Press International

UNITED NATIONS (JULY 20) UPI - A request by Haiti for the United Nations to monitor elections in the Caribbean nation was opposed by some Latin American countries, forcing the U.N. General Assembly to postpone a debate on the issue Friday.

Haiti's Provisional President, Ertha Pascal Trouillot, asked Secretary-General Javier Perez de Cuellar in a letter dated June 23 to provide observers as well as U.N. guidance to ensure security during the electoral process. Haiti is scheduled to hold general elections Nov. 4.

Diplomats said some Latin American countries such as Bolivia, the Bahamas and Cuba viewed the presence of a U.N. force, or any foreign force, in Haiti an interference in the region.

The president of the 159-nation assembly, Nigerian Ambassador Joseph Garba said the world body will discuss the request at a date to be announced.

Trouillot, appointed earlier this year to run the government after the previous military regime stepped down, said the U.N. group should observe and verify the entire electoral process, ensure security to dissipate

voters' fears and coordinate activities with the Caribbean community for security in and around polling stations.

Press reports from Haiti said supporters of ousted dictator Jean-Claude Duvalier, whose family ruled the impoverished country for more than 30 years, were trying to make a comeback.

Haiti Foreign Minister Kesler Clermont said in a statement following the meeting of the General Assembly that his government's request has prompted ''diverse interpretations, particularly from certain countries in the hemisphere.''

But Clermont said he believed it is still possible to obtain a consensus among U.N. member states, which would permit Haiti to hold the elections in a ''peaceful climate and to obtain credible results.''

Clermont met with U.N. officials last week in an effort to lobby for Trouillot's request and had wished that the assembly take prompt action to assist the Haitian government organize free elections.

Clermont said an initial U.N. contingent of 45 members should be sent to Haiti to help set up the electoral process, and a second group of between 300 and 400 observers will monitor the voting on Election Day.

While the General Assembly was meeting, Haitian exiles in New York staged a demonstration in front of the U.N. headquarters, brandishing a banner that said, ''U.N. keeps hands off Haiti; Stop being a U.S. puppet.''

Trouillot's government has issued arrest warrants for two of Duvalier's former ministers who returned to Haiti early July. Their presence on the island caused a general strike that closed business in the capital of Port-au-Prince July 11.

Former minister Roger Lafontant was responsible for the feared militia ''Tontons Macoutes'' that terrorized Haitians in the name of the Duvaliers; William Regalia was responsible for the deaths of 34 people during the 1987 elections in Haiti.

Duvalier, nicknamed Baby Doc, has been living in exile in France since 1986. He inherited in 1971 the post of president-for-life from his father, who ruled Haiti for 14 years.

#90201u1563 07/20/1990 ~United Press International

WASHINGTON (JULY 20) UPI - Israeli Foreign Minister David Levy plans to meet in Washington next month with Secretary of State James Baker in an attempt to revive the stalled Middle East peace process, the State

Department announced Friday.

Levy, who is recovering from what was described as a mild heart attack, will meet with Baker on Aug. 9-10. He had declined an invitation to meet Baker in Paris this week, with the Israeli government explaining that Levy's health would not permit it.

Israeli Defense Minister Moshe Arens met Friday at the Pentagon with Secretary of Defense Dick Cheney. Arens did not meet Baker during his brief visit.

The State Department and the Israeli Embassy confirmed that a meeting of a joint committee to discuss Israel's security assistance requirements has been postponed until September.

State Department spokeswoman Margaret Tutwiler said the postponement was prompted by the uncertainty caused by the continuing budget negotiations between the Bush administration and Congress.

Ruth Yaron, a spokeswoman for the Israeli embassy, said the delay was suggested by the State Department ''and we accepted.''

Tutwiler said it would be wrong to suggest the delay in meeting over $1.8 billion in U.S. military aid for Israel in the 1992 budget year was a bid to pressure Israel to move ahead on the stalled negotiations.

Yaron agreed, saying, ''We don't think there is pressure.''

Levy, a right-wing member of the conservative cabinet of Prime Minister Yitzhak Shamir, was an outspoken opponent of any concessions to Baker, who has been trying for the last year to bring Israelis and Palestinians into face-to-face talks.

As housing minister in the last Shamir government, Levy was responsible for giving covert funds to a fundamentalist Jewish group who bought a building in East Jerusalem and turned it into an Israeli settlement. The transaction was subsequently overturned by an Israeli court, but U.S. officials, including Baker, were openly furious at what they considered an attempt to sabotage the possibility of peace talks.

The preceeding Shamir government in Israel collapsed over the issue of the peace talks, after the prime minister refused to respond to Baker's suggestions for putting together an acceptable Palestinian delegation.

Baker nearly abandoned his mediation attempt, but agreed to make one last attempt, according to officials, after Egyptian President Hosni Mubarak made a frantic appeal to the United States, warning that a total breakdown of the peace process would undercut Arab moderates and create a danger of

a new Arab-Israeli war.

#90201u1571 07/20/1990 ~United Press International
LOS ANGELES (JULY 20) UPI - Jurors in the retrial of Raymond Buckey, defendant in the McMartin Pre-School child molestation case, returned their first verdict Friday, but it was sealed and they were ordered to continue deliberating on seven other counts. The Superior Court jury returned the verdict on a single molestation count on its tenth day of deliberations.

In ordering the verdict sealed, Superior Court Judge Stanely Weisberg indicated he apparently plans not to announce any of the verdicts until jurors arrive at them on all eight counts.

Buckey, 32, is being retried on the charges stemming from the alleged sexual abuse of three girls at the now-closed Virginia McMartin Pre-School in Manhattan Beach from 1979 until 1983. He has steadfastly maintained his innocence.

Buckey and his mother, 63-year-old Peggy McMartin Buckey, were acquitted in January at the end of the first trial in the case of 52 other molestation counts stemming from the alleged sexual abuse of 11 children.

Jurors at the first trial deadlocked on the eight counts on which Buckey is being retried. The verdicts in January climaxed a trial that lasted nearly three years and cost $13.2 million, making it the longest, costliest criminal trial in U.S. history. The retrial, greatly reduced in scope, has lasted over three months.

If convicted, Buckey could be sentenced to up to 22 years in state prison. The nearly five years he spent in custody following his 1984 arrest would be subtracted from that total.

The case was the largest sex abuse case in U.S. history when the county grand jury handed down its initial indictments in March 1984. But five co-defendants, including Buckey's sister and grandmother, and dozens of charges were dismissed because of insufficient evidence.

-30- 1993
#90201u1581 07/20/1990 ~United Press International
BONN, WEST GERMANY (JULY 20) UPI - West German Foreign Minister Hans-Dietrich Genscher Friday praised the U.S. administration for backing German unification and promoting a new relationship with the Soviet Union.

Genscher made the unusually warm remarks in an article he wrote for a West German daily and which he concluded with the words ''Thank-you America.''

He urged fellow Germans to ''stop and look across the Atlantic'' in the midst of the headlong rush toward unification.

Genscher said that U.S. support for unification ''has been unequivocal right from the start.''

In the article written for Saturday's edition of the Nordsee-Zeitung, Genscher particularly praised President George Bush ''and my friend Secretary of State James Baker.''

''They are promoting the process of European and German unification with great understanding and empathy,'' he said.

''Their successful endeavors to develop a new relationship with the Soviet Union ... have initiated the process of rapprochement and created the strategic framework for the positive developments in Europe.''

''Never has America's influence on developments in Europe been as great as it is today,'' he said, ''not in the sense of domination, but of partnership.''

Observers say that the tone in Genscher's article clearly reflects the improvement in U.S.-German relations, which had been strained last year by West Germany's refusal to support NATO plans for the modernization of short-range nuclear missiles.

#90201u1632 07/20/1990 ~United Press International

INTROD, ITALY (JULY 20) UPI - Pope John Paul II, on the final day of his Alpine vacation, said Friday the new Europe emerging from 50 ''very painful'' and humiliating years needs a ''big prayer.''

The pope spoke about the future of Europe following the collapse of communist regimes in the East in a chat with reporters after celebrating

an open-air mass in a field outside the Alpine chalet where he has been vacationing since July 11.

The pope later ended his Alpine vacation and flew back via Turin to Rome's Ciampino military airport, where he arrived at 6:50 p.m. aboard an Italian Air Force Gulstream plane.

From the airport, the pope flew by helicopter to Castel Gandolfo, some 12 miles south of Rome, where he will spend most of the next two months at the papal summer residence. He planned to return to the Vatican briefly Saturday morning to hold the weekly general audience, which was postponed from Wednesday because of his absence on vacation.

The Alpine mass, held against a background of peaks tinted pink by the rising sun, was attended by about 60 forestry workers, police and church aides to whom the pope expressed his thanks for helping to make his 10-day rest a peaceful one.

In his brief exchange with reporters who have been struggling to cover his secluded vacation, John Paul talked of the ''united and peaceful'' Europe, which he said he had in mind when he blessed the continent from near the top of Mont Blanc on Tuesday.

''For the future of Europe, along with realistically conceived hopes, prayer is also needed,'' he said. ''I think we have need of a big prayer for Europe.

''We are living a new experiment, different from the preceding one, which lasted 50 years and was painful, very painful,'' the pope said. ''I think it was also humiliating for Europe, for Christian Europe, and also humiliating for the European church.

''Now we are witnessing changes, many of which have a certainly positive significance - Europe is breaking with the past which was against truth, freedom and the dignity of Man,'' John Paul said in an obvious reference to his native Poland and the rest of Eastern Europe.

''The problem of the future, the problem of hope, comes down to what we can achieve, what we can offer to the European community - the community in the continental and pluralistic sense - what we can offer to this community of the future,'' the pope said.

John Paul also spoke of the spiritual strength to be drawn from nature in the spectacular Alpine scenery encountered during his daily walks along mountain paths.

''We turn to the beauties, the resources of this nature to find strength in ourselves, as a child finds strength in its mother,'' he said.

#90201u1648 07/20/1990 ~United Press International
MOSCOW (JULY 20) UPI - European Community chief Jacques Delors scorned the independence aspirations of Soviet republics Friday and reaffirmed the West's support for President Mikhail Gorbachev.

Delors, on the first official visit to Moscow by a president of the commission of the European Community, indicated that the country's growing ranks of rebellious republics will receive a cold shoulder from the EC in their bid to establish separate contacts with international organizations. "We respect the sovereignty and the political situation in every country, including the Soviet Union," Delors said.

"President Gorbachev has announced a constitutional reform that is a new distribution of political and economic power from the center to the republics. At present we recognize only the Soviet Union."

As Delors briefed reporters on the results of his three-day trip to Moscow Gorbachev summoned his top advisers for a meeting on how to accelerate the country's movement toward a market economy and the creation of a new federation based on a union of sovereign states.

"A transition to a regulated market economy and development of the new union treaty are two sides of the same coin," the official Tass news agency quoted Gorbachev as having told his President Council.

Delors sharply criticized the recent declaration by the giant Ukraine and similar earlier moves by the Baltic republics to establish their own currencies and take other steps to cut their connections with Moscow.

"In any federation that I know of, the problems of finance, security and the army are the prerogatives of the central authority," Delors said. "It is difficult to imagine a federation that does not have a single currency as a factor to guarantee the cohesion of the whole society.

"That is why we were surprised to hear that the Ukraine and other republics want to control their own currencies. At this stage of (Soviet) economic reforms, that would be devastating in its consequences."

Delors, on a fact-finding trip to determine whether the 12-nation EC should provide short-term financial aid to Moscow, said his meetings with Gorbachev and other senior officials had "given a new political impetus to relations between the Soviet Union and the European Communities."

Tass said that "the steps toward each other by the EC and the Soviet Union, evidenced by the promising results of Delors' talks in Moscow, testify to the powerful process of change that is leading to the building of a common European home."

Delors' trip capped a week of momentous visits to the Soviet Union by European political leaders. West German Chancellor Helmut Kohl and Gorbachev announced Monday that Moscow had dropped its opposition to a unified Germany's membership in NATO. Kohl's trip followed that of NATO Secretary-General Manfred Woerner, the first official visit by a head of the Western alliance.

#90201u1657 07/20/1990 ~United Press International
JERUSALEM (JULY 20) UPI - Israeli soldiers shot and wounded more than 30 Palestinians in the Gaza Strip Friday as residents of the territories observed a general strike to mark the May 20 slayings of seven Arab workers by an Israeli civilian, Palestinian sources said.

The weekly newspaper Jerusalem also reported Friday the underground leadership of the nearly 32-month-old uprising has issued a leaflet in Hebrew directed at Israeli soldiers in the occupied territories, calling on them to ''be thinkers (and) make peace.''

''Be people, defend your humanity, oppose violence, torture and the occupation,'' the newspaper quoted the leaflet. ''Do you know why we are having the intifada? Why are you chasing in the streets of our cities, in our villages and in the alleys of the refugee camps?

''Why are you shooting our youths, our children, our wives, our elders and our babies?'' the leaflet asked, blaming the Israeli government and politicians for violence in the territories.

In the Gaza Strip, Palestinian sources reported a 7-year-old boy from the Bureij refugee camp had his right eye removed at a Gaza City hospital Friday after a tear gas canister hit him during street confrontations late Thursday. The army spokesman said the report was being investigated.

Palestinian sources also said clashes erupted between soldiers and Palestinians in the Rafah refugee camp area Friday afternoon and evening. Palestinian youths who stoned a military patrol sparked the confrontation, during which more than 30 Palestinians were shot and wounded, the sources said.

Most of the injured were treated and released from a U.N.-run clinic and a Gaza City hospital said it was investigating the reports.

The Gaza Strip has been relatively quiet since late May, when the slayings of seven Palestinians by an Israeli civilian sparked widespread rioting and reignited the long dormant uprising.

During the week, Palestinian sources said, Israeli soldiers and Border Police had detained or harassed Palestinians who wore T-shirts commemorating the May 20 killings of the seven Gaza residents by an Israeli civilian posing as a soldier in the Israeli town of Rishon Le Zion.

The T-shirts began appearing in the occupied territories and East Jerusalem shortly after the attack on the Palestinian workers.

''Black Sunday'' is written across the shirts, usually surrounded by drawings of seven bullet holes dripping with blood. Several shops in the Gaza Strip have been raided during the past week and dozens of the shirts confiscated, Palestinian sources said.

''At first Israelis condemned the killing which encouraged us to wear T-shirts written on it 'Black Sunday,''' said Abed al-Heta, who said his 17-year-old son's identification card was confiscated Monday because he was wearing a ''Black Sunday'' T-shirt. ''But nowadays it seems that they are sympathizing with that criminal.''

The military spokesman has said soldiers have not been told to order the removal of the T-shirts.

The Unified Leadership of the Palestinian uprising called a general strike Friday to commemorate the May 20 slayings, which sparked widespread rioting in the territories, particularly in the Gaza Strip. More than 10

Palestinians were killed and hundreds wounded in the subsequent rioting and Israeli military attempts to quell the violence.

The slayings reignited the uprising, but violence in the occupied territories has generally subsided and no deaths have been reported in the Gaza Strip since late May.

#90201u1667 07/20/1990 ~United Press International

LONDON (JULY 20) UPI - The probable purchase of Britain's largest computer company, ICL, by Japan's Fujitsu Corp. has fueled a debate on how the European Community should deal with advances by major Japanese competitors.

Reports Thursday said the negotiations were at an advanced stage and virtually irrevocable, and that a formal offer of an estimated $1.09 billion was expected from Fujitsu within three weeks.

Members of the European computer industry reacted with shock at the deal, which would be the first major move into the European market by a Japanese company. It could herald approaches by other Japanese companies eager to enter the European market before it integrates in 1992.

Francis Lorentz, chairman of the French state-owned Groupe Bull, said ICL had chosen a short-term course for profits at the expense of its technological independence.

Lorentz told The Financial Times the lesson for European companies was to have long-term research and development strategies, and to collaborate more with each other.

The European Commissioner for Research and Technology Policy, Maria Filippo Pandolfi, said he was concerned about the loss of crucially important areas of Europe's electronics industry.

British legislators asked for guarantees that Fujitsu would not jeopardize the jobs of ICL's 18,000-strong workforce. ICL is Britain's largest indigenous information technology company, and in 1989 achieved a record operating profit of $262 million on a tunrover of $2.9 billion. It operates in more than 70 countries, and has a six percent slice of Western Europe's mainframe market.

Analysts expect Fujitsu's entry into the European market to sharpen the competion for other multinationals such as International Business Machines which holds about 47 percent of Europe's computer sales.

The largest Europan company is West Germany's Siemens, which said it would not comment on the ICL-Fujitsu deal until it had studied the proposal.

NEW YORK (JULY 20) UPI - Ernst and Young said Friday it will help Hungary privatize its gasoline and petroleum products supplier, which has more than 400 filling stations in the country.

The national service, AFOR Asvanyolajforgalmi Vallalat, is also Hungary's major supplier of household fuel oil and liquefied petroleum gas cylinders and operates a pipeline supplying regional distribution centers, Ernst and Young spokeswoman Elisabeth Coleman said.

The project will begin with a valuation of AFOR's business. AFOR is scheduled to become a public limited liability company Jan. 1. Ernst and Young said the assignment follows 15 privatization projects it conducted in Hungary in the last two years, including business in the chemical, hotel, printing and engineering industries and foreign trade.

"Our experience in undertaking these assignments has been instrumental in helping the Hungarian government develop privatization regulations," said Jim Searing, Ernst and Young's national director of international business services, said. "We hope that this will lead to an increase in foreign investment into the Hungarian economy."

Ernst and Young, an accounting, auditing, and consulting company, has 65,000 employees in more than 100 countries, including 24,000 employees in the United States.

#90201u1712 07/20/1990 ~United Press International
WASHINGTON (JULY 20) UPI - Senate Republican leader Robert Dole of Kansas warned colleagues Friday that billions of dollars will have to be cut from the new farm policy law, while the administration assailed a plan to expand food stamp spending.

The comments underscored the important role that budget constraints will have in shaping the final version of the legislation. The farm bill sets the terms for farm subsidies, food aid, research and conservation programs for the next five years.

''The bottom line is there are going to have to be budget savings (possibly as large as several billion dollars),'' Dole said in a speech on the Senate floor. ''We should begin now to talk about options for achieving those savings.''

Senators voted Thursday to cut $3.5 billion from the cost of the bill, and

Agriculture Committee Chairman Patrick Leahy, D-Vt., indicated any other cuts would be postponed until the White House and Congress agree on a budget package - possibly weeks from now.

Agriculture Secretary Clayton Yeutter renewed his call for spending cuts in a letter to House Speaker Thomas Foley, D-Wash., over the House farm bill, which is due for debate Monday.

In a change of tone from White House threats to veto the Senate version of the bill, Yeutter said the administration could support the House bill ''only if further budget savings and policy reforms ... are achieved.''

''The budget summit is considering reducing entitlements from their baseline levels,'' Yeutter wrote. ''A significant and rapid expansion of the food stamp program is not warranted and ill-timed.''

Yeutter said a food stamps accounted for $5.4 billion of the estimated $6.4 billion in new spending under the House farm bill. Its Agriculture Committee has proposed larger housing deductions and a slight increase in the food stamp formula. Food stamps are the nation's major anti-hunger program, serving 18.5 million people a month.

In his letter, Yeutter said ''we can be assured'' the budget summit will decide that farm bill spending ''will have to be reduced significantly.''

Farm state leaders in the House and Senate have aimed at writing a bill that spends the same amount of money, or about $54 billion, as if there were no change from current law.

''The budget seems to be the farthest thing from their minds,'' one administration official said in lamenting congressional unwillingness to reduce farm bill spending.

Meanwhile, in its only roll call vote of the day, the Senate rejected, 50-37, an amendment by Sen. Rudy Boschwitz, R-Minn., to allow larger grain stockpiles to accumulate before the government was required to order a large land setaside. Boschwitz said keeping land in production would protect the U.S. share of the world market.

The House Rules Committee cleared the way for debate on the House version of the farm bill, including amendments to break the so-called pesticide Circle of Poison and to change the chain of control over the Food for Peace program. The plan written by the committee also would restore briefly the Great Lakes setaside for food aid shipments.

The Circle of Poison language would bar the export of chemicals that cannot be used by U.S. farmers. Supporters say food imports may be tainted by residues of the pesticides.

#90201u1730 07/20/1990 ~United Press International

WASHINGTON (JULY 20) UPI - Despite a fresh cash infusion last January, Jiffy Lube International Inc.'s troubles continue to grow, as the Houston-based company disclosed Friday it was facing a possible lawsuit from franchisees and an inquiry by the Securities and Exchange Commission.

The problems, outlined in a quarterly report that Jiffy Lube filed with the SEC, follow a January deal in which Jiffy Lube sold 82 percent of its stock to Pennzoil Co. for about $43.5 million.

Although the stock sale helped Jiffy Lube meet some obligations, past troubles still to haunt the company, which operates a chain of automobile maintenance centers.

The SEC, for example, is inquiring about a $39.2 million special charge that Jiffy Lube recorded in the third quarter of the fiscal year ended March 31, 1989, according to the quarterly report.

The charge related primarily to a decision to restructure certain large multi-unit franchisees into smaller operations by repurchasing automotive maintenance centers and then marketing them to owner-operator franchisees, said Jiffy Lube spokeswoman Carolyn Foster. The company determined that such a program would take longer than anticipated and would have a substantial adverse impact on its financial condition.

Because remarketing the centers held for resale was taking significantly longer than in the past, the company expected to incur substantial holding period costs from operating them. Jiffy Lube also resold centers it had purchased at a loss to encourage certain franchisees to participate in the restructuring.

The SEC is also investigating certain documents produced by Jiffy Lube, including the company's 1989 annual report. Jiffy Lube attorneys said the company provided the documentation to the SEC over a year ago but has yet to hear back from the agency.

Meanwhile, Jiffy Lube franchisees - many of Jiffy Lube's 1,107 automotive maintenance centers are operated as franchises - may reportedly sue the company.

The Jiffy Lube Association of Franchisees Inc. has raised more than $250,000 in contributions from members to retain counsel, according to the Jiffy Lube quarterly report. But the organization has yet to file a complaint in court.

The quarterly report indicated the threatened suit may relate to the royalty rates franchisees are paying the company and the effectiveness of certain license agreements.

Other franchisee complaints, according to Jiffy Lube, may be based on an alleged conflict of interest between the company and Pennzoil as well as on the company's poor financial condition and the adequacy of services provided by Jiffy Lube to franchisees.

Jiffy Lube plans to fight any suit lodged but noted in the quarterly report that the legal battle could "have an adverse impact on the company's ability to attract new franchisees and diminish the value of existing franchises." Franchisee association representatives were not immediately available for comment.

#90201u1757 07/20/1990 ~United Press International

WASHINGTON (JULY 20) UPI - Citing Rep. Barney Frank's ''improper conduct'' stemming from his relationship with a male prostitute, the House ethics committee Friday recommended that the House formally reprimand the Massachusetts Democrat.

The recommendation culminated 10 months of deliberations by the committee, which Chairman Julian Dixon, D-Calif., admitted was deeply divided over the severity of the punishment it should propose for Frank, a 50-year-old, five-term congressman who represents suburban Boston.

A reprimand is the mildest formal sanction the ethics committee can recommend for action by the full House. The panel, formally called the Committee on Standards of Official Conduct, could have urged harsher measures, such as censure or explusion. If the full House approves the reprimand, Frank would not lose his committee privileges, salary or seniority.

Frank, an acknowledged homosexual, has admitted paying Stephen Gobie $80 for a sexual encounter in 1985 and later hiring him with personal funds as an aide. Frank maintains he fired Gobie in 1987 after learning Gobie was operating a prostitution service out of Frank's Capitol Hill apartment. Gobie alleges Frank was aware of the activities from the beginning.

Dixon said the committee believes the punishment is tough enough.

''I'm sure Barney Frank would not consider it a slap on the wrist and the committee does not consider it a slap on the wrist,'' Dixon said at a news conference announcing the recommendation.

Dixon and House Speaker Thomas Foley, D-Wash., said the House likely will

take up the issue next week. The House usually follows the committee's recommendations.

Frank was not immediately available for comment. He scheduled a 5 p.m. EDT news conference in West Newton, Mass.

The committee based its recommendations on two instances of ''improper conduct,'' including:

-Frank fixed 33 parking ticket incurred by Gobie while driving the congressman's car by claiming the vehicle was being used for official business.

-A memo written by Frank and sent to court officials overseeing Gobie's probation on drug and sodomy charges ''could be perceived as an attempt to use political influence'' to help Gobie.

The committee report rejected Gobie's claims that Frank had prior knowledge of the prostitution activities and said there was ''no credible evidence'' to support Gobie's contention that Frank engaged in sexual activity in the House gym.

The report says Frank, a leading liberal voice in the House who is heavily favored to capture his sixth consecutive term in November, violated a clause in the Code of Official Conduct that states a congressman ''shall conduct himself at all times in a manner which shall reflect creditably on the House of Representatives.''

The committee action, approved unanimously Thurday after a closed two-hour meeting, broke a long deadlock over the severity of punishment to be imposed on Frank. Committee Republicans apparently pushed for a recommendation requiring action on the House floor, while committee Democrats urged a milder sanction in the form of a letter of reproval, which the panel could issue without House action.

The Constitution gives each chamber of Congress the power to ''punish its members for disorderly behavior and, with the concurrence of two thirds, expel a member.''

The ethics panel began its inquiry into the Frank case Sept. 12, a month after The Washington Times the congressman's relationship with Gobie.

Jim Nuzzo, the top Republican challenger to Frank, bowed out of the race last month, leaving an unknown, underfinanced attorney, John Soto, as Frank's only GOP opposition.

In a statement Friday, Soto said a reprimand would be ''a victory'' for Frank and ''a defeat for the ethical standards in this country.''

Frank would be the second homosexual congressman from Massachusetts to be sanctioned by the House in the past decade. Rep. Gerry Studds, D-Mass., was censured in 1983 for a relationship with a male teenage congressional page.

Dixon would not say if the fact that the case involved homosexuality played a role in the committee's deliberations other than to say ''all of the color surrounding the case was discussed.''

The last House member to receive a reprimand was Rep. Austin Murphy, D-Pa. in December 1987, who was found to have violated House rules by absentee voting, payroll abuses and diversion of office resources.

#90201u1760 07/20/1990 ~United Press International

WASHINGTON (JULY 20) UPI - Thrift regulators said Friday a settlement has been reached to provide a partial recovery of money invested in bonds sold by American Continental Corp., parent of the failed Lincoln Savings and Loan Association.

The agreement has been approved by the Resolution Trust Corp. and a committee for the unsecured creditors of ACC, which filed for bankruptcy protection the day before regulators seized the Irvine, Calif., thrift.

ACC, of Phoenix, was headed by real estate developer Charles Keating, who has sued the federal government seeking return of Lincoln. Keating also is the target of a $1.1 billion federal fraud and racketeering lawsuit.

"As a result of this settlement, the RTC, the creditors committee and the bondholders, all parties will now work cooperatively to unwind the corporate affairs of ACC and to investigate and pursue claims against various persons, who in their judgment, may have injured Lincoln Savings, ACC and the bondholders," the RTC said in a statement.

More than $200 million worth of ACC bonds, sold largely through Lincoln branches, were rendered worthless when the company filed for bankruptcy protection in April 1989.

The agreement, subject to court approval, would allow ACC bondholders to receive $21 million from the RTC to settle their claims. Regulators said the settlement also relieves Lincoln of liability "asserted by bondholders independent of the bankruptcy proceedings."

Claims by bondholders and other unsecured creditors against ACC total about $350 million. Regulators said no settlement has been made with Keating and added that Keating will not be entitled to benefit from the agreement.

The settlement also calls for the dismissal or resolution of bankruptcy cases involving Lincoln's subsidiaries, dismissal of all claims filed against Lincoln and its subsidiaries by ACC's creditors and a partial resolution of claims filed by subordinated debt holders in class-action securities lawsuits, the RTC said.

#90201u1768 07/20/1990 ~United Press International

NEW ORLEANS (JULY 20) UPI - Rep. Lindy Boggs, D-La., elected to succeed her husband after he died in a 1972 airplane crash, said Friday she is retiring from Congress.

''Today I am announcing that this chapter in my life of service to the public is ending. After 17 years, I will not stand another term in the House of Representatives,'' Boggs told a news conference.

''This is not the end of my career. I will continue to actively participate in community and education affairs, both here and in Washington,'' she said.

Boggs, who was a teacher before she married, is the first woman elected to Congress from Louisiana.

In her retirement speech, given at the Lindy Claiborne Boggs Building at Tulane University, Boggs recalled how she had met her husband, Hale Boggs, on the campus and began a 50-year career in public service.

Hale Boggs was elected to Congress in 1940 and had risen to the post of House majority leader when his plane disappeared in the Alaskan wilderness in October 1972. Also lost aboard the twin-engine Cessna 310 was Rep. Nick Begich, D-Alaska, an aide to Begich and the pilot.

#90201u1782 07/20/1990 ~United Press International

ANCHORAGE, AK (JULY 20) UPI - A change in wind direction Friday temporarily saved an Indian village and commercial timber stands from approaching wildfires, and state officials ordered their broadest burning ban ever.

Water hoses were stretched out around Tetlin, a village evacuated by most of the 100-plus residents, with flames just 2 miles away, fire spokesman Bill Beebe said after a visit to Tetlin, where ''You see smoke and you smell it.''

A few people, including children, still in the village went swimming or fishing, but boats remained ready on the Tetlin River to evacuate the last dozen or so holdouts - not counting firefighters flown into the village to defend it, Beebe said from the town of Tok.

Tetlin already has lost some of its commercial white spruce stands and more timber land was threatened by the 54,000-acre fire in eastern Alaska, 275 miles northeast of Anchorage near Canada.

Favorable winds nearly stopped the advance of the fire, but a finger of flame reaching out from the main mass of the blaze slowly crept toward Tetlin anyway, fire spokesman Steve Waterman said from Tok.

He said another eastern Alaska fire that forced a bible camp to evacuate, closed a road to Canada and threatened state commercial timber, was held back by winds.

Although the wind change was welcomed, temperatures remained far above normal in the 80s, humidity remained low and fire danger remained high.

Virtually a statewide burning ban went into effect at noon Friday. State Forester Bob Dick ordered all cooking, camping, warming, signaling and

other fires prohibited throughout Alaska, except in extreme fringes of the state, on the Arctic coast, the wet Aleutian Islands and the southeast panhandle. Fires were allowed in approved campground firepits.

The burning ban represented ''the broadest closure we've ever had in the state,'' said Frenchie Mallot of the state forestry division.

''The fires we're fighting now were caused by lightning, but the fire potential is so high and our fires crews are stretched so thin that we can't afford to have human-caused fires begin,'' Mallott said.

Alaska Fire Service headquarters in Fairbanks reported 115 fires burning Friday in Alaska on 784,500 acres.

#90201u1820 07/20/1990 ~United Press International

EAST BERLIN (JULY 20) UPI - East German Prime Minister Lothar de Maiziere warned in a statement marking his first 100 days in office Friday that the current wave of strikes seriously threatens the country's already ailing economy.

''We should not sink the ship in which we want to sail to a better region '' he told a news conference. ''A strike at the wrong time can mean that a company goes bankrupt.''

In the past two weeks, strikes in East Germany's industrial and services sectors have slowed down the country's productivity, leading to fears of rapidly rising unemployment and spiraling prices.

''Where there is so much work waiting to be done, there cannot be unemployment,'' de Maiziere said. ''Go through our country and look and the condition of our streets and houses.''

He said that because of the East Germany's economic troubles, the pace of German unification could not be increased.

''To those who say the transitional phase had not gone fast enough, it should be said that the inheritance we take up is far worse than we imagined. Therefore, the transition can only be made step by step'' he said.

But he said he wants unification as ''fast as possible, and as orderly as necessary.''

De Maiziere unleashed a crisis in his coalition government when he objected to a proposal that the two Germanys merge before the tentatively scheduled all-German election Dec. 2.

The prime minister called for separate elections in the two German states before unification.

The country's fragile coalition government, meanwhile, Friday faced a renewed dilemma over whether to hold its own elections before unification with West Germany or to wait until the two Germanys are joined.

The seven coalition parties Friday continued to seek a solution to the dispute they were unable to settle during an emergency meeting Thursday night.

The impasse has led to speculation that Prime Minister Lothar de Maiziere may be forced to resign and that the broad coalition government may collapse.

But de Maiziere, who heads the conservative Christian Democratic Union, told a news conference Friday he is not planning to quit the post he has held for 100 days.

''I have never threatened to resign and I have no intention of resigning '' he said.

De Maiziere, disagreeing with some of his coalition partners, has insisted that the two German states must only merge after holding separate elections Dec. 2.

The Social Democratic Party - the CDU's main partners in the coalition - and the smaller Liberal party want East Germany to join the West German federal republic Dec. 1 so that all-German elections can be held the next day.

The Liberals have called for the immediate adoption by parliament of a resolution to this effect.

''There is no agreement in the coalition on this motion. And to be honest I am decidedly against the motion,'' de Maiziere said.

The Liberals, who hold only 23 of the coalition's 303 seats in the 400-member parliament, have threatened to quit the government.

But de Maiziere dismissed the threat and said that ''a small party which is in the coalition must prove that it can go against the grain of the larger parties - that is it.''

In an interview published Friday in a West German daily, de Maiziere said that if the merger took place before elections, East Germany would be ruled by the West German government until a new government takes office.

''We would have a situation where 16 million (East) Germans would be ruled by a government which none of them had legitimized through elections,'' he told Die Welt.

The Bonn government has not officially taken sides in the argument but urged the East German parties to solve the issue before the end of July to avoid delaying unification.

''The matter is slowly becoming serious,'' said Otto Graf Lambsdorff, head of the Free Democratic Party, the junior partners in the conservative-led Bonn government.

#90201u1847 07/20/1990 ~United Press International

SAN DIEGO (JULY 20) UPI - The former Exxon Valdez, renamed the Exxon Mediterranean, was readied Friday to leave dry dock and begin sea tests 16 months after running aground off Alaska in the nation's biggest oil spill.

Rechristened and refurbished, the tanker was scheduled to slip into the water at 7 p.m. at the National Steel and Shipbuilding Company, the shipyard that built the ship in 1986.

Exxon Shipping officials said the 987-foot tanker will embark on its new overseas route in the Middle East sometime in August, after completing a battery of tests to ensure its seaworthiness.

"The ship won't go back out to sea until we're satisfied it is totally ready. We anticipate that will be in ten days to two weeks," Robert Weatherford, Exxon's business and planning manager, said Friday.

The tanker's reconstructed hull, sporting 3,000 tons of new steel and a fresh coat of burnt-red paint, will be tested along with its cargo system and all other equipment, Weatherford said.

"We don't anticipate any problems," he said. "The ship has been fully repaired. We think NASSCO has done a great job. The ship is almost in as-new condition and is fully operable."

From the newly painted "Exxon Mediterranean" name on its stern to its polished brass propeller, the tanker appeared to have undergone a metamorphosis since its arrival in San Diego Harbor last summer.

The then-Valdez limped into NASSCO July 30 with a mangled hull, torn apart where the ship hit reefs in Prince William Sound, disgorging 11 million gallons of crude oil. The ship was dry docked in August and repairs began in September.

Working from the inside out, NASSCO work crews replaced one-third of the hull in an unprecedented nine-month, $30 million repair job that was finished on time and about $5 million over budget.

The decision to rename the ship was announced July 6 by Exxon Shipping Co. President Gus Elmer, who said dwindling Alaskan oil supplies forced the company to transfer the tanker to more lucrative foreign routes.

Mike Stalzer, the tanker's new captain and its former alternate captain, said he and his crew are eager to return the Mediterranean to service. "I've been with this vessel since it was first delivered to Exxon and I'm really proud of this ship," Stalzer said.

A 17-year Exxon veteran who has served with the company in the Mediterranean, Stalzer said the crew is well aware that political tensions in the Middle East could complicate their new mission. "In that part of the world, we have to be a little more mindful of security. We have to make extra sure we maintain our vigilance," he said.

Weatherford said Exxon's cleanup efforts are continuing in Prince William Sound this summer and added, "As I understand, it's progressing well."

#90201u1856 07/20/1990 ~United Press International

CAPE CANAVERAL, FL (JULY 20) UPI - An Atlas 1 rocket carrying a $189 million science satellite was grounded for at least 24 hours Friday by another crippling leak, this one involving liquid helium that kept steering rocket fuel too cool.

With the leaking shuttle Atlantis sitting grounded just a few miles away, cautious space agency managers were taking no chances. The Atlas flight was tentatively rescheduled for Saturday, but the delay could stretch even longer depending on what repears are needed.

The $64 million commercially-built Atlas rocket and the Combined Release and Radiation Effects Satellite, or CRRES, had been scheduled for liftoff from launch pad 36B at the Cape Canaveral Air Force Station at 4:49 p.m. EDT Friday, one hour and 16 minutes late because of problems with ground equipment.

But less than an hour before liftoff, NASA launch director James Womack ordered the flight ''scrubbed'' for the day because of a liquid helium leak that kept second stage steering rocket fuel too cool for safe use. The cause of the leak was not immediately known.

NASA launch commentator George Diller said agency managers were shooting

for a second launch attempt Saturday at 3:31 p.m. But he said a firm launch date would not be set until engineers determined exactly what went wrong and what will be required to fix the problem.

''A decision has been made to secure the (launch) for today because of a liquid helium leak,'' he said. ''It is not entirely possible to say we will have a launch attempt Saturday. We will have to await inspections by the pad teams after they go to the vehicle. In the meantime, the launch has been scrubbed for the day.''

NASA was not responsible for launch processing under the terms of a commercial launch contract with rocket builder General Dynamics Corp. of San Diego.

But given a storm of negative publicity in recent weeks because of problems with the Hubble Space Telescope and fuel leaks grounding the space shuttle, a successful launch is considered crucial to the National Aeronautics and Space Administration.

When it finally gets into space, CRRES will make a series of chemical releases that program manager Richard Howard said should be ''very visible'' to observers in the United States, creating celestial displays that bear ''an uncanny resemblance'' to the aurora borealis, or northern lights.

The boxy, solar-powered satellite also carries Department of Defense experiments to study the effects of space radiation on microelectronics, research expected to help engineers design satellite equipment that is better able to withstand the rigors of space.

The primary goal of the flight is to improve knowledge of how Earth's magnetic field, the supersonic solar wind and the planet's atmosphere interact to extract energy from the sun. The importance of such research is easily seen.

When a cloud of energetic particles from a solar flare smashes into the invisible bubble of Earth's magnetic field, for example, a ''geomagnetic storm'' can occur, disrupting communications and causing problems for electrically sensitive satellites.

''The results of these investigations will greatly expands man's knowledge of the space environment and permit future government and commerical satellites to be more efficient, reliable and economical,'' said Air Force Col. John Armstrong.

CRRES, a 3,732-pound satellite built by Ball Aerospace Systems Group of Denver, is equipped with 24 canisters containing barium and lithium. For each experiment, one or two canisters will be ejected into space and

detonated about 25 minutes later, after the satellite is a safe distance away.

High-energy ultraviolet light from the sun then will ionize the released chemicals, changing the number of negatively-charged electrons in a given atom to give the gas an electrical charge.

The resulting ''plasma'' clouds, initially 60 miles or so in diameter, then will stretch out along Earth's magnetic field lines much like iron filings will line up around a bar magnet to make its force field visible.

In a sense, CRRES will ''paint'' Earth's magnetic field with bright clouds of chemicals, simulating naturally-occuring processes like those involving the solar wind.

''That's really why were doing this - so we can make space visible,'' said NASA project scientist David Reasoner.

By studying how the artificial clouds move, scientists will be able to learn more about the interaction between the planet's magnetic field and atmose sun.

#90201u1868 07/20/1990 ~United Press International

MOSCOW (JULY 20) UPI - Russian republican President Boris Yeltsin has drafted a 500-day economic plan to privatize property, abolish price controls, and end state subsidies in his republic, in a direct challenge to Soviet leader Mikhail Gorbachev, the Interfax news service said Friday.

Gorbachev, trying to keep pace with Yeltsin, called together his Presidential Council and Council of the Federation to accelerate his own drive for a market economy and new national compact with the 15 republics.

"A transition to a regulated market economy and development of a new union treaty are two sides of the same coin," the official Tass news agency quoted Gorbachev as saying.

But Yeltsin's brain trust leaked an 18-month plan more concrete than

Gorbachev's to free the economy of the total state ownerhip and planning in force since 1928, when Josef Stalin introduced his series of five-year plans.

Called the "500-Day Confidence Mandate," Yeltsin's plan would be in full force when Gorbachev's more moderate program, pending approval by the Soviet Parliament, starts on Jan. 1 next year.

"Large-scale privatization and free pricing designed to boost economic reforms are essential to the program," Interfax said of Yeltsin's strategy. Yeltsin's revolutionary plan for the largest Soviet republic, which covers three-quarters of the country and has half its population of 290 million, would abolish the industrial ministries serving as linchpins of central planning.

The radical blueprint would also allow foreigners to buy unfinished construction sites and condemn bankrupt enterprises to closure - a step Gorbachev has failed to take in five years at the helm, even though 13 percent of all Soviet businesses require heavy subsidies to stay afloat.

The Yeltsin plan, worked out by Moscow Mayor Gavriil Popov and other leading radical economists, has four stages, Interfax said. Within the first 100 days, the government will guarantee the right to own any kind of property, including means of production and land.

In the next 150 days, all subsidies will be abolished and industrial ministries eliminated. Unfinished construction products will be sold or leased to private citizens and foreigners.

In the third stage, also 150 days, government control of prices will be lifted, and industries that cannot compete and go bankrupt will be closed. The final 100 days will be devoted to regulatory measures and other steps needed to remove imbalances and stabilize the economy.

Gorbachev, who watched Yeltsin quit the Communist Party last week, outlined his agenda for the summer, but it was far less concrete than Yeltsin's.

"In the nearest future, we should work out the framework of the new treaty, which will guarantee the sovereignty of the republics," Gorbachev told his new advisory councils. "We should not break up the country's integrated market, but rather create and strengthen the all-union market."

Gorbachev, whose initial attempt to move the vast country to a market economy was stymied by Parliament in June, has ordered Premier Nikolai Ryzhkov to forego his annual vacation and work through August to have a new plan ready when the legislature reconvenes in September.

#90201u1898 07/20/1990 ~United Press International
NEW YORK (JULY 20) UPI - Prices were sharply lower at the close of the New York Stock Exchange Friday in active trading as a wave of late computer-driven selling pulled the Dow Jones industrial average away from the historic 3000 mark.

The Dow Jones industrial average, which rose 12.13 Thursday, dropped 32.67 to 2961.14, according to an unofficial tally.

Declines led advances 905-573 among the 1,989 issues crossing the NYSE tape at 4 p.m. EDT. Volume amounted to about 180,000,000 shares, compared with 161,990,000 traded Thursday. Prices were lower in moderate trading of American Stock Exchange issues.

Analysts said the market had anticipated the monthly expiration of stock-index futures and options contracts at the end of the trading day could have pushed the Dow to close above 3000.

However, broader market weakness combined with some late-breaking disappointing earnings reports, particularly in the high-technology sector to pull prices lower, they said. Oil stocks remained strong after a rally that began Thursday after a jump in crude oil prices, analysts noted.

On the trading floor, United Telecommunications was most active, off slightly. The company, which reported sharply lower earnings this week, announced it has been named in a class-action lawsuit charging it made false or misleading statements about the prospects for second-quarter earnings.

Chase Manhattan followed, off slightly. Wal-Mart Stores was third, up slightly.

LIMA, PERU (JULY 20) UPI - Suspected guerrillas of the left-wing Shining Path movement killed a businessman and a university official in separate attacks Friday, police said.

Antonio Rosales Durand, a 65-year-old businessman, and two of his bodyguards were shot to death on a street on their way to a rubber factory after their two-car caravan was forced to stop by a tanker truck that rebels placed across the road, police said.

Rosales and his two bodyguards, identified as Luis Ballon Ramos and Gustavo Gor Farfan, died instantly, and Rosales' driver, who was not immediately identified, was wounded and taken to a hospital, police said.

In a separate assault in the Andean city of Ayacucho, the spiritual center of the Shining Path movement 200 miles east of Lima, the legal adviser to the University of San Cristobal de Huamanga was shot by assailants in his home, police said.

Four suspected rebels climbed over a wall and surprised the adviser, Hernando Colonia Arteaga, 35, who was asleep in his bedroom, police said. The rebels pulled Colonia Arteaga into a reception room and shot him once in the head, killing him instantly, police said. They said the attackers then fled.

Shining Path, following the teachings of the late Chinese leader Mao Tse-tung, began its rebellion in primitive, Quechua-speaking indigenous communities in the Andean mountains in 1980.

More than 19,000 persons have been killed in fighting and assassinations since the revolt began. In some sections of the country, Shining Path militants are allied with growers of coca, the raw material used to make cocaine. The rebels protect clandestine drug dealers against government authorities.

#90201u1951 07/20/1990 ~United Press International

WASHINGTON (JULY 20) UPI - With five major military aviation programs on the budget block, Rep. Les Aspin, chairman of the House Armed Services Committee, may be sharpening his ax for a swing at the multibillion-dollar B-2 bomber.

The Wisconsin Democrat, at a luncheon with reporters Friday, declined to comment directly on a report that he will announce his opposition to the B-2 stealth bomber, built in California by Northrop.

''Stay tuned, stay tuned,'' said Aspin, trotting out a line Ronald Reagan often used to put off answering a question.

But Aspin said he will deliver an address to the House Monday on the defense budget and later added that in fashioning the 1991 defense bill he wants to protect military personnel over weapons systems.

He noted that there are five aviation programs that could be subject to cuts, among them the batwinged B-2, whose shape and space-age construction makes it very hard to detect with radar. Current estimates are that each B-2 will cost more than $800 million.

The other programs under scrutiny are the Advanced Tactical Aircraft or ATA, an advanced fighter known as the ATF, a new light Army helicopter called the LHX, and the C-17 cargo plane being built by McDonnell Douglas.

The ATA is under development by both General Dynamics and McDonnell Douglas and Lockheed and Northrop are competing for the ATF. McDonnell Douglas and Bell Helicopter-Textron are competing with Boeing's Vertol division and Sikorsky Aircraft of United Technologies for the LHX project.

The five projects together, Aspin said, run to well over $300 billion and in an era of tight budgets and a rapidly vanishing threat, ''We can't afford all of them.''

The Pentagon initially sought money in the 1991 budget for five B-2s, but recently revised its plans - scaling back the total program from 132 planes to 75 - and requested just two for 1991.

Aspin refused repeated efforts to draw him out on what his recommendations to the House would be.

''Those five weapons system are all at the cusp of the process,'' said Aspin.

Noting the military expansion of the last decade, he said, ''What you need to do is maintain the quality of the forces rather than buying the next generation of equipment.''

Aspin said many in the intelligence community believe the next five-year plan for the Soviet Union will see a decreased emphasis on strategic weaponry. The intercontinental-range B-2 is a strategic weapon.

''What I think we'll do ... is a policy of slowing down strategic programs on our side, maybe see what happens in the Soviet Union, see what happens in the next five-year plan. ...

''I'm going to be advocating let's just slow this down and watch and see what happens,'' said Aspin.

In addition to the B-2, other strategic programs include the rail-mobile MX missile, which a Senate panel already has recommended be slowed, the one-warhead road-mobile Midgetman missile, and the Trident ballistic missile submarine.

BEIRUT, LEBANON (JULY 20) UPI - Rival Shiite forces fought fierce battles Friday in a strategic southern region, killing at least 5 people and wounding 18 others, security sources said.

They said battles between the pro-Iranian Hezbollah, or Party of God, and the pro-Syrian Amal militia continued for a fifth consecutive day in the Iqlim Al Tuffah region - raising the casualty toll to at least 45 dead and 170 wounded.

Police said rival Shiite gunmen traded mortar, heavy artillery and machine gun fire along the Tuffah frontlines, east of the port city of Sidon, 24 miles south of Beirut.

Security sources said most villages in Iqlim Al Tuffah, including Jarjou, Jebaa and Sarba, came under heavy shelling during the night. The bombardment eased off early Friday but resumed at noon.

A Hezbollah communique said Israeli troops and their surrogate South Lebanon Army militia bombarded its positions in Jarjou, a strategic mountain-top village which has been the scene of house-to-house battles since fighting broke out five days ago.

Meanwhile, security sources said Hezbolah and Amal were reinforcing their positions in what appeared to be preparation for a major battle to control the region.

Hezbollah and Amal have been engaged in a 3-year-old bloody struggle for the control of Lebanon's 1.2 milliom Shiites.

Security sources in Sidon said the two rival forces were reinforcing the battlefronts as Palestinian forces, which deployed early this week in the Toffah region, used heavy artillery and multi-barreled rocket launchers.

The leading An Nahar newspaper quoted security sources as saying that heavy artillery and multiple rocket launchers were introduced in the Palestinian area of deployment.

The sources ''did not rule out the possibility of an offensive being waged in the next few hours to recover Jarjou (from Hezbollah), unless the Palestinian side receives a commitment that a settlement would be reached

and a peaceful pullout from Jarjou carried out.''

The Palestine Liberation Organization warned Hezbollah to leave Jarjou on Wednesday or face forceful measures by Palestinian guerrillas. But the next day, the PLO was reported to have held back on an ultimatum to enter Jarjou by force after behind-the-scenes efforts to find a peaceful end to the conflict.

Last September, more than 1,100 guerrillas loyal to PLO leader Yasser Arafat and based in shantytowns on the outskirts of Sidon, took up positions in some areas in Iqlim Al Tuffah to prevent any Shiite forces from controlling the strategic region.

#90201u1972 07/20/1990 ~United Press International

WASHINGTON (JULY 20) UPI - The United States is still aiding the cause of the genocidal Khmer Rouge in Cambodia despite a policy shift this week by the Bush administration, senators and witnesses said at a subcommittee hearing Friday.

The Khmer Rouge killed at least 1 million Cambodians in the mid-1970s before they were overthrown by a Vietnamese invasion in 1978, and the United States subsequently backed a Chinese-supported rebel coalition comprising the Khmer Rouge and two less militarily powerful non-communist groups.

The American goal was to force Vietnam to withdraw, which it did last year while continuing to oppose a Khmer Rouge return to power. However, in recent weeks that possibility has grown, prompting the U.S. policy change.

Secretary of State James Baker said Wednesday the United States would begin talks with Vietnam on a political settlement and would withdraw support from the rebel coalition at the United Nations if the Khmer Rouge remained a member.

At the hearing, senators and former Secretary of State Edmund Muskie criticized Baker for not going far enough, calling for an and to U.S. aid to the rebels and to the economic embargo against Cambodia.

''Uuder current policy, including the changes just announced, the United States government is not neutral. With the embargo and aid to the resistance, with pressure on Vietnam to force (current Cambodian leader) Hun Sen to yield authority, U.S. policy helps the Khmer Rouge,'' Muskie said.

''Now, there is a small adjustment, that may well prove too little and too late,'' Muskie, who visited Cambodia in October 1989 on a visit sponsored

by the National Policy Center, told the East Asian and Pacific Affairs panel of the Senate Foreign Relations Committee.

''If Cambodia should again fall to the Khmer Rouge, the United States government will have the blood of the Cambodian people on its hands. President Bush will have the fall of Cambodia on his record,'' Muskie said.

Although still supporting aid to the non-communist groups, Sen. Frank Murkowski, R-Alaska, said the present policy is flawed because it ''tries to achieve two incompatible objectives at the same time.''

Warning that ''time is running out,'' Murkowksi said the alternative would be to work with the Vietnamese-backed government and the non-communist groups to stop the Khmer Rouge.

Democrats said the U.S. aid to the non-communists, which includes $7 million in non-lethal assistance and covert military aid, is helping the Khmer Rouge in the field despite administration denials that collaboration is occurring.

Sen. Bob Kerrey, D-Neb., also criticized the U.S. reliance on a guerrilla strategy, saying the Khmer Rouge, as the strongest guerrilla group, would take power if the Hun Sen government fell.

''Is there anyone that would want to say that this is a desirable outcome?'' Muskie asked, referring to a defeat of Hun Sen. ''I think it's appalling.''

Sen. John Kerry, D-Mass., said the embargo, which was imposed to punish the communist Khmer Rouge regime in 1975, ''has become a critical part of the Khmer Rouge strategy'' because it weakens the current government.

Richard Solomon, assistant secretary of state, told the subcommittee the United States was not seeking a military defeat of the Vietnamese-backed government but was hoping to keep the non-communist resistance alive until a political settlement administered by the United Nations can be worked out.

#90201u1976 07/20/1990 ~United Press International

WASHINGTON (JULY 20) UPI - Oliver North won an important victory Friday when an appeals court overturned one of his three Iran-Contra convictions, but the gung-ho ex-Marine likely will spend years battling for complete legal exoneration.

In addition to striking down one conviction, the Court of Appeals for the District of Columbia, citing improper handling of North's immunized

congressional testimony, ordered the trial judge, Gerhard Gesell, to reconsider the remaining two.

The 2-1 decision, in which two Reagan appointees voted against a Carter appointee, could spawn new rounds of appeals, lengthy, complex hearings over North's testimony before Congress and even a new trial. It is also possible the convictions could be reinstated.

North, speaking briefly with reporters in Baton Rouge, La., said: ''I'm grateful that it's happened. I'm very pleased.''

''It has been for my family and me 3 1/2 long years of a bitter legal ordeal. We've been under virtual siege. I certainly hope the special prosecutor ends it now,'' he said.

The ruling did not appear to surprise special Iran-Contra prosecutor Lawrence Walsh, who has been investigating the scandal since he was appointed in 1987.

''Everyone familiar with these proceedings has recognized the difficulty presented by the grants of immunity by Congress,'' Walsh said in a statement. ''We have diligently tried to work around these difficulties. We are studying the opinions to determine the most appropriate next step.''

Walsh could ask the entire 12-judge appeals court to review the case, appeal directly to the Supreme Court or return to Gesell's court for new hearings on the immunized testimony issue. Legal sources said Walsh had little to lose by appealing directly to the Supreme Court.

Walsh said San Francisco lawyer John Keker, the lead prosecutor in the case against North, would head the trial team if the new hearings are held by Gesell.

The court's concern about all three counts centered on the testimony that North was ordered to give Congress in 1987 under a grant of limited immunity - meaning North's revelations could not be used against him in his criminal trial.

The court struck down the count that accused North of shredding White House documents. The judges said Gesell failed to hold a full hearing to ensure that witnesses were not ''tainted'' by exposure to North's congressional testimony. Gesell also gave erroneous jury instructions, the judges said.

''If the government has in fact introduced (tainted, immunized) evidence ... then the defendant is entitled to a new trial,'' the court said. ''If the same is true as to grand jury evidence, then the indictment must be dismissed.''

The court ordered a new hearing on the other two convictions, stemming from his alleged effort to obstruct Congress and accepting an illegal gift - a home security system.

The court said it disagreed with Gesell that the use of immunized testimony ''to refresh the memories of witnesses'' should not be subject to a hearing to guarantee North's Fifth Amendment rights against self-incrimination.

North, a former National Security Council staff member, was convicted May 4, 1989, on one count each of obstructing Congress, destroying government documents and receiving the illegal gift.

North was subsequently forced to testify against his boss, former national security adviser John Poindexter, who was convicted on all five felony counts on April 7, 1990. Poindexter was sentenced to six months in prison and has said he will appeal.

Poindexter was the first Iran-Contra defendant to receive a prison sentence and the highest-ranking Reagan administration official snared in the scandal.

In addition to North and Poindexter, five people have been found guilty in the scandal.

The Iran-Contra affair was the biggest scandal of Reagan's presidency. It is a complex tale of secret weapons sales to Iran, efforts to win the freedom of American hostages in Lebanon and covert aid to the Nicaraguan Contra rebels when Congress had banned such aid. The money for the Contras was diverted from the secret Iranian arms sales profits.

Walsh and his office, which has spent about $21 million so far, continues to investigate aspects of the scandal, reportedly focusing on allegations of perjury. Both North and Poindexter have been forced to appear before the grand jury.

#90201u2052 07/20/1990 ~United Press International
WASHINGTON (JULY 20) UPI - Oliver North's appeals court victory Friday prompted the Navy to take a look at whether the decorated ex-Marine should start getting his pension checks again.

And regardless of the outcome in the court system, Congress is moving to restore North's pension anyway. A House subcommittee voted 8-1 Friday to tell the House Armed Services Committee to put language in this year's defense bill to take care of North and the $23,000 a year he could be getting.

Craig King, general counsel for the Navy, was testifying at the Judiciary Subcommittee on Administrative Law when word of the court ruling came down and told members, ''When we leave here I'll find out exactly what happened in terms of whether it allows us to reinstate him, if there's a new trial or whatever.''

The committee, just to be on the safe side, approved legislation on the topic in a vote that saw conservatives and liberals join to rectify what many have argued is a discriminatory quirk caused by a General Accounting Office ruling.

North, a former lieutenant colonel, had retired before his conviction on charges of destroying documents in connection with the Iran-Contra scandal. The statute under which he was convicted required that he be stripped of his government ''office'' as part of the punishment.

Although the Navy had concluded that as a retired officer North held no ''office'' and thus could not be stripped of his ''retired pay,'' as the stipend is called, it asked the General Accounting Office for an opinion because it was concerned paymasters might be personally liable if the Navy interpretation was wrong.

The GAO, which is the final authority in such questions, concluded there was serious questions about whether he could draw the money and suggested that North file suit to get a court ruling. His allies protested that North should not have to bear the cost of a lawsuit to get his pension.

That prompted legislative moves to clear up the problem, and debate both in the subcommittee and on the Senate floor - where a similar bill passed last year - pointed out that a retired civilian government employee convicted of the same crime would not lose his federal pension because there was no government ''office'' for him to lose. And others noted that

retired Adm. John Poindexter, who was convicted of more serious crimes in his Iran-Contra trial, will not lose his pension.

Rep. William Dickinson, R-Ala., told the subcommittee, ''Regardless of one's personal feelings for Ollie North, the law is inconsistent and flawed and should be corrected.''

#90201u2096 07/20/1990 ~United Press International

EAST BERLIN (JULY 20) UPI - East Germany's fragile coalition government faced a renewed crisis with members clashing in Parliament Friday over whether to hold its own elections before unification or wait until the two Germanys are joined.

After a heated debate dividing the seven-party coalition, members of Parliament defeated a motion calling on the legislature to adopt a resolution stating that unification will take place on Dec. 1, 1990, and all-German elections the next day.

Prime Minister Lothar de Maiziere's Christian Democratic Union and its conservative partner in the coalition, the German Social Union, opposed the motion.

The Communist Party, now the Party of Democratic Socialism, also voted

against it apparently because it would stand a better chance of returning deputies to Parliament if the two states held separate elections. The Socialists are not a member of the government coalition.

The smaller political parties stand a better chance of returning deputies to Parliament if East and West German elections were held separately. In West Germany, a party must gain at least five percent of the vote to return members to Parliament, but there is no such clause in East German electoral legislation.

The smaller Liberal Party, which presented the proposal with the backing of the Christian Democrats' main coalition partner, the Social Democratic Party, indicated they would try to put the motion to the vote a second time.

De Maiziere, who has insisted on separate elections in the two German states before unification, said the motion presented by the Liberals would turn "unification negotiations into a farce."

The Liberals, who hold only 23 of the coalition's 303 seats in the 400-member Parliament, have threatened to quit the government but de Maiziere dismissed the threat and said that "a small party which is in the coalition must prove that it can go against the grain of the larger parties - that is it."

In an interview published Friday in a West German daily, de Maiziere said that if the merger took place before elections, East Germany would be ruled by the West German government until a new government takes office.

"We would have a situation where 16 million (East) Germans would be ruled by a government which none of them had legitimized through elections," he told Die Welt.

The debate in Parliament, briefly interrupted by a bomb threat, followed a crisis meeting of the conservative-led government and growing speculation that de Maiziere might resign. But the prime minister denied he was planning to quit the post he has held for 100 days. "I have never threatened to resign and I have no intention of resigning," he said earlier Friday.

De Maiziere unleashed the crisis in his coalition government when he objected to the proposal that the two Germanys merge before the tentatively scheduled all-German election Dec. 2. "There is no agreement in the coalition on this motion. And to be honest, I am decidedly against the motion," de Maiziere said.

The West German government has not officially taken sides in the argument but has urged the East German parties to solve the issue before the end of

July to avoid delaying unification.

"The matter is slowly becoming serious," said Otto Graf Lambsdorff, head of the Free Democratic Party, junior partners in the conservative-led Bonn government. Lambsdorff said de Maiziere's position is not even backed by the prime minister's own party.

De Maiziere, in a statement marking his first 100 days in office, said Friday the current wave of strikes seriously threatens the country's already ailing economy and that because of the economic troubles, the pace of German unification could not be increased.

"To those who say the transitional phase had not gone fast enough, it should be said that the inheritance we take up is far worse than we imagined. Therefore, the transition can only be made step by step" he said.

In the past two weeks, strikes in East Germany's industrial and services sectors have slowed down the country's productivity, leading to fears of rapidly rising unemployment and spiraling prices.

(JULY 20) UPI - SPORTS DIGEST

Baseball

Pete Rose underwent successful knee surgery Friday, one day after being sentenced to five months in prison for tax evasion. Dr. S. Michael Lawhon, the Cincinnati Reds' team physician, repaired torn cartilage and removed some other cartilage from Rose's right knee during out-patient surgery at Christ Hospital. Rose is scheduled to report to prison Aug. 10, but U.S. District Court Judge Arthur Spiegel said he would delay the reporting date

if Rose is not sufficiently recovered from surgery by then.

Basketball

The Erie Wave of the World Basketball League has released Dwayne McClain, injured since July 6. McClain, a forward from Villanova University, played in six games, averaging 13.5 points and 9.2 rebounds a game before being sidelined with knee problems.

College

Cinietra Henderson, the Texas Lady Longhorns' starting center, has been suspended for one game for violating an NCAA rule that regulates participation in off-season tournaments. Henderson, a 6-foot-4 sophomore, played in the Pizza Hut-Pepsi Hoop It Up three-on-three tournament in Tyler, Texas, on June 2. The NCAA only sanctions summer play between June 15 and Aug. 31.

Football

Offensive tackle Anthony Munoz and tight end Jim Riggs have signed new contracts with the Cincinnati Bengals. Munoz has played the last 10 years with the Bengals and has been selected for the Pro Bowl team the last nine years in a row. He was a unanimous choice on the NFL's ''Team of the 1980s.'' Riggs was a fourth-round draft pick in 1987 from Clemson.

Games

British gymnast David Cox received a late call-up for the Goodwill Games in Seattle. The 20-year-old from Liverpool replaces an Italian in an international team against the United States, the Soviet Union, East Germany, China, Japan, Hungary and Romania. ... Olympic gold medal-winning gymnast Mary Lou Retton will help kick off the 13th annual Empire State Games in Syracuse, N.Y., with a speech to about 9,500 amateur athletes. The Games are scheduled to begin Aug. 1 with opening ceremonies and conclude Aug. 5.

Hockey

The Pittsburgh Penguins signed free-agent center Bryan Trottier, the leading scorer in New York Islanders history and a four-time Stanley Cup champion. ... Three NHL exhibition games will be played at the Knickerbocker Arena in Albany in September. The New York Rangers will face the Washington Capitals Sept. 15, the Boston Bruins and Philadelphia Flyers play the following night, and Sept. 26, the Buffalo Sabres will play the Capitals. ... Former Minnesota North Stars player Bill Goldsworthy has accepted a two-year contract with George and Gordon Gund. Goldsworthy will be a scout for the Gunds' expansion team in the San

Francisco Bay Area.

Tennis

Billie Jean King will be competing for New Jersey Stars Team tennis team this weekend, substituting for Janine Thompson who was named to the Australian Federation Cup.

Track & Field

Steve Backley of Britain set a new world record in the javelin with a throw of 90.98 meters at the Parcelforce Games in London. It surpassed the previous record of 89.66 meters, held by Jan Zelezny of Czechoslovakia.

Volleyball

Teams from France, Poland and Yugosliava will compete in the international ''Tomis Trophy'' women's volleyball tournament at the Romanian seaport of Constanta from July 31 to August 4.

#90201u2190 07/20/1990 ~United Press International

MONTREAL (JULY 20) UPI - Defiant Mohawk warriers in Quebec Friday refused to meet a Canadian government demand to surrender their arms and return to negotiations aimed at ending week-long standoffs with police at two Indian reserves.

The standoffs at the Kanesatake and Kahnawake reserves near Montreal, in which hundreds of heavily-armed Mohawks are facing off against thousands of police officers, were sparked when Quebec police tried to dismantle a

roadblock the Mohawks erected on a golf course expansion site they claim is on ancestral land.

A Mohawk negotiator known by his Indian name, Kanasaraken, said in a televised interview Friday the Indians will not lay down their arsenal of weapons or tear down barricades as demanded by Canadian Indian Affairs Minister Tom Siddon.

''Will Canada lay down its arms in its defense to its own sovereignty?'' Kanasaraken said. ''We also have sovereignty and the authority to defend our nations from invasion.''

Kanasaraken said the dispute has grown to include all Mohawk Indians.

''We are a nation. If you're attacked in New York, the entire United States gets involved. If Canada is invaded by a foreign country in Nova Scotia, Canada gets involved. It isn't just a Nova Scotia problem,'' Kanasaraken said.

Many of those wielding high-powered arms at the Quebec standoffs are reportedly highly paid members of the paramilitary Warriors Society, from the St. Regis reserve that straddles the United States-Canada border near Massena, N.Y.

The Warriors Society, which has been linked to organized crime, supported the pro-gambling forces when a dispute over gambling erupted into violence on the St. Regis reserve in May, leaving two men dead.

Despite Mohawk claims of solidarity, there are accusations the Warriors Society is providing muscle to one side of a factional power struggle on the Quebec reserves.

Jacques Lacaille, a lawyer who represents the traditionalist chiefs on the reserve, says members of the Mohawk Warriors Society have threatened him at gunpoint and he fears for his life when he visits the standoff site at the nearby Kahnawake reserve, near Montreal.

''On Tuesday, I had five guns pointed at me. My personal security here is not assured,'' Lacaille told reporters.

A police officer died in last Wednesday's police assault on Kanesatake, although police say it may never be determined if he was felled by a Mohawk or police bullet.

Kanasaraken said barricades could be dismantled in five minutes if Canada ''subjects itself to the international community, the laws of the international community and signs an agreement with the Mohawk Nation to adhere to'' a decision by the World Court at The Hague.

He said the World Court's opinion is important because it is a neutral party, unlike the Canadian and Quebec governments which have vested interests in the land disputes.

But Indian Affairs Minister Siddon, in a televised interview Friday, said the government would not allow the Mohawk's land claims case to go to the World Court.

Siddon said the government negotiated with the Kanesatake Mohawks in good faith for more than nine months and all parties - the federal and Quebec governments and the Mohawks - had agreed on a process to resolve land and legal claims.

#90201u2299 07/20/1990 ~United Press International

OAK BROOK, Ill. (JULY 23) UPI - McDonald's Corp. Friday reported second quarter earnings of $215.8 million, or 59 cents a share, up 10 percent from $196 million, or 53 cents a share, a year ago.

Revenues increased to $1.70 billion from $1.55 billion in last year's second quarter.

It was the 101st straight quarter of record year-to-year increases in earnings and sales.

For the first six months of this year, the fast-food chain reported record earnings of $373.9 million, or $1.02 a share, up 11 percent from $337.7 million, or 90 cents a share, a year ago.

First-half revenues also hit record highs - $3.23 billion compared with $2.93 billion a year ago.

#90201u2325 07/20/1990 ~United Press International

NEW YORK (JULY 20) UPI - The dollar mostly slipped against key foreign currencies in thin, uninspired New York trading Friday as players concentrated on selling Japan's yen against the German mark and other European units.

Currency traders said the Japanese currency came under selling pressure both for technical reasons and in re- sponse to the Tokyo stock market's sharp fall on expecta- tions interest rates there may rise.

Bank of Japan Governor Yasushi Mieno expressed con- cern about expansion of the money supply, prices and a tight labor supply, which was taken as a

signal to the marketplace that his bank will raise its discount rate.

Investment officer Lori Poyner of the Harris Trust & Savings Bank in New York said expectations of higher interest rates normally tend to support the yen. But the stock market's selloff and technical factors pressured it.

In late New York trading, the dollar was quoted at 1.6380 marks, off from 1.6405 Thurs- day, and at 148.60 yen, up from 148.05.

Sales of the yen for the deutsche mark dominated New York trading, said Lee Stalzer, an Amsterdam-Rotterdam Bank assistant vice president. ''Basi- cally we saw a lot of cross trading, back and forth,'' she said.

But it was a lackluster session, especially for the dollar. ''As is typical of hot Fridays, I don't know if everybody is leaving early, but it's been a slow day,'' remarked Poyner of Harris Trust.

Other New York dollar rates: 1.4020 Swiss francs, down from 1.4050; 5.4950 French francs, off from 5.5050; and 1,200 Italian lire, down from 1,201.50.

The British pound moved up to $1.8180 from $1.8150.

In Europe, the dollar closed generally lower against the main currencies in quiet trading. Dealers said the U.S. unit remained boxed in a tight range as Wall Street failed to give the foreign exchange market direction.

The dollar closed marginally lower in Frankfurt, at 1.6420 marks against 1.6425 marks Thursday, but was unchanged in Zurich, at 1.4085 Swiss francs.

In London, the pound closed lower against the dollar at $1.8135 compared with $1.8155 at Thursday's close.

The British currency was quiet in routine trading as investors were unwilling to commit themselves ahead of British trade figures due out Monday that areexpected to be poor, Barclays Bank analyst Bill Simpson said.

The U.S. unit fell in Paris, Brussels and Milan - to 5.5075 French francs against 5.5200, 33.85 Belgian francs compared with 33.92 and 1,202.50 lire against Thursday's 1,205.40. In Milan, the dollar dipped below the 1,200-lire mark for the first time since Jan. 13, 1988, opening at 1,199.50 lire.

Earlier, in Tokyo, the dollar, rising against the yen as funds moved through the U.S. unit from the yen to high-yielding European currencies, closed at 148.35 yen, up from 147.60.

But Warren Pinner, a Klein- wort Benson analyst in London, said the

dollar's strength was ''a short-term aberration.'' He added: ''We should see yen appreciate in coming weeks on higher Japanese (interest) rates.''

Gold declined in both Zurich, to $361.50 an ounce from $363 Thursday, and London, to $361.25 an ounce against $362.50.

Republic National Bank in New York closed cash gold at $361 an ounce, down from $361.25 Thursday. The New York Commodity Exchange settled gold at $361.30 an ounce, off from $361.40.

Similarly, Silver closed lower in Zurich, at $4.85 an ounce against $4.90, and in London, at $4.88 an ounce compared with $4.89.

Republic closed cash silver at $4.855 an ounce, down from $4.865. Comex silver eased to $4.848 an ounce from $4.851.

#90201u2373 07/20/1990 ~United Press International

SEATTLE (JULY 23) UPI - The Boeing Co. said Friday it is holding discussions with government-owned aircraft corporations in Italy and France about a possible sale of Boeing's Canada-based de Havilland division, which makes small commuter planes.

Any sale to Aerospatiale of France and Aeritalia of Italy ''would involve an orderly transfer of responsibility to the buyers with continuing Boeing support'' and would depend, among other things, on Canadian government approval,Boeing said in a short statement.

Colin Fisher, a spokesman for de Havilland Aircraft Co., said the French and Italian concerns are approaching the possible acquisition as a joint venture. Neither Fisher nor Boeing spokesman Paul Binder would comment on how long the discussions had been under way.

Since its purchase from the Canadian government for $112 million in January 1986, de Havilland has been a drain on Boeing's bottom line.

''It's not surprising,'' Bill Whitlow, a securities analyst with Dain Bosworth, said of Boeing's announcement. ''The only surprising thing to me is that Boeing can find someone who might be willing to buy it.''

Boeing does not reveal divisional profits, but analysts estimate de Havilland has posted hundreds of millions of dollars in losses. Whitlow estimated de Havilland had about $700 million in revenues last year, a small portion of Boeing's total sales of about $26 billion.

''It's been a drag on their earnings and they came to the conclusion that they are not going to fix it,'' Whitlow said. ''If it goes away, it should

help their earnings, although they may take some kind of one-time hit it they have to sell it for less then they bought it for.''

Boeing is estimated to have spent $400 million or more to improve de Havilland's Downsview, Ontario, plant, where the Dash 8 turboprop, a commuter plane that holds about 40 passengers, is produced.

Boeing in February settled a lawsuit filed against the Canadian government over charges the Seattle company was misled about the condition of de Havilland's facilities at the time of the purchase four years ago.

Boeing received about $97 million in the settlement for upgrading of the de Havilland facility and for reimbursement of research-and-development costs, Fisher said.

A host of other problems also have plagued the operation, including rough relations with the Canadian Auto Workers union, which represents about 4,500 de Havilland workers, and slow production rates that are hampering sales.

Wolfgang Demisch, an analyst with UBS Securities, said Boeing's reasons for buying de Havilland were sound - the purchase put Boeing in good stead with the Canadian government and gave Boeing another line of planes to offer major customers that were interested in starting or expanding commuter air routes.

But, Demisch, said Boeing ''has given it a good shot for some time and has not found it possible to make money.''

An additional problem is that de Havilland competes with heavily subsidized small-aircraft manufacturers in Europe, including Aeritalia and Aerospatiale, and Brazil. Aerospatiale owns 38 percent of the Airbus Industrie consortium that competes with Boeing on large passenger jets.

The two government-owned aircraft companies also are partners in a joint venture that produces the ATR 42, a 42-passenger turboprop passenger jet that is very similar to the Dash 8.

Demisch said the purchase of de Havilland by Aeritalia and Aerospatiale would held them eliminate some competition and give them a foothold in the Canadian market.

#90201u2386 07/20/1990 ~United Press International

WASHINGTON (JULY 20) UPI - Citing Rep. Barney Frank, D-Mass., for ''improper conduct'' stemming from his relationship with a male prostitute the House ethics committee recommended Friday that the House formally

reprimand Frank, an action he accepted with ''no complaints.''

The recommendation culminated 10 months of deliberations by the committee, which Chairman Julian Dixon, D-Calif., admitted was deeply divided over the severity of the punishment it should propose for Frank, five-term congressman who represents suburban Boston.

A 57-page report released by the committee accused Frank of ''improper conduct'' in abusing congressional privilege to influence court officials overseeing the probation of prostitute Stephen Gobie and for fixing parking tickets accrued by Gobie while using the congressman's car.

But the report exonerated Frank, 50, on the most serious charges. The panel said Frank had no knowledge that Gobie operated a prostitution service from the congressman's Capitol Hill apartment and that there was ''no credible evidence'' Frank had sex with Gobie in the House gym.

During a news conference in West Newton, Mass., Frank said he would ''apologize to my colleagues'' in the House when the body considers the reprimand and would acknowledge ''what I did wrong.''

''I honestly say I have no complaints about this process,'' Frank added. ''I got myself into this through my own foolishness and I have no complaints about (the committee's recommendation) ... This is what I was expecting, frankly.''

A reprimand is the mildest formal sanction the ethics committee can recommend for action by the full House.

The panel, formally called the Committee on Standards of Official Conduct, could have urged harsher measures, such as censure or explusion. If the full House approves the reprimand, Frank would not lose his committee privileges, salary or seniority.

Committee Republicans apparently pushed for a recommendation requiring action on the House floor, while committee Democrats urged a milder sanction in the form of a letter of reproval, which the panel could issue without House action.

Rep. William Dannemeyer, R-Calif., said he would introduce a resolution to expel Frank from the House shortly before the chamber considers the reprimand.

Dixon and House Speaker Thomas Foley, D-Wash., said the House likely will take up the issue next week. The House usually follows the committee's recommendations.

Frank, an acknowledged homosexual, has admitted paying Gobie $80 for a

sexual encounter in 1985 and later hiring him with personal funds as an aide.

Frank maintains he fired Gobie in 1987 after learning Gobie was operating a prostitution service out of Frank's apartment. Frank denied Gobie's charge that he knew about the prostitution ring from the start.

Dixon said the committee believes the punishment is tough enough.

''I'm sure Barney Frank would not consider it a slap on the wrist and the committee does not consider it a slap on the wrist,'' Dixon said at a news conference announcing the recommendation.

Frank said he did not think the committee was ''being unduly soft on me.'' But he added he was pleased the report refuted allegations that he knew about the prostitution ring and that he had sex in the House gym.

''The effect of this report, I think, is to say that many of the most serious examples of misconduct of which I've been accused weren't true,'' Frank said. ''(But) I don't want to overstate this. This is not a nomination for a Nobel Prize. This is not saying this person (himself) used very good judgment in all cases.''

''In 1985 through 1987, I showed very poor judgment and acted inappropriately,'' he added. ''That will always bother me.''

The report says Frank, a leading liberal voice in the House who is heavily favored to capture his sixth consecutive term in November, violated a clause in the Code of Official Conduct that states a congressman ''shall conduct himself at all times in a manner which shall reflect creditably on the House of Representatives.''

The report orders Frank to make restitution for fixing the 33 parking tickets Gobie earned while driving the congressman's car by claiming the vehicle was being used for official business.

Frank would be the second homosexual congressman from Massachusetts to be sanctioned by the House in the past decade. Rep. Gerry Studds, D-Mass., was censured in 1983 for a relationship with a male teenage congressional page.

The last House member to receive a reprimand was Rep. Austin Murphy, D-Pa. in December 1987, who was found to have violated House rules by absentee voting, payroll abuses and diversion of office resources.

#90201u2560 07/20/1990 ~United Press International

SANTA MONICA, Calif. (JULY 23) UPI - The number of credit cards in the hands of the 110 million Americans who use them surpassed the 1 billion mark in June, the Nilson Report, an credit card research company, said Friday.

The organization said those Americans who use credit cards have an average of 9 apiece, and this year will charge an average of $4,268 on those cards for a national total of $469.50 billion in credit card spending.

It said U.S. consumers use credit cards to pay for $28 out of every $100 spent for goods and services, excluding expenses such as mortgage payments auto loans and insurance, for which cards are not accepted.

''During the next decade, spending on credit cards will almost double, growing to $893 billion for an average of $7,549 per cardholder annually by the year 2000,'' the Nilson Report said. By the end of this century, it added, credit cards will total 1.2 billion, cardholders 118.3 million.

Established in 1969, The Nilson Report is a twice-monthly news and advisory service for the credit-card industry.

#90201u2584 07/20/1990 ~United Press International

FORT WORTH, Texas (JULY 23) UPI - American Airlines is not satisfied with test results of the MD-11, the long-range jumbo jets it has planned to buy from McDonnell Douglas Corp. in a $4.5 billion deal, the carrier said Friday.

The AMR Corp. unit has placed orders and options for 50 MD-11s, which it plans to use to augment its share of the lucrative trans-Pacific market.

American and Douglas Aircraft Co. in Long Beach, Calif., which is designing the MD-11 for McDonnell Douglas, are discussing making improvements on the plane. American is scheduled to take delivery of the first MD-11 next January.

The discussions also include General Electric Co., which will make engines for the MD-11s on the American order, Douglas Aircraft said.

American is concerned the MD-11 may not be able to take as much cargo load and still fly the same long distance as it had been told when the carrier placed the jet order in 1988.

''The problem is that the aircraft is buring more fuel than the guarantee levels that we negotiated with McDonnell Douglas,'' said Bob Baker, American's executive vice president of operations.

Flight testing necesssary to certify the plane with the Federal Aviation Administration is proceeding. The tests are to ascertain the amount of fuel burned at different altitudes and payloads, Baker said.

Both sides need to resolve the issue quickly. For American, the MD-11 fleet is a significant part of its Pacific strategy. For McDonnell Douglas the American order has been instrumental in boosting MD-11 sales.

An MD-11 is the larger version of the DC-10 and costs about $100 million. According to Douglas Aircraft, it can carry about 290 passengers and a full load of cargo on a non-stop flight from Los Angeles to Hong Kong.

Currently, Douglas Aircraft has orders and options for 371 MD-11s from 31 U.S. and foreign customers.

Douglas Aircraft said that the MD-11 has met or exceeded all aerodynamic performance predictions in flight tests so far and that the plane would achieve non-stop performance for customers' established route segments in all seasons, with full passenger loads and baggage. For most routes, ''significant payloads of revenue cargo'' also can be carried, Douglas Aircraft said.

However, Douglas Aircraft also said: ''Current flight test data show that specific fuel consumption is more than predicted, and Douglas is working closely with the engine companies to develop and incorporate technical improvements into production aircraft.''

The Fort Worth Star-Telegram Friday quoted American officials as saying the plane may not be able to fly long distances with as much weight as McDonnell Douglas pledged 18 months ago.

''We are quite cross with McDonnell Douglas about this,'' the report quoted Donald Carty, American's executive vice president of finance, as saying. ''We have 50 of them on order and we selected that plane because we thought the economics on them worked better for us, so long as they had that long range that we were looking for.''

But Baker told United Press International that American does not anticipate cancelling the order. He said American will make a judgment after Douglas Aircraft and GE have resolved the problem.

''If the problem is not fixed, the lawyers will have a lot of fun,'' Baker said.

Because of its investment in the MD-11 program, Douglas Aircraft reported a loss of over $110 million in the first two quarters of this year, according to company officials. However, McDonnell Douglas showed a net profit of $59 million in those two quarters.

#90201u2601 07/20/1990 ~United Press International
LOS ANGELES (JULY 23) UPI - The U.S. Navy said Friday that it had cancelled Lockheed Corp.'s contract for the troubled P-7A anti-submarine aircraft program, which has already cost the company $300 million because of cost overruns.

Lockheed has been sparring with the Navy for most of this year over how much the government will pay for the P-7A program.

''Lockheed is disappointed by the Navy's action,'' said Chairman and Chief Executive Officer Daniel Tellep, adding that the company will appeal the decision to a Pentagon contract appeals board.

''This is another step in a high-stakes poker game between the Navy and Lockheed,'' said Lawrence Harris, an aerospace analyst with Bateman Eichler, Hill Richards.

Lockheed, which took a $300 million charge against fourth-quarter results last year because of a 50 percent overrun on the program's fixed-price development portion of the program, said that changes in the government's requirements for the aircraft, an updated version of the P-3C patrol plane had created the overrun.

#90201u3035 07/20/1990 ~United Press International
MANAGUA, NICARAGUA (JULY 21) UPI - Torrential rains pelting Nicaragua's Caribbean coast have created floodwaters rising above the tops of trees, drowned five people and left more than 100,000 homeless, authorities said Friday.

"There are more than 106,000 homeless, 5,000 houses have been destroyed, 32 communities have virtually disappeared and at least five people have drowned," said Brooklin Rivera, a regional development minister.

Telephone and electrical lines have been submerged beneath the water, cutting off all communication to the coast and causing a major blackout in the swamped section of the Central American nation.

The coast has been declared an emergency zone and Rivera said officials are asking for medical aid and international relief. Rivera added that the local leadership asked for help from the federal government, but had yet to receive a response.

Thousands of homeless have descended from the mountains where the flooding is worst - water levels reaching beyond treetops - to the coastal cities of Bluefields and Puerto Cabezas.

Rivera said a Cuban medical team has arrived and is helping with the injured and homeless, but "it is not enough because the rains continue and the number of those affected is rising."

CAIRO, EGYPT (JULY 21) UPI - Chinese Foreign Minister Qian Qichen arrived in Saudi Arabia Friday, becoming the first senior communist Chinese official to visit the staunchly anti-communist Moslem kingdom.

Saudi government officials said Qian was scheduled to hold talks with his Saudi counterpart, Prince Saud al Faisal, and analysts speculated they could result in the establishment of diplomatic relations between Riyadh and Beijing.

Reports from Taiwan earlier this week said Saudi Arabia informed Taipei that the kingdom intended to establish diplomatic relations with mainland China. Saudi Arabia has no diplomatic relations with either Beijing or Moscow. Arab newspapers said the Saudis might move to exchange envoys with China in September.

China has been somewhat isolated diplomatically since June 1989 when government troops fired on pro-democracy demonstrators in Beijing's Tiananmen Square, leaving at least hundreds of people dead.

Qichen was scheduled to visit Cyprus, Morocco, and Algeria July 22, but it was not immediately clear if he would return home after his Saudi visit or whether he would carry on from Riyadh and head for Cyprus.

Saudi Arabia maintains good commercial ties with Beijing, and recently established a commercial office in the Chinese capital. China has in the past sold intermediate-range ballistic missiles to Saudi Arabia.

Taiwan, which purchases the bulk of its crude oil from Saudi Arabia, has expressed disappointment at the prospect of the kingdom establishing diplomatic ties with Beijing.

But Western diplomats in the Saudi Red Sea resort of Jeddah told United Press International in a telephone interview that an immediate establishment of ties was unlikely.

"Unless the Saudis have changed the way they operate, I would be very surprised to see an immediate establishment of ties," one envoy said. "These things take a long time in the kingdom, where patience is the word."

The Saudis have indicated they would prefer to maintain relations with two Chinas, but Taipei has virtually ruled this out if Riyadh moves ahead and establishes ties with Beijing. All other Persian Gulf Arab states already have ties with Beijing, leaving Saudi Arabia as Taipei's last Middle East ally.

The Soviet Union has also been courting Saudi Arabia in the hope the

kingdom will agree to re-establish ties, which lapsed before World War II. One of the main obstacles to Riyadh restoring ties with Moscow was the Soviet intervention in Afghanistan more than a decade ago. But repeated visits by senior Soviet officials, including Kremlin trouble-shooter Yuli Vorontsov, after the Soviet pullout from Afghanistan last year, have so far not resulted in a resumption of Moscow-Riyadh ties.

Reports at the time had speculated that ties would be restored after Vorontsov was granted a rare audience with Saudi monarch King Fahd. Diplomats in Jeddah said King Fahd was also expected to grant China's foreign minister an audience, but neither Chinese nor Saudi officials could immediately confirm this.

#90202u0023 07/21/1990 ~United Press International

WASHINGTON (JULY 20) UPI - Supreme Court Justice William Brennan, the leading voice of the court's dwindling liberal wing, resigned Friday - a move that could dramatically alter constitutional law in a number of areas including abortion and civil rights.

Brennan, 84, who made his decision shortly after learning he had suffered a minor stroke, informed President Bush in a letter Friday that he would retire after nearly 34 years on the high court bench.

"The strenuous demands of court work, and its related duties, required or expected of a justice appear at this time to be incompatible with my advancing age and medical condition."

"I therefore retire effective immediately as an associate justice of the Supreme Court of the United States," said the letter, which was transmitted to President Bush aboard Air Force One.

Brennan will go down in history as one of the court's most important members. His long tenure, strong beliefs, and ability to form a majority of justices - including staunch conservatives - to agree with him even in his last years enabled him to personally craft major constitutional precedents in many areas of law that will surely last for decades.

The surprise announcement, coming less than a month after the end of the 1989-1990 Supreme Court term, could set off bitter nomination fight that will pit the White House against a Senate controlled by the Democrats.

Bush, who was flying back to Washington after a two-day political trip in the West, said aboard the presidential jet that he will meet at the White House Saturday morning with top administration officials, including Attorney General Dick Thornburgh and chief of staff John Sununu, to begin the process of choosing a nominee.

"It's so sudden that I have no time frame in mind. The court ... is in its summer adjournment so there is some time, but I'd like to get started on this process and hopefully have a nominee very, very soon."

Asked what judicial philosophy he would seek Bush said, "It's too early to express anything of that nature. "I've always said I want somebody who will be on there not to legislate from the bench, but to faithfully interpret the Constitution, so that gives me a wide latitude. But I do not plan at this point to talk about any issues or any judicial philosophy."

Bush acknowledged that administration officials probably have given some thought to possible Supreme Court appointments. "It's not like we are starting from ground zero."

Despite Bush's comments, it is unlikely he will nominate a liberal or even moderate. Another conservative is sure to strengthen the hand of Chief Justice William Rehnquist who, with the help of three other Reagan appointees, has changed the court's direction.

However, predicting a future justice's behavior on the bench based on past performance is a risky task. Brennan, who will go down in history as one of the most liberal justices, was appointed by a Republican. President Dwight Eisenhower often complained that Brennan was one of his biggest mistakes in office.

In a series of 5-4 rulings in the past two years, the court has chipped away at a number of rights established in a more liberal era including abortion, civil rights, and the separation of church and state.

However, due to the slim majority, the court has appeared reluctant to go further than adjusting laws established over the more than 30 years of Brennan's tenure. The addition of a sixth conservative to the court could lead to even more dramatic changes by an energized and strengthened 6-3 majority.

Aware of the court's conservative shift, Brennan said in his statement Friday, "It is my hope that the court, during my years of service, has built a legacy of interpreting federal laws to make them responsive to the needs of the people whom they were intended to benefit and protect. This legacy can and will withstand the test of time."

The importance of Brennan's seat has not been lost on the Senate, which must confirm any nominee sent by Bush. Sen. Paul Simon, D-Ill., a member of the Senate Judiciary Committee, said it is important "that President Bush make an appointment that will not polarize the nation."

The remark brings to mind the bitter fight that followed the retirement of

Justice Lewis Powell. The battle raged for months and saw the defeat of Robert Bork and the withdrawal of another nominee before Justice Anthony Kennedy was confirmed.

According to court officials, Brennan fell earlier this summer in the Newark, N.J., airport on his way to a cruise in Norway. Upon return from the cruise this week, he consulted with a doctor, who told him he had suffered a small stroke, court spokesman Ed Turner said. The doctor recommended that the elderly jurist avoid stressful situations and consider retirement. A Brennan aide added that the justice has told associates he is feeling well.

#90202u0028 07/21/1990 ~United Press International

MEXICO CITY (JULY 21) UPI - The United States will abide by revised rules set by the Mexican government for the conduct of anti-narcotics agents in Mexico, U.S. Ambassador John Negroponte said Friday. A Mexican Foreign Ministry spokesman, however, said the new regulations are not very different from the old ones.

Negroponte told reporters Mexican President Carlos Salinas de Gortari issued new rules of conduct following the arrest in April of a Mexican doctor charged in the 1985 killing of a Drug Enforcement Administration officer in Mexico.

"Two or three weeks ago, the government of Mexico delivered to us a note that outlined some new standards of conduct for agents here in Mexico," Negroponte said. "We promised to respect in full the standards set by the government of Mexico." He said the new rules "deal with respect for the laws and the sovereignty of Mexico, and the principle of reciprocity."

Mexican Foreign Ministry spokesman Hector Herrera said in a telephone interview "there is no change" in the substance of the rules, adding they simply try to add emphasis to the principles mentioned by Negroponte.

Referring to reports of a special anti-narcotics team operating out of the U.S. Embassy in Mexico City, Negroponte said "they serve for the purpose of liaison" with Mexican authorities. He also said they provide information obtained elsewhere regarding drug shipments "that could be useful for the relevant authorities here in Mexico."

On another issue, Negroponte also said a proposed free trade agreement between Mexico and the United States will not mean a North American "common market."

"It's an important distinction," he said. Free trade "concerns the trade of products, reduction of tariffs, and other types of obstacles to

commerce. A common market would imply more economic integration than does a free trade agreement. For the moment, in our thinking, we're limiting ourselves to free trade."

Negroponte said free trade talks with Mexico and President Bush's proposal to create a hemispheric free trade zone reflect the U.S. position that "trade is the response to the problems of the hemisphere, not economic aid ... (but) that does not mean that we are going to end the programs of economic aid overnight."

#90202u0191 07/21/1990 ~United Press International
(JULY 21) UPI - Friday's Sports Transactions:

BASKETBALL

Erie (WBL) - Released forward Dwayne McClain.
Minnesota - Signed guard Tim Legler to a two-year contract.
Phoenix - Signed unrestricted free agent Ed Nealy to a multi-year contract.

BASEBALL

Kansas City - Placed outfielder Bo Jackson on the 15-day disabled list; activated catcher Bob Boone.

Texas - Activated infielders Steve Beuchele and Jeff Kunkle from 15-day disabled list; optioned third baseman Scott Coolbaugh to Oklahoma City of American Assoication (AAA); placed designated hitter Harold Baines on 21-day disabled list retroactive to July 11.

COLLEGE

Lycoming - Named Robert Eaton head soccer and golf coach, James Kramer head swimming and cross country coach and Brett Hoffman head trainer.

NCAA - Banned Nevada-Las Vegas men's basketball program from 1991 NCAA Tournament; suspended Texas women's basketball center Cinietra Henderson one game for playing in non-sanctioned tournament.

Pittsburgh - Named Rick Burkholder assistant athletic trainer.

Southern Cal - Named Milan Tiff, Barbara Ferrell Edmondson and John Medved assistant track coaches.

FOOTBALL

Cincinnati - Re-signed offensive tackle Anthony Munoz and tight end Jim Riggs.

Detroit - Signed cornerback Terry Taylor, free-agent center Tom Baugh and free-agent quarterback Wayne Johnson.

Houston - Signed draftee wide receiver Pat Coleman.

Indianapolis - Agreed to terms with wide receiver Stanley Morgan; announced retirement of offensive tackle Steve Knight; Signed draftees wide receiver Stacey Simmons, defensive back Alan Grant, linebacker James Singletary, wide receiver Darvell Huffman, and offensive tackle Dean Brown.

Miami - Signed quarterback Scott Mitchell and wide receiver Thomas Woods.

NY Jets - Signed wide receiver Dale Dawkins; announced tackle Curt Singer agreed to terms.

Phoenix - Claimed defensive end Carl Hairston from waivers.

HOCKEY

Pittsburgh - Signed free-agent center Bryan Trottier; named Barry Smith assistant coach.

WASHINGTON (JULY 21) UPI - Supreme Court Justice William Brennan, who retired from the high court after 34 years, was popular with colleagues and the leaders of government, who said he secured his place in history as a compassionate jurist devoted to "justice for all humankind."

President Bush, who was notified of the Brennan resignation while on Air Force One, said Friday the development was a "complete surprise." "Obviously his resignation is accepted," Bush said. "I also thanked him for his distinguished service to the United States."

Chief Justice William Rehnquist also said Brennan's decision caught him off guard, saying, "I am as surprised as anyone by Justice Brennan's retirement announcement.

"He will be greatly missed by his colleagues in the deliberations of the court," Rehnquist said. "He is a delightful person and has made a major contribution to American constitutional law during his nearly 34 years on the court. I hope his retirement will enable him to relax from the cares of office and restore his health."

"I am Justice Brennan's oldest colleague on the court and I enjoyed every day I spent with him," said Justice Byron White, an appointee of President Kennedy. "He is a great justice, and he will be remembered for that."

Sen. Paul Simon, D-Ill., a member of the Senate Judiciary Committee, remarked: "Justice Brennan has been a giant on the court who has been popular with all of his his colleagues."

Justice Thurgood Marshall, the only other justice who always sided with Brennan against the death penalty when such cases were addressed by the court, said, "He is an eminent jurist whom no one can equal for breadth of knowledge, integrity, and commitment to justice for all humankind.

"Without doubt, his opinions will go down in history as the greatest of the court," Marshall said. "Justice Brennan consistently has been a voice of caution and compassion in urging that this court not retreat from its constitutional mission to protect individual's rights of freedom of expression, to guarantee that minorities be free from discrimination, and to assure the rights of those accused of crimes.

"Justice Brennan has been a treasured colleague and a dear friend. I will miss his warm heart and kindred spirit."

Former Justice Lewis Powell, who retired in 1987, also placed a lofty historic perspective on Brennan's career. "I think his retirement brings to an end one of the most distinguished careers of anyone who has ever sat on the court."

Norman Dorsen, president of the American Civil Liberties Union - often a benificiary of Brennan's rulings, expressed sadness that the court's most influential voice for the preservation of civil liberties.

"He has consistently championed every element of the Bill of Rights," Dorsen said. "This is an incalculable loss to the law and civil liberties and to every person whose rights are threatened in the United States." Dorsen said Brennan "has been a courageous, insightful and above all humane jurist. He will not be easily replaced."

By: Joseph Mianowany

WASHINGTON (JULY 21) UPI - Supreme Court Justice William Brennan's decision to retire dramatically alters the landscape of the high court and could clear the way for a solid conservative majority that would affect every American by reshaping issues from abortion to affirmative action.

Brennan's departure on Friday gives President Bush an opportunity to do what Ronald Reagan sought for eight years - a chance to replace one of the court's staunch liberals with a more conservative justice who will provide the critical vote on a host of issues. Reagan nominated three justices, but all of them replaced moderates or conservatives on the bench.

However, standing in Bush's way is a Democrat-led Senate that must confirm whomever the president chooses. With abortion and a plethora of other issues hanging in the balance, the confirmation battle is likely to be brutal.

If Bush is able to push a conservative justice through the Senate, it will provide the nine-member court with six solid conservative votes - a margin likely to be large enough to force major changes in the nation's laws.

With Brennan on the court, there was a 5-4 majority for the conservative wing. But that one-vote edge was not enough to enact sweeping changes. Instead, the slim conservative majority began to chip away at a host of liberal items, but not completely dismantle the laws.

The addition of a sixth conservative justice would give Chief Justice William Rehnquist a large enough bloc of votes to aggressively reshape constitutional law. The sharpest focal point of all the issues will be abortion.

Last year, in the so-called Webster decision, the high court gave states the power to strengthen their anti-abortion laws. However, the 5-4 decision stopped short of throwing out the landmark Roe vs. Wade decision that guaranteed a woman's right to abortion.

With Bush strongly on record as opposing abortion, it is likely that his nominee for the high court - if approved by the Senate - will provide the impetus the court needs to overturn the Roe decision.

Other issues in virtually the same position read like an index of a liberal agenda and include minority rights, affirmative action programs and chuch-state questions.

Those matters are certain to be on the minds of Senate Democrats when they receive Bush's nominee - and the November election could be a critical factor in their deliberations on Capitol Hill.

In most cases, a conservative president can push a moderate or even conservative judicial nominee through a more liberal Senate, providing that the choice is not too radical.

The 1987 nomination of U.S. Appeals Court Justice Robert Bork, regarded by

many in Congress as staunchly conservative in his rulings, galvanized the Senate, which rejected him. Reagan eventually won approval of U.S. Appeals Court Justice Anthony Kennedy, considered a more moderate choice.

However, given the high stakes of this battle, senators are likely to come under extreme pressure and that may play a bigger role because 34 Senate seats are up for grabs this year.

Of the 14 members of the Senate Judiciary Committee which will consider Bush's nominee, five are facing the voters, including Chairman Joseph Biden, D-Del., and Sen. Howell Heflin,. D-Ala., a potential swing vote on the panel.

On the court itself, Brennan's departure means that the liberal wing will now be extremely isolated. Brennan was known not only as a liberal vote, but also as a highly political justice who worked hard to rally others to his cause. His departure leaves only Justices Thurgood Marshall, John Paul Stevens and Harry Blackmun on that now shrinking liberal wing.

#90202u0335 07/21/1990 ~United Press International

(JULY 21) UPI - During his nearly 34 years on the Supreme Court, Justice William Joseph Brennan Jr. never veered from his liberal view of the Constitution, even as the court surged from left to right under the leadership of three different chief justices.

After his 1956 nomination by President Dwight Eisenhower, the former New Jersey Supreme Court judge and son of Irish immigrants gave new strength to the "activist" group on the court headed by Chief Justice Earl Warren.

By 1962, liberals had a solid majority. But Brennan outlasted his colleagues - becoming both the oldest in age and the longest in tenure - and watched new and more conservative appointees steadily erode the law he had helped create on the Warren court.

Citing health reasons and the demands of the job, Brennan, 84, announced his resignation from the court Friday, and in typical Brennan style held out hope that his strong convictions were not in vain.

"It is my hope," he said in a statement, "that the court, during my years of service, has built a legacy of interpreting federal laws to make them responsive to the needs of the people whom they were intended to benefit and protect. This legacy can and will withstand the test of time."

In many ways, Brennan's influence grew as he aged. Although a frequent dissenter in the courts of conservative Chief Justice Warren Burger and his more conservative successor, William Rehnquist, Brennan was the

court's senior member and thus had the power of assigning opinions whenever his liberal views prevailed.

In one of his most controversial decisions, Brennan last year wrote for a 5-4 majority that struck down a Texas anti-flag burning law. The ruling caused a storm of protest, including criticism from President Bush, and eventually led to a proposed constitutional amendment to protect Old Glory.

And in the 1986-87 term, Rehnquist's first as chief justice, Brennan led the court in upholding affirmative action plans, keeping religious doctrine out of public schools, and extending anti-discrimination laws to people suffering from acquired immune deficiency syndrome. His influence on those issues led one analyst to say Brennan was experiencing his "finest hour." Another dubbed Brennan "acting chief justice."

While on the losing side of many issues in recent years, perhaps the most difficult for Brennan was the court's decision in January 1983 to reinstate the death penalty, which he considered a violation of the Consitution's ban on cruel and unusual punishment and a moral affront. In his dissent, Brennan said the court is "simply deluding itself and also the American public" by saying the death penalty is not imposed arbitrarily.

Brennan, joined only by Justice Thurgood Marshall, has opposed capital punishment in every case to reach the Supreme Court. Once executions resumed and the court once again became the last resort for death row inmates, it was routine for their appeals to be rejected 7-2.

On his 80th birthday in 1986, Brennan granted numerous interviews to members of the news media and reflected on his long tenure as justice. He said his greatest hope was that the death penalty would one day be found unconstitutional.

Energetic, quick to grasp ideas, dedicated to his family and to a belief in the common man and the American system of justice, "Bill" Brennan was born in Newark, N.J., on April 25, 1906. He was the second of eight children of William Joseph Brennan and Agnes McDermott Brennan who had traveled to America from Ireland to start a new life.

His father, who began at a job stoking a boiler at the Ballantine Brewery in Newark, became one of the city's most respected labor leaders and served as commissioner of public safety.

Brennan was an honor student at the University of Pennsylvania's Wharton School of Finance and Commerce and was in the top ten percent of his class at Harvard Law School, where the faculty included Professor Felix Frankfurter.

Years afterward, Frankfurter, later a famed justice on the court, is said

to have remarked about his student's career: "I always wanted my students to think for themselves, but Brennan goes too far."

In 1928, Brennan married Marjorie Leonard of Belfast, N.Y., whom he had met at a high school dance. After she died in 1982, he married his longtime secretary, Mary Fowler, of Leonardtown, Md.

Following graduation from law school in 1931, Brennan joined the Newark law firm of Pitney, Hardin & Skinner and became its expert on labor law. During World War II, he served as a military manpower troubleshooter. Then, after joining a group of young lawyers who successfully fought to reorganize New Jersey's bulky court system, he was appointed a superior court judge in 1949.

#90202u0349 07/21/1990 ~United Press International

MOSCOW (JULY 21) UPI - Lithuanian Prime Minister Kazimiera Prunskiene has arrived in Moscow for talks with Soviet President Mikhail Gorbachev and Premier Nikolai Ryzhkov on a timetable for negotiations on independence for the Baltic republic.

The visit, which began Friday, is the latest in a series of compromises by both sides since Lithuania's March 11 declaration of independence. Last month, Lithuania agreed to suspend its independence proclamation and Moscow lifted its economic blockade of Lithuania. An initial trip by Prunskiene in April helped to ease hostilities.

The independent Interfax news service said Gorbachev invited Prunskiene to come to the Soviet capital on the eve of the 50th anniversary of Lithuania's July 21, 1940, incorporation into the Soviet Union.

"I wouldn't say it was by invitation, but by mutual agreement," Angonita Rubcete, an aide to Prunskiene, said by phone from Vilnius. "Gorbachev simply called Prunskiene earlier this week, and they agreed that they should meet."

Rubcete said she could "neither confirm nor deny" an Interfax report that Prunskiene had failed to persuade Lithuanian President Vytautas Landsbergis to go with her to Moscow so that he could participate in a meeting of the Council of the Federation, a new advisory body that joins the presidents of the 15 republics. "If they did discuss that, it was a personal conversation between them, and there has been nothing said publicly about it," Rubcete said.

Prunskiene was accompanied by Lithuanian Vice President Bronius Kuzmitskas chairman of a Lithuanian commission in charge of preparing for the formal talks with Moscow, Rubcete said. She said the two Lithuanian officials

were to discuss with Gorbachev and Ryzhkov a timetable for preliminary negotiations.

Robert Virbitskas, deputy chief of the Lithuanian mission in Moscow, said Prunskiene arrived from Vilnius Friday and went directly to the Kremlin to attend a joint meeting of Gorbachev's Presidential Council and the Council of the Federation. Rubcete, however, said Prunskiene had gone to Moscow to hold separate talks with the two groups of leaders.

Vilnius also is preparing for formal negotiations with the Russian Federation, which under the new leadership of Boris Yeltsin, has invited Lithuania to conclude a separate treaty with the giant republic.

In an address to the people of Estonia, Latvia and Lithuania, the Soviet Parliament's Presidium, or executive arm, said elected legislatures in the Baltic states voted to join the Soviet Union a half century ago to escape the ravages of Nazi fascism.

But in Tallinn, Estonian Prime Minister Edgar Savisaar unveiled another step in the Baltic republics' drive to end the Soviet rule they claim was enforced by puppet governments installed by Soviet soldiers.

Savisaar, former head of the nationalist Estonian Popular Front that dominated parliamentary elections in March, announced on republican television that he had instructed cattle farmers to reduce meat supplies to the rest of the Soviet Union, Interfax said.

Savisaar said his government had introduced a licensing system for all meat exports from Estonia, and he ordered highway police to control all transport of such goods.

The move came a day after neighboring Latvia set up its own customs service, a step taken in March by Lithuania but later withdrawn as part of the compromise measures.

#90202u0366 07/21/1990 ~United Press International

(JULY 21) UPI - For the most part, the 1990 season has been a frustrating nightmare for the Houston Astros. Just when they finally get what appeared to be an easy victory, they got a ninth-inning scare.

Danny Darwin won his second straight start and Glenn Wilson drove in three runs including the 500th of his career Friday night, and the Astros had enough to withstand a six-run ninth inning rally in a 12-6 triumph over the Montreal Expos.

"It's been a while since we've had one like that in our favor," said Houston manager Art Howe. "It got a little hairy in the ninth, but Dan (Schatzeder) came in and got the job done. We really had the killer instinct tonight. We got a lead and we kept adding on to it."

The nightmare in recent games has belonged to the Expos and their beleaguered pitching staff. The Expos have lost five straight and their

six pitchers, which included outfielder Dave Martinez and infielder Junior Noboa surrendered 11 hits and ten walks. The Expos have allowed 52 runs in their last six games.

"Our pitching has really been struggling," said Expos manager Buck Rodgers. "We've been giving up so many runs recently and with the extra-inning games we've had, I had to make (Drew) Hall sort of a sacrificial lamb. But I had plenty of volunteers to pitch the eighth.

Darwin, 4-1, walked one and struck out five and belted the first triple by a Houston pitcher since he accomplished the feat in May, 1987.

Houston took advantage of control problems by Montreal starter Kevin Gross 8-6, to grab a 3-0 lead in the first without a base hit. Gross, making his first start after spending 22 days on the disabled list with a broken middle finger on his pitching hand, walked five in just 2-3 of an inning.

Eric Yelding walked and stole second and Bill Doran walked. Javier Ortiz grounded to third but was safe on a fielder's choice when Yelding eluded a tag by Tim Wallach. One out later, Glenn Wilson walked forcing in Yelding. The Astros sent ten men to the plate in the second and increased their lead to 9-0.

With Houston leading 12-0, the Expos scored six runs in the ninth off reliever Jim Clancy. Mike Aldrete smacked a two-run double, Junior Noboa delivered an RBI single and Delino DeShields knocked in three runs with a bases-loaded double.

-- AROUND THE NL --

Elsewhere in the National League, Chicago topped San Francisco 5-4; New York crushed Atlanta 6-1; Pittburgh downed Los Angeles 4-2; Cincinnati slugged Philadelphia 5-1 and St. Louis defeated San Diego 4-2.

Reds 5, Phillies 1

At Cincinnati, Jeff Reed went 3 for 3 with two RBI and Norm Charlton pitched six strong innings to lead Cincinnati in a game marred by a sixth-inning brawl. Charlton, 8-4, retired the first 14 batters he faced and allowed two hits through six innings for his second straight win. Rob Dibble worked three hitless innings for his eighth save and Jeff Parrett, 3-8, took the loss.

Cubs 5, Giants 4

At Chicago, Joe Girardi stroked a two-out single to cap a two-run ninth, rallying Chicago to their fifth-straight win. Mike Bielecki, who entered the game in the seventh, retired the last seven batters to improve to 4-8.

Jeff Brantley suffered the defeat and fell to 3-2.

Mets 6, Braves 1

At New York, Sid Fernandez allowed four hits over 7 2-3 innings, striking out seven consecutive batters in one stretch, and Howard Johnson collected three RBI. Fernandez, 6-6, retired l4 Braves in a row and Alejandro Pena pitched 1 1-3 innings of hitless relief for his third save. Braves' starter Steve Avery, 1-4, took the loss.

Pirates 4, Dodgers 2

At Pittburgh, Barry Bonds and Bobby Bonilla each knocked in a first-inning run and Bob Walk scattered five hits over 6 2-3 innings to earn his first victory in eight starts. Walk, 5-4, walked two and struck out two and Ted Power worked a scoreless ninth to earn his fifth save. Dodgers' starter Mike Morgan, 8-8, allowed four runs and six hits.

Cardinals 4, Padres 2

At St. Louis, Jose Oquendo collected three hits, Willie McGee drove in two runs, and John Tudor pitched seven strong innings, lifting St. Louis. Tudor, 8-3, allowed two runs and four hits in seven innings, sending San Diego to its fifth-straight loss. Ed Whitson dropped to 7-7.

#90202u0375 07/21/1990 ~United Press International

JOHANNESBURG, SOUTH AFRICA (JULY 21) UPI - Seventeen black residents of a strife-torn township ended an overnight sit-in Saturday at the U.S. Consulate aimed at bringing alleged police intimidation to Washington's attention.

The 16 adults and an 11-month-old girl moved into the reception area between the consular offices and the elevators Friday "to highlight their severe harassment at the hands of police" in Tumahole, 45 miles south of Johannesburg, said Tom Letsoenyo of the township's anti-apartheid group. Tumahole has for months been the scene of anti-apartheid protests and police counter-action.

Letsoenyo said that after police arrested eight people in the township for "various protest activities," the 17 chose the U.S. Consulate in Johannesburg as "the U.S. administration shows sympathy to disadvantaged communities around the world and we want to bring this to their attention."

He noted after the sit-in ended and the group headed back for Tumahole, "This small protest has made its point. People now know who we are and what our problems are. We made these issues of harassment very clear to

the (U.S.) officials."

A U.S. Embassy spokesman, asked if there was a sit-in, said, "I don't know " but noted, "Members of the Tumahole Progressive Structures met with consular officials ... to discuss their grievances regarding certain incidents in the Tumahole area."

"The consulate agreed to accept their petition and pass it along to appropriate South African authorities," the spokesman said. Police Saturday declined to comment on the residents' action or the situation in Tumahole.

#90202u0377 07/21/1990 ~United Press International

BONN, WEST GERMANY (JULY 21) UPI - The West German government inaugurated a new, $78 million official guest house in Bonn, which is already fraught with controversy and may never be used if Berlin becomes the capital of a unified Germany.

"No matter how the question on the future capital will be decided, I still think it is commendable that we have a hospitable house in this beautiful landscape for our state guests," said Construction Minister Gerda Hasselfeldt.

She made the comments as she led journalists on a tour Friday of the huge Petersberg residence, perched on one of the seven wooded hills which overlook Bonn and the river Rhine.

She said the West German government spent the equivalent of $78 million to turn what was a 122-year-old private hotel into the guest house. But if the seat of government moves from Bonn to Berlin - and opinion polls show most Germans would support such a move - the Petersberg mansion might never see foreign royalty and other dignitaries dance in its grand marble halls.

The Bonn government bought the 256-acre property in 1979 for $11.2 million and started to renovate the complex in 1985, she said. Eleven suites have been named after the 11 West German states, which will be responsible for decorating them. The 12th suite was simply named "Bonn".

But even before the paintings and sculptures started to arrive, the government unleashed a heated argument Wednesday when it took away the presidential suite from host state North-Rhine Westphalia and gave it to Berlin. "Bonn and Berlin have a special symbolic meaning and I think the two cities should decorate the two largest suites," Hasselfeldt said.

But a spokesman for North-Rhine Westphalia, the most populous and

industrialized West German state, said the state will fight the government's decision. "Either we hang our paintings on the wall of the Presidents' Suite or nowhere at all," spokesman Bernd Drescher told a West German daily. Hasselfeldt said she did not know what the government would do with the building if Berlin becomes the capital.

Whatever the future holds, the site will remain part of German history. Before it was turned into an official guest house, the century-old hotel had its share of famous visitors.

Before World War II, British Prime Minister Neville Chamberlain stayed there when he traveled to Bonn to meet Adolf Hitler. Other illustrious guests included Shah Reza Pahlavi, the former Iranian ruler and Queen Elizabeth II of Britain.

One of the last guests was Leonid Brezhnev. The former Soviet leader, racing down the winding road from the hotel, wrecked a German limousine which Chancellor Willy Brandt had just given him.

#90202u0380 07/21/1990 ~United Press International

BAGUIO, PHILIPPINES (JULY 21) UPI - Rescuers heard tapping sounds Saturday underneath the rubble of a hotel in a mountain resort town devastated by a massive earthquake that has killed more than 700 people.

Filipino miners burrowed through debris in an attempt to reach the basement gymnasium of the crumbled Hyatt Terraces Hotel in Baguio where workers said ten people were believed to have been trapped since Monday's quake.

Mark Aldrige, a member of a U.N. relief team, said sensitive instruments picked up tapping sounds from the gymnasium Friday evening, indicating there still was a survivor. He said four tapping sounds were again monitored at 6 a.m. but they had grown faint.

"Obviously, the more time goes by the less chance there is of getting survivors," said Aldrige, of Lancashire, England. "If they have access to water, they can live a long time."

The military Office of Civil Defense put the death toll from the 7.7-magnitude temblor as of Saturday at 738. At least 635 people were reported missing and feared dead and 2,951 were injured. The social welfare department said 33,423 houses were destroyed and more than 700,000 people were homeless.

An aftershock measuring 3.0 on the Richter Scale shortly after midnight Friday chipped off a slab of concrete from atop the crushed upper floors of the Hyatt Terraces, falling on the site of the gymnasium and briefly

halting rescue operations.

A hotel clerk earlier said 80 of the 120 hotel guests had been rescued but the rest were missing, including five Filipino-Americans, one Omani, two Hong Kong Chinese and three Dutch. At least 60 hotel and casino employees are among those inside the hotel. Twelve bodies have been retrieved from the hotel.

U.S. Embassy spokesman Stanley Schrager identified an American killed at the nearby Hotel Nevada as Richard Finley, a retired official of the U.S. Agency for International Development who lived in Washington, D.C. He identified a second American victim of the quake as Christine de Leon, whose hometown was unknown.

The pre-dawn aftershock also caused fresh landslides, briefly stopping traffic on the reopened Naguillan Road, one of three leading to the mountain resort, 120 miles north of Manila, which had been closed by the temblor. At least 560 aftershocks have been recorded since Monday's quake, the volcanology commission said.

Rescue teams had earlier given up hope of finding more survivors in the 28 crumbled buildings in Baguio, where more than 200 people were thought to have perished from dehydration and injuries.

Officials said scores of remote villages in Nueva Viscaya and LA Union provinces were leveled by the temblor, the worst to hit the country since a quake and tidal wave killed more than 3,000 people in August 1976 in Mindanao island. In LA Union, five coastal villages sank six feet below sea level, forcing the evacuation of 400 peasants.

Government spokesman Horacio Paredes said an inspection team flew to the isolated village of Kayapa in nearby Nueva Viscaya province and was told 108 vegetable farmers were killed in the area and another 93 were missing.

In Baguio, residents of surrounding villages lashed at the government of President Corazon Aquino for delays in shipment of relief supplies. "What good is grass if the horse is dead," said one village chief in an interview with Manila Radio Station DZRH. "Both the rich and the poor are starving," he said.

Presidential relief coordinator for Baguio, Jose de Jesus, said the government did not have the resources to feed all 177,000 residents of the mountain town. "All of them are demanding to be fed, but obviously we cannot feed them all," de Jesus said.

He said 255 people died in Baguio and another 189 were missing. In surrounding towns in Benguet province, officials recorded 174 dead and 16 missing, de Jesus said.

Aquino appealed Friday night to Filipinos to stop blaming the government for the destruction caused by the quake. "I appeal to our countrymen, let us stop blaming (the government)," Aquino said in a nationwide broadcast. "Let us not listen to those who just criticize and do nothing but complain. What we need to do now is to help each other."

Opposition leaders have criticized Aquino for not reacting fast enough to the mass destruction and blamed her administration for an uncoordinated relief effort.

The communist New Peoples Army meanwhile declared a temporary cease-fire Saturday in their war against the government to allow guerrillas to join rescue efforts in quake-hit areas.

#90202u0397 07/21/1990 ~United Press International

SIDON, LEBANON (JULY 21) UPI - The pro-Syrian Amal movement and Palestinian guerrillas launched an offensive Saturday against the Iranian-backed Hezbollah in a strategic southern village. Security sources said at least 30 people were killed and 70 wounded.

Sources said the battle that broke out at dawn was the fiercest since Hezbollah attacked the village of Jarjou in Iqlim Al Tuffah region, east of the port city of Sidon, 24 miles south of Beirut. At least 75 people have been killed and 240 wounded since fighting broke out between Amal and Hezbollah last Monday.

Reporters returning from the embattled region said the attackers bombarded positions of Hezbollah in Jarjou, using cannons and Soviet-made Grad rockets. "It is raining shells," a Western cameramen said. "We couldn't reach Jarjou because of the non-stop shelling." A Moslem source said the attacking force included more than 600 gunmen of Amal and the Palestinians.

Some 450 guerrillas of the mainstream Fatah movement headed by Palestine Liberation Organization chairman Yasser Arafat were deployed earlier this week in some areas of Iqlim Al Tuffah to halt Hezbollah expansion.

The bombing that began at daybreak also engulfed the villages of Arab Salim, Houmin and Jebaa, setting houses and shops afire and causing widespread damage. Refugees fleeing the region said shells were exploding at 30 per minute as clouds of black smoke shrouded the areas.

Ambulances with sirens wailing transported victims to hospitals in Sidon and other southern cities. Rescue workers said they only managed to reach the outskirts of Jarjou and evacuate a number of wounded but could not pull out bodies littering the village's streets.

Hezbollah said Amal militiamen launched a three-pronged offensive to regain positions lost in six days of fighting in Jarjou. The fundamentalist group said all attacks were repulsed and "Amal cliques failed to score any victory or even advance one inch." But security sources in Sidon said Amal regained some positions.

PLO representative in Lebanon Zeid Wehbe denied that Palestinian guerrillas participated in the battles. "The Palestinians would never be a party in this fighting regardless of the sacrifices."

#90202u0409 07/21/1990 ~United Press International

MANILA (JULY 21) UPI - The communist New People's Army said Saturday it ordered a cease-fire to allow guerrillas to join rescue efforts in areas hit hard by a killer earthquake and where the Philippine Army is not operating.

In a statement released to news agencies, the NPA general command said in areas where the Armed Forces of the Philippines is not carrying out operations, guerrillas should carry out "rescue and disaster control projects."

"Exercise maximum restraint but when attacked by the AFP, effectively defend your areas and units. It may be necessary to carry out this mass work anonymously so as not to provoke encounters," the statement said.

The military Office of Civil Defense put the death toll from Monday's 7.7-magnitude temblor as of Saturday at 738. At least 635 people were missing and feared dead and 2,951 were injured. The social welfare department said 33,423 houses were destroyed and more than 700,000 people left homeless.

A military spokeswoman declined comment on the cease-fire but said that as far as she she knew operations against the 19,000-strong NPA, which has been fighting the government for 21 years, are continuing.

In the capital Saturday, police said men in cars sprayed gunfire at another car in the suburb of Pasig, killing police Lt. Antonio Benavidez and three of his men. Police said an investigation was under way and it was not known if guerrillas were involved. More than 80 people have been killed in the capital in ambushes staged by the NPA this year.

On Friday, cashiered army Col. Gregorio Honasan said he would call off his campaign to oust President Corazon Aquino if her government stopped hunting his men as a gesture of reconciliation in the face of the Monday's disastrous temblor.

Aquino's spokesman, Tomas Gomez, dismissed Honasans proposal. "We have a disaster in our hands and would rather devote our time to it," Gomez said. Honasan led the December coup attempt in which more than 100 people were killed and 500 wounded.

#90202u0460 07/21/1990 ~United Press International

COLOMBO, SRI LANKA (JULY 21) UPI - Sri Lankan security forces, fighting to gain control of the strategic northeastern district of Trincomalee, clashed with Tamil guerrillas Saturday, killing at least 20 rebels, a senior military official said.

Also, the Liberation Tigers of Tamil Eelam dynamited the Elephant Pass causeway connecting the northern Jaffna Peninsula with the rest of Sri Lanka, the military official said.

The attack was an apparent attempt to prevent government land forces from crossing onto the peninsula, which is controlled by the guerrillas. "We do not know the exact extent of the damage or whether any vehicles can pass through to Jaffna," the official said.

Sri Lankan security forces have been engaged in an all-out war with the Tigers since June 11 when the guerrillas attacked four military bases in eastern Sri Lanka.

At least 1,500 soldiers, rebels and civilians have died in the fighting and at least 40 have been killed since Friday, the senior military official said.

The Tigers are fighting to establish a homeland in the northern and eastern provinces for the nation's Tamil minority, on grounds the government of the majority Sinhalese discriminates against them.

Saturday's fighting erupted after the government launched a major military offensive Friday against Tiger strongholds near Chavaru, about 50 miles south of the port town of Trincomalee in northeastern Sri Lanka. At least 20 rebels were killed and several others were wounded, the military official said. He did not say if any government troops were killed.

"Chavaru is their main base," the military official said Saturday. "Since this morning heavy fighting began after an infantry column directed by the 22nd Brigade commander surrounded the base.

"We have already recovered six dead bodies of Tiger rebels. But our information is at least 20 of their cadres are already killed and large numbers are wounded," the official said.

Further details were not available becasue the fighting was continuing, he said. The official said about 75 percent of the strategic Trincomalee district was under government control.

On Friday, at least 17 Tiger rebels were killed in separate encounters with security forces at Kalmunai and Velaveli in the eastern coastal province of Batticaloa, the official said.

At Akkaraipattu, about 35 miles south of Batticaloa, Tiger rebels Saturday shot dead a Moslem identified as Kamal Deen, the military official said. He was the third Moslem killed since Friday, the official said.

Local Moslem residents protested by closing their shops and staging a general strike. Schools and government offices were closed and public transport came to a halt, the official said.

Thousands of people have been killed in ethnic violence since 1983 when several Tamil separatist groups began fighting the Colombo government. Security forces were unable to defeat them and in 1987 Indian troops were deployed after New Delhi and Colombo signed a peace accord aimed at ending the fighting.

Indian soldiers were to maintain law and order and supervise the surrender of weapons by rebels in exchange for greater rebel autonomy in Tamil areas. But the Tigers refused to give up their guns on grounds the accord did not solve their problems. The refusal sparked a war with Indian soldiers and at least 1,100 troops and 600 rebels were killed.

India withdrew its troops last March and political analysts were optimistic the peace between the government and the Tigers would hold. But rebel attacks on military camps June 11 sparked renewed fighting. Two cease-fires were negotiated within days but both failed.

JERUSALEM (JULY 21) UPI - Former Defense Minister Yitzhak Rabin, mounting a tough challenge for the Labor Party leadership, indicated Saturday that rival Shimon Peres must accept responsibility for the party's failure to form a government.

Peres and Rabin have competed twice since 1977 for the party chairmanship, but their decades-long rivalry generally remained below the surface after the nation's first "national unity government" was formed in 1984.

The latest round in their political competition was sparked by Peres' failure to form a government after his coalition "national unity"

government with the rightist Likud Party collapsed in March.

The center-left Labor Party's 1,400 Central Committee members will meet Sunday to decide whether to vote for a new leader this month, as Rabin prefers, or to postpone the balloting until next year, as Peres wants.

"I think that in any properly conducted system, there is a leader, a No. 1 " Rabin told Army Radio. "Let's take for an example if Peres, and in my opinion this had no basis, had succeeded in putting together a narrow government, all the honors would have gone to him.

But he added, "There is a leader. He either succeeds or is responsible for lack of success. He has partners but numbers two and three are not the ones to make the decision."

The comments by Rabin, Labor's No. 2 man and Israel's prime minister from 1974 to 1977, appeared an attempt to dispel criticism of his role in Labor's failure to form a government.

Rabin led the Labor Party from 1974 and fought off a strong challenge by Peres in 1977 but was forced to resign the premiership later because of a scandal involving his wife's foreign bank account. Peres took over the helm and easily fought off a challenge from Rabin in 1980.

But during his tenure, Peres led the party to electoral defeat after electoral defeat and to two coalition governments with Likud. Peres has been prime minister as well as minister of defense and foreign affairs.

"I did not invite Rabin to a duel," Peres said at his last meeting with supporters before the Central Committee vote. "He has plunged the party into a big whirlpool. But if he asked for a duel, he'll get it."

Rabin is much stronger in his challenge of Peres this time than in 1980. As the defense minister who directed Israel's attempts to quash the Palestinian uprising, Rabin gained huge popular support at a time when he had to fight off international criticism.

Several newspaper polls have shown Rabin would be favored over Peres, as well as Prime Minister Yitzhak Shamir of Likud, if a vote were held for the prime minister's office. But it is still not clear whether Rabin, who was Israel's prime minister in the mid-1970s, will be able to translate that support to victory at the Labor Central Committee meeting and in the final vote for the leadership.

Some observers consider the leadership fight as a prelude to a split within the party, whether Rabin or Peres wins. In a biting commentary, Israeli journalist Nahum Barnea hinted the real problem is the Labor Party itself.

"The showdowns come back to us like a stubborn fly that returns and lands on one's nose," Barnea wrote in the Yediot Aharonot newspaper Friday. "One cannot make a tragedy of a fly landing on one's nose, but it is irritating."

"The showdowns in the party are always similar - same basic plot, same heroes, same radical expressions of mutual hatred and violence - only the audience is getting smaller," Barnea wrote.

#90202u0506 07/21/1990 ~United Press International

BANGKOK, THAILAND (JULY 21) UPI - The Thai government, aided by an opposition boycott, easily survived a no confidence vote Saturday but weak responses to charges of corruption and incompetence by some ministers boosted chances for a Cabinet reshuffling.

The six-party coalition government of Prime Minister Chatichai Choonhavan won the vote, 220-38, as four opposition parties boycotted it to protest the house speaker's failure to control a government minister.

The nationally televised debate erupted in turmoil Friday night when Cabinet member Chalerm Yubamrung, instead of answering charges against him defied the speaker and refused to withdraw accusations of tax fraud against an opposition leader.

The accusation violated parliamentary rules and House Speaker Panja Kesornthong had ordered Chalerm to withdraw them. He took no action when Chalerm refused.

The speaker's inaction sparked the walkout. On Saturday four of the six opposition parties refused to return for the no-confidence vote they had little chance of winning.

"It is meaningless for us to attend the voting today," said Boontheng Thongsawat, chairman of the main opposition Solidarity Party. "How can we attend the meeting when the house speaker is so weak and un-neutral. There is a hooligan in the government's side," Boontheng said.

Boontheng said Chalerm's outburst was a calculated tactic to end the debate that was going badly for the government. Analysts said the debate damaged several ministers with evidence of corruption and incompetence they were unable to rebut satisfactorily.

The debate raised major questions over a collapsed agreement for advertising on a government television station the award of a refinery contract, the construction of a government road to property owned by a minister, the failure to provide an effective telecommunications and road

system, the granting of private title to government land and a number of irregularities in bids and purchases.

The second-largest party, the Social Action Party, led by Foreign Minister Siddhi Savetsila, could be dropped because three of its ministers fared poorly, political sources said.

"At the moment, I have yet to think about it (a reshuffle)," Siddhi said. "I am satisfied with the votes and my ministers' clarifications," he said.

The prime minister declined to say whether he would reshuffle the cabinet. "I am an optimist. I don't think that everybody is bad," Chatichai said. Chatichai said he will set up a working group to consider the opposition allegations in an effort to improve efficiency.

But the debate, which was widely followed on national television, strengthened the impression that Chatichai's government has done little to rein in corruption.

Public resentment of the government, however, has been softened by a booming economy expected to grow this year by more than ten percent for the third straight year.

#90202u0518 07/21/1990 ~United Press International

WASHINGTON (JULY 21) UPI - President Bush began the politically sensitive job Saturday of making his first Supreme Court appointment, hoping to move quickly to replace Justice William Brennan, the court's most liberal member, who surprised the nation with his retirement.

Bush met with White House chief of staff John Sununu, Attorney General Dick Thornburgh and White House general counsel C. Boyden Gray to sift through names Saturday morning in a decision that could ultimately change the face of constitutional law in such areas as abortion, affirmative action and the separation of church and state.

"I'm going to try to make this determination as quickly as possibly," Bush said aboard Air Force One on his way to Newport News, Va., to christen an aircraft carrier. Bush said names were discussed at the hour-long meeting but refused to say how many or whose.

However, he is expected to make his selection from a group of well known conservative jurists frequently mentioned as Supreme Court timber. The list is made up of a number of federal judges appointed by President Ronald Reagan during his eight-year quest to remake the federal judiciary in his image.

Heading that list is Kenneth Starr, the solicitor general who argues the administration's point of view before the Supreme Court. Starr, who turned 44 on Saturday, was appointed to the federal appeals court in Washington by Reagan and was born in Vernon, Texas. His youth, solid experience, and conservative credentials place him at the top of the list.

Other names include Roger Miner, 56, who was appointed to the 2nd U.S. Circuit Court of Appeals in New York on July 22, 1985, by Reagan; James Wilkinson III, appointed to the 4th U.S. Circuit Court of Appeals in 1984; Patrick Higginbotham, appointed tot he 5th U.S. Circuit Court of Appeals in 1982; Pasco Bowman, appointed to the 8th U.S. Circuit Court of Appeals in 1983; and Edith Jones, named to the 5th U.S. Circuit Court of Appeals in 1985.

While Bush said Friday that he would not seek to put his own "stamp" on the court as did his predecessor, he added he was not afraid of stirring things up. "I'm trying to put up the person I think is best qualified, and if that causes some controversy, so be it," he said. Despite that remark, it is expected that Bush will try to avoid a bruising battle with the Democratic-controlled Senate that must approve any nominee.

Sen. Paul Simon, D-Ill., a member of the Senate Judiciary Committee, said it is important "that President Bush make an appointment that will not polarize the nation."

That comment brings to mind the bitter 1987 fight that followed the retirement of Justice Lewis Powell. The battle raged for months and saw the defeat of Robert Bork and the withdrawal of another nominee before Justice Anthony Kennedy was confirmed. While Bork's name continues to come up as a possible nominee in some circles, it is doubtful the White House or the Senate would want a replay.

Alan Dershowitz, a law professor at Harvard Law School, said he thought it unlikely that Bush would make a "dramatic appointment" such as a Robert Bork who would "set sparks flying in the Senate." Rather, Dershowitz predicted Bush will appoint a circuit court judge who has been "a workmanlike, steady conservative over the years."

The appointment is a pivotal one. While the court shifted to a conservative body with three Reagan appointees, it remains narrowly divided. In many important decisions, Chief Justice William Rehnquist holds a slim 5-4 majority.

Another conservative, especially one replacing Brennan, who had the ability to form and hold a majority despite the dwindling number of liberals on the bench, could make the difference on a number of issues - including whether the landmark 1973 Roe vs. Wade remains law.

Brennan, who has long been a lightening rod for conservative ill will, was well aware of the importance of his resignation. Brennan said in his statement Friday, "It is my hope that the court, during my years of service, has built a legacy of interpreting federal laws to make them responsive to the needs of the people whom they were intended to benefit and protect. This legacy can and will withstand the test of time."

#90202u0523 07/21/1990 ~United Press International

CAPE CANAVERAL, FL (JULY 21) UPI - Engineers attempted Saturday to repair a leaky helium line in a commercially built Atlas-Centaur rocket, hoping for a second attempt the next day to launch a $189 million science satellite into orbit.

Engineers from General Dynamics Corp. of San Diego, Calif., which built the Atlas 1 rocket, hoped to finish repairs by mid-evening Saturday to enable preparations to resume for a launch attempt Sunday at 3:28 p.m. EDT.

The rocket was grounded Friday by a helium leak that appeared to be keeping steering rocket fuel too cool. With the leaking shuttle Atlantis sitting grounded just a few miles away, cautious space agency managers were taking no chances.

The $64 million Atlas rocket, and the Combined Release and Radiation Effects Satellite, or CRRES, had been scheduled for liftoff from launch pad 36B at the Cape Canaveral Air Force Station at 4:49 p.m. EDT Friday, one hour and 16 minutes late because of problems with ground equipment.

But less than an hour before liftoff, NASA launch director James Womack ordered the flight "scrubbed" for the day because of a liquid helium leak that kept second stage steering rocket fuel too cool for safe use.

NASA launch managers were shooting for a second launch attempt Sunday but said a firm launch date would not be set until engineers repaired the problem. NASA was not responsible for launch processing under the terms of a commercial launch contract with rocket builder General Dynamics.

But given a storm of negative publicity in recent weeks because of problems with the Hubble Space Telescope and fuel leaks grounding the space shuttle, a successful launch is considered crucial to the National Aeronautics and Space Administration.

When it finally gets into space, CRRES will make a series of chemical releases that program manager Richard Howard said should be "very visible" to observers in the United States, creating celestial displays that bear "an uncanny resemblance" to the aurora borealis, or northern lights.

The boxy, solar-powered satellite also carries Department of Defense experiments to study the effects of space radiation on microelectronics, research expected to help engineers design satellite equipment that is better able to withstand the rigors of space.

The primary goal of the flight is to improve knowledge of how Earth's magnetic field, the supersonic solar wind and the planet's atmosphere, interact to extract energy from the sun.

The effects are easily seen. When a cloud of energetic particles from a solar flare smashes into the invisible bubble of Earth's magnetic field, for example, a "geomagnetic storm" can occur, disrupting communications and causing problems for electrically sensitive satellites.

"The results of these investigations will greatly expands man's knowledge of the space environment and permit future government and commericial satellites to be more efficient, reliable and economical," said Air Force Col. John Armstrong.

CRRES, a 3,732-pound satellite built by Ball Aerospace Systems Group of Denver, is equipped with 24 canisters containing barium and lithium. For each experiment, one or two canisters will be ejected into space and detonated about 25 minutes later, after the satellite is a safe distance away.

High-energy ultraviolet light from the sun then will ionize the released chemicals, changing the number of negatively charged electrons in a given atom to give the gas an electrical charge.

The resulting "plasma" clouds, initially 60 miles or so in diameter, then will stretch out along Earth's magnetic field lines much like iron filings will line up around a bar magnet to make its force field visible.

In a sense, CRRES will "paint" Earth's magnetic field with bright clouds of chemicals, simulating naturally occurring processes like those involving the solar wind. "That's really why were doing this - so we can make space visible," said NASA project scientist David Reasoner.

#90202u0526 07/21/1990 ~United Press International

BONN (JULY 21) UPI - The United States, France, and Britain will keep troops in Germany after unification, a senior West German government official said in an interview made available Saturday.

Horst Teltschik, a senior adviser to Chancellor Helmut Kohl, told the Bild newspaper in an interview to be published Sunday that Soviet leader Mikhail Gorbachev agreed to the proposal at his recent meeting with Kohl

in the Soviet Union.

The adviser said it is in the Soviet Union's interest that a unified Germany "remains strongly tied to the European Community and NATO, instead of swaying between the worlds." He said the number of troops by the Western allies maintained in West Germany will be determined at the disarmament talks in Vienna.

France, Britain, and the United States will pull their armed forces out of West Berlin in three or four years, after the Soviet Union has completed the withdrawal of its troops from East Germany, Teltschick said. He said allied troops would remain in the rest of Germany "for a long time."

The United States has about 250,000 troops stationed in West Germany and West Berlin, Britain 65,000, and France about 50,000. The Soviet Union keeps about 400,000 troops in East Germany.

Kohl and Gorbachev had agreed at their meeting to withdraw all Soviet troops from East Germany, to grant a unified Germany membership in the North Atlantic Treaty Organization and to reduce a unified German army to 370,000 troops.

Teltschik said if the level of armed forces in all of Europe would be reduced, a unified German army could cut the number of its troops even more. "In that case, of course, the last word on the German army with 370,000 troops is not spoken," he said.

He said only a few members of the East German National People's Army, or NVA, would become part of a unified German army because of their different ideological training under the former Communist regime. "We have a hard time imagining that in the future, NVA officers will be taking over the education of our recruits," he said.

#90202u0534 07/21/1990 ~United Press International

NEWPORT NEWS, VA (JULY 21) UPI - President Bush Saturday helped christen the aircraft carrier George Washington, quoting the mighty vessel's namesake as saying, "To be prepared for war is one of the most effective means of preserving peace."

Standing on a freshly painted barge beneath the carrier's steel grey hull, the president told a flag-waving crowd of several thousahd, "American power is still the world's paramount force for freedom."

The ceremony at the Newport News Shipbuilding Co. coincided with the administration's review of a Navy recommendation to reduce the number of deployable carriers from 14 to 12, and as Bush is urging Congress not to

let the end of the Cold War lead to a "fire sale" of military power.

Bush was joined at the star-spangled christening by Navy brass, Defense Secretary Dick Cheyney, his daughter, Doro Leblond, and the first lady, Barbara, who performed the christening ritual. With a mighty swing, she smashed a bottle of champagne across the George Washington's bow, disregarding the portion that sprayed her white dress.

The president told the crowd, "Today, the carrier remains an indespensable element in the American arsenal - projecting power, preserving the peace." The $3 billion George Washington will be the sixth Nimitz class nuclear carrier. It replaces the 45-year-old USS Midway.

In his remarks, Bush recalled his own days as an 18-year-old Navy flier during World War II. "The planes were slower. The ships were smaller," the president said. "In fact, (on) my ship, the San Jancinto ... the deck wasn't much wider than the wingspan of the plane I flew. Now looking up at the Washington, I wonder if the San Jancinto herself wouldn't fit on her deck."

The George Washington is longer than three football fields, and the width of its flight deck measures 250 feet. The ship will come on line in 1992 after sea trials.

"While freedom has made great gains, we have not entered an era of perpetual peace," Bush said. "What George Washington said in the 18th century is truer today than it ever was: 'To be prepared for war is one of the most effective means of preserving peace."'

Bush asked Congress Friday to compromise to "hold the line" against cutting his 1991 military budget beyond the "already painful" six percent voted by the Senate Armed Services Committee earlier in the week.

While assuring Congress the Pentagon "will contribute its share" to deficit reduction, he also asked for more flexibility to decide where the cutbacks will come in the transition to a smaller post-Cold War force.

"We must have an orderly build-down, not some kind of a fire sale," Bush told the troops on a visit Friday to Warren Air Force Base, home of the nation's MX missile force, outside of Cheyenne, Wyo.

He visited the base in capping a three-day, mostly political trip to western states. The Navy has recommended cutting the 14 carrier battle groups to 12 by 1997, and some in Congress would like to reduce it further possibly to ten. Defense Secretary Dick Cheney's fiscal 1991 budget leaves the Navy at 14 carriers and he has not put together his five-year defense plan.

The George Washington's keel was laid in August 1986 and the ship is scheduled to be completed in July 1992. Propelled by two nuclear reactors, the ship can reach speeds of 30 knots and carry 85 aircraft and a crew of nearly 6,000.

With the George Washington nearing completion, the shipyard will now focus on two more carriers it has contracts to build, the John Stennis, and the United States. Even if these ships don't ultimately increase the number of Navy carriers, they would help modernize the overall fleet.

#90202u0539 07/21/1990 ~United Press International

WASHINGTON (JULY 21) UPI - When the Gramm-Rudman deficit reduction law was passed in 1985, it was seen as a cure-all that would drive down the federal deficit to zero in 1991. With the deficit still climbing and lawmakers debating even stronger medicine, the law now is being denounced as a fraud and failure.

The original act was overturned by the Supreme Court in 1986 and then rewritten in 1987 by Congress. The zero-deficit goal was extended to 1993 and probably will be pushed back further this year.

The hoped-for elimination of the annual deficit has been thwarted by a combination of factors that include large defense spending, unexpected new costs such as the savings and loan bailout, tax cuts that lowered revenues and budgetary sleight of hand that allows Congress to avoid painful cuts in favored programs.

"We have to admit that legislative solutions are not solving the problem," Rep. James Quillen, R-Tenn., said last week as the House debated a more drastic approach - amending the Constitution to require balanced budgets. The amendment only narrowly failed.

Rep. Mike Synar, D-Okla., recalled that the act "was touted as the solution to all budget problems and the solution to any deficits. It was a gimmick then and is still one. It also has spawned more ruses for avoidance than any law I can identify."

The original concept of Gramm-Rudman seemed plausible. The law named for Sens. Phil Gramm, R-Texas, and Warren Rudman, R-N.H., required smaller deficits each year until 1991, when there was to be no red ink. If the deficit threatened to go over the limit in any year, automatic cuts would take effect to bring it in line.

The deficit limit for 1986 was $171.9 billion. The revised target for fiscal year 1991, which begins Oct. 1, is $64 billion, an almost impossible goal in view of the latest projections that show the federal

government will be in the red by at least $168 billion next year and possibly $231 billion if the cost of cleaning up the savings and loans mess is included. The target is $28 billion in 1992 and then the elusive zero deficit for 1993.

Congress and the administration are busy negotiating a package of spending cuts and tax increases to bring the 1991 deficit figure down, but both sides say it also will be necessary to change the Gramm-Rudman target and permit a bigger deficit. The new agreement may stretch out the Gramm-Rudman schedule and delay the zero deficit target to the mid-1990s.

Technically, the Gramm-Rudman targets have been met, but the process has become more of a shell game each year. Both Congress and the administration play the game.

Last year the administration shifted a Defense Department pay day from Oct. 1 to Sept. 29, in order to put the bill on the 1989 fiscal year rather than 1990. Some farm price-support payments also have been shifted.

The Congressional Budget Office criticized the 1990 budget plan, saying, "More than one-third of the reductions ... would consist of accounting changes, one-time savings and asset sales that would not reduce the deficit in the long run."

In addition, the Social Security trust fund, which currently has a huge surplus, is counted in the annual federal budget along with the highway and aviation trust funds even though they cannot be spent for other purposes. That causes the annual deficit to appear several billion dollars smaller than it would be without the trust funds.

One of the biggest loopholes in the law is that everyone is off the hook Oct. 15th of each year, 15 days after the start of the new fiscal year. If the administration and Congress come up with a balanced budget plan for the new year, no matter how unrealistic the numbers, then the job is considered done. Any appropriations bills passed by Congress and signed by the president after Oct. 15 are not counted in the deficit figure.

The 1988 target was $108 billion, but when all the spending finally was added up the actual deficit was $155 billion. In 1989 the target was $72 billion, but the actual defict ballooned to $161 billion. The target for this year is a mere $36 billion, but estimates now put the 1990 deficit at $218 billion.

Another flaw is that the law relies soley on the numbers provided by the president's Office of Management and Budget. Critics say the Reagan and Bush administrations consistently have made overly optimistic projections of how well the economy will perform, thus boosting the estimates of tax revenues.

Similarly, actual interest and inflation rates often have been higher than administration estimates, thus the government has had to pay more interest on the national debt than projected.

The process is "loaded with estimates and guesses as to the next year's revenues," said Rep. Don Edwards, D-Calif. The estimates are "closer to wish lists than to facts."

#90202u0590 07/21/1990 ~United Press International

WASHINGTON (JULY 21) UPI - While the ethics committee has urged the House to formally reprimand Rep. Barney Frank, D-Mass., he faces the prospect of a nasty public fight over the level of severity of the sanctions led by a colleague who calls Frank "a man ensconced in the homosexual pathology."

Frank, a leading liberal voice in the House who is heavily favored to capture his sixth consecutive term in November, says he believes he can remain a vital force in Congress despite Friday's recommendation by the House ethics committee that the House reprimand him for conducting stemming from his relationship with a male prostitute. "I don't believe this has damaged my effectiveness as a member of the House," Frank said.

The ethics committee report "does say many of the most lurid charges were simply untrue, were fabrications and there wasn't any evidence for them. And I think that helps reassure people," added Frank, who has admitted to "poor judgment" and "100 percent responsibility" for his problems.

The ethics committee faulted Frank for abusing congressional privilege by fixing 33 parking tickets received by Stephen Gobie and by misleading prosecutors in a memo seeking favorable treatment for Gobie in a probation proceeding. The committee cleared Frank on claims that he knew Gobie was running a prostitution service out of Frank's apartment and that the congressman had sex with Gobie in the House gym.

The issue of Frank's homosexuality promises to play a prominent role in the forthcoming House battle over the level of severity of the sanctions. Rep. William Dannemeyer, R-Calif., says he will introduce a resolution for expulsion against Frank shortly before the House considers a reprimand.

After the committee ended ten months of deliberations on the matter with the reprimand recommendation, Dannemeyer said House members "are being played the fool" about "a man ensconced in homosexual pathology, a man who paid other men to have sex with him as easily as anyone might pay for a meal at a restaurant." Dannemeyer also said he would reveal evidence that Frank knew that Gobie was operating the prostitution service.

Frank, one of two members of Congress who have publicly admitted they are gay, said Dannemeyer is driven by hatred of homosexuals. "Mr. Dannemeyer has been very explicit," Frank said. "He does not like gay people."

Frank admitted in 1987 that he is homosexual. He said going public was the right choice. "I'm gay," he said. "I spent from 1953, when I figured that out at the age of 13, until June of 1987 shielding that in varying degrees."

"I would say to people that to try and conceal a very central part of your life, sexual orientation, and at the same time have a public career and answer questions about your income, about your views on issues, about where you go for vacation, what's your favorite food, what's your shoe size, but then try not to answer questions about why at the age of 47 you're not married, that's a very big mistake," he added.

Frank noted that the House generally follows the advice of the unanimous ethics committee report. "I would note this: This is a report signed by all 12 members of the ethics committee, six Democrats and six Republicans " Frank said. "The Republicans who signed range in the spectrum from some of the more conservative to some of the more moderate."

The ethics committee, deadlocked for months over the level of severity of the proposed sanctions, ruled out sanctions such as censure or explusion in settling on urging a formal reprimand, the mildest formal sanction the ethics committee can recommend for action by the full House. If the full House follows the advice, Frank would not lose his committee privileges, salary, or seniority.

Several prominent House Democrats have spoken up on behalf of Frank. Speaker Thomas Foley of Washington said Frank will "continue to be someone of extraordinary importance." Rep. Chester Atkins, D-Mass., who recused himself as an ethics committee member during the Frank investigation, said Frank is "one of the most talented legislators this House has ever known."

#90202u0593 07/21/1990 ~United Press International

BONN, WEST GERMANY (JULY 21) UPI - Two leading neo-Nazis secretly met in both West and East Berlin in early July to discuss the future of fascism in a unified Germany, a statement released Saturday said. They said they spoke to a dozen prominent right-wing radicals at the meeting about "national socialism as a living and present-day idea and movement."

The twos, Gerhard Lauck and Michael Kuehnen, are members of the outlawed National Socialist German Workers' Party, successor to Adolf Hitler's fascist Nazi party that ruled Germany from 1933 to the end of World War II.

Lauck, who currently lives in the United States, is banned from entering West Germany, but said he evaded the ban by using the open uncontrolled border between East and West Berlin. He did not explain how he entered Berlin.

There are about 36,000 right-wing extremists now in West Germany, organized in 70 groups and parties, the West German government said in its latest report on the movement.

The NSDAP was banned by the World War II allies after 1945, but neo-Nazis in West Germany have found other ways to organize. Kuehnen himself acted as founder of several groups in the past, including the "Action Front of National Socialists", which was promptly outlawed by German authorities.

Lauck and Kuehnen, a convicted right-wing radical, said in their statement they demand the "creation of a Fourth Reich." "We are back again. Everything for Germany," their statement ended.

#90202u0599 07/21/1990 ~United Press International

WASHINGTON (JULY 21) UPI - Interior Secretary Manuel Lujan announced a campaign Saturday to preserve America's historic battlefields through cooperative efforts with states and private groups.

"Let us begin with a clear understanding of the situation. Battlefields - especially Civil War battlefields - are a particularly important part of our national heritage, and they are worthy of our best efforts to protect them," Lujan said in prepared remarks for a speech at nearby Manassas National Battlefield Park. Lujan announced the program on the 129th anniversary of the first battle of Bull Run, the first major battle of the Civil War.

"We need to ipmrove our ability to preserve such sites - before investments have been made and before development proposals have been filed - in short, before the preservation lines have been drawn," Lujan said. "We need to deal with protection in a manner that makes good sense for all concerned."

Lujan named 25 battlefields in 14 states as top priority areas to protect them from encroaching development. The preservation effort will focus initially on Civil War battlefields.

Under Lujan's plan, federal, state, and local officials and private preservation organizations will work together to protect imminently threatened battlefields through a variety of methods, such as zoning, historic district designation or land acquisition.

Lujan reportedly will ask Congress for $15 million to create a commission of historical experts to identify threatened battlefields and set priorities for protection. The money also could be used to help buy sites in immediate jeopardy.

Civil War buffs and preservationists in Virginia, which has the most priority sites, praised the goverment's willingness to get involved. "We are just absolutely estatic that they are joining with us," said Clark Hall, secretary of the Association for the Preservation of Civil War Sites in Fredericksburg, Va. "Their resources and ability to coordinate things on a national scale are far greater than ours."

In addition to providing funds for acquisitions, Hall said the government's involvement sends an important message to Americans. "It sends a signal to the American public that protection of our Civil War heritage is of concern," Hall said. "Obviously the ground over which these men fought and died in pursuit of a dedicated principle, no matter which stripe, is absolutely crucial to us as a people."

Lujan said his commission will include five citizens who are recognized as experts in the history of the Civil War. The panel will also include the chairman of the Advisory Council on Historic Preservation, three citizens recommended by the Senate and three by the House. The director of the National Park Service will serve as director of the commission.

"I will ask the commission to hold hearings, conduct studies, prepare analyses and propose alternatives for dealing with the situation. I will expect the commission to consult with other federal agencies, state governors, local government leaders, state and local historic preservation organizations and other interested parties," Lujan said.

OTTAWA (JULY 21) UPI - Town officials want the land to expand a golf course from nine to 18 holes. Mohawk Indians on the Kanesatake reservation near Montreal say the eight-acre parcel must go to expand an ancient tribal burial ground.

That conflict is at the center of a two-week confrontation between armed Mohawks and Quebec police that has already claimed one life and illustrated the federal government's difficulty in negotiating with native people.

The Mohawk cemetery, dotted with headstones dating back more than century, is surrounded by a nine-hole golf course used by sportsmen in the nearby town of Oka. But land the town wants to use to expand the course is urgently needed by the Mohawks to enlarge their overcrowded burial ground.

"To an Indian, the land is home," said Laurena Montour, spokeswoman for the Kanesatake reserve near Oka. "Non-natives will go from city to city and country to country to work. A native always returns to his home," Montour explained.

The dispute over the land, an eight-acre parcel which Oka intends to use for the back nine holes of the golf course and a housing development, became a pitched battle last week as hundreds of armed police and Mohawks faced each other from behind opposing barricades. One officer was killed in the gunfire when police attempted to smash a roadblock set up by the Warriors Society, a militant faction of the Mohawks.

The roots of the land dispute date back to a 1717 grant made by the King of France to the Seminary of St. Sulpice to a trace of land along the Lake of Two Mountains.

The religious order established a mission there for the Nipissing, Algonquins, and Mohawks, ancestors of the present Indians living on reserves near the town of Oka.

In the next century, a series of disputes over the ownership of the land culminated in the Privy Council in London, England - Canada's highest court at the time - determining that the seminary was the legal owner.

The seminary subsequently sold the land in question to a private developer and the federal government purchased other property to establish the Kanesatake reserve for the Mohawks.

Last year the federal government and Kanesatake Mohawks reached agreement on a proposal to settle the outstanding dispute. The government agreed to purchase the golf course if it became available or find other land to accommodate the growing reserve. The agreement was suspended in January when the Mohawk chief who negotiated it was replaced by the clan mothers on the reserve.

Even though the Mohawks have no legal right to the Oka property, many Canadians and federal politicians believe their claim should be reconsidered because of the significance of the burial grounds.

"If somebody wanted to put a golf course on your mother's grave you would take up arms too," said Maude Barlow, head of the Council of Canadians, an umbrella group of labor and human rights organizations.

Brad Morse, an expert on native legal issues at the University of Ottawa, sympathizes with the Mohawks because the courts that ruled on the land claim in 1912 were notorious for ignoring native rights.

"The law in Canada has evolved quite a bit in recent years and we are

starting to come to grips with the fact that Indian people were here first they did own the country, they were dispossessed improperly, and that they had valid claims," he said.

Morse said earlier Canadian courts and the Privy Council in London were far less respectful of Indian people and their legal rights. "Decisions were rendered in an earlier era which would not be rendered today," he said.

The Canadian government's relations with native people has been sharply criticized by human rights organizations despite the number of comprehensive land claims negotiated with northern Indian groups in recent years.

Critics say successive national governments have either attempted to assimilate natives or segregate them, but at no time were natives consulted about their future.

Although the Conservative government has been prepared to spend billions of dollars on settling land claims, it has cut back funds for post-secondary education sorely needed by natives and reduced money for native broadcasting and publishing ventures.

At the same time, natives complain that federal and provincial game conservation laws have restricted their ability to hunt and fish in traditional ways.

Most native Indians live in deplorable conditions in housing that would be condemned by non-native standards. An Indian in Canada is more likely to go to prison than university and aboriginal youths commit suicide at a rate five or six times higher than the national average.

SAINT-TROPEZ, FRANCE (JULY 21) UPI - Municipal officials at Saint-Tropez said Saturday they have widened a ban on sunbathing in the buff on the shores of the chic Cote d'Azur resort to include tourists using rocky coves.

The new measure was necessary "to assure the security, hygiene and respect for morality as well as the liberty of others," said the council resolution introducing the regulation.

The new regulation will ban nude sunbathing and skinny-dipping in rocky cove areas. City fathers already had banned nudity at the six small sand beaches of Saint-Tropez. Anyone flouting the ban risks having to pay a fine equivalent to $13.

Sources at City Hall said the new measure was introduced to discourage dozens of tourists from baring themselves along Saint-Tropez's sun-drenched Mediterranean shores.

But those in the know in St. Tropez find they can go just up the beach to Pampelone to bathe in the buff. Pampelone is located within the boundaries of the less strict municipality of Ramatuelle.

EAST BERLIN (JULY 21) UPI - Thousands of East and West German rock'n roll fans Saturday poured into the heart of Berlin, once encircled by the Berlin Wall, to watch the giant rock music concert "The Wall." Organizers said they expect a record of more than one billion people to watch the show on television worldwide.

About 200,000 people gathered on the Potsdamer Platz to see a 53-foot styrofoam replica of the Berlin Wall crash down in memory of the November 1989 opening of grim symbol of division and repression in Eastern Europe.

The musical, including rock and pop stars Cyndi Lauper, Sinead O'Connor, Bryan Adams, The Band and many more, centers around the Pink Floyd classic album "The Wall."

The stage bears the 504-foot long wall made of 3,000 styrofoam bricks, which will be illuminated by hundreds of spot lights on stage and - on three helicopters. A giant plastic pig will head through the wall after Waters cries out from behind the wall: "Is there anybody out there?"

Roger Waters, lead singer of the former Pink Floyd band, said in a radio interview he started to look at spots for this show a day after the Berlin Wall tumbled Nov. 9, 1989. "I knew, then, I wanted to do this show in Berlin," Waters told German radio.

He chose the Potsdamer Platz - once the vivacious center of old Berlin which during the Cold War became the deserted death strip patrolled by East German border guards and inhabited by hundreds of rabbits.

The wall - originally a barbed-wire barricade - was built literally overnight, Aug. 12-13, 1961, as East Germany's communist leaders tried to stem the flow of thousands of skilled East German workers to the West. Months later, it became the focal point of the first great nuclear confrontation between President Kennedy and Soviet leader Nikita Khrushchev.

It came crashing down in a single day - symbolically, at least - following weeks of unprecedented pro-democracy demonstrations and the exodus of more

110,000 East German refugees to West Germany.

Thousands of people in spectacular escapes defied the concrete, barbed wire, guards and automatic machine guns in a "death strip" during the 28-year history of the Berlin Wall.

#90202u0625 07/21/1990 ~United Press International

BALTIMORE (JULY 21) UPI - A black man hit by a truck after he was chased into a street by a group of whites remained in critical condition Saturday as police who patrol the mostly white neighborhood played down similarities with a 1986 clash in New York's Howard Beach.

Herbert Jennings sustained severe head and chest injuries Thursday when he was struck by a pickup truck in an East Baltimore neighborhood known as Highlandtown.

He was walking with his white girl friend in the mostly white neighborhood when a passing truck driver yelled at him, provoking three white pedestrians to join in with racial slurs and chased him, police said. Jennings ran through an intersection toward a public telephone to call police but slipped and fell under the wheels of a different pickup truck, police said.

Police charged Daniel Porter, 21, with assault and reckless endangerment and have questioned at least two other men. The truck driver who hit him was questioned and released and Porter was freed on $25,000 bond, police said.

The confrontation resembled an incident in New York's Howard Beach on Dec. 20, 1986, in which a mob of whites chased a black man to his death on a busy highway. Three youths were convicted of assault and manslaughter and are serving long prison terms. A fourth pleaded guilty to lesser charges. An appeals overturned some of the convictions.

Baltimore police characterized the incident as an isolated one and were quick to put down the expected comparison with the Howard Beach clash. "It certainly wasn't anticipated or expected. It's pretty unusual for that area," a patrolman said Saturday. "People are trying to make a lot of it."

It was the second racial incident this week in Baltimore. Wednesday, a black man was fatally stabbed and a friend wounded in a dispute with a group of whites over use of a public telephone.

"We think first and foremost the police should conduct a thorough investigation and make a determination whether these things were racially motivated," said Mayor Kurt Schmoke, one of many black officials in

Baltimore. But Schmoke said he does not think racial tensions "represent a general problem in the city."

Tom Cullota, director of a community center that promotes racial tolerance said tensions continue to simmer between blacks and whites. "Things are moving in a generally positive direction in this city but I don't think there is a reduction in the number of incidents in the last ten years," he said.

#90202u0671 07/21/1990 ~United Press International

SAN ANTONIO DE BELEN, COSTA RICA (JULY 21) UPI - Salvadoran rebels and government negotiators entered the second day of peace talks Saturday amid rising tension in El Salvador over a possible guerrilla offensive.

Rebel delegation leader Schafik Jorge Handal told reporters before beginning the day's session that if no agreements can be reached on the concrete issues of the agenda, which include reforms of the armed forces, the justice system and the constitution, there will be no advancement towards a cease-fire and no incorporation of rebels into civilian life.

Government negotiators and representatives of the leftist Farabundo Marti National Liberation Front, or FMLN, began five days of talks Friday at a hotel in the town of San Antonio de Belen, about 7 miles northwest of San Jose.

Rebels have said repeatedly they are ready to launch a massive offensive if the government fails to make concessions at the talks to end the decade-long war that has taken a toll of more than 72,000 lives, mostly civilians.

In El Salvador, the army prepared for a possible large-scale rebel attack, putting the military on special alert. A military source said intelligence information indicated that the FMLN had increased the number of guerrilla fighters around San Salvador.

"The armed forces is in a state of alert for anything the rebels might do in reaction to the talks in Costa Rica," a military spokesman said. Military sources who asked not to be identified said the army had increased the number of soldiers stationed in the Salvadoran capital.

Guerrillas launched a massive offensive in November, just days after breaking off peace talks. An estimated 2,000 people died, including government troops, rebels and civilians caught in the crossfire.

A Salvadoran armed forces spokesman told United Press International the military is holding tight to its position that "the armed forces is not

negotiable ... no terrorist group is going to mess with it."

The FMLN is demanding that main branches of the military linked to human rights violations and right-wing death squads be dismantled, and that the armed forces be reduced.

On Friday, Roberto D'Aubuisson, a leading member and fouder of El Salvador's ruling Nationalist Republican Alliance, or ARENA, told reporters, "The armed forces and the constitution are non-negotiable ... the FMLN is the one that better incorporate itself (into the political process) ...."

Chief U.N. mediator at the talks Alvaro de Soto, however, voiced optimism an agreement on at least some of the issues under dispute might be resolved. "There is an amiable attitude on both sides and mutual respect that leads me to think that there could be advancement on some of the points," Soto said.

Both rebels and government negotiators said they are still hoping to reach an accord before the September cease-fire deadline established at a previous round of talks last May in Caracas, Venezuela.

#90202u0687 07/21/1990 ~United Press International

WASHINGTON (JULY 21) UPI - With Roe vs. Wade hanging by a thread at the Supreme Court, the next nominee's views on the right to abortion will be closely examined - especially among interest groups devoted to preserving or striking down the right.

Those opposing or supporting abortion rights are sure to use whatever clout they have to put pressure on President Bush and the Senate, which must approve Bush's choice.

Groups such as the National Abortion Rights Action League that played a central role in the defeat of Robert Bork's nomination in 1987 are sure to renew the fight as are anti-abortion groups, who hope the next justice will join the more conservative members of the court to overturn the landmark 1973 Roe vs. Wade that established a constitutional right to abortion.

The court has been moving in that direction since the addition of Justice Anthony Kennedy, but, with a slim, 5-4 majority, the steps are small and halting.

In 1989, the court for the first time reversed direction on abortion and gave states more rights to regulate the procedure that is done 1.5 million times a year in America. While conservatives cheered, they, along with some members of the court, were disappointed that Roe was going to be

taken apart piece by piece.

"For a year, the right to choose in this nation has hung by a thread," said Kate Michelman, executive director of NARAL. "With Justice Brennan's resignation, that thread is now unraveling. Unless there is a massive and unprecedented political mobilization, Justice Brennan's departure may be a death knell for the right to choose in America."

Michelman noted that the Republican Party has recently sought to distance itself from its anti-abortion stand as a result of losses at the polls and said "this is the time to put reality behind that rhetoric."

Molly Yard, president of the National Organization for Women, said that with "so much at stake, particularly women's rights and their very lives, NOW has no choice but to oppose, tooth and nail, any nominee who threatens to eviscerate our constitutional rights.

"To overturn Roe vs. Wade would be a national disaster, and NOW vows to mobilize the American public and convince Congress to reject any anti-abortion nominee."

National Right to Life Committee spokesman Douglas Johnson said that "Roe vs. Wade was judicial legislation at its most exteme. Any jurist who meets the president's criteria of faithfulness to the real Constitution could not vote to reaffirm Roe vs. Wade."

And if Bush doesn't realize the vise he is in, Texas Republicans for Life spelled it out. "President Bush should know that the only reason many people voted for him was for this opportunity to swing the court in a conservative pro-life manner," said David Rucker, president of TRFL. "Now, the day has come, and we strongly urge the president to find the right man or woman to complete the conservative, pro-life majority on this nation's highest court."

#90202u0707 07/21/1990 ~United Press International

WASHINGTON (JULY 21) UPI - Marilyn Tucker Quayle, wife of Vice President Dan Quayle, underwent surgery Saturday for an unspecified ailment and was recovering well, the vice president's office said.

In a statement, the vice president's spokesman, David Beckwith, said Marilyn Quayle "is recovering well following surgery this morning. Mrs. Quayle will be able to resume her full schedule in four to six weeks. Full and total recovery is expected."

Beckwith would not disclose the nature of Mrs. Quayle's illness, but the statement said a Pap test "was able to detect her disease at its earliest

stages." The Pap test is generally used to detect uterine cancer.

"Vice President and Mrs. Quayle encourage all women to have yearly Pap tests. With early diagnosis, the complete cure and total recovery are possible," the statement read.

#90202u0709 07/21/1990 ~United Press International

ASHEVILLE, NC (JULY 21) UPI - Accused "punk" serial killer Leslie Warren confessed to killing four women, including a woman in High Point, N.C., whose body was found Friday where Warren said it would be, police said.

Warren, 22, of Candler, N.C., was arrested in High Point, N.C., Friday afternoon about two hours after a national bulletin was issued for his detention.

Police began questioning him about 9 p.m. Friday about three of the homicides and "Warren confessed to these three homicides," said Alan Hyder a spokesman for the Asheville Police Department. "Warren also confessed to the murder of the woman in High Point on July 15, 1990," Hyder said.

Warren was taken Friday night to Asheville, where he was accused of killing Jayme Hurley, whose body was found Wednesday where Warren said in would be - in the trunk of a car in a snake-infested area of the Pisgah National Forest.

Hyder said Warren was charged with felony larceny in North Carolina, a fugitive charge related to a murder issued in South Carolina and the kidnapping and murder of Jayme Hurley. Another murder warrant from New York state is pending, Hyder said.

"Our police received information from Asheville and Spartanburg County (S.C.) authorities last night that Warren had confessed to a murder in High Point," Police Capt. R.B. Rankin said Saturday. "Warren stated he had murdered a woman and hidden her body in the trunk of a car on the second level of a parking deck in downtown High Point.

"He further stated he had committed the murder Sunday, July 15. High Point officers located the vehicle and subsequently located the body of a young white female, just as Warren had described," Rankin said. The body, later identifed as Jayme Hurley, was taken to the state Medical Examiner's office in Chapel Hill, N.C., for an autopsy.

"Three or more killings qualifies as a serial killer. There may very well be additional charges," Hyder said. "I can't speak for other states, but it wouldn't surprise me if there are more charges.

"Every state on the East Coast has unsolved murders and they will be trying to make a connection with Warren," Hyde said. "That's normal, especially with a guy like this and his history."

Warren was described by police as a former truck driver and construction worker who adopted the lifestyle of a new age beatnik, wearing an offbeat hairstyle and listening to acid rock music.

Warren was arrested Friday afternoon after High Point police received information about his location, Maj. Wayne Hartley said. "He was located. There was no resistance. He surrendered at the front door," Hartley said. "His hair was sorta orangish color."

"He has a punk hairstyle, long in the back and short in the front, and a goatee, both of which were recently dyed an orange-blond color," said Bill Coffee, of the Spartanburg County Sheriff's Department.

Warren is charged with killing three women: Patsy Diane Vineyard, of Sacket's Harbor, N.Y.; Velma Faye Gray, of Traveler's Rest, S.C., and Jayme Hurley of Asheville.

Hurley, 39, was reported missing May 24 by her father. On May 30, police got a tip that she was dead and the body had been dumped in the French Broad River. But the woman was not found and the search was called off five days later.

Gray, 42, was kidnapped and killed in late August 1989. Two fishermen found her body in Lake Bowen at 7:10 a.m. on Aug. 27, 1989. Her hands had been tied behind her back.

Friends and relatives offered a $3,000 reward for information about Gray's death and a search began for a truck driver who was seen near her wrecked car about the time she disappeared.

Vineyard, 20, had just moved with her soldier husband from Knoxville, Tenn., to Sacket's Harbor, N.Y. in early 1987 when she disappeared. Her husband, stationed at Fort Drum, was away from home on field maneuvers at the time and Warren, who was also a soldier at Fort Drum, was excused from the same training exercise.

"It was felt that her killer was in all likelihood an acquaintance familiar with Patsy's vulnerabilities and also aware that her husband was away on required military training exercises," New York State Police said in a statement released Friday. Authorities said the three women had been sexually assaulted.

#90202u0710 07/21/1990 ~United Press International

MONROVIA, LIBERIA (JULY 21) UPI - Besieged President Samuel Doe expelled the head of the U.S. military mission Saturday, accusing him of helping the rebels who are pressing in on Doe's fortified mansion in the capital. Advancing rebel troops fought pitched battles with government soldiers Saturday close to central Monrovia.

A government communique said Col. David Staley, head of the U.S. military mission for the past three years, had been given 24 hours to leave Liberia. The statement accused Staley of having regular contacts with the Rebel National Patriotic Front of Liberia, of using abusive language in reference to Doe and of giving the rebels military supplies.

The U.S. Embassy in Monrovia described the accusations against Staley as baseless, but Staley nevertheless left Liberia at about noon. In Washington, State Department spokesman Adam Shub confirmed the report and said Staley left the country Saturday.

"We understand the Liberian government accussed Col. David Staley of contact with the rebels, using abusive language describing President Doe and encouraging government forces to defect. Our embassy has protested to the government of Liberia," Shub said. "There is no substance to these charges."

Combat drew closer to the city center, as government troops fought the rebels in Monrovia's free port, 1 mile west of Doe's executive mansion. Reporters watching from the heights overlooking the estuary of the Mesurado River saw government tanks and troops moving into defensive positions on the Monrovia side of the two bridges which lead to the city center.

Heavy fighting could be heard throughout the morning Saturday in the Via Town area, on the far side of the bridges. There were no government troops beyond the port and the city's eastern suburbs were in rebel hands, eyewitnesses said. There were no reports of fighting to the east of the city, where the rebels have advanced to the edge of Congotown, six miles from the executive mansion.

Doe remained holed up in his beachside mansion with some 500 soldiers of his minority Krahn tribe. Many fear a massacre at the hands of the Gio and Mano tribesmen who make-up the bulk of the rebel NPFL force led by former civil servant Charles Taylor.

Fifteen government soldiers were reported summarily executed after being captured by the rebels Friday, one unconfirmed report said. Diplomatic sources said the report of executions was contrary to previous indications that Taylor's men were scrupulously observing the basic rights of Liberians.

Western reporters and photogrpahers were permitted into the presidential mansion to see Doe Saturday, but he refused to meet them. Doe has not been seen in public for the past two weeks.

Witnesses reported infiltrating rebel troops fought pitched battles Friday with government troops who remained on Bushrod Island. They said the main bridge across the Mesurado River was littered Friday with the bodies of government troops. Shipping sources said two Liberian Coast Guard cutters were sunk in the port by gunfire during the battle for the area.

The rebels, estimated have between 4,000-5,000 fighters, launched a full-scale assault on Thursday after laying siege to the capital for more than two weeks.

During that time, rebel and government delegations have met in neighboring Sierra Leone for last-ditch talks aimed at ending the six-month-old civil war. But the discussions in Freetown broke down Friday, with the rebel delegation leaving Sierra Leone saying further discussions were pointless.

In Monrovia, hundreds of residents gathered at the gates of the American Embassy hoping to gain refuge, while scores of others broke into a U.S. Marine compound demanding food and shelter. In the downtown area, every shop and office was closed.

#90202u0714 07/21/1990 ~United Press International

HARTFORD, CT (JULY 21) UPI - Rep. John Rowland, R-Conn., won his party's nomination for governor Saturday in his quest to become the state's youngest chief executive.

Delegates to the GOP state convention unanimously bestowed the nomination on Rowland, who outlasted three challengers to become the lone Republican candidate.

Rowland is seeking to become the first Republican elected governor since 1970. At age 33, he is the youngest candidate for the office, party officials said.

The three-term congressman faces former Republican Sen. Lowell P. Weicker Jr., who is running as an independent and leads in the polls over Rowland and the two Democrats vying for their party's nomination.

Rep. Bruce Morrison was endorsed for the Democratic nomination last weekend, but faces a September primary with state Rep. William Cibes Jr. of New London.

Democratic Gov. William O'Neill earlier this year dropped a bid for a

third term, facing the lowest poll ratings of his nearly ten years as governor following last year's record tax increases.

Rowland emerged the lone GOP candidate in a field that had included state Senate minority leader Reginald Smith, developer Joel Schiavone and banker Joseph McGee.

#90202u0750 07/21/1990 ~United Press International

LOS ANGELES (JULY 22) UPI - A man facing prosecution for sending harassing letters to a young television actor died from drinking a quart of the notorious pesticide malathion, sheriff's investigators said Saturday.

Mark Budman, 28, of Carson, died at Harbor General Medical Center about 3:25 p.m. Thursday, eleven days after he was hospitalized after drinking about a quart of malathion, sheriff's homicide detective Dorel Riggs said.

Sheriff's Deputy Jack Smith said said hospital officials told investigators Budman was also under treatment for AIDS.

At the time of his death, Budman reportedly was facing two misdemeanor counts of harassment stemming from letters he wrote to Danny Pintauro, the pre-teen star of the television sitcom, ''Who's The Boss?''

Smith said investigators are treating Budman's death as a suicide.

He said hospital officials notified the sheriff's department of the death for the first time on Friday and that homicide investigators were just beginning to unravel the circumstances surrounding the bizarre suicide.

Malathion, a widely used poison used on a variety of agricultural pests, has become the bane of many Southern California communities where it has been mixed with a bait mixture and sprayed from helicopters to combat the crop-destroying Mediterranean fruit fly.

#90202u1087 07/21/1990 ~United Press International

EAST BERLIN (JULY 22) UPI - Hundreds of thousands of rock fans watched the Cold War's most notorious symbol tumble again Saturday, this time knocked over in an outdoor performance of Pink Floyd's epic musical, ''The Wall.''

About 200,000 people gathered on the Potsdamer Platz to see the crashing of the 53-foot-tall Styrofoam replica of the Berlin Wall at the concert's peak, recalling the breach of the actual structure Nov. 9, 1989.

Organizers said before the show they expected a record of more than 1 billion people worldwide to watch on television.

The performance by former members of the '70s band, accompanied by pop stars Cyndi Lauper, Sinead O'Connor, Bryan Adams and others, took place outdoors in in the massive square that was a no man's land before the wall came down.

The huge stage held a 504-foot-long wall made up of 3,000 Styrofoam bricks which were illuminated by hundreds of spotlights from the stage and three helicopters.

In the show's climax, a giant plastic pig broke through the wall when Pink Floyd lead singer Roger Waters cried out the key line: ''Is there anybody out there?''

Waters said he started to look at locations for the show a day after the wall first started to be taken down last year, following pro-democracy demonstrations and the exodus of 110,000 East German refugees to West Germany.

''I knew then I wanted to do this show in Berlin,'' Waters told German radio.

He chose the Potsdamer Platz, which was once the lively center of old Berlin, but after World War II became a deserted death strip patrolled by East German border guards.

The wall - originally a barbed-wire barricade - was set up literally overnight, Aug. 12-13, 1961, as East Germany's communist leaders tried to stem the flow of thousands of skilled East German workers to the West. It was later reinforced with concrete.

Months later, it became the focal point of the first great nuclear confrontation between President Kennedy and Soviet leader Nikita Khrushchev.

Thousands of people in spectacular escapes defied the concrete, barbed wire, guards and automatic machine guns during the wall's 28-year history.

(JULY 22) UPI - DIGEST:

Auto racing

Jimmy Horton Jr. won a record fifth super speedway ARCA Super Car series

stock car race by taking the checkered flag in the AC Spark Plug 150 in Long Pond, Pa. Horton took the lead for good on lap 48 of the 60-lap race at Pocono International Speedway. When rain started on the 2.5-mile tri-oval five laps from the end, Horton rode his Pontiac Grand Prix to victory under a caution flag. Horton, of Hammonton, N.J., won $10,025 for running the 150 miles at an average speed of 103.349 mph.

Basketball

Andre Turner of the World Basketball League Memphis Rockets has been suspended for two games and fined $1,000 for an incident in the Memphis at Saskatchewan game, July 17, 1990. Turner did not leave the court immediately after being ejected and bumped referee Ken Falkner. Falkner was also suspended for one game and fined $500 for retaliating physically after Turner bumped him.

Hockey

The Pittsburgh Penguins announced the hiring of scout Pierre McGuire. McGuire had been an assistant coach and chief recruiter at St. Lawrence University for two years.

Motorcycle racing

Doug Chandler rode a Kawasaki to victory in the inaugural Camel Motorcycle Grand Prix of Miami after the race was shortened due to a technical glitch. The victory was Chandler's third straight this year and boosted his lead in the National Superbike championship standings to 89-66 over Randy Renfrow of Fredericksburg, Va., who finished third aboard a Honda. Chandler, of Salinas, Calif., led during all 31 laps around the 1.51-mile temporary circuit through downtown Miami. The event, which had been scheduled to last 40 laps, was halted due to a breakdown in communication with workers around the 11-turn course.

Soccer

English soccer club Aston Villa shocked the local soccer establishment by naming former Czechoslovak national team coach Jozef Venglos as new manager. Venglos succeeds Graham Taylor, who left to replace Bobby Robson as England manager. Venglos, 54, led the Czechoslovaks to the quarterfinal stage in the 1990 World Cup for the first time since 1962.

Tennis

Hong Kong took a 2-1 lead over Thailand in the Davis Cup Asia-Oceania Zone Group 2 final in Bangkok with a convincing doubles victory. Hong Kong's doubles team of Mark Bailey and Colin Grant dominated the Thai team of Panomkorn Pladcheurnil and Vittaya Samrej 7-5, 6-3, 6-0. Hong Kong needs

to win only one of Sunday' s reverse singles matches to triumph in the Group 2 of the Asia-Oceania Zone.

SAN ANTONIO DE BELEN, Costa Rica (JULY 22) UPI - Salvadoran rebels and government officials discussed reform of the armed forces in a second day of peace talks Saturday, but any agreement ''still might take awhile,'' the chief U.N. mediator said.

''Today we have discussed - we have almost entirely concentrated on - the subject of the armed forces,'' Alvaro de Soto, the chief U.N. mediator, told reporters after leaving the four-hour morning session.

Soto said the positions of both sides were clearly laid out during the morning's talks and there appeared to be room for negotiation.

''We are working towards an agreement,'' he said. ''What I am trying to say is that we have nothing until we have signed an accord and that still might take awhile.''

Rebel delegation leader Schafik Jorge Handal told reporters before beginning the day's session that if no agreements can be reached on the concrete issues of the agenda, which include reforms of the armed forces, the justice system and the constitution, there will be no advancement towards a cease-fire and no incorporation of rebels into civilian life.

Government negotiators and representatives of the leftist Farabundo Marti National Liberation Front, or FMLN, began five days of talks Friday at a hotel in the town of San Antonio de Belen, about 7 miles northwest of San Jose.

Rebels have said repeatedly they are ready to launch a massive offensive if the government fails to make concessions at the talks to end the decadelong war that has taken a toll of more than 72,000 lives, mostly civilians.

In El Salvador, the army prepared for a possible large-scale rebel attack, putting the military on special alert.

A military source said intelligence information indicated that the FMLN had increased the number of guerrilla fighters around San Salvador.

''The armed forces is in a state of alert for anything the rebels might do in reaction to the talks in Costa Rica,'' a military spokesman said.

Military sources who asked not to be identified said the army had

increased the number of soldiers stationed in the Salvadoran capital.

Guerrillas launched a massive offensive in November, just days after breaking off peace talks. An estimated 2,000 people died, including government troops, rebels and civilians caught in the crossfire.

A Salvadoran armed forces spokesman told United Press International the military is holding tight to its position that ''the armed forces is not negotiable ... no terrorist group is going to mess with it.''

The FMLN is demanding that main branches of the military linked to human rights violations and right-wing death squads be dismantled, and that the armed forces be reduced.

On Friday, Roberto D'Aubuisson, a leading member and founder of El Salvador's ruling Nationalist Republican Alliance, or ARENA, told reporters, ''The armed forces and the constitution are non-negotiable ... the FMLN is the one that better incorporate itself (into the political process) ....''

Chief U.N. mediator at the talks Alvaro de Soto, however, voiced optimism an agreement on at least some of the issues under dispute might be resolved.

''There is an amiable attitude on both sides and mutual respect that leads me to think that there could be advancement on some of the points,'' Soto said.

Both rebels and government negotiators said they are still hoping to reach an accord before the September cease-fire deadline established at a previous round of talks last May in Caracas, Venezuela.

DETROIT (JULY 21) UPI - A lock of George Washington's hair went for $2,750 while a lithograph of the late John Lennon was sold for nearly twice that - $5,000 - in an auction Saturday of celebrity and historical memorabilia.

The highest price in the auction at DuMouchelles art gallery was $9,300, paid for Babe Ruth's 700th home run baseball.

Jack Nicholson's silk boxer shorts and a collection of letters written by convicted murderers including Charles Manson and John Gacy went for a relatively paltry $700.

The auction drew bidders from as far away as California.

The items came from the collection of a Detroit-area resident whose name was not disclosed by DuMouchelles.

#90202u1552 07/21/1990 ~United Press International
CAPE CANAVERAL, FL (JULY 22) UPI - The launch of an Atlas-Centaur rocket was rescheduled for Sunday afternoon after technicians fixed a helium leak in one of the commercially built rocket's stages.

The rocket was grounded Friday by the leak, which appeared to be keeping steering rocket fuel too cool.

With the leaking shuttle Atlantis sitting grounded just a few miles away, cautious space agency managers were taking no chances.

The rocket is slated to carry a $189-million science satellite into orbit.

A NASA spokesman said the leak, which was traced to a loose helium vent duct, was repaired earlier Friday evening. As a precaution, each of the rocket's four helium vent ducts was replaced, the spokesman said.

Officials from General Dynamics Corp. of San Diego, Calif., which built the rocket, decided to proceed with a second launch try at 3:28 p.m. EDT Sunday.

Countdown for the launch will begin about 4:30 a.m. Sunday. NASA said there was a 30 percent chance that unfavorable weather would interfere with the blastoff.

The $64-million Atlas rocket, and the Combined Release and Radiation Effects Satellite, or CRRES, had been scheduled for liftoff from launch pad 36B at 4:49 p.m. EDT Friday, one hour and 16 minutes late because of problems with ground equipment.

But less than an hour before liftoff, NASA launch director James Womack ordered the flight ''scrubbed'' for the day because of a liquid helium leak that kept second-stage steering rocket fuel too cool for safe use.

NASA was not responsible for launch processing under the terms of a commercial launch contract with rocket builder General Dynamics.

But given a storm of negative publicity in recent weeks because of problems with the Hubble Space Telescope and fuel leaks grounding the space shuttle, a successful launch is considered crucial to the National Aeronautics and Space Administration.

When it finally gets into space, CRRES will make a series of chemical releases that program manager Richard Howard said should be ''very visible'' to observers in the United States, creating celestial displays that bear ''an uncanny resemblance'' to the aurora borealis, or northern lights.

The boxy, solar-powered satellite also carries Department of Defense experiments to study the effects of space radiation on microelectronics, research expected to help engineers design satellite equipment that is better able to withstand the rigors of space.

The primary goal of the flight is to improve knowledge of how Earth's magnetic field, the supersonic solar wind and the planet's atmosphere, interact to extract energy from the sun.

The effects are easily seen. When a cloud of energetic particles from a solar flare smashes into the invisible bubble of Earth's magnetic field, for example, a ''geomagnetic storm'' can occur, disrupting communications and causing problems for electrically sensitive satellites.

''The results of these investigations will greatly expands man's knowledge of the space environment and permit future government and commercial satellites to be more efficient, reliable and economical,'' said Air Force

Col. John Armstrong.

CRRES, a 3,732-pound satellite built by Ball Aerospace Systems Group of Denver, is equipped with 24 canisters containing barium and lithium. For each experiment, one or two canisters will be ejected into space and detonated about 25 minutes later, after the satellite is a safe distance away.

High-energy ultraviolet light from the sun then will ionize the released chemicals, changing the number of negatively charged electrons in a given atom to give the gas an electrical charge.

The resulting ''plasma'' clouds, initially 60 miles or so in diameter, then will stretch out along Earth's magnetic field lines much like iron filings will line up around a bar magnet to make its force field visible.

In a sense, CRRES will ''paint'' Earth's magnetic field with bright clouds of chemicals, simulating naturally occurring processes like those involving the solar wind.

#90203d7430 07/22/1990 ~French/German News Agency

CAIRO (JULY 22) - President Hosni Mubarak held talks here Sunday with Iraqi Foreign Minister Tareq Aziz on settling Iraq's dispute with Kuwait as Baghdad continued to denounce its oil-rich Gulf neighbour.

Mr. Aziz, speaking to reporters after the meeting, said he had handed a letter to Mr. Mubarak from President Saddam Hussein that expressed Iraq's "point of view" on the dispute and also covered bilateral relations.

Asked about Iraq's criticism of Kuwait and the United Arab Emirates (UAE), Mr. Aziz said "they are the ones threatening us. We are threatening nobody." Baghdad has accused Kuwait, with which it has a longstanding border dispute, of encroaching on its territory, stealing 2.4 billion dollars worth of its oil, and joining the UAE in deliberately flooding the oil market to undermine Iraq.

Kuwait and the UAE have both denied the charges, first made last Monday in a memorandum to the Arab League. Kuwait in turn accused Iraq of pumping oil from Kuwaiti wells and called on the League to define the two countries' borders.

Mr. Aziz underlined the "brotherly" relations between Iraq and Egypt and played down recent Egyptian press criticism of Baghdad for allegedly backing remarks by PLO leader Yasser Arafat seen as critical of Egypt.

Mr. Arafat was reported to have told an Arab League meeting in Tunis last

week that Egypt supported conditions set by Washington for the resumption of its dialogue with the Palestine Liberation Organisation, which was broken off last month.

Amid continuing diplomatic efforts to defuse the Iraq-Kuwait dispute, Mr. Aziz was to travel on to Jordan later in the day for a meeting with King Hussein, according to authoritative sources in Amman.

King Hussein was himself expected in the Egyptian port of Alexandria Monday for talks with Mr. Mubarak after receiving a letter from the Kuwaiti emir, Sheikh Jaber al-Ahmad al-Sabah.

Jordan, Egypt and Iraq are grouped with Yemen in the Arab Cooperation Council.

Mr. Mubarak earlier Sunday urged a "sincere dialogue to solve inter-Arab differences", in a speech marking the 38th anniversary of Egypt's revolution, saying the Iraq-Kuwait dispute was a "cloud that must dissipate."

He said he was convinced that President Hussein could resolve his differences with Kuwait and the UAE with "objectivity and wisdom." more

JOHANNESBURG (JULY 22) - A white South African Defence Force (SADF) soldier allegedly raped a black girl and fired blindly into a crowd of villagers who rushed to defend her, the City Press newspaper reported here Sunday.

The soldier was then attacked and assaulted by angry villagers in Schoemansdal about 400 kilometres (250 miles) east of here near the South African border with Swaziland.

The soldier, who was not named, and a villager who sustained bullet wounds to his groin were both taken to hospital where the soldier was recovering under police guard, City Press reported.

The incident happened when the alleged rape victim and her brother entered South Africa illegally from Swaziland earlier this month and was caught by the soldier who demanded money, the newspaper said.

SADF spokeswoman Hanneke van der Merwe confirmed to City Press that a soldier had been injured earlier this month and said the matter was under investigation by South African police and the SADF.

SIDON, Lebanon (JULY 22) - Beleagured civilians streamed out of embattled areas of southern Lebanon Sunday to escape inter-Shiite fighting that has defied PLO intervention and left 76 people dead in the last week, correspondents said.

The Fatah movement of the Palestine Liberation Organization (PLO) re-enforced positions around the disputed village of Jarjouh east of here, where the pro-Iranian Hezbollah and the Syrian-backed Amal movement are locked in bitter combat.

Fundamentalist Hezbollah forces last Monday seized much of the town, which is an Amal stronghold in the hilly Iqlim al Touffah region. Pro-Syrian combatants re-captured part of the community early Saturday but lost ground later in the day after a major counter-thrust by Hezbollah.

"Direct attacks will now be difficult in the region," said PLO commander Anwar Madi after PLO positions were strengthend Sunday. "But artillery duels are still possible."

Amal and Hezbollah gunners traded sporadic artillery fire in the Iqlim al Touffah region Sunday as dozens of families fled villages that have been left without water -- in sweltering summer heat -- because of the fighting.

Security sources reported that Hezbollah positions for the second day had come under shelling from Israeli forces deployed in their "security zone" further south along the Israeli-Lebanese border.

The latest flare-up in the long-running Amal-Hezbollah struggle for dominance in the Lebanese Shiite community began Monday. The clashes have so far left 76 people dead, combatants for the most part, and 208 wounded according to a provisional hospital toll.

HAMBURG (JULY 22) - A heatwave sweeping across western Europe has brought forest fires, water rationing and a large number of cases of people suffering high blood pressure.

Temperatures in southern England climbed to 42 degrees Celcius. Judges in Wales have been allowed to take off their wigs and robes in court.

Employees at London zoo sprayed animals with water and tapirs were treated with sun oil. Workers at British breweries worked overtime to keep up with the rise in beer consumption.

In France, water authorities ordered rationing in many regions and banned sprinkling and car washing.

Temperatures in southern France also reached the 40s. A modernised control system helped stop several forest fires shortly after they had broken out.

Saint Lazarre station in Paris came to a standstill when complex switching gear failed owing to high temperatures.

In southern Italy and on Sardinia several forest fires broke out, while Spain also experienced temperatures in the 40s and at least 16 forest fires. In Gent, Belgium, pollution and heat led to a dangerous rise in the Ozone level.

ISLAMABAD (JULY 22) - Libyan envoy Mohammad Ahmad Ali Sharif arrived here Sunday to deliver a message from Libyan leader Colonel Moamar Kadhafi to Pakistan Prime Minister Benazir Bhutto.

Diplomatic sources said the message expresses Libyan concern over the current tension between India and Pakistan on the Kashmir issue.

The emissary, who is also the secretary of the World Islamic Call Society in Libya, earlier delivered a similar message to Indian Prime Minister Vishwanath Pratap Singh in New Delhi, the sources said.

Mr. Sharif is heading a four-member delegation.

#90203d8160 07/22/1990 ~French/German News Agency

SPA-FRANCORCHAMPS, Belgium (JULY 22) - Belgian driver Guy Renard was killed at the Spa 24 Hours race here on Sunday when his Toyota burst into flames after a high-speed crash.

Renard, 27, from the nearby town of Malmedy, was coming off a straight when his car span and careered into a barrier before rebounding back on to the track where two other cars ploughed into it and the Toyota caught fire.

The two other drivers escaped unhurt.

The race was halted for two hours and Toyota withdrew their remaining cars when it was restarted "as a mark of respect for the driver and his family.

MARSEILLES, France (JULY 22) - The head of security at the French embassy in Beirut has been charged with two other policemen in connection with an arms trafficking network between Lebanon and France,

The three men are suspected of smuggling arms from Lebanon to southern France, where they are believed to have been sold to organised criminal gangs.

Jean-Claude Labourdette, 48, head of security at the French embassy in Beirut and Patrick Jacquin, 28, and Jean-Noel Lebat, 30, both brought here from the French embassy in Washington, were indicted by a magistrate here Saturday.

They faced charges including breaking arms laws and acquiring and possessing arms and amunition, according to judicial sources.

A fourth policeman, Maurice Onno, was to be moved later Sunday from Paris to Marseilles for indictment, the same sources said.

Mr. Onno, 49, a weapons instructor at the police training centre in Vincennes east of Paris, is suspected of having gone to Mr. Labourdette's home in Etiolles, near Paris, to "clean up" before a police search, which nevertheless uncovered three rocket-launchers.

Five others were expected to be charged in connection with the affair, which is being investigated by both the French foreign and interior ministries.

Some 10 policemen serving in French embassies are also under investigation in connection with the gun-running racket.

A judge will Monday hear legal argument on the continued detention of the three men indicted Saturday.

The prosecutor has asked for Joel Buono and Max Riviera, two municipal workers employed at Bandol, in the Var department of the South of France, and Pascal Courdesses, to be charged with buying, selling and possessing offensive weapons.

Charges are also expected to be brought against two gun collectors.

Police trade unions have claimed that the racket could not have gone undetected for several years, as it apparently did, without "passive compliance of important figures" in diplomatic circles.

A French foreign ministry spokesman has said however that there was so far nothing to suggest that any French diplomat was implicated in any way.

#90203d9220 07/22/1990 ~French/German News Agency
PARIS (JULY 22) - American jazz pianist Joe Turner, who played with Louis Armstrong and Benny Carter, died Saturday after suffering a heart attack. He was 82.

Mr. Turner died in the Montreuil Hospital, near Paris, where he had been admitted on Wednesday.

Since 1962, Mr. Turner had been a fixture at La Calavados nightclub on the Champs-Elysees in Paris, where from evening until dawn he played and sang, often while chewing on a large cigar.

Born on November 3, 1907 in Baltimore, Maryland, Mr. Turner won his first piano competition at age 16, and two years later left to make a career in New York City.

In 1928, he was hired by saxophonist Benny Carter to join his orchestra, and in 1930 he joined trumpet legend Louis Armstrong. During the Depression, Mr. Turner was a regular in nightclubs in New York's black Harlem district.

During World War II, Mr. Turner became friends with Errol Garner, who would himself become a major figure among jazz pianists, and throughout the war years he played for the U.S. Army orchestra.

After the war, Mr. Turner joined horn player Rex Stewart's band before moving to Europe where he performed mainly in France and Switzerland. He moved to Paris in 1962.

Mr. Turner was the last surviving jazz pianist of the "stride" style, emphasising the use of the left hand. Others in the "stride" tradition were James P. Johnson, Fats Waller, Art Tatum and Willie Smith the Lion.

Among Mr. Turner's recordings are Joe Turner Trio, with bassist Slam Stewart and drummer Jo Jones, Stride by Stride, and Smashing Thirds.

#90203d9310 07/22/1990 ~French/German News Agency
JOHANNESBURG (JULY 22) - Scores of guerrilla fighters of the African National Congress (ANC) have been arrested by the South African authorities according to press reports here, partly confirmed Sunday by police and the ANC.

The Sunday Times and the Sunday Star said, quoting security sources, that

the guerrillas had been infiltrating their way into the country through neighbouring Swaziland in connection with an alleged plan for insurrection.

Reacting to the reports, a top ANC leader, Walter Sisulu, said however that such infiltration was not new, while confirming that "significant arrests" of ANC people had taken place over the last few weeks.

Mr. Sisulu said "people have always been infiltrating here since we (the ANC) launched our armed struggle in the sixties".

He said: "I am aware that there had been significant arrests over the past few weeks. I understand that two senior people have been arrested.".

Mr. Sisulu said he believed the name of one of the arrested members of the ANC military wing Umkonto We Sizwe was Sipho Nyanda.

The press reports said that South African police had arrested about 40 members of Umkhonto We Sizwe who had infiltrated into South Africa through neighbouring Swaziland and established secret hideouts.

Police spokesman Mike Lombard confirmed Sunday that "a certain number of people" had been arrested and that police were busy with an "intensive nationwide investigation".

They expected to make more arrests, he said.

Police also recovered a large quantity of arms, including mines, assault rifles and a rocket launcher, the reports said, but Maj. Lombard refused "to comment on speculation", saying it would prejudice the investigation.

Mr. Sisulu described the arrests as "unwelcome", but he said they would not hamper talks scheduled for August 6 between the ANC and the white-minority government aimed at reaching a peaceful political settlement in South Africa.

"The issue will obviously be raised when we go to the table on August 6. We intend meeting on that date. It will give both parties a chance to iron out issues such as these," Mr. Sisulu said.

According to the press reports, police sources have indicated that those held were linked to the South African Communist Party (SACP), which has long had considerable influence over the ANC leadership.

News of the crackdown came amid increasing "war talk" from hardliners within the ANC, such as its armed wing leader Chris Hani, and the allied militant South African Youth Congress (SAYCO) president Peter Mokaba.

On Wednesday, Mr. Hani told students at the University of Transkei that

blacks may have to seize power. "The struggle still goes on. We are deploying our cadres inside South Africa and that's no secret," he said.

The speech earned him a rebuke from President Frederik de Klerk, who said it ran counter to an agreement the government and the ANC reached at their historic first talks in Cape Town on May 2-4 expressing a "common commitment towards the resolution of the existing climate of violence".

On Saturday, Mr. Mokaba told a rally at the eastern Cape town of Cradock that the government had only one option -- to negotiate or "die".

"Our patience is not endless. We depend on action for power", Mr. Mokaba warned.

A number of ANC guerrillas meanwhile paraded Sunday with AK-47 assault rifles at rallies in Transkei, one of four nominally independent black tribal homelands and the birthplace of ANC deputy president Nelson Mandela the South African Press Association reported without giving further details.

Transkei military ruler Major General Bantu Holomisa has repeatedly voiced support for Mr. Mandela and the ANC, which is encouraged to operate openly in that homeland.

Mr. Mandela for his part told the Sunday Times that the ANC had made it clear it would only consider suspension of its 29-year-old armed struggle once the government removes obstacles to negotiations.

#90203d9440 07/22/1990 ~French/German News Agency

THE HAGUE (JULY 22) - The Dutch government has decided to offer cash incentives to companies that purchase trucks and cars that emit less exhaust and make less noise.

Environment Minister Hans Alders said Sunday the government would offer the grants, from 1,400 florins to 6,500 florins (760 to 3,514 dollars), starting next month.

Mr. Alders said in a radio interview tha the move is in anticipation of European regulations on vehicle exhaust and noise levels expected to be introduced within a few years.

When European regulations come into force, the Dutch anti-exhaust and anti-noise incentives will be discontinued, he said.

Mr. Alders said his government had allocated 40 million florins for the programme this year and 90 million florins for subsequent years.

The money is being raised through an indirect tax on diesel fuel that came into effect this year, he said.

ALGIERS (JULY 22) - The third summit of the Maghreb Arab Union, which groups Algeria, Libya, Mauritania, Morocco and Tunisia, opened near here late Sunday.

The summit had been scheduled to open Sunday morning at the residence of Algerian President Chadli Bendjedid in Zeralda, near Algiers, but was delayed by the late arrival of King Hassan II of Morocco.

Libyan leader Moamar Kadhafi, Tunisian President Zine el-Abidine Ben Ali and Mauritanian leader Maouya Ould Sid'Ahmed Taya arrived here on Saturday and held talks on Sunday with Mr. Chadli.

The leaders are in particular expected to discuss the continuing independence war in the Western Sahara territory, which is claimed by Morocco, plus their relations with the European Economic Community (EEC) and plans to set up a permanent headquarters for the union.

Foreign ministers of the Arab Maghreb Union held talks Friday to lay the groundwork for the summit of the alliance, which was set up in February last year.

Draft agreements have also been drawn up on such subjects as investment, the movement of people and capital within union countries, a joint airline common identity documents, and and a high-speed train link between the five capitals.

The impact of the local election victory in Algeria of the fundamentalist Islamic Salvation Front, while not on the official agenda, is also expected to be raised.

-30- 1565
#90203u0027 07/22/1990 ~United Press International
SEATTLE (JULY 22) UPI - Former President Ronald Reagan presided Saturday over opening ceremonies of the second Goodwill Games, calling for the brotherhood that symbolizes this event to be the ''guiding light of our lives.''

Reagan spoke on a warm, clear evening before a near-capacity crowd of 72,000 at Husky Stadium and an international television audience. He said global changes like those in Eastern Europe must continue, and events like the Goodwill Games can play a leading role in meeting that goal.

''Freedom is on the march around the world and it cannot be stopped,'' Reagan said.

''I've often wondered if there isn't a way that somehow we could capture that spirit of togetherness, and yes, brotherhood, and have it be the guiding light of our lives after these Goodwill Games. Wouldn't that be something?''

Athletes from all 51 competing nations paraded around the stadium track and were introduced as one group instead of separate teams.

Olympic star Carl Lewis took the athletes' oath for all Goodwill competitors.

The theme of peace and renewed Soviet-American relations dominated the two-hour ceremony at Husky Stadium. A white dove with an olive branch was stenciled into the upper-deck seats.

A ''talking stick'' created by Indians and Eskimos from both sides of the Bering Strait contained written messages from President Bush and Soviet President Mikhail Gorbachev. The stick also featured a carved eagle and bear.

Soviet and American fighter planes flew together for the first time, zooming over the stadium. A pair of Soviet and American skydivers landed on the Husky football field.

Seattle native jazz saxophonist Kenny G, Grammy Award-winning country singer Reba McEntire, the Soviet rock group Gorky Park and the British group The Moody Blues were among the entertainers.

Dr. Armand Hammer, whose relations with the Soviet Union date to the 1920s was honored at the beginning of the ceremonies. The philanthropist said he has hopes of celebrating his 100th birthday at the fourth Goodwill

Games.

''You see, I have a pacemaker, and it's guaranteed for eight years,'' said Hammer, 92. ''After that, I'll get a new battery.''

-30- 2381

#90203u0062 07/22/1990 ~United Press International

ROANOKE, TX (JULY 22) UPI - For some people, Saturday's auction of Nelson Bunker Hunt's personal possessions was a time to reminisce; for others, it was a vivid lesson to remember; and for others still, it was just business.

''I've grown up my entire life hearing about the Hunts and they've just been larger than life,'' said Pam Brier of Dallas, just one of about 1,000 people who came to the Circle T Ranch north of Fort Worth to watch and perhaps bid on the almost 600 items which once belonged to one of the world's richest men.

Hunt, who along with his brother, William Herbert, lost his fortune in silver speculation, has been auctioning off his assets to help pay a debt of more than $1 billion in one of the largest personal bankruptcies in history. Hunt's main creditor, the Internal Revenue Service, is scheduled to get about 80 percent of Saturday's proceeds.

Organizers expected the auction to take in $200,000, but soon after it ended made a preliminary estimate of the proceeds of about $450,000.

''It's unbelievable the way this thing has taken off,'' said a delighted Carter Pate, the trustee charged with getting the highest price possible for such items as kitchenware, furniture and artworks, including a bronze bust of Hunt. ''It's just gotten a little crazy. A $20 dime-store teapot sold for $150, and the crowd just went crazy.''

Among the top sellers were a Persian rug that sold for $9,000, a Chippendale chest that garnered $8,500 and a bronze panther that went for $4,000.

One of the more popular items auctioned Saturday was a 4-foot-high cowhide-covered oak rocking chair, with ''N.B. Hunt'' burned into the headrest, which bought by Mike McCauley of Dallas for $3,000.

''I want to get it in my office,'' said McCauley, ''to remind me that no matter how big you get and how high you rise you can always fall.''

''I would say we are getting maybe a 20 to 30 percent appreciation (increase in what the items sell for) because of who they belonged to,'' said Pate.

Hunt ''was a thoroughbred (horse) enthusiast and an animal enthusiast, so we have a lot of paintings of animals,'' said auction official Danny Smith. ''His wife was a large collector of porcelains and so forth. So we have a lot of ... very collectable pieces.''

Members and friends of the Hunt family attended the auction, hoping to help the clan retain some of the possessions.

''This is really unpleasant,'' said Hunt's son, Houston.

The Hunt brothers have planned several auctions of their belongings to help pay their debts. They auctioned their coin and antique collection at Sotheby's in New York last month and a dispute almost immediately arose about how much of the proceeds the Hunts should get for promoting the sale.

(JULY 22) UPI - When Baltimore pitcher Tom Phoebus threw a complete game shutout in his first major league start Sept. 15, 1966, rookie Ben McDonald hadn't seen the light of day.

The 22-year-old McDonald became the first Oriole in 24 years to repeat Phoebus's feat Saturday night when he pitched Baltimore to a 2-0 blanking of the Chicago White Sox.

''I'm glad it finally happened,'' said McDonald, 1-0, who waited two years for his initial start. ''I'm looking forward to another one, but I didn't think it would be this great. I didn't expect this.''

McDonald retired the last 16 batters, allowed four hits, walked one and struck out five in also becoming the youngest Oriole to throw a shutout since 21-year-old Storm Davis beat Boston on June 10, 1983.

McDonald, who received the highest rating ever by Major League Scouting, was the No. 1 pick in the 1989 June draft from Louisiana State University.

''He came from an outstanding program where he was in the spotlight,'' Baltimore manager Frank Robinson said. ''He was the nation's number one pick. He's had the spotlight on him for a few years. I didn't know what to expect, but I had no limitations on him.''

Bill Ripken and Joe Orsulak drove in Baltimore's two runs off Jack McDowell, 5-5, who struck out a career-high 10 batters.

In the second, Tim Hulett walked and went to third base on Bob Melvin's single. Ripken then singled to center, scoring Hulett and sending Melvin to third.

After Ripken was picked off and Phil Bradley drew a two-out walk, Orsulak doubled down the right field line to make it 2-0.

It was Baltimore's third straight win over Chicago, which has scored only three runs so far in the four-game series to be completed Sunday.

''He threw everything for strikes and was pumped up,'' said Chicago catcher Ron Karkovice. ''We tried to pick it up, but he didn't let us.''

McDonald entered the ninth inning to a rousing ovation from the Baltimore crowd.

''When the fans gave me that ovation when I took the mound in the ninth inning, it was like walking on air,'' McDonald said.

--- AROUND THE AL ---

In other American League action, Toronto edged Oakland 2-1, Minnesota nipped New York 2-1, Kansas City defeated Boston 4-2, Milwaukee pounded Seattle 10-3, Detroit pummeled Texas 8-1, and California beat Cleveland 5-2.

Blue Jays 2, Athletics 1

At Oakland, Dave Stieb held Oakland to five hits over eight innings and George Bell and Pat Borders added solo homers to lift Toronto. Stieb, 12-4 struck out two and walked two before giving way to Tom Henke in the ninth. Henke picked up his 19th save. Scott Sanderson, 11-6, took the loss.

Twins 2, Yankees 1

At Minneapolis, Mark Guthrie pitched four-hit ball over 7 2-3 innings and Rick Aguilera notched a save to guide Minnesota. Guthrie, 3-2, walked one and struck out six in his first career appearance against the Yankees. Aguilera came on to retire four straight for his 23rd save. Jeff Robinson, 2-6, took the loss, giving up seven hits in his first complete game.

Royals 4, Red Sox 2

At Kansas City, Mo., Mike Macfarlane knocked in the go-ahead runs with an eighth-inning double to pace Kansas. Steve Farr, whose 7-4 record marks the team high in victories, retired all four of the Red Sox he faced in relief of Pete Filson for the victory. Jeff Montgomery pitched the ninth for his 12th save. Boston starter Wes Gardner allowed eight hits over 6

1-3 innings.

Brewers 10, Mariners 3

At Milwaukee, Greg Vaughn hit two home runs, added an RBI double and drove in a career-high six runs to lead Milwaukee. Ron Robinson, 4-1, scattered seven hits over five innings. Randy Veres worked 2 1-3 innings for his first major league save. Erik Hanson, 10-8, allowed seven runs and eight hits in 5 1-3 innings.

Tigers 8, Rangers 1

At Arlington, Texas, Dan Petry and Paul Gibson combined on a two-hitter and Cecil Fielder and Gary Ward hit three-run homers to guide Detroit. Petry, 7-6, allowed two hits, walked two and struck out three over eight innings. Petry is 8-1 in his last nine decisions against Texas. Fielder blasted his homer off Texas starter and loser Mike Jeffcoat, 3-5, his fourth of the season.

Angels 5, Indians 2

At Anaheim, Calif., Chuck Finley tossed a seven-hitter while Max Venable and Jack Howell hit solo home runs to help California hand Cleveland its fourth straight loss. Finley, 13-4, struck out eight and walked one in out-pitching Indian rookie Mike Walker, 0-1. Walker, making his first start of the season, allowed just three hits and three walks in 5 1-3 innings.

TAIPEI, Taiwan (JULY 22) UPI - Taiwan suspended diplomatic relations with Saudi Arabia Sunday after the oil-rich kingdom announced it had established ties with China, a statement from the Taiwan Foreign Ministry said.

''In view of the kingdom's disregard of the traditional friendship between our two peoples and its yielding to the Chinese communists' disruption of the long-standing close ties between our two countries, the government of the Republic of China has instructed its embassy in Riyadh to lodge the strongest protest against the kingdom for the decision and has also

decided to suspend its diplomatic relations with the kingdom,'' the statement said.

Taiwan calls itself ''The Republic of China'', and both Taipei and Beijing claim to be the sole legitimate government of China.

Saudi Arabia had maintained close ties with staunchly anti-communist Taiwan for 44 years and last week sent H. E. Abdulaziz Al Zamil, Minister of Industry and Electricity, to inform Taiwan of the impending break.

Analysts said the Saudi move was a major political setback for Taiwan, which has been trying to woo governments to switch recognition from Beijing to Taipei following China's brutal crackdown on the pro-democracy movement in June 1989.

The embassies in Taipei and Riyadh are expected to be downgraded to trade offices. The statement said the two sides would conduct further consultations on the adjustment of future relations.

#90203u0159 07/22/1990 ~United Press International

(JULY 22) UPI - In the season of the no-hitter, Tim Belcher gladly settled for the next best thing - a one-hitter.

Belcher fired a one-hitter Saturday night, the first of his career, to lead the Los Angeles Dodgers to a 6-0 blanking of the Pittsburgh Pirates.

''Who's to say if that pitch to Jay Bell was the difference,'' Belcher said referring to the difference between the one-hitter and a no-hitter. Bell singled with one out in the fourth but was promptly caught stealing.

''I would think not. In reality, they hit some shots and the guys made some great plays. I even made one play, just a lucky stab at the ball,'' Belcher said. ''I'll take a one-hitter.''

The Pirates' only other baserunner was Mike LaValliere, who led off the sixth with a walk but was erased on a double play, allowing Belcher to face the minimum number of batters.

Belcher, 8-7, also continued his dominance of the Pirates.

The righthander ran his record to 3-0, all complete games, and a 1.03 ERA against the Pirates this season in four starts.

He's 6-1 lifetime with a 2.20 ERA with 51 strikeouts in 57 1-3 innings.

The Pirates are a collective 14-for-105 against him for a .133 average.

Belcher couldn't explain his success against Pittsburgh.

''I wish I had an answer,'' Belcher said. ''Luck?! You know, pitching on the right day, I just happen to have good stuff.

''As many good lefthanded hitters and lefthanded hitters with power that they have, and myself being a fastball pitcher, there's really no answer to why I have had such good success against this ballclub.''

Pirate Manager Jim Leyland had another explanation.

''He just blew us away,'' Leyland said. ''No contest. He had it all together. No ands, ifs or buts about it. He pitched great.''

It was Belcher's fifth complete game and second shutout of the season. It was the first time since April 18 that the Pirates have been shut out.

Neal Heaton lost his fourth straight to fall to 10-6 despite allowing just two runs on three hits over six innings.

The Dodgers took a 2-0 first-inning lead on a balk by Heaton and a sacrifice fly by Eddie Murray.

Los Angeles added two more in the eighth off Bob Patterson. Juan Samuel hit a two-run home run, his fourth of the year.

The Dodgers made it 6-0 on Samuel's third RBI of the game and Jose Vizcaino's RBI single.

--- AROUND THE NL ---

Elsewhere in the National League, Chicago edged San Francisco 3-2; Cincinnati downed Philadelphia 6-1, New York scalped Atlanta 4-2; Montreal edged Houston 3-2 and St. Louis beat San Diego 4-2.

In the AL, it was: Toronto 2, Oakland 1; Baltimore 2, Chicago 0; Minnesota 2, New York 1; Kansas City 4, Boston 2; Milwaukee 10, Seattle 3; Detroit 8 Texas 1 and California 5, Cleveland 2.

Cubs 3, Giants 2

At Chicago, Jose Uribe's second error of the game, allowed Marvell Wynne to score in the eighth inning and break a 2-2 tie to lift Chicago to its sixth straight win. Mike Harkey, 8-4, pitched his first career complete game. Jeff Brantley, 3-3, took the loss. Matt Williams RBI single in the first inning was his league-leading 79th RBI.

Reds 6, Phillies 1

At Cincinnati, Jose Rijo, in his first start since being placed on the disabled list, hurled six innings and Glenn Braggs doubled home two runs to lead Cincinnati. Rijo, improved to 6-3. Rick Mahler pitched three innings for his second save. Terry Mulholland, 4-4, took the loss.

Mets 4, Braves 2

At New York, Darryl Strawberrry slammed his 24th home run, a three-run first-inning blast. Ron Darling, 3-5, allowed six hits and two runs in six innings to earn the win. John Franco pitched the ninth for his league-leading 21st save. Marty Clary fell to 1-7.

Expos 3, Astros 2

At Houston, Tim Raines singled home the go-ahead run in the eighth inning and Zane Smith scattered seven hits over seven innings to help Montreal snap a five-game losing streak. Juan Agosto, 4-4, absorbed the loss. Smith 6-7, allowed two runs over seven innings to take the win. Tim Burke worked the final two innings to record his 12th save.

Cardinals 4, Padres 2, 7 1-3 innings, rain

At St. Louis, Pedro Guerrero homered and drove in three runs to lift St. Louis Cardinals in a game called by umpires after 7 1-3 innings due to rain. Bob Tewksbury, 5-2, picked up the win and Frank DiPino notched his second save. Eric Show, 1-8, took the loss, allowing nine hits in 5 1-3 innings.

#90203u0185 07/22/1990 ~United Press International

SEOUL, South Korea (JULY 22) UPI - Main opposition leader Kim Dae Jung said Sunday the government must accept the dissolution of the current National Assembly and call elections to replace it or face a serious political crisis.

In a televised interview with the state-run Korea Broadcasting System, Kim repeated that all 70 lawmakers of his Party for Peace and Democracy and five legislators of the minor opposition Democratic Party would submit resignations en mass Monday.

Kim said the nation's voters in elections in 1988 chose a power alignment in which the opposition controlled the one-house parliament. But he said the balance of power was shifted in favor of the government with February's three-party merger into a big ruling party led by President Roh Tae Woo.

''A National Assembly in which a popularly dictated alignment of power is arbitrarily overturned cannot claim to represent the will of the voters,'' Kim said. ''The voters' mandate cannot be overturned arbitrarily. It can be changed only through elections.''

Kim said all opposition lawmakers decided to leave the National Assembly because the ruling Democratic Liberal Party, which enjoys an ''artificially fabricated majority'' in the legislature, makes it impossible for them to represent the real popular will.

''That majority is not a legitimate one,'' he said. ''This National Assembly goes against the wishes of the people. As such, it must not be allowed to exist.''

Kim said possible options for dissolution of the parliament included the resignation of all lawmakers to pave the way for by-elections for the entire 299 parliamentary seats. Another was for the Assembly to pass a resolution dissolving itself. He said he is ready to negotiate with the government on the methods.

''If the demand for its dissolution is not accepted, or if the ruling party decides to accept opposition resignations selectively, I warn that there will develop a grave situation in which the survival of the Roh regime will be at stake,'' Kim said.

Any legislator's resignation is subject to consent by a majority of Assembly members. The ruling party which controls more than two thirds of the parliamentary seats has said it will turn down the opposition bid to abandon the legislative body.

The opposition decision to quit parliament was prompted by the ruling party's proposal on July 14 of controversial laws to place all the armed forces under a unified command and others seeking to restructure the nation's broadcast system.

Kim said his party and others opposed the proposed laws because they could weaken civilian control over the military and place networks back under government control.

The government has said the armed forces law is needed to meet the changing military situation in Korea and the broadcast restructuring was required to accommodate demands for more varied information and to help upgrade management of the existing networks.

On Saturday Kim's party, the Democrats and a dissident organization jointly sponsored a rally at a public park in southern Seoul to seek public support for their cause.

Kim proposed at the rally, attended by an estimated 100,000 people, that the three groups merge into a unified opposition party by September.

Following the rally, about 20,000 participants marched toward the city center. Police fired tear gas to block them from entering downtown areas.

The marchers dispersed, but part of the group continued sporadic attempts to move into the heart of the city. Scattered skirmishes lasted until late in the evening but there were no serious clashes between police and the marchers. Police briefly detained 195 people.

#90203u0188 07/22/1990 ~United Press International

KATMANDU, Nepal (JULY 22) UPI - An epidemic of cholera and gastroenteritis sweeping Nepal has claimed at least 210 lives and is threatening the tourism industry in the tiny Himalayan mountain kingdom, officials said Sunday.

At least 210 people have died in the epidemic that has hit 12 of the kingdom's 75 administrative districts, including Katmandu, said Dr. Arun Thapa of the Health Ministry.

''The epidemic has spread with a high rate of fatality,'' he said. ''The death rate, however, in Katmandu is low though the number of patients admitted to hospitals is far higher that in other parts of the country.''

More than 5,000 people have been treated for the diseases in the current outbreak, he said.

Only sporatic instances of cholera - a highly contagious water-borne disease - have appeared in the past in Katmandu. But this year, 40 percent of all patients admitted to the capital's hospitals have been affected by cholera.

Authorities have declared Katmandu's water supply unsafe for drinking, instructing residents to boil water before use.

The Hotel Association of Nepal issued a statement Sunday, saying ''tourism could be adversely affected if the epidemic is not tackled on a war-footing.'' It termed present government efforts to control the outbreak as ''unsatisfactory.''

Tourism is Nepal's main earner of foreign exchange, with about 300,000 arrivals annually.

#90203u0196 07/22/1990 ~United Press International
BAGUIO, Philippines (JULY 22) UPI - Rescuers gave up hope Sunday of finding survivors in a crushed hotel where tapping sounds were heard from under the building flattened seven days ago in a massive earthquake that killed more than 800 people.

Presidential coordinator Jose de Jesus said after a meeting with foreign rescue experts in the mountain resort of Baguio ''the chances are nil for finding anyone still alive in the wreckage in various buildings in the city.''

''The last sound we heard was at 8 a.m. Saturday,'' said Willie McMartin of Grengemouth, Scotland, leader of a British rescue team assigned at the crushed Hyatt Terraces Hotel in Baguio. ''That means effectively that the person making the sounds has died.''

The team using sensitive instruments had picked up tapping sounds Friday night in response to their knocks on a wall of the crumbled hotel in Baguio, 120 miles north of Manila.

Filipino miners using jackhammers had burrowed through debris in an attempt to reach the basement gymnasium of the hotel, where workers said 10 people were believed to have been trapped since Monday's temblor, which measured 7.7 on the Richter scale.

But McMartin said after a meeting with de Jesus his team was pulling out of the hotel. A total of 60 employees and 40 hotel guests were thought buried in the rubble of the building.

''It is a very sad decision to make. We came here (to the hotel) hoping to save people but didn't save anybody.''

''If there's somebody alive, that would be a miracle,'' he said.

The military Office of Civil Defense put the death toll from the temblor as of Sunday at 889. At least 730 people were reported missing and feared dead and 3,060 were injured.

The social welfare department said 52,000 houses were destroyed and 995,000 people were homeless.

The death toll was still rising and would not be fully known until remote areas are reached, officials said.

President Corazon Aquino, scheduled to open a new session of Congress Monday, was expected to call in her state of the nation speech for urgent approval of the equivalent of $434 million in emergency programs to

rehabilitate damaged cities.

De Jesus said two more bodies were pulled Sunday out of the Hyatt Terraces bringing to 12 the number of fatalities recovered there.

Confirmed deaths in Baguio totaled 375 with 191 missing and 627 injured. De Jesus said 920 people were rescued from 28 flattened buildings in the mountain city with damaged houses numbering 6,981.

City engineer Valentino Julian said 90 percent of buildings and houses in Baguio were damaged and it would take 10 to 15 years to rebuild the city.

Life was gradually returning to normal in the city of 170,000, with electricity and water restored to most areas. Stores and markets opened on Sunday.

Elsewhere, officials were discovering destruction in surrounding provinces. Officials said scores of villages in Nueva Viscaya and LA Union provinces were leveled by the temblor, the worst to hit the country since a quake and tidal wave killed more than 3,000 people in August 1976 on Mindanao island.

#90203u0198 07/22/1990 ~United Press International

JOHANNESBURG, South Africa (JULY 22) UPI - A bomb explosion bearing the mark of right-wing terrorists ripped through the offices of the ruling National Party in the Orange Free State's capital Sunday, damaging the empty building but causing no casualties, police said.

A police spokesman declined to speculate on who may be responsible ''for this damaging attack,'' in the city of Bloemfontein, but noted, ''the cause was commercial explosive'' - a trademark of right-wing extremists outraged at President Frederik de Klerk's racial reforms.

Police also said Sunday ''a certain number of people'' linked to the military wing of the African National Congress were ''temporarily detained'' in the country over the past week in connection with planning anti-government violence.

But a Department of Law and Order official noted, ''This is not a crackdown on the ANC, it is an exercise to curtail possible violence.'' The ANC, legalized at the launch of the country's racial reform on Feb. 2, has since vowed to continue its 30-year armed struggle against white minority rule until apartheid is ended.

The ''struggle'' since February has been only nominal, ANC insiders have acknowledged, and the latest detentions ''took place to gain information

rather than as a follow-up to terrorism,'' the Law and Order official said.

Authorities blame right-wing elements for a bombing spree over the past month directed at black, government, and liberal-white targets.

At least 15 right-wingers have been detained in the blasts, which in three incidents at Johannesburg-area hotels and a transport point used mainly by blacks killed two people and injured 48.

Law and Order Minister Adriaan Vlok has vowed to stamp out the right-wing violence, which in the months after the launch of racial reform was preceded by extremists' threats to fight for the protection of 42 years of white minority rule.

But police chief spokesman Maj. Gen. Herman Stadler has said infiltrating an estimated 70 extreme right-wing groups and tracking myriad solo operators to stem the violence ''will be no easy task.''

-30- 2311

#90203u0202 07/22/1990 ~United Press International

BEIJING (JULY 22) UPI - Herdsmen, villagers and city dwellers across Mongolia voted Sunday in the primary stage of the country's first multi-party election, with opposition groups fighting for a share of the power held by the communists for seven decades.

The voting is the product of eight months of stunning changes during which Mongolia's hidebound leadership, prodded by reforms in the Soviet Union, relinquished its constitutional monopoly on power and launched its own version of Moscow's perestroika.

The Mongolian People's Revolutionary Party, the ruling communists, and five small opposition parties legalized just two months ago fielded candidates for provincial and local assemblies, but the most attention focused on the national parliament.

Voting began at 6 a.m. in schools, libraries and public offices across the country as herdsmen, rural dwellers and urban residents went to the polls under warm, cloudy skies to mark their choices on paper ballots for national, regional and local races.

About 1.2 million of the more than 2 million people in the country, sandwiched between the Soviet Union and China, were eligible to vote in the first multi-party election in the longtime Soviet satellite.

A nation of remote desert and grasslands, half of whose people are nomadic herdsmen, Mongolia was ruled by feudal warlords from the days of Genghis Khan, who roamed Asia in the 13th century, until communist revolutionaries

declared independence in 1921.

Reached by telephone in Ulan Bator, the capital, Mongolian sources and foreign diplomats said the communists were likely to win a majority due to the opposition's lack of organization in rural areas and election procedures advantageous to the ruling party.

By midday, they said, the government announced voter turnout at more than 50 percent in three major provinces and more than 30 percent in the capital. The polls were to close at 10 p.m. and counting to go all night, with results expected late Monday.

About 19 foreign observers from the United States, Britain and the Soviet Union were monitoring the voting.

''The support for the ruling party is still really strong in the rural areas,'' a Mongolian source explained. ''And they've done some gerrymandering with the proportional representation that favors the countryside.''

Sunday's vote was to winnow more than 2,400 candidates in the primary running for the parliament, the Great People's Hural, to no more than two candidates for each of its 430 seats representing the nation's districts. The final round of voting is next Sunday.

Once elected, the Great People's Hural will elect a 50-member ''Small Hural,'' which will play a key role as a legislative presidium and make most of the major decisions each year.

Of the 430 districts, Mongolian sources said, 44 had only a single candidate and 113 had two, so only 273 seats were contested in the primary most in urban areas. One district in Ulan Bator had a slate of 55 nominees to be narrowed to the two top finishers.

Although the government has been generally accommodating to reform goals, the opposition has demanded faster political and market-oriented economic changes, along with opening to foreign business and an end to official privilege for ranking members of the ruling party.

The Soviet Union has already begun withdrawing its 60,000 troops from Mongolia. Moscow also plans to slash economic aid to Mongolia by half over the next two years, and Ulan Bator will have to begin repaying the Soviets nearly $6 billion in debt.

The election was announced this spring after a small democracy movement began staging daring protests last December in Ulan Bator, spurring the government into replacing its leaders and giving up its constitutional monopoly on power.

Opposition parties led by the Mongolian Democratic Party, whose organizers started the pro-democracy movement, had been critical of the election system, which is weighted to favor representation in rural areas where the communists are strongest.

''It's complicated and convoluted, but the opposition now seems fairly well satisifed,'' said a Western diplomat in Ulan Bator.

Campaigning has been low-key, with party activists going door to door in districts, distributing leaflets and promoting candidates in party newspapers. Politicking on state television has been limited to interviews with political figures.

''Some of the politicians have appeared in traditional dress and appealed to nationalism,'' the diplomat said, noting the impact has been difficult to gauge.

One party distributed a leaflet in old-style Mongolian script, not the Russian cyrillic used in the country for decades, even though only about 10 percent of the population can still read the native lettering.

#90203u0207 07/22/1990 ~United Press International

NEW YORK (JULY 22) UPI - Federal banking officials admitted they erred in allowing a businessman with a history of legal and regulatory problems to buy an insolvent Oklahoma bank at a fire sale price with lobbying help from a former aide to President Bush, a published report said Sunday.

The businessman, James Fail, 64, of Phoenix, paid $500,000 for the bank that officials said could have fetched $2 million to $6 million, the New York Times reported.

The Oklahoma deal is the latest disclosure concerning Fail, who is under investigation by a Senate subcommittee studying how he acquired 15 insolvent Texas savings and loans using $70 million in borrowed money and a personal investment of only $1,000.

The Times reported previously undisclosed details of the deal with the now defunct Federal Home Loan Bank Board showed that Fail and his lobbyist, Robert Thompson, received unusually swift and favorable treatment from another regulatory agency, the Federal Deposit Insurance Corporation.

Thompson was a campaign aide to Bush in 1980 and served as legislative aide when Bush was president.

Federal officials were unaware of, or ignored, the objections of local

regulators, who thought Fail's legal problems should disqualify him as a suitable buyer.

Fail was indicted in 1976 in Alabama on charges of securities fraud. The charges were dropped and Fail agreed not to conduct new business there. In the same case, his insurance company pleaded guilty to securities fraud, a felony.

Fail did not disclose his indictment but did mention the guilty plea by his company one day before the FDIC approved the sale. Fail did not submit the agency's background form which asks specifically if the applicant has ever been indicted.

Lance Morgan, a spokesman for Fail and Thompson, said Thompson arranged a January 1987 meeting between Fail and FDIC head, L. William Siedman.

Edwin Locke, an associate of Fail, said Thompson played a key role in moving thr process along without the standard forms.

Senior FDIC officials acknowledged they should not have approved Fail so quickly. The agency's chairman. L. William Seidman, said in an interview that the agency should have deferred action or chosen a second bidder.

''We didn't stick strictly to the rules; he slipped through,'' Seidman said. ''He duped us.''

In approving Fail in 1988 for the purchase of the Texas savings and loans, the bank board relied on the fact that the FDIC had approved Fail for the 1987 Oklahoma purchase.

Siedman said he did not know why the agency's screening process broke down and that his dealings with Thompson were routine.

The disclosure of Fail's deal with the FDIC is one of the first to link the agency with irregularities in its application process and the involvement of a politically connected lobbyist.

Ohio Democratic Senator Howard Metzenbaum, who is leading the Senate inquiry, called the deal ''the worst case'' to emerge from the savings-and-loan scandal.

Critics of the Federal Home Loan Bank Board, which supervised the savings industry, have said political manipulation was commonplace there while the FDIC, which oversees commercial banking, has a reputation for integrity and sound financial judgement.

ATLANTA (JULY 22) UPI - A black teaching major with skill in math, science, special education or foreign languages has it made in the Southern job market, a report said Sunday.

Elementary and high schools across the region, suffering from declining black interest in the education profession, will roll out the red carpet for a black with a teaching degree in hand, the Atlanta Journal-Constitution said.

Math, science, special education and foreign languages teachers of every race are an endangered species all over the nation, and blacks trained in those specialty areas are particularly rare in the South, officials said.

In a 1987-88 U.S. Department of Education survey of 470 school principals nationwide, 45 percent said they had a shortage of special education teachers, one-third cited a need for math and science teachers and 24 percent were low on foreign language instructors.

Despite the fact that 20 percent of school-age children are minorities, the black teaching force represented only 6.9 percent of the total in 1986 down from 8.1 percent in 1971, the survey said.

''We didn't have a single applicant in math and science this year,'' said James Harris, superintendent of the North Panola school district in rural northern Mississippi.

''It's increasingly difficult to find qualified minorities,'' said Tom Ingram, a superintendent in Tuscaloosa, Ala.

''There's a critical shortage in all those areas,'' said Mike Campbell, personnel administrator in Shreveport, La.

The statistics make job-hunting no job at all for people like Roberta Lynn Jones, a Jackson, Miss., black junior high school teacher, who graduated from Mississippi State in 1988 with a master's degree in education.

''I had nine job offers,'' the 24-year-old recalled. ''I can't tell you how good it was.''

School system recruiters are going to great lengths to snare graduates like Jones.

In Decatur, Ala., recruiters go to every university in the Southeastern Conference, where they ''try to make a positive impression on every applicant,'' personnel director Sam Houston said.

New Orleans flies prospective elementary school teachers in, puts them up

in fancy hotels and treats them like corporate job prospects to fill 150 elementary special education and high school science and math vacancies.

Shreveport beams a live television show about its school district to black colleges nationwide and offers subsidized housing to new recruits.

South Carolina, Georgia and to some extent, North Carolina have developed innovative ways of filling their teacher needs, with large-scale state recruiting efforts and pay increases.

Even states blessed with Florida's resources are not immune to what Bob Kronley of the Southern Educational Foundation calls ''a major shortage in this region of minority teachers.''

National analysts blame much of the problem on a severe drop in the number of blacks graduating from education schools, as more lucrative career opportunities for minorities lure them away.

Historically black colleges, once responsible for half the nation's black teachers, suffered a 40 percent decline in teacher education enrollment from 1977 to 1986, the Education Department said.

At predominantly black Jackson State University in Mississippi, recruiters from across the nation come to shop for talent at the school's college of education.

''We feel like we are being raided from across the country,'' said John Jordan, personnel director of Jackson's public schools. ''We fight tooth and nail to keep those people in Jackson.''

#90203u0230 07/22/1990 ~United Press International

NEW YORK (JULY 22) UPI - A fire ripped through an apartment building Sunday, killing three young siblings who were trapped as their bedroom was engulfed in flames, officials said.

Four others were injured, including two firefighters, and were hospitalized. Seventeen firefighters and two police officers sustained minor injuries such as smoke inhalation.

The three-alarm blaze erupted in the children's fourth-floor Harlem apartment about 5 a.m., sending waves of flames out the windows and quickly spreading to the fifth and sixth floors, said Efrain Parrilla, a Fire Department spokesman.

It was unclear what caused the fire, which was not labeled suspicious, Parrilla said.

He said the three siblings were killed from the tremendous heat and flames in the fire in the renovated city-owned building. They were identified as Caprisha Kennebrew, 6, her sister Duwatha, 4, and her brother Devin, 3.

The names and conditions of the children's parents were not known.

Two apartment residents and two firefighters were admitted to Saint Luke's Hospital for fire-related injuries.

Seventeen other firefighters suffered minor injuries, including smoke inhalation, minor burns, contusions, heat exhaustion and back injuries, Parrilla said.

Three apartments were gutted by the fire, leaving three families homeless.

#90203u0233 07/22/1990 ~United Press International

LONDON (JULY 22) UPI - Britain has banned a film that portrays author Salman Rushdie being killed by a bolt of lightning after he shoots and tortures Moslems trying to murder him, according to a report published Sunday.

The Independent on Sunday newspaper said the British Board of Film Classification has refused distribution rights for the Pakistani film ''International Guerrillas'' on grounds that it could be criminally libelous.

The film depicts Rushdie - who remains in hiding under death threats sparked by Moslem outrage over his controversial book ''The Satanic Verses'' - wielding a sword covered with blood, hanging Moslems and torturing other Moslems by playing them tapes of his book. Rushdie is later struck down by lightning, which is seen as an act of God for the author's role in an international syndicate trying to destroy Islam.

It has drawn record audiences in Pakistan, where viewers have paid five times the normal cinema price to see the film, the newspaper said.

James Ferman, director of the BBFC, said in a letter to a Pakistani-owned video distribution company in London, that the film contravened criminal libel laws and would expose Rushdie to public hatred, according to the newspaper.

If the film were edited to change Rushdie's name and remove all statements calling for his death if might stand a better chance with the BBFC, Ferman said.

''This would turn it into a more traditional entertainment, with a villain who is an enemy of Islam in a general sense, rather than a specifically named individual,'' Ferman said in the letter.

Mohammed Fayyaz, whose south London video center holds world rights to the film, told the newspaper he intends to appeal the decision.

''The establishment wants to protect Rushdie. They say this is an independent country, but they ban a film which gives the real feeling of Moslems,'' Fayyaz said.

Rushdie has been in hiding since Feb. 14, 1989, when the late Iranian leader Ayatollah Ruhollah Khomeini sentenced him to death for writing ''The Satanic Verses,'' a novel many Moslems regard as blasphemous.

#90203u0248 07/22/1990 ~United Press International

NEW YORK (JULY 22) UPI - Sen. Alfonse D'Amato, R-N.Y., responding to reports that the federal government losses $20 billion annually in taxes from foreign companies that under-report their incomes, said Sunday he would introduce legislation to expand tax collection efforts.

''Foreign companies are defrauding the country to the tune of $20 billion every year,'' the New York Republican said. ''An unconscionable fraud is being perpetrated against the American people and American businesses struggling to compete against foreign firms paying little or no tax.''

The senator said in a statement that the government should not be reducing the federal deficit ''on the backs of U.S. taxpayers'' until it attempts to collect billion of dollars owed by foreign firms selling their products to American consumers.

He said a General Accounting Office report had found that between 1984 and 1987, foreign firms operating in the United States reported an average return on assets and receipts of less than 1 percent.

''It strains the imagination to believe these foreign firms,'' he said. ''If these companies are making such miniscule profits, how can they afford to continue doing business in the United States?''

D'Amato called for application of the ''waitress theory'' to collect the taxes. Under the theory, the Internal Revenue Service presumes food servers earn 8 percent of their income in tips so it subjects them to an 8 percent tax on their gross receipts as an estimate of their total tips.

''Applying the same theory, my bill will shift the burden of proof to foreign-controlled U.S. corporations,'' D'Amato said. ''If a

corporations's return is less than a certain percentage, the law will require it to open its books and prove that its federal tax liability is not being understated.''

''I will call on the IRS to immediately expand its manpower in these cases '' he added.

While singling out Japan as the nation with the most offenders, D'Amato said the IRS and the House Ways and Means oversight subcommittee were also investigating a number of companies in West Germany, Britain, Canada and South Korea.

#90203u0259 07/22/1990 ~United Press International

YORBA LINDA, CA (JULY 22) UPI - The ''smoking gun'' Watergate tape on exhibit at the new Richard M. Nixon Library and Birthplace is heavily edited, but still includes a key portion where the former president instructs the FBI be told, ''Don't go any further into this case, period.''

Before the library and museum opened, officials had said the public would be able to listen to unedited tapes.

Library Director Hugh Hewitt told the Los Angeles Times after the opening that the editing of the tapes was ''a museum design question.'' He added that the museum design was supervised by John Taylor, a Nixon aide and spokesman.

The privately funded library, which opened Friday following a dedication ceremony highlighted by an historic appearance by four presidents, eventually will offer visitors three of the tapes made by a once-secret recording system in the Oval Office. The White House tapes helped tie Nixon to the widening scandal and force his resignation in 1974 in the face of impeachment proceedings.

The library's Watergate display also fails to mention the criminal convictions of a host of senior Nixon aides for their roles in the overlapping conspiracies known as Watergate. The first was a plan to use wiretaps, burglaries, the FBI, CIA and independent groups organized by White House aides to punish Nixon's political enemies.

The second conspiracy, initiated after a team of White House-linked burglars was arrested during a break-in at the Democratic National Committee headquarters in the Washington's Watergate office building, was designed to cover up the first conspiracy.

The only recording currently on display contains portions of the ''smoking gun'' tape, made during a July 23, 1972, meeting between Nixon and his

chief of staff, H.R. Haldeman, six days after the Watergate burglary.

At the meeting Nixon approved a plan to have the CIA warn the FBI to halt its investigation of the burglary. But the heavily edited library version of the tape deletes much of the discussion of the plan and stitches the remaining portions together with narration.

Haldeman is heard to say the matter should be handled by having the CIA call FBI Director L. Patrick Gray. ''Just say, 'Stay to hell out of this - this is ah, business here we don't want you go to any further on it.'''

Nixon's approval is not heard on the library tape, but later in the conversation, Nixon sums up by asking Haldeman to arrange for the CIA to call the FBI and say, ''Look, the problem is that this will open the whole the whole Bay of Pigs things, and the president just feels that ah, without going into the details - don't lie to them to the extent to say there is no involvement, but just say this is a comedy of errors, without getting into it, the president believes that it is going to open the whole Bay of Pigs thing up again. ... don't go any further into this case, period!''

Text displays concede that ''Nixon himself has said he made inexcusable misjudgments during Watergate,'' but accuse many of his critics of ''partisan'' bias, including the late Democratic Sen. Sam Ervin of North Carolina, who chaired the Senate probe of Watergate, and the first Watergate special prosecutor, Harvard law professor Archibald Cox, who Nixon fired.

Another display particularly criticizes the investigative work to unearth the scandal by Pulitzer Prize-winning reporters Bob Woodward and Carl Bernstein. The display offers an accusation from an unidentified ''scholar'' that the reporters offered bribes for information and illegally obtained telephone numbers and talked to grand jurors.

Woodward, in an interview with the Times, denied ever offering bribes.

#90203u0275 07/22/1990 ~United Press International

CASTEL GANDOLFO, Italy (JULY 22) UPI - Pope John Paul II appealed for international aid for Philippine earthquake victims and reminded Roman Catholic priests they must obey church teachings during a Sunday Angelus blessing.

The Polish-born pope, who ended a 10-day alpine holiday Friday, spoke to a crowd of around 1,000 pilgrims who gathered in the courtyard of the papal summer retreat at Castel Gandolfo south of Rome.

''We have been following with apprehension the dramatic news from the Philippines,'' John Paul said of the earthquke which struck a week ago and which has claimed more than 900 lives. ''We are close with our heart and with our prayers to all of those involved in this tragic occurence.''

The pope asked for prayers for the dead, the wounded and their families.

''I ask you to send help to the injured, to those who have lost their homes and I encourage you to multiply these gestures of solidarity, which can bring aid, comfort and help to these good people in this moment of great suffering.''

The Pope took an opportunity to remind Roman Catholic priests of their duty to obey church law.

''With obedience, priests assure their unity, not only with other priests, but also with all of their brothers,'' John Paul said.

During his two-month summer working holiday in the wine-growing hills near the capital, John Paul will give his Sunday Angelus blessing from Castel Gandolfo, but will fly by helicopter to the Vatican each Wednesday for his regular general audience.

#90203u0284 07/22/1990 ~United Press International

KATMANDU, Nepal (JULY 22) UPI - Poachers have killed four endangered one-horned rhinos in the past month in the heavily guarded Royal Chitwan National Park, it was reported Sunday.

The weekly newspaper ''Deshanter'' attributed the report to wildlife officials in the park about 100 miles southwest of the capital.

The park has about 400 one-horned rhinos. Bullet-riddled carcasses of the animals - without their horns - were found in the park, the weekly said.

The horns are highly prized and are in demand in Southeast Asia for their perceived aphrodisiac qualities.

Despite investigations, the poachers have not been traced.

The one-horned rhino is also found in India.

#90203u0293 07/22/1990 ~United Press International

COLOMBO, Sri Lanka (JULY 22) UPI - Army engineers temporarily repaired a strategic bridge blown up by Tamil rebels at the mouth of the northern

Jaffna peninsula, and new fighting in the north killed at least 39 guerrillas and government troops, a military official said Sunday.

The senior military official also said security forces in the east of the country had recovered the bodies of 50 policemen slain by the rebels. The policemen had surrendered to the guerrillas at the start of hostilities more than a month ago.

The latest fighting broke out Saturday night when Tamil rebels opened fire on a military patrol with mortars and small arms near the northern city of Mannar, 195 miles north of the capital, the senior military official said.

The attack killed seven soldiers and wounded nine others. Government troops then surrounded the area and clashed with the rebels, killing 32 guerrillas, the official said.

The engineers made temporary repairs Sunday to the Elephant Pass Causeway, a strategic bridge along the road that links the northern Jaffna peninsula to the rest of the teardrop-shaped island, the official said.

He said the bridge could be used by advancing troops and military vehicles but was still not fit for use by other transport.

Rebels from Liberation Tigers of Tamil Eelam dynamited the strategic bridge Saturday in a bid to block a military offensive aimed at recapturing the northern Jaffna peninsula, which has been in guerrilla hands since the start of the five-week war.

Fighting between the Tiger rebels and government forces erupted June 12, when guerrillas simultaneously attacked four army camps in the east of the country.

Since then, more than 1,500 people have been killed in the fighting, including scores of policemen who were forced to surrender in the initial attacks by the Tiger rebels.

The Liberation Tigers have been fighting for an independent Tamil homeland in the north and east of the country since 1983, but the situation in Sri Lanka had been relatively quiet for nearly a year when the latest fighting broke out.

The rebels believe the minority Tamils, who are mostly Hindu, need a separate state because of years of discrimination by the majority Sinhalese, who are predominantly Buddhist.

#90203u0298 07/22/1990 ~United Press International

WASHINGTON (JULY 22) UPI - Senate Republican leader Robert Dole of Kansas said Sunday that abortion ''should not be the single litmus test'' in choosing a successor to retired Supreme Court Justice William Brennan and predicted a big fight if it is.

As President Bush ponders his decision on a successor to Brennan, advocates on both sides of the abortion issue are geared for a fight over the landmark decision that legalized abortion. Bush's choice must be confirmed by the Senate.

''If you have to have someone who wants to overturn Roe vs. Wade, it's going to be a bloodbath getting the nomination confirmed,'' Dole said, ''and the same is true on the other side.''

Dole, appearing on NBC's ''Meet the Press,'' said it would be ''very difficult'' for Bush to base his decision on how well it satisfies ''this group or that group.''

Sen. Arlen Specter, R-Pa., a member of the Senate Judiciary Committee, echoed Dole's feelings.

''I hope that President Bush does not go for a single issue litmus test. The qualifications for a Supreme Court justice have a broad base. ... The abortion issue is only one of many, many very important issues to come before the court, and I do not believe a Supreme Court justice ... should be evaluated solely on where he or she stands on a single issue,'' Specter told CBS's ''Face the Nation.''

Brennan, who retired Friday after 34 years on the court, supported abortion rights. With the addition of conservative justices over the years the court has been moving in the direction of overturning the 1973 decision allowing abortions in the United States.

Among the names mentioned as possible nominees is that of Kenneth Starr, the solicitor general who argues the administration's case before the Supreme Court.

Other names include Roger Miner, who was appointed to the 2nd U.S. Circuit Court of Appeals in New York in 1985; James Wilkinson III, appointed to the 4th U.S. Circuit Court of Appeals in 1984; Patrick Higginbotham, appointed to the 5th U.S. Circuit Court of Appeals in 1982; Pasco Bowman, appointed to the 8th U.S. Circuit Court of Appeals in 1983; and Edith Jones, named to the 5th U.S. Circuit Court of Appeals in 1985.

Bush's selection process did not start from scratch. In anticipation of an opening in the near future, administration officials had quietly begun thinking of possible candidates some time ago.

''The matter had received some thought,'' said one official, ''though nothing formal and nothing nearly as comprehensive as this is going to require.''

Dole said that for Bush, choosing a Supreme Court nominee ''is the toughest decision he has had to make since he's been president.''

''With the S&L crisis, with the election coming up, with the tax matters, the budget, a lot of people concerned about were government is headed - wrong direction, right direction - this could be the bellwether decision in the first two years of his presidency,'' Dole said.

Another member of the Judiciary Committee, Sen. Patrick Leahy, D-Vt., said ''If I gave any advice to the president ... I'd say don't go with the symbolism that some will ask you to make a symbolic appointment. Go with your place in the history books, because what you do in this appointment, you can shape the course of the Supreme Court well into the next century.''

Leahy, who appeared on the CBS program, said Bush ''has an enormous opportunity before him. I don't think there has been a time since the New Deal time when the appointment could be so important.''

#90203u0312 07/22/1990 ~United Press International

NASHVILLE, TN (JULY 22) UPI - Sex-starved male ducks have killed 40 female ducks at a lake in a city park, and volunteers have begun rounding up the offending quackers.

Volunteer Karen Easter said the problem at Watauga Lake in Nashville's Centennial Park is caused by people who get ducklings as Easter presents and then abandon them when they mature.

After spending Saturday rounding up White Peking ducks at the 3-acre lake, Easter determined the population was predominantly male.

''They had 40 (female) ducks die this spring alone,'' she said. ''I just cannot stand seeing animals being treated brutally.''

She said the disproportionate number of males caused the sex-starved ducks to gang up on the famales, seriously injuring or killing them in the process.

Easter said the pet ducks bought around Easter time are ill-equipped to try to fend for themselves in the city park.

''They buy them, and raise them to be totally dependent on humans for their livelihood,'' Easter said. ''And just when they become a little bit

troublesome, they dump them like a piece of trash.''

Easter said there are about 90 wild ducks on the lake. She said the maximum number of ducks should be 10-12 per acre.

Easter said after determining the birds' sex, their tails were sprayed with pink or blue paint.

The birds were put up for adoption and many were taken to farms with private lakes. Easter said five male and 25 domestic female ducks were left on the lake.

#90203u0314 07/22/1990 ~United Press International

WISCONSIN DELLS, WI (JULY 22) UPI - It dares to be the most unusual - and messiest - lottery around.

Dells Crossroads Fun Park this week begins ''Elephant Lotto,'' a game in which players predict where the huge animal's first droppings will land on a 225-square-grid playing field.

''Wherever she does her business, there's your winner,'' said Jim Grogan, owner of the park. ''The judge's decision will be final.''

Prizes include $100 for the winner, or winners if the contest gets messy. The first 225 people who pay admission to the theme park can take a free chance in the contest.

Grogan said it may be difficult to find someone willing to judge the strange contest.

''We haven't had any immediate volunteers,'' he said. ''It's probably going to be dropped right into my lap, literally.''

The facility's advertising agency came up with the promotional idea.

''I loved it. I seized right upon it,'' Grogan said. ''I think it will make a hell of a promotion.''

The idea caught some workers off guard.

''They say, 'What?''' Grogan said. ''And then everybody laughs and says it's a great idea.''

The park has 14 pachyderms that are part of daily shows.

''The elephants at the park are part of a breeding program designed to

increase the population of these endangered animals,'' Grogan said.

''It's a fun show. We're dragging logs and loading them on hay wagons as they do in Asia. The intent is to let the people understand what elephants are capable of doing and how they are used in their native habitats.''

The game will begin Friday and continue throughout the park's season.

-30- 1794

#90203u0340 07/22/1990 ~United Press International

WASHINGTON (JULY 22) UPI - In a breakthrough in the long campaign to account for the 2,302 American servicemen still missing from the Vietnam War, a group of U.S. experts for the first time will visit Cambodia this week to search for the remains of as many as 82 military personnel.

''This is big breakthrough,'' said Mary Curall of the National League of Families of POWs/MIAs in Southeast Asia.

''Since the mid-1980s, we have made appeals to (Cambodian Premier) Hun Sen to turn over any remains but to no avail. There has been no response.''

But a week ago, the State Department said the Phnom Penh government had agreed to let a U.S. team into Cambodia.

Lingering sentiments from the bitterly divisive Vietnam War-era that have blocked U.S. diplomatic recognition of the governments of both Vietnam and Cambodia, as well as Cold War rivalries, have long been obstacles to a final accounting for the more than 2,300 U.S. personnel counted as missing in the Southeast Asian conflict.

The agreement to allow the search for U.S. servicemen came after an appeal from Sen. Charles Robb, D-Va., who had led a delegation to Cambodia earliar this year and met with Hun Sen.

''This is obviously only the beginning of a process which we hope will allow for the accounting of every missing American,'' Robb told the league.

Curall said 82 U.S. soliders are listed as missing in Cambodia but she cautioned that it is unknown what the official team will find.

The forensics team, from the Joint Casualty Resolutions Center and the Central Identification Laboratory, based in Hawaii, will fly to Cambodia on Tuesday. Both Vietnam and Laos have in the past allowed similar teams to search for MIAs but Cambodia has not even responded to the appeals.

''Thanks to Robb, a response has been heard,'' Curall said.

Curall refused to speculate on the reasons for Cambodia's about-face. ''I'm not going to question it,'' she said.

It may have been, however, a goodwill gesture on the part of the embattled regine of Hun Sen.

A State Department spokesman said in a July 13 announcement that the U.S. government appreciated the move, ''which we consider an important humanitarian endeavor and which, if successful, will help alleviate the continued uncertainty of the families of missing Americans.''

The statement came just days before the Secretary of State James Baker announced the United States was dramatically changing course with regard to Cambodia and withdrawing its diplomatic recognition of the Cambodian guerrilla coalition seeking to oust Hun Sen. Baker also said the United States would begin direct negotiations with Vietnam aimed at settling the Cambodian conflict.

A separate set of talks with Vietnam will focus on U.S. soldiers missing in action.

Baker's reversal came amid eroding congressional support for the administration's policy of giving aid to the two non-communist factions in the anti-Pnom Penh coalition and reports that the Khmer Rouge, the third member of the coalition, was gaining militarily in its struggle with the forces of Hun Sen.

Baker said a major U.S. policy goal was ''to prevent the return of the Khmer Rouge.''

The Khmer Rouge, which ruled the country from 1975 until they were ousted by the Vietnamese in 1979, has been blamed for one of the worst genocides in modern history - the death of more than 1 million Cambodians.

Last year, most of the Vietnamese invasion force was withdrawn, accomplishing what Baker called a major policy goal of the United States.

-30- 3753

#90203u0347 07/22/1990 ~United Press International

WASHINGTON (JULY 22) UPI - This is the week President Bush and Congress pick up the pace of their plodding budget summit, under pressure to forge a deficit-reduction agreement before their already difficult task is complicated by other election-year concerns.

The negotiations, which for the most part have been held on Capitol Hill, move to the White House, where Bush will meet with congressional leaders for 90 minutes Tuesday and an hour each of the following three days in a

search for $50 billion or more in spending cuts and revenue increases next year.

When Bush agreed May 6 to open negotiations on a bipartisan deficit-reduction plan, the idea was that his personal involvement would be limited, called upon only when needed to inject momentum into the process.

With Congress as little as two weeks away from a summer recess that could postpone further work until after Labor Day, that time for intervention has arrived.

The first sign came last Wednesday, when Bush invited the top five members of the congressional leadership to the White House for a review of the limited progress to date.

The intent was to give what White House press secretary Marlin Fitzwater characterized as ''a little shove'' to the talks and move beyond generalities to the nitty-gritty of the budget problem.

This week will see further acceleration. Senate Republican leader Robert Dole of Kansas said Sunday that Bush will become ''much more active'' in ''pushing Congress,'' despite complaints from some Democrats that it is the administration that has been slow to come forward with specific proposals, especially in the touchy area of taxes.

Interviewed on the NBC program ''Meet the Press,'' Dole said members of both parties agree that ''the posturing stage surely should be over.'' In contrast to the partisan fireworks that erupted last week in the Senate over civil rights legislation, Dole said the budget summit has reached the point where there is ''good faith on both sides.''

Time, however, is running short and Dole conceded it was ''probably not realistic'' to expect an agreement before Congress recesses Aug. 3 or 10.

''It would take something short of a miracle,'' he said.

Dole acknowledged a curtailment of itemized deductions for such things as mortgage interest payments, charitable contributions and state and local taxes was among the options under consideration for raising tax revenues, perhaps to be accepted by Republicans in exchange for a cut in capital gains taxes. Both would be aimed at wealthier taxpayers.

However, House Republicans went on record last week against higher taxes, and Dole emphasized that no firm decisions have been made on how to achieve a targeted $50 billion in savings next year and $500 billion over five years.

''Everything is on the table,'' he said. ''It's wide open.''

If the budget talks spill over into September, they risk entanglement in other anticipated political conflicts between Bush and Congress, not the least of which is the nomination of a Supreme Court justice.

That also would bring the negotiations perilously close to the Sept. 30 end of the fiscal year. Failure to approve a deficit-reduction plan by then would trigger some $100 billion in automatic spending cuts - disrupting and forcing reductions in virtually every service provided by the federal government - to bring the deficit down from a projected $169 billion to a legal limit for next year of $64 billion.

#90203u0349 07/22/1990 ~United Press International

LOS ANGELES (JULY 22) UPI - With one verdict down and seven to go, jurors begin a third week of deliberations Monday in the molestation retrial of Raymond Buckey, the only remaining defendant in the notorious McMartin Pre-School case.

The jury returned its first verdict Friday, the tenth day of deliberations in a case that focused the nation's attention on child molestation when it began seven years ago.

Superior Court Judge Stanley Weisberg ordered the verdict sealed until jurors decide the seven other molestation counts against Buckey.

Buckey, 32, is being retried on the charges he molested three young girls at the now-closed Virginia McMartin Pre-School in Manhattan Beach from 1979 until 1983.

The former preschool teacher has steadfastly maintained his innocence.

At the end of a marathon first trial in January, Buckey and his mother, Peggy McMartin Buckey, 63, were acquitted of 52 other molestation counts involving a total of 11 children.

The first jury deadlocked on the eight counts on which Buckey is being retried.

The verdicts in January climaxed a trial that lasted nearly three years and cost $13.2 million, making it the longest, costliest criminal trial in U.S. history.

The greatly scaled down retrial has lasted more than three months.

If convicted, Buckey could be sentenced to up to 22 years in state prison.

He would be credited for the nearly five years he spent in custody following his 1984 arrest.

The core of the prosecution was the testimony of the three girls, who said Buckey molested them, forced them to play sex games such as ''Naked Movie Star,'' and scared them into silence.

However, when pressed by defense attorney Danny Davis for details of the alleged sex abuse, all three girls repeatedly said, ''I don't remember.''

From the beginning, the defense has argued that the children were brainwashed by overzealous therapists at the Children's Institute International in Los Angeles. The therapists, the defense argued, manipulated the children into leveling false allegations.

The girls, now ages 14, 12, and 11, were allegedly molested when they were ages 2 to 5.

During his cross-examination of the girls, Davis pointed out that their testimony at the retrial frequently contradicted testimony they gave at the first trial and in videotaped interviews with the child therapists.

The county grand jury handed down its initial indictments containing scores of charges in March 1984. But all charges against five codefendants including Buckey's sister and grandmother, were dismissed for lack of evidence.

The preschool was closed by the state in January 1984 after the molestation allegations surfaced. In May, it was razed to make way for an office building, but not before a group of parents dug up the foundation in an inconclusive search for secret tunnels mentioned by some children.

#90203u0459 07/22/1990 ~United Press International

LOS ANGELES (JULY 22) UPI - One of two despondent women who on the same day set themselves on fire rather than face health and family problems was barely alive Sunday with severe burns, authorities said.

Louisa Jiminez, a 35-year-old mother of three young children, was in extremely critical condition suffering from third-degree burns over 90 percent of her body after dousing herself with a flammable liquid and setting herself on fire in the middle of a street.

Doctors ''don't hold out much hope,'' for her survival, said Nancy Powell, a nursing supervisor at Huntington Memorial Hospital in Pasadena.

Hours after Jiminez attempted suicide Saturday morning, Ruby Poublane of

Tujunga died on a mountain road in a fiery tomb of her own making. The 26-year-old woman doused her car with gasoline, then climbed inside as it burned, detective Jerome Beck said.

Investigators found notes indicating she was having health and family problems and friends said she was despondent and previously attempted suicide, Beck said.

Jiminez told her husband Friday night that she was sick of her life and asked him to help her burn to death, Sgt. John Johnston said.

''She told her husband she was tired of her dirty house and the cockroaches and everything else, and she asked him to set her on fire to purify her body,'' Johnston said.

The husband refused and by the time the couple went to bed he thought the crisis had passed, Johnston said. But his wife woke up early and went outside.

Horrified neighbors found Jiminez on fire in the middle of the street in front of the couple's duplex in suburban Highland Park about 6:15 a.m. Saturday.

The neighbors grabbed a garden hose and put the fire out despite Jiminez' yelling at them to leave her alone, Johnston said.

Paramedics arrived several minutes later and found her conscious, even though her injuries indicated she had been on fire for ''quite some time '' Johnston said.

Fire investigators found an empty gas can in the couple's kitchen and a book of matches was found near her body.

Fire officials said Jiminez had been despondent for the past month.

Johnston said Jiminez may have gone outside to set herself on fire out of concern for the safety of her three children, aged 1, 2, and 4.

Initially, authorities thought the two suicide attempts could be related, but further investigation revealed they were not.

''You don't have this kind of thing everyday. It's a terrible way to go,'' Johnston said.

#90203u0496 07/22/1990 ~United Press International

EAST BERLIN (JULY 22) UPI - The East German coalition parties said Sunday

they are ready to compromise on the timing of German unification to save the broad-based alliance from collapsing.

Following numerous party meetings and heated debates, the parties agreed to hold all-German elections after German unification, but still differ on the details.

''We have to look for arguments and approaches that are able to create consensus and discussion over party boundaries,'' Richard Schroeder, a social democratic spokesman, said at a special session of Parliament.

The Christian Democratic Union, the senior coalition party, said all questions concerning the final unification process will be solved in special unification committees set up by the two governments.

Members of the junior coalition parties had sharply accused Prime Minister Lothar de Maiziere of trying to split up the government by maintaing his position to have separate elections in the two Germanys before they merge.

''I can only hope that Lothar de Maiziere gives up his extremely stubborn position, otherwise he will break up the coalition,'' Wolfgang Thierse, head of the East German Social Democrats said earlier.

But de Maiziere dismissed the accusations by saying, ''I think that we are facing very grave economic and social problems which need the coalition in its current composition.''

Parliament, meanwhile, Sunday passed the budget proposal by the government of more than $39 billion for the last six months of 1990. The budget deficit will grow by $21 billion, exceeding the $18 billion in revenue.

Finance Minister Walter Romberg sharply criticized the West German government for not giving East Gemany enough money to patch up its economy.

''In the first reading of the budget proposal, I already said that the tight funding from the finance minister in Bonn left us with little room for an independent budget policy,'' he said.

Romberg said the East German government has often decided on programs which were approved by Bonn officials with a nod of the head, but not with funds.

''I regret this very much, for I would have wished for more cooperation as partners and good neighbors on the path of German unity,'' he told delegates,who responded with loud applause.

Parliament approved of a 15 percent cut in the defense budget, or $406 million. It doubled the budget for environmental protection to a total of

$501 million.

Meanwhile, the the government estimated East German unemployment will soar to an alarming 1.5 million people from the present 220,000.

The people in East Germany are ''really desperate,'' said Labor Minister Regine Hildebrandt.

She said in a radio interview Sunday the ministry expects about 1 million unemployed in the industrial sector and 250,000 jobless in agriculture.

The numbers stand in sharp contrast to 30,000 available jobs, she said. ''We do not even have the chance to offer someone a job,'' she declared.

The opposing parties in Parliament have said the faster unification comes about, the better the chance for economic improvements in East Germany through Western investment.

#90203u0504 07/22/1990 ~United Press International

BUCHAREST, Romania (JULY 22) UPI - Thousands of students demonstrated in the capital Sunday, demanding the release of two political activists jailed during anti-government violence last month.

The students, wearing white shirts and carrying flowers, chanted slogans demanding the release of activists Marian Munteanu and Nica Leon. Both were prominent figures in a 7-week anti-government demonstration in Bucharest that was broken up by police on June 13.

''The atmosphere was peaceful and the (demonstration) proceeded in a civilized manner,'' said the official Rompres news agency, adding that the protesters numbered in the thousands.

The police action last month sparked two days of anti-government violence in which six people were killed and hundreds wounded. On June 14, thousands of pro-government coal miners who poured into the capital from the countryside, attacking demonstrators and opposition supports with clubs and whips.

#90203u0522 07/22/1990 ~United Press International

CAIRO, Egypt (JULY 22) UPI - Iraqi Foreign Minister Tareq Aziz arrived in Cairo Sunday for talks with President Hosni Mubarak about the oil-state crisis that erupted when Iraq accused Kuwait and the United Arab Emirates of glutting the world oil market, the Egyptian Middle East News Agency reported.

The agency quoted its Iraqi correspondent as saying that Tareq Aziz would consult with a number of Egyptian officials to ''try to find a solution within the scope of the brotherly relations between the Arabs.''

The talks are part of a flurry of diplomatic activity among Arab nations over the charges leveled last week.

King Hussein of Jordan Saturday phoned Iraqi leader Saddam Hussein, President Mubarak and President Ali Abdullah Saleh of Yemen about the crisis, MENA reported. It said the king plans to travel around the region beginning Tuesday.

Saudi Foreign Minister Prince Saud al Faisal went to Iraq Saturday, where he met with the Iraqi leader.

Arab League Secretary-General Chedli Klibi on the same day met Emir Jabr al-Ahmed al-Sabah and Prime Minister Prince Saad al-Abdullah al-Sabah in Kuwait.

The crisis between Iraq and the two Gulf states started Wednesday when Iraq accused both states at an Arab League ministerial meeting of undermining world crude prices by dumping their oil on world markets.

Iraq also accused Kuwait of stealing $2.4 billion worth of its its oil.

Kuwait and the UAE denied the accusations and accused Iraq of drilling on its territory.

The Kuwaiti Federation of Trade Unions countercharged Saturday that Iraq had declared war on Kuwait. The Kuwaiti news agency called the Iraqi act a ''grave menace to Arab solidarity.''

The Saudi foreign minister reportedly described the row as only ''a summer cloud,'' but in Iran two newspapers Sunday supported Iraq in the dispute.

A Tehran Times editorial said cheating on production quotas set by the Organization of Petroleum Exporting Countries ''has indeed hurt OPEC and consequently all the members as it has pulled down the oil price substantially in recent months.''

Iran's news agency quoted the Tehran Times as saying that a practical ''means of punishment against quota violators seems a necessity.''

Some Western oil analysts expressed surprise that Saddam launched his attack only days after Kuwait and the UAE jointly announced production cutbacks totaling 900,000 barrels a day. The Iraqi president apparently was looking back to alleged production violations reaching back to the

mid-1980s.

#90203u0528 07/22/1990 ~United Press International
CAIRO, Egypt (JULY 22) UPI - Saudi Arabia and the People's Republic of China have agreed to establish diplomatic relations, Saudi Arabian radio reported Sunday.

The governments agreed to establish diplomatic relations as of July 21, Riyadh radio said, quoting a joint communique issued Saturday.

''The government of the Kingdom of Saudi Arabia recognizes that the government of the People's Republic of China is the sole legitimate government that represents the entire Chinese people,'' the communique said.

In return, China supports Saudi Arabian security pursuits, the report said.

''The two governments have agreed to develop cooperation and friendly relations ... on the basis of the principles of mutual respect for sovereignty and territorial integrity, mutual non-aggression, non-interference in each other's internal affairs, equality and mutual benefit and peaceful coexistence,'' the communique said.

Unconfirmed reports said the two countries were expected to exchange ambassadors in September.

#90203u0608 07/22/1990 ~United Press International
CAPE CANAVERAL, FL (JULY 22) UPI - The threat of thunderstorms and high winds Sunday postponed for 24 hours the launch of an Atlas 1 rocket carrying a $189 million science satellite, the second delay in three days for the commercial rocket's debut.

Despite deteriorating weather, engineers had pressed ahead with the rocket's countdown, hoping to launch the 143-foot-tall booster at 3:28 p.m. EDT from launch pad 36-B at the Cape Canaveral Air Force Station, two days late because of work to fix a second-stage helium leak that grounded the rocket Friday.

But before fuel could be loaded aboard the Atlas, officials at 1:30 p.m. scrubbed the launch until 3:26 p.m. EDT Monday. Forcasters, however, said there was a 50-50 chance similar weather conditions would delay Monday's launch until Tuesday, when there was an 80 percent chance of favorable weather conditions.

''The weather pattern looks about the same Monday,'' said NASA spokesman George Diller. ''Tuesday looks better.''

Mounted inside a protective 14-foot-wide nose cone was the Combined Release and Radiation Effects Satellite, or CRRES, a joint NASA-Department of Defense satellite built to study the interaction between the supersonic solar wind, Earth's upper atmosphere and the planet's magnetic field.

CRRES, a solar-powered, 3,732-pound satellite built by Ball Corp. of Denver, is equipped with 24 canisters of barium and lithium that will be released into space and detonated over the next year, ''painting'' the otherwise invisible magnetic field with vast clouds of glowing chemicals.

Program manager Richard Howard said the releases, scheduled to begin in September and continue through next July, should be ''very visible'' to observers in the United States, creating celestial displays that bear ''an uncanny resemblance'' to the aurora borealis, or northern lights.

The satellite also carries Department of Defense experiments to study the effects of space radiation on microelectronics, research expected to help engineers design satellite equipment that is better able to withstand the rigors of space.

The mission marks the debut of the Atlas 1 rocket, a commercial version of the workhorse Atlas-Centaurs built by General Dynamics Corp. of San Diego, Calif. A successful launch was considered crucial to the company's plans to win a share of the lucrative commercial launch market, dominated by the European Ariane rocket program.

CRRES originally was scheduled for launch Friday, but a liquid helium leak between the first stage of the Atlas and its Centaur second stage forced NASA managers to delay the flight with less than an hour to go before blastoff. The leak was fixed Saturday.

The Atlas 1 was valued at $64 million. But under the terms of the launch contract, General Dynamics swapped the rocket for out-of-use government launch equipment that will be modified for use in the commercial Atlas program.

CRRES was built to study the invisible bubble of Earth's magnetic field, called the ''magnetosphere,'' to learn more about how it interacts with the solar wind, a stream of electrons, protons and other particles blasted away from the sun. The importance of such research is easily seen.

When high-energy particles from a solar flare smash into the magnetosphere for example, a ''geomagnetic storm'' can occur, disrupting communications and causing problems for electrically sensitive satellites.

For each experiment, one or two canisters will be ejected into space and detonated about 25 minutes later, after the satellite is a safe distance away.

High-energy ultraviolet light from the sun then will ionize the released chemicals, changing the number of negatively-charged electrons in a given atom to give the gas an electrical charge.

The resulting ''plasma'' clouds, initially 60 miles or so in diameter, then will stretch out along Earth's magnetic field lines much like iron filings will line up around a bar magnet to make its force field visible.

By studying how the clouds move, scientists will be able to learn more about the interaction between the planet's magnetic field and atmosphere and plasmas like the solar wind. Such particles spiraling along magnetic field lines create spectacular auroral displays near the planet's poles.

Seven chemical release experiments will be conducted at altitudes ranging from 1,200 miles to 21,000 miles. The rest will take place at altitudes between 240 and 300 miles.

#90203u0624 07/22/1990 ~United Press International

ST. ANDREWS, SCOTLAND (JULY 22) UPI - Nick Faldo staked his claim as golf's dominant player Sunday, winning his second British Open title by coming within two strokes of the tournament record.

Faldo finished with a total of 18-under-par 270, sailing around the Old Course in 1-under-par 71 to defeat American Payne Stewart and Zimbabwe's Mark McNulty by five strokes.

The British star, who also won in 1987, just missed the tournament's record total of 268 set by Tom Watson in 1977 at Turnberry, Scotland.

''I'll be singing and dancing tonight, that's for sure,'' said Faldo, who also will be celebrating the 63rd birthday of his mother, Joyce. ''I'll be doing plenty of that.''

The victory was Faldo's second major championship of 1990. He won his second consecutive Masters in April and finished tied for third at the U.S. Open, missing a playoff when his short putt at the 18th hole lipped out.

Stewart, last year's PGA Championship winner, pulled within two strokes of Faldo on the back side, but three bogeys in the final six holes ended his challenge. He also finished with a 71 for a four-day total of 13-under 275.

McNulty recorded the day's best round, recording seven birdies and no bogeys on the way to a 65 and 275 total.

Next came Tournament Players Championship winner Jodie Mudd of the United States and Britain's Ian Woosnam, both at 276. Mudd fired a 66 Sunday and Woosnam a 69.

Another stroke back at 277 was Greg Norman (69), who shared the lead on each of the first two days before his game collapsed Saturday, and fellow Australian Ian Baker-Finch (73).

Faldo entered Sunday with the lowest 54-hole score in British Open history at 17-under 199, leading Stewart and Baker-Finch by five strokes. His final round was much like his 1987 Open triumph, when he parred all 18 holes to win at Muirfield, Scotland.

''I figured if I could just match (Stewart's) scores, I'd be safe,'' Faldo said. ''I was still aggressive, and was trying to hit the right shot at the right time.''

He birdied the par-4 first hole, then dropped back to par for the day when he three-putted No. 4 for a bogey. But he drove the green in two at the par-5 fifth hole and two-putted for a birdie.

Faldo rocked along from that point, recording pars except for a birdie at the par-4 15th hole and a bogey at No. 17 - the notorious Road Hole.

As his 4-foot putt dropped at the 18th hole, Faldo raised his arms in triumph, then walked over to kiss his wife, Gill.

''You would think that with a five-shot lead last night that I would know what to say,'' Faldo said as he accepted the silver claret jug that goes to the winner. ''There were some scary moments out there when (the lead) dropped back to two. I just thought I've got to hang on.''

In four rounds on the 6,933-yard Old Course, Faldo recorded an eagle, 20 birdies and only four bogeys. He played all but eight holes of the tournament in four strokes or less, with four of his 5s coming on par-5 holes.

''I had a few scary hits out there, but my iron play was really good this week,'' Faldo said. ''I only hit two shots off line, maybe three.''

Stewart, who began the day at 12-under, birdied the fifth and sixth holes, then made his charge after the turn.

He birdied Nos. 10 and 11 to move within two strokes of Faldo at 16-under. But he three-putted No. 13 to fall three shots behind. Another three-putt

at No. 17 resulted in a bogey, ending his bid.

''To finish with two bogeys was disappointing,'' Stewart said. ''To be second in the Open is irrelevant. It's the winning that it's all about. I am going to try to win, and one of these years I will do it.''

Play began Sunday under overcast skies and light winds, but the sun began peeking through as Faldo teed off and bright sunshine dominated the Old Course as the leaders made their way around.

More than 40,000 spectators lined the fairways of the 500-year-old links course. Sunday's crowd was expected to push the 1990 Open to a record attendance nearing 210,000 for the week.

American Tim Simpson recorded the only hole-in-one of the tournament on Sunday, acing the 172-yard 11th hole. He finished the day at 72 for a four-round total of 8-under 280.

-30- 4452

#90203u0674 07/22/1990 ~United Press International

PARIS (JULY 22) UPI - Greg LeMond won his second straight Tour de France Sunday in a 23-day display of power riding, teamwork and brilliant strategy.

In capturing the 77th edition of the world's most prestigious bicycle race LeMond clearly established himself as the premier rider on the circuit. He previously won the Tour de France in 1986 and 1989.

The 29-year-old from Wayzata, Minn., covered the 2,112 miles over 22 stages in 90 hours 43 minutes, 20 seconds. He beat surprising Italian Claudio Chiappucci by 2 minutes, 16 seconds. Eric Breukink of Holland finished third, 2:29 behind.

LeMond won the Tour without having captured an individual stage, the first rider to do so since 1966.

''Physically, this is the freshest I've ever been at the end of a Tour,'' LeMond said. ''Mentally - and that helped me physically - it was important knowing I had a strong team behind me.''

From the start, he battled. In the first stage, four breakaway riders took an unexpected 10 1/2-minute lead on the pack. Top riders often let a breakaway go without challenge if the participants are not seen as an overall threat. But Chiappucci, little known before this race, made the lead stand until the next-to-last stage.

In that leg, a 28-miles time trial around the Lac de Vassiviere, LeMond

needed to make up five seconds to claim the leader's yellow jersey. He beat Chiappucci by 2:21 to take a comfortable lead of 2:16 into the final stage.

That segment was raced in searing 100-degree heat, as was most of the Tour in the last week.

In the last of 22 stages, from Bretigny-sur-Orge to Paris, Johan Museeuw of Belgium won the 113-mile leg in an unofficial time of 4 hours, 53 minutes, 52 seconds.

LeMond got his biggest scare in the Tour in the Pyrenees, when he suffered a flat tire while trying to catch up Chiappucci. With the help of teammates on the Z squad, LeMond recovered the 90 seconds lost.

''I felt like an animal,'' he said. ''I don't even remember coming back to the group. I took more risks in the descent than I ever did in my life. My director said he'd never seen anyone go that fast.''

LeMond's most impressive performances, however, were in the two most difficult mountain stages, where he made up most of his deficit.

In the 113-mile 11th stage from St. Gervais-Mont Blanc to l'Alpe d'Huez, he led a late charge, then skidded around a final curve as Italian Gianni Bugno edged him at the finish.

In the 16th stage in the Pyrenees from Blagnac to Luz Ardiden, LeMond left most of the pack behind, closing within five seconds of the overall lead. But again, LeMond was beaten at the finish, this time by Miguel Indurain of Spain, who had ridden in LeMond's wake before overtaking him.

Some riders put everything into one stage. LeMond stuck to his strategy of not letting his rivals break away, using the mountains and time trials to build his advantage.

''At Alpe d'Huez, I was two inches from winning,'' LeMond said. ''At Luz Ardiden, if I had gone for the victory at the summit, I probably would have lost the Tour. What's important is the yellow jersey.''

Unlike his 1989 victory, when he raced virtually alone, LeMond owes much of the credit this year to his teammates on the Z team. Teammates are essential to pack riding because of the greatly reduced effort a rider uses when behind another cyclist.

LeMond, who earns a salary of $1.8 million, plans to donate the $363,000 top prize to his team.

''I never would have had this victory without the team - I owe them a lot

'' he said. ''And I'm going to add a bonus.''

Coming back from difficulties seems to be LeMond's specialty, and he seems to ride best when the pressure is greatest.

Last year, he made up a 50-second deficit on a time trial in the final stage into Paris to beat Laurent Fignon of France by eight seconds.

That capped a comeback from a near-fatal hunting accident in 1987 that left shotgun pellets lodged in his chest. LeMond missed the Tour de France in 1987 and 1988 because of the incident and was later hampered by appendicitis and a knee operation.

In 1986 he became the first American to win the Tour de France. In his only other starts, LeMond finished third in 1984 and second in 1985.

''I'm always motivated for the Tour de France,'' LeMond said at the start of this year's race. ''I guess that's why I always do so well. You never get tired of winning the Tour de France.''

In 1990, a virus interrupted his training. He finished poorly in the Tour de Trump and Giro d'Italia, but regained his form with a 10th-place finish in the Tour of Switzerland.

During the Tour de France, LeMond rode with saddle sores since the seventh stage. He also dislocated a finger, injured a foot and crashed twice.

''I suffered more physical problems this year than I have in any Tour,'' he said. ''But even with those I never felt like I suffered at all.''

#90203u0791 07/22/1990 ~United Press International

BEIRUT, Lebanon (JULY 22) UPI - A three-man British delegation arrived in Beirut Sunday as a politician said he would exert informal efforts in Syria to try and resolve the plight of Britons held hostage in Lebanon.

Local officials said the delegation, including Robert Adley, a Conservative Party Member of Parliament, arrived in Moslem west Beirut by air on a so-called fact-finding mission.

But analysts said they strongly believed the low-key mission would touch on the plight of Western hostages, notably the British captives, taken by Mideast extremists.

In London, the Independent newspaper reported that Gerlad Kaufman, the shadow foreign secretary for the Labor Party, traveled to Syria to try and break the deadlock over the British hostages held in Lebanon.

The envoy would ask the Syrian government to intervene and speed up the hostages' release, the Independent said.

''This is not in any sense an attempt to negotiate with Syrians,'' the Independent quoted Kaufman as saying.

Britain severed diplomatic relations with Syria in 1986 after it found evidence implicating Syrian fingers in an attempt to blow up an Israeli El Al passenger plane at London's Heathrow airport.

Syria, with 35,000 troops in Lebanon, has played a technical role in the release of Western hostages in the past.

The Independent quoted Kaufman as saying he would not be officially representing the British government.

''But it seems to me that the release of the American hostages and reports in the press of the possible release of (Irishman) Brian Keenan mean that it would be useful to see whether the Syrian government can assist with the release of British hostages,'' he declared.

The simultaneous visits to both Lebanon and Syria came after fruitless efforts earlier this month to release Keenan.

As Irish diplomats exerted efforts in Beirut and Damascus earlier this month to obtain the release of Keenan, Iranian press reports had suggested that he was on his way to freedom.

But pro-Syrian sources in Beirut said Syria sought to use Keenan's release to start a dialogue with Britain, but was met with an intransigence stance by London.

There was no official word as to why Keenan failed to surface, but the sources, who requested anonymity, reported that Syria expressed no enthuthiasm to help arrange the release.

Keenan is believed held hostage by pro-Iranian fundamentalists along with 15 other Westerners, including three Britons and six U.S. nationals.

#90203u0795 07/22/1990 ~United Press International

ROME (JULY 22) UPI - Italian President Francesco Cossiga, spurred by a television documentary suggesting a possible CIA role in Italian terrorism in the 1970s, has urged an investigation into allegations involving the U.S. intelligence agency, a letter released Sunday said.

The letter, written by Cossiga July 3 and sent to Prime Minister Giulio Andreotti, stems from a four-part report broadcast late last month on state-run Italian television.

The program featured an interview with a man calling himself Dick Brenneke who said he was a former CIA agent.

''I think it is my duty to call your attention to the program,'' the Cossiga letter said. ''In this program, people purporting to be former CIA agents were interviewed.''

Cossiga added, ''The gravity of the information broadcast includes an allegation that the CIA (was involved in) Italian terrorism through the masonic P2 lodge.''

The illegal P2, a shadowy secret group exposed publically in 1981, had a membership list of hundreds, including some of the cream of the Italian political, economic and military establishments.

Its exposure nine years ago toppled a government coalition.

Italy's ANSA news agency said magistrates questioned journalist Ennio Remondino, who worked on the program for the RAI network, about the report on July 7. Remondino had given the text of his Brenneke interview to judicial officials the day after the expose was broadcast.

In addition to the interview transcript, Remondino is said to have supplied magistrates with other documents given to him by Brenneke, including details on foreign bank accounts.

Last week, former P2 boss Licio Gelli was cleared of complicity in the 1980 bombing of a train station in Bologna, Italy, but still faces trial in Milan, Italy, on charges of fraudulent bankruptcy connected with the 1980 collapse of the Banco Ambrosiano.

Cossiga said in his letter that the investigation should probe charges by Brenneke that P2 and the CIA were also involved in the unsolved 1986 assassination of Swedish Prime Minister Olaf Palme in Stockholm.

Italy was rocked in the 1970s by a wave of terrorism from the left and right, including an alleged failed coup plot and a string of killings by the left-wing Red Brigades gang, whose victims included five-time former Christian Democrat Prime Minister Aldo Moro.

#90203u1082 07/22/1990 ~United Press International

LOS ANGELES (JULY 22) UPI - Strengthening crude oil prices, increased

summer driving and a shortage of an additive are putting upward pressure on wholesale gasoline prices in a trend that could soon be reflected at the pump, market analyst Trilby Lundberg said Sunday.

Lundberg, publisher of the Lundberg Letter, said that while retail prices were up less than a tenth of a cent in the two-week survey period ended Friday, wholesale prices were up nearly a full cent.

''We could see upward movement,'' she said. ''The retailers are under pressure to try to gain back some margin.''

She said driving increases in the summer, not only because of traditional vacations, but also because generally good weather nationwide allows for more business and commercial transportation.

Crude oil prices are strengthening and, she said, the additive MTBE is in short supply.

Atlantic Richfield Corp's Channelview plant on the Houston Ship Channel blew up June 5, killing 17 workers and shutting down a major source of MTBE, which is used to increase performance of unleaded gasoline and reduce air pollution.

ARCO announced plans Friday to work with Coastal Refining and Marketing Inc. to restart Coastal's MTBE unit at Corpus Christi to make up for the lost production.

In a survey of 13,000 service stations Friday, the Lundberg Letter said gasoline prices nationwide averaged $1.1772 at the retail level, up 0.0005 from July 6. Self-service unleaded, the biggest seller, was $1.055 per gallon.

Other self-service components of the weighted average were premium at $1.2296 and leaded regular at $1.0731.

Full-service products, which account for only 20 percent of sales, were unleaded, $1.3227; premium, $1.4593 and leaded regular, $1.2972.

MOUNTAIN VIEW, CA (JULY 23) BUSINESS WIRE - Adobe Systems Inc. (NASDAQ:ADBE) Monday announced Adobe Illustrator 3.0, a new version of the best-selling illustrator program for the Macintosh computer.

Among the product's new features are advanced text-handling capabilities, graphing and charting tools, and a new easy-to-use interface. Developed to enable design professionals to create and lay out all facets of a page, the new product is ideal for advertising and packaging design, newspaper layouts, business presentations and technical illustrations.

Adobe Illustrator 3.0 will be demonstrated in Adobe's booth at the MacWorld Exposition in Boston, Aug. 8-11.

Adobe Illustrator 3.0 is expected to ship in September 1990 and has a suggested U.S. retail price of $595. The new program also includes the new Adobe Type Manager 2.0 software (a $99 value). Registered Adobe Illustrator users can upgrade for $99 until Dec. 31, 1990. After Dec. 31, all registered users can upgrade for $149.

Customers who have purchased Adobe Illustrator 88 between July 1, 1990 and

until the product ships will receive a free upgrade.

In addition to the original Adobe Illustrator benefits of precision illustration, the program's new text-handling tools allow for direct, on-screen entering and manipulation of text, as opposed to working through a dialogue box.

With the new graph tool, users can automatically create high-quality charts and graphs. Users can choose any style graph, from grouped bars, to stacked bars, to line, area, scatter and pie charts, and then manipulate or customize them. And, when data is revised, charts and graphs are automatically updated.

The program's new interface makes the program much easier to learn, easier to use and easier to remember. Among many other enhancements, Adobe Illustrator 3.0's new interface includes interactive feedback, more easily identified tools, and enhanced dialogue boxes.

Adobe Separator software, included with Adobe Illustrator, has been completely redesigned to improve ease-of-use and to work interactively with illustrations or layouts. The new Adobe Separator also provides access to important file information, enabling users to more easily create better color separations. The program gives users the ability to preview color illustrations and provides complete compatibility with Adobe Photoshop files. New, Powerful Illustration Tools

SEATTLE (JULY 23) BUSINESS WIRE - Spanish-, Japanese-, German- and Russian-speaking travelers can now access their PLUS and VISA accounts using Security Pacific Bank of Washington's new multi-lingual automated teller machine (ATM) at Sea-Tac International Airport.

Korean and Chinese language capabilities will be added within the first month of operation, as well as vocal instructions in all six languages.

Larry Campbell, vice president and manager of Electronic Banking Administration and Development at Security Pacific, said the ATM is the first of its kind by a major bank in the Northwest, but surely will not be the last.

''The Goodwill Games are a visible example of the Northwest's increasing prominence in the international arena,'' said Campbell, ''and with expanding levels of international trade in this region there is definitely

a need for this service. Security Pacific's goal is to make the international traveler's transition into our 'currency culture' more smooth and trouble free.''

In addition to the airport ATM, Security Pacific is in the process of installing bilingual (English and Spanish language) ATMs at six Central Washington branches. The bilingual machines will accommodate the needs of the bank's expanding hispanic customer base.

''Bilingual ATMs are just part of what we're doing for our Spanish speaking Central Washington customers,'' said Campbell. ''Branch employees are being trained to appreciate cultural differences through the bank's 'Diversity in the Workplace' program, and we have bilingual branch signage and product brochures.''

The multi-lingual and bilingual ATMs are NCR's 5070 and 5085 models. Headquartered in Dayton, Ohio, NCR Corp. develops, manufactures, markets, installs and services business information processing systems for customers worldwide.

Security Pacific Bancorporation Northwest is a Seattle-based, multi-bank holding company with assets of $11.2 billion and subsidiaries operating in Washington, Oregon and Alaska. The bancorporation is an affiliate of Security Pacific Corp.

MOUNTAIN VIEW, CA (JULY 23) BUSINESS WIRE - Adobe Systems Inc. (NASDAQ:ADBE) Monday announced Adobe Type Set 3, a new package for both Macintosh and IBM computers.

Designed for graphic designers and business professionals who appreciate the value of high-quality type, Adobe Type Set 3 combines 11 of the most popular Adobe typefaces in one affordable package. At $198 Adobe Type Set 3 offers a savings of over $400 from purchasing each typeface family individually.

''Many customers want to build their own personal type library but have not been able to make the investment,'' said Kathy Englar, group product marketing manager, Adobe Systems. ''Now, this special package offers a large collection of our most popular typefaces at a very affordable price.''

Adobe Type Set 3 contains Adobe Garamond Regular, Italic, Semibold and

Semibold Italic, Helvetica Light and Oblique, Black and Oblique and Helvetica Compressed, and Tekton Regular and Oblique.

Adobe also offers Adobe Type Set 1 and Adobe Type Set 2 for $99 each. Each of these packages contains seven different display typefaces from the Adobe Type Library. ''After thoroughly researching our customers' type needs, we developed the three Type Set collection,'' Englar said.

''We plan to continue our aggressive posture in bringing high-quality type in the right combinations to our customers.''

Adobe Type Set 3 is available Aug. 1, 1990, from all Adobe authorized dealers and has a recommended U.S. retail price of $198. Interested customers can contact Adobe at 1-800-83-FONTS.

Adobe Systems Inc. founded in 1982 by Dr. John Warnock and Dr. Charles Geschke, has headquarters in Mountain View. Adobe is the developer of PostScript, the industry standard page-description language for the electronic printing and publishing fields, and Display PostScript, a device-independent graphics imaging model that drives screen displays.

In addition the company develops and markets a complete line of application software programs, including the award winning Adobe Illustrator and Adobe Type Manager, the Adobe Type Library, Adobe Streamline, the PostScript Cartridge, and Adobe Photoshop. Revenues for fiscal 1989 were over $121 million.

     #90204b0016 07/23/1990 ~Business Wire

CUPERTINO, CALIF. (JULY 23) BUSINESS WIRE - Tandem Computers Inc. (NYSE:TDM) Monday announced that Swissair, headquartered in Zurich, Switzerland, purchased NonStop CLX midrange computers for a paperless air cargo application that is currently under development.

Swissair intends to improve efficiency by electronically creating and distributing air cargo documentation through Electronic Data Interchange (EDI). British Telecom, headquartered in London, England, is developing the software for the application.

Air cargo shipments generate substantial documentation, including bills of

lading, waybills, customs dockets, and invoices, that must be distributed to carriers, handlers, customs authorities, consignees, banks, and insurers. Swissair expects that the benefits of the system will be faster document data transmission, greater accuracy, reduced costs, improved recordkeeping, and better customer service.

The air cargo industry has its own EDI standard called Cargo Community System-Interchange Message Procedures. The EDI standard is designed to interconnect computer systems from multiple vendors operated by all organizations concerned with a shipment, as well as translating different message structures into a common format.

The Swissair application will comply with this standard, as well as more widely used protocols, such as X.25 packet switching and the United Nations-supported Edifact.

Swissair is developing the system and piloting it, in cooperation with the International Air Transport Association (IATA). IATA has identified a number of other airlines and airports worldwide as potential system users, and Swissair and British Telecom will subsequently market the system to them.

Tandem manufactures and markets computer systems and networks for online transaction processing, large database applications, and the UNIX system marketplace. Company headquarter are located in Cupertino, 408/725-6000.

#90204b0020 07/23/1990 ~Business Wire

COLUMBUS, IN (JULY 23) BUSINESS WIRE - Cummins Engine Co. Inc., today reported net earnings for the second quarter ending July 1 of $6.1 million or 15 cents primary and fully diluted earnings per common share, on sales of $871.3 million.

In the first quarter of 1990, Cummins reported net earnings of $8.9 million, or primary and fully diluted earnings per common share of 41 cents, on sales of $861.4 million.

Although earnings were somewhat lower than those reported in the first quarter, Cummins said control of managed expenses and reduced warranty expense favorably affected second quarter results. These improvements were, however, partially offset by a reduction in results from the company's Brazilian subsidiaries following implementation of that country's new economic program and by increased costs of introducing products to meet 1991 federal emissions standards.

For the second quarter of 1989, Cummins reported net earnings of $23.9 million, or $2.03 primary and $1.74 fully diluted earnings per common share, on sales of $930.9 million. While Cummins' sales to North American heavy-duty truck producers were considerably stronger in the second quarter of last year, company profits were reduced at that time by high warranty expense of 4.7 percent of sales. In the second quarter of 1990, warranty expense was 2.6 percent of sales.

For the first six months of 1990, Cummins' net earnings were $15.0 million or 56 cents primary and fully diluted earnings per common share, on sales of $1.7 billion. This compares with first-half 1989 net earnings of $43.4 million, or $3.65 primary and $3.21 fully diluted earnings per common share, on sales of $1.9 billion.

The company said, while it anticipates better third quarter results than those for the same period in 1989, it expects to report a loss for the quarter. It does not foresee making supplemental warranty reserves for the period as it did in third quarter 1989. Improved performance will come despite the expectation that production in the company's major market, North American heavy-duty trucks, will be down 10 percent from the same quarter last year and down 33 percent from the peak of this cycle in the second quarter of 1989. Cummins said the outlook for the fourth quarter depends on market conditions.

Cummins, headquartered in Columbus, is a major producer of diesel engines, components and power systems for trucks and industrial equipment.

#90204b0022 07/23/1990 ~Business Wire

NEWPORT, KY (JULY 23) BUSINESS WIRE - NS Group Inc. (ASE:NSS) announced Monday its fiscal 1990 third quarter and nine month results.

Net sales for the third fiscal quarter ended June 30, 1990, were $64.2 million, compared to $59.5 million for the third quarter a year ago. Net income was $3.3 million, or 24 cents per share, vs. $4.2 million, or 32 cents per share for the comparable quarter.

For the nine months ended June 30, 1990, net sales were $183.0 vs. $161.2 million for the first nine months of fiscal 1989. Net income for the nine month comparable periods was $9.7 million, or 72 cents per share, vs. $9.4 million, or 70 cents per share a year ago.

C. R. Borland, president and chief executive officer of NS Group Inc.

noted: ''. . . the results for the year thus far have been quite rewarding. Shipments and sales dollars for both tubular and bar products have increased in each of the first three quarters of the fiscal year, putting us on ace for a recording-setting year.

''Kentucky Electric operated near full capacity for the entire third quarter and their order backlog will keep them full for the next three months plus. Unfortunately, overall weaker pricing in the steel industry in general has kept average selling prices at Newport Steel and Kentucky Electric at or below the levels of a year ago, resulting in downward pressure on third quarter earnings.

''Year-to-date, however, earnings have kept pace with the prior year, primarily on the strength of the improvement in shipments of tubular products. Recently announced price increases in both the tubular and bar industries have added to our optimism for improvement in pricing in the coming months.''

Borland further noted that the improvement in Newport Steel's business is timely with the completion of Newport's new continuous slab caster less than two months away. Scheduled for start-up in September, the caster will bolster operating results through greatly improved product quality and operating efficiencies at the tubular steel manufacturer.

NS Group Inc. is a holding company that owns four operating subsidiaries: Newport Steel Corp., a tubular steel producer; Kentucky Electric Steel Corp., a producer of steel bars; Erlanger Tubular Corp., a processor of tubular products; and Imperial Adhesives Inc., an adhesives manufacterer.

#90204b0025 07/23/1990 ~Business Wire

MILWAUKEE (JULY 23) BUSINESS WIRE - Federated Bank, S.S.B. (OTC:FEDF) today announced net income for the third quarter of fiscal 1990 of $133,076 or 10 cents per share, the highest in six quarters.

This compares with a loss of $45,943 or 3 cents per share for the same quarter last year. Net income for the first nine months of fiscal 1990 was $219,585 or 16 cents per share, vs. $237,811 or 17 cents per share in 1989.

Core income from operations (before tax and excluding nonrecurring gains and loan and REO loss provisions) was $230,912 for the third quarter of 1990, compared with a loss of $40,816 in the third quarter of 1989.

Net interest income for the quarter ending June 30, 1990, was up 18 percent to $1.78 million from 1989. Net interest spread for the nine months ending June 30, 1990 was 1.79 percent, and 1.95 percent for the most recent quarter, showing a consistent improvement for the last four quarters. General and administrative expenses (excluding REO loss reserves) remained unchanged for the third quarter of fiscal 1990 at $1.8 million as compared to the previous year.

Stockholders' equity remained unchanged from the previous quarter at $21 million or $15.33 per share. This represents an equity-to-asset ratio of 7.19 percent based on total assets of $294 million as of June 30, 1990.

The previously announced merger of Hopkins Savings with Federated was approved by the Office of Thrift Supervision (OTS) on June 21, 1990. A subscription offering to Hopkins depositors was completed on June 18, 1990 and a private placement for the balance of the stock offering is now being finalized. Hopkins has not yet been consolidated with Federated, resulting in separate financial information for each company.

#90204b0026 07/23/1990 ~Business Wire

OVERLAND PARK, KS (JULY 23) BUSINESS WIRE - George E. Powell, Jr., chairman of the board of Yellow Freight System Inc. of Delaware (NASDAQ:YELL) reported to shareholders Monday that second quarter operating revenue of $570,044,000 was 1 percent higher than the same period of 1989.

Net income for the quarter was $16,449,000, or 58 cents per share, down from $18,463,000, or 64 cents per share, earned in the same quarter last year. For the six months ended June 30, 1990, operating revenue was $1,137,506,000, up 4 percent from the first half of 1989.

Net income totaled $29,880,000, or $1.05 per share, down from the $34,221,000, or $1.19 per share, earned in the same period of 1989. These prior year results do not include the impact of adopting the Financial Accounting Standards Board's Statement No. 96, Accounting for Income Taxes which increased net income by $29,200,000, or $1.01 per share, for the first quarter of 1989.

Less-than-truckload (LTL) tonnage as well as total tonnage was down 1 percent in the second quarter of 1990 compared to the same period last year. Higher weight per shipment was offset by a 4 percent decline in shipments handled.

These results reflect the company's continuing policy of price restraint as well as the economy's modest growth. For the first half of 1990 both LTL and total tonnage were up 2 percent.

In accordance with the current labor contract, wages and benefits were raised 3% effective April 1, 1990. To help offset this, as well as other cost increases, the company implemented a 4 percent average rate increase on June 4 that will have an initial impact on revenue of 2 3/4 percent.

The company has been successful in retaining the benefits of this increase. Yellow is determined to meet its obligation to its customers to provide high levels of service, while also fulfilling its obligation to its shareholders to provide a satisfactory return on their investment.

#90204b0028 07/23/1990 ~Business Wire

NEW CASTLE, IN (JULY 23) BUSINESS WIRE - Ameriana Bancorp (NASDAQ/NMS:ASBI), the holding company for Ameriana Savings Bank, Monday announced a 20 percent increase in net income and a 17 percent increase in earnings per share for the second quarter of 1990, compared with the same period last year.

Other highlights of the quarter included higher total assets, loans outstanding and mortgage-backed securities, and deposits, compared with both the preceding quarter and year-earlier amounts.

Net interest income for the quarter ended June 30, 1990, rose 4 percent to $2,369,000 compared with $2,281,000 in the same quarter last year. Net income totaled $651,000 or 34 cents per share compared with earnings of $543,000 or 29 cents per share in the second quarter of 1989, representing an increase in net income and earnings per share of 20 percent and 17 percent, respectively.

For the first half of 1990, Ameriana posted a 3 percent increase in net interest income to $4,606,000. Earnings for the six-month period rose 21 percent to $1,285,000 or 68 cents per share.

Paul W. Prior, chairman of the board, noted that Ameriana's higher earnings for the quarter reflected continued improvement in its net interest spread and lower operating expenses compared with the 1989 periods. ''We are indeed encouraged by the continued strength of our core banking operations, which have demonstrated steady improvement for several quarters,'' said Prior.

Prior pointed out that Ameriana's provision for loan losses remained at a traditionally low amount for the quarter, reflecting Ameriana's conservative lending policies. ''Recently the Office of Thrift Supervision completed its periodic review of Ameriana's lending operations and loan portfolio,'' Prior remarked.

Ameriana Bancorp, through its wholly owned subsidiary, Ameriana Savings Bank, offers an extensive line of banking services to the east central Indiana area through offices in New Castle, Knightstown, Middletown and Greenfield.

In addition to banking services, Ameriana, through Ameriana Financial Services, Inc., has an interest in a life insurance company headquartered in New Orleans, owns Thalls Ameriana, a full-service insurance agency in New Castle, and provides a full line of investments and securities products in its brokerage center.

#90204b0038 07/23/1990 ~Business Wire

SEATTLE (JULY 23) BUSINESS WIRE - SAFECO Corp. Monday reported net income of $76 million, or $1.20 per share, for the second quarter of 1990, compared with $1.17 per share in 1989, reflecting continued strong earnings in its life and health companies and non-insurance subsidiaries, and the investment income produced by its property and casualty companies.

Chairman and Chief Executive Officer Bruce Maines said that the corporation's operating results for the first six months of the year were slightly better than the same period in 1989.

Underwriting losses in property and casualty insurance operations were $25.6 million for the second quarter, compared with a loss of $8 million a year ago. These results stem from underwriting losses in private passenger auto insurance and commercial insurance. They also include the impact of the June fires in the West.

Personal lines underwriting losses were $11.3 million for the second quarter, compared with a profit of $3.2 million in the same quarter in 1989. ''The largest component of these losses was in the automobile line '' Maines said. ''We see no end to the trend in increasing frequency and severity of claims.'' Voluntary auto insurance produced an underwriting loss of $5.4 million for the second quarter, while non-voluntary personal auto (assigned risk) losses were $6.5 million, with $4.6 million attributable to California. ''Nearly a year has passed since the California insurance commissioner first called for hearings on Proposition

103. The ultimate resolution of all issues concerning the proposition continues to be unclear,'' Maines said.

Homeowners insurance produced underwriting losses of $700,000 for the second quarter. ''Five million dollars in claims from fires in California and Arizona in June adversely affected our homeowners results,'' Maines said. ''Disasters such as these can take a heavy toll.''

Losses from the severe Denver hailstorm of July 11 will be recorded in the third quarter. Based on information received so far, they are expected to be approximately $15 million, Maines said. If losses of this type total more than $20 million, 95 percent of any amount over $20 million will be covered by reinsurance.

Commercial lines insurance produced an underwriting loss of $17.9 million in the second quarter, while surety profits were $3.6 million. Property and casualty investment income for the quarter was $70.2 million, compared with $63.7 million for 1989.

All SAFECO life and health product lines reported strong profits, and life and health company assets reached the $5 billion mark during the quarter. ''The second quarter operating income was $32.1 million, a record high, compared with $25.6 million for second quarter 1989,'' Maines said. ''Income from our group insurance operation was very favorable, and our pension and annuity lines continue to report solid growth in both profits and deposit activity.''

SAFECO's non-insurance subsidiaries also produced positive results. SAFECO Properties Inc. reported a pre-tax profit of $2 million for the quarter, compared with a loss of $1 million for 1989, and pre-tax operating income for SAFECO Credit Co. was $1.5 million, compared with $1.6 million in 1989.

KANSAS CITY, MO (JULY 23) BUSINESS WIRE - UtiliCorp United (NYSE:UCU) Monday announced that its PSI subsidiary and an investment partner have completed the acquisition of Clajon Holdings, LP.

PSI has paid approximately $50 million in the transaction and owns a 49 percent interest in Clajon.

PSI and EnCap Financial Services Inc. of Dallas, have purchased all outstanding equity in Clajon for $65 million and paid additional expenses

related to the transaction of approximately $5 million. In addition, Clajon's existing senior bank debt of approximate ly $30 million has been refinanced with a nearly identical senior credit line.

Under terms of the partnership agreement PSI has an option to purchase at a later time all of EnCap's interest in Clajon and EnCap has an option to sell its interest to PSI.

Clajon, headquartered in Midland, Texas, owns and operates a 1,200-mile intrastate gas transmission and gathering network, two processing plants that extract and sell natural gas liquids and a subsidiary that markets natural gas and associated natural gas liquids. The company has 154 employees.

Clajon gathers gas from more than 1,100 wells and transports it to other pipeline systems through its own pipeline network located throughout south-central Texas. Clajon's largest pipeline system is located in the seven-county Austin Chalk gas fields east of Austin, Texas. Total system transportation capacity is 450 million cubic feet per day.

PSI, a wholly owned subsidiary of UtiliCorp based in Omaha, Neb., is one of the nation's major marketers and suppliers of natural gas. PSI owns proven gas and oil reserves, located in offshore areas of Louisiana, Texas and in Oklahoma. It also owns a 280-mile intrastate pipeline system in western Oklahoma.

EnCap Financial Services Inc. is an institutional funds manager specializing in energy related financings and oil and gas property acquisitions. The firm has raised more than $250 million in the past two years for various oil and gas related transactions.

Based in Kansas City, UtiliCorp provides gas and electricity to 820,000 customers in eight states and in Canada through six regulated divisions and a subsidiary. PSI, UtilCo Group and EnerGroup are non-regulated subsidiaries specializing in utility and energy related enterprises.

#90204b0050 07/23/1990 ~Business Wire

PITTSBURG, KS (JULY 23) BUSINESS WIRE - National Pizza Co. (PIZA) Monday announced record sales and earnings for its first fiscal quarter.

For the fiscal quarter ended June 26, 1990, net sales of $68,531,000 increased 74 percent over the $39,459,000 reported for the similar period

ended June 27, 1989.

Sales in comparable Pizza Hut units increased approximately 17 percent while per restaurant averages increased more than 2 percent in the Skipper's restaurants.

Operating income for the period ended June 26, 1990, of $8,105,000 increased 34 percent over the prior year.

Net income for the fiscal quarter of $4,285,000 was up 17 percent over the $3,653,000 reported in the similar fiscal 1990 quarter.

Earnings per share of 31 cents was up over 19 percent compared to the 26 cents reported for the 13 weeks ended June 27, 1989.

Gene Bicknell, chief executive officer, stated, ''We are pleased to report record sales and earnings despite the impact of the recent increase in the minimum wage and higher cheese prices. These cost increases were offset by the exceptionally strong comparable sales numbers in our Pizza Hut operations.

''We believe this extraordinary sales growth is among the highest experienced by any operator in the quick service segment of the restaurant industry. Although we anticipate even higher cheese prices, combined with increases in insurance and advertising expenditures in future periods, we are confident we can continue to grow our earnings at a 20 + percent compound rate.''

National Pizza is the largest Pizza Hut franchisee in the world and currently operates 357 Pizza Hut restaurants and delivery kitchens in 13 states. The company also operates and franchises 204 Skipper's quick-service seafood restaurants in 12 western states and British Columbia. The company's common stock is traded on the NASDAQ National Market System under the symbol ''PIZA''.

OAKLAND, CALIF. (JULY 23) BUSINESS WIRE - Civic BanCorp, (NASDAQ:CIVC) the holding company for CivicBank of Commerce, announced that its board of directors voted to declare a five percent stock dividend that will be paid Aug. 10, to its shareholders of record as of July 31.

The stock dividend will be paid in shares of Civic BanCorp stock, one share of common stock for every twenty shares of stock outstanding in the company. This is the company's third stock dividend in the past eighteen months.

Civic BanCorp reported assets of $343,798,000 for the second quarter as of June 30, up 49 percent compared to $231,374,000 as of June 30, 1989.

The company reported earnings per share at 30 cents for the quarter ended June 30, an increase of 20 percent from 25 cent earnings per share for the like period in 1989. Earnings per share were 59 cents for the six months ended June 30, up 20 percent compared with 49 cents a year earlier. All per share amounts have been adjusted to reflect 5 percent stock dividends paid in 1988 and 1989.

Also during the first six months of 1990, the bank completed a major part of the conversion with the former Meridian National Bank which was acquired by CivicBank on Jan. 1, 1990, closed duplicate operations centers and moved its administrative offices to larger, more efficient space in downtown Oakland.

Registered market makers for Civic BanCorp's common stock are Bateman Eichler, Hill Richards, Inc. in San Francisco, Keefe, Bruyette & Woods in San Francisco, Kidder Peabody in San Francisco and VanKasper & Co. in Walnut Creek.

SAN FRANCISCO (JULY 23) BUSINESS WIRE - Reference Software Monday announced that it has sold more than 4,000 units of their new Grammatik Windows since its release June 18.

Grammatik Windows is the only grammar checker for recently released Microsoft Windows 3.0.

Currently, Reference Software is on a 22-city Egghead Windows Tour and today announced plans to participate in both Kenfil's Windows of Opportunity nine-city tour and Ingram Micro D's eight-city Windows Road Show to promote Windows and its top applications.

Kenfil's Windows of Opportunity showcases Windows products to both the reseller and corporate markets. The Ingram Micro D Windows Road Show is targeted to reach top resellers.

The popularity of Grammatik Windows is an indication of the acceptance of Grammatik in the high-end corporate market. With more than 500,000 units sold, Grammatik is the best selling grammar checker on the market today.

For more information about Grammatik Windows or current Reference Software developments contact Pat Meier Associates Inc. or Reference Software.

BOULDER, CO (JULY 23) BUSINESS WIRE - Paul D. Whittle, president of American Educational Products Inc. (NASDAQ:AMEP), Monday announced the results of second quarter operations ended June 30, 1990.

American Educational Products Inc. achieved record sales and profits for the second quarter ended June 30, 1990. Sales for the three months ending June 30, 1990 were $1,237,750, up 22 percent from the $1,017,244 reported for the second quarter of 1989. After-tax earnings for the second quarter of 1990 were $138,085, or $.066 per share, an increase of 55 percent over the $88,909, or 5 cents per share, reported for the the same period in 1989.

The after-tax profit for the first half of 1990 was $184,657, or $.089 per share, based on sales of $2,029,946, an increase of 67 percent from the 1989 first half profits of $110,282, or 6 cents per share on sales of $1,668,685.

On May 22, 1990 American Educational Products Inc. was selected by the ''Colorado Association of Commerce and Industry,'' the ''Colorado Business

Magazine'' and ''Coopers & Lybrand'' as the Wholesale/Retail industry's Colorado ''Company of the Year'' in the 1990 competition. The company's selection by this group was based on the company's ''1989 financial performance'' and the company's ''quality of management.''

American Educational Products Inc. is a NASDAQ listed firm, symbol AMEP, that specializes in the design, manufacture and distribution of educational mathematics and earth science/geology products to the nations school systems.

PORTLAND, Ore. (JULY 23) BUSINESS WIRE - Earnings at Northwest Natural Gas were up during the second quarter from last year's results, aided by cooler weather and new customer additions, Robert L. Ridgley, president and chief executive officer, said Monday.

Earnings for the quarter were 9 cents per share, up 2 cents from 1989. Year-to-date earnings were $1.56 per share, down from last year's $1.80 per share when extreme cold weather contributed to record first-quarter results.

Consumptions by the company's weather-sensitive residential and commercial customer classes increased over last year.

Industrial gas sales and transportation for the second quarter were 126 million therms, down from 157 million therms in 1989. However, last year's results included 43 million therms of deliveries to PGE's Beaver and Bethel turbine generating plants, which did not operate during this year's second quarter. The company and PGE recently entered a new 18-month contract for natural gas transportation to the Beaver plant, which returned to service in early July.

The company's net income available for common stock for the second quarter was $1,066,000 compared to $726,000 in the same quarter of 1989. For the 12 month period, net income available for common stock was $24,292,000 as of June 30, 1990, compared to $25,331,000 as of June 30, 1989.

The company's board of directors declared a quarterly dividend of 41 cents per share on its common stock, as well as dividends on preferred and convertible preference stock, to be paid on Aug. 15, 1990, to shareholders of record on July 31, 1990.

Northwest Natural Gas is the largest gas distribution utility, in terms of

gas volumes delivered, in the Pacific Northwest, serving customers in Oregon and Southwest Washington.

FOSTER CITY, Calif. (JULY 23) BUSINESS WIRE - Cell Genesys, a new biomedical company, has completed its first round of venture capital financing, raising over $7 million for the development of human therapeutic products based on homologous recombination technology, an advanced form of cellular genetic engineering.

Together with earlier seed funding, this brings the total amount raised to date to approximately $8.5 million. Investors include the Mayfield Fund, Robertson Stephens & Co., U.S. Venture Partners, Interwest Partners and Stanford University.

''The magnitude of this early funding indicates a high degree of excitement about the commercial potential of our core technology, homologous recombination, and about the contributions that Cell Genesys will make to clinical medicine,'' commented Stephen A. Sherwin, M.D., president and chief executive officer.

Homologous recombination is a recently developed and broadly applicable technology which allows mammalian cells to be ''engineered'' in ways that were previously impossible. Unlike recombinant DNA technology, homologous recombination enables scientists to replace, activate and inactivate selected genes within cells.

This capability permits tightly regulated, permanent changes in cellular functions, thereby enabling human cells to serve as important sources of new therapeutic compounds or be used themselves as therapies for a wide range of difficult-to-treat diseases.

''Our goal is to build the premier company in this field,'' Sherwin said. ''Toward this end, we have implemented an aggressive product development plan, with particular emphasis on genetic modification of cells to allow the manufacture of human therapeutic proteins and genetic modification of cells to create 'universal donor cell' transplant products.

Cell Genesys Inc. began operating in late 1989 and now occupies a 10,000 square foot laboratory facility in Foster City, Calif., a few miles south of San Francisco.

#90204b0071 07/23/1990 ~Business Wire

FREMONT, CA (JULY 23) BUSINESS WIRE - The San Francisco Examiner has broken new ground by conducting the first ever election-day exit poll using GRiDPAD, the only computer in America that recognizes handwriting and uses an electronic pen interface instead of a keyboard.

The battery-powered, MS-DOS compatible computers replaced the slow and cumbersome manual process that market researchers have used for years to sample the public's opinion on everything from voting to toothpaste brand preference.

The exit polls were conducted for the newspaper during the June primary election in California by Richard Hertz Consulting, a market research firm. Polling questionnaires appeared on the computer's screen and data was entered on the screen with a pen.

Richard Hertz, president of the Bodega Bay, Calif.-research company, credited GRiDPAD with ''significantly increasing the speed and accuracy of the polling process. It allowed us to conduct more election day interviews, and more in-depth interviews, that provided the Examiner with immediate insight on why people voted for various candidates and initiatives.

After the polling was completed, the information was electronically transferred to a minicomputer which analyzed the results. Within hours, the Examiner was able to shed light on why people voted as they did.

GRiDPAD is a fully IBM-PC compatible, 4.5-pound, hand-held computer the size of a clipboard. The computer, introduced in September, also captures and stores signatures and graphics which can be transmitted by a built-in modem.

The poll taker, Sylvia Covington, said this was her first experience polling with computers. ''I'm totally computer illiterate,'' she said.

GRiD manufactures and markets laptop, pen-and-display and desktop computers and electronic mail/networking systems. GRiD, which has a worldwide direct sales and support organization, demonstrates products at more than 50 GRiD Systems Centers and sells products through application specific value added resellers.

GRiD is a wholly owned subsidiary of Tandy Corp., of Fort Worth, Texas. Tandy is a leading manufacturer and distributor of consumer electronics

and computers. A New York Stock Exchange company, Tandy has sales in excess of $4 billion annually.

LOS ANGELES (JULY 23) BUSINESS WIRE - HarCor Energy Inc. (NASDAQ:HARC) Monday announced that its Canadian subsidiary, Consolidated HCO Energy Ltd. (HCO), has entered into an agreement with QC Oil and Gas Ltd.

Partnership for the placement of up to 259,000 shares of HCO's common stock at $1.93 (Canadian dollars) per share.

Proceeds of the issue, $500,000 (Canadian dollars), will be used for funding certain of HCO's exploration expenditures, with the tax benefits derived therefrom flowing through to QC.

HarCor also announced that during the second quarter HCO successfully completed two gas wells. The first, in which HCO holds a 50 percent working interest, will be placed on production at 1 MMCFD by Nov. 1, 1990. The second, in which HCO holds a 25 percent-before-payout interest, is scheduled for tie-in the first quarter of 1991.

Immediate plans call for the drilling of several offset wells prior to 1990 year-end. HarCor, for its own account and through its wholly owned subsidiary, HTAC Investments Inc., currently controls 50.04 percent of HCO.

Commenting on these developments, Mark Harrington, chairman and chief executive officer of HarCor, stated: '' We are very pleased with the early success achieved in our Canadian subsidiary's drilling program. HCO's plans call for drilling at least 10 additional exploration prospects before year-end.

HarCor is a Los Angeles-based oil and gas company with interests in the United States and Canada.

#90204b0087 07/23/1990 ~Business Wire

SOUTH SAN FRANCISCO, CA (JULY 23) BUSINESS WIRE - Genentech Inc. Monday announced that human clinical trials of DNase have begun.

The recombinant form of the mucus-dissolving enzyme will be studied for its potential to improve lung function in patients with cystic fibrosis and other bronichial diseases.

The Phase 1 studies are underway at two centers: the National Heart, Lung and Blood Institute, which is a division of the National Institutes of Health, and the University of Washington, Seattle. Adult volunteers have been enrolled for the purposes of evaluating the safety and appropriate aerosolized dosing regimen of the recombinant enzyme. Children and adolescents afflicted with cystic fibrosis wil be studied in subsequent trials.

DNase is a recombinant form of a naturally-occuring enzyme which dissolves the extracellular DNA released by the inflammatory cells that accumulate to fight lung infections. The extracellular DNA contributes to the thick infected mucus secretions of patients with cystic fibrosis, compromising their normal lung function. Through a series of clinical trials, Genentech will evaluate the potential of DNase to reduce the viscosity of infected mucus to facilitate removal of the secretions.

It is hoped that this will improve lung function and help improve and prolong the quality of cystic fibrosis patients' lives.

Genentech has requested that the Food and Drug Administration grant Orphan Drug designation for DNase for the treatment of patients with cystic fibrosis. Approximately 30,000 children and young adults in the United States are afflicted with the inherited disease. Many of them die due to respiratory failure brought on by repeated lung infections. The median survival age is 28 years.

DNase is Genentech's second product to enter clinical trials in 1990. In February, the company began Phase 1 trials of relaxin, a hormone which might facilitate childbirth in near-term pregnancies, and provide an alternative to cesarean section deliveries.

Genentech Inc. is a leading biotechnology company focusing on the development, manufacture and marketing of pharmaceuticals produced by recombinant DNA technology.

#90204b0097 07/23/1990 ~Business Wire

SAN FRANCISCO (JULY 23) BUSINESS WIRE - One week after filing a technology misappropriation suit against the Japanese industrial concern Kubota, Allen H. Michels and Matthew H. Sanders, founders of Ardent Computer were dismissed as officers of Stardent Computer Corp. by vote of the Japanese dominated board of directors.

''Our terminations are unlawful and retaliatory'' Michels and Sanders said ''this compounds the illegal acts alleged in our complaint and we plan to seek immediate redress in the courts.''

Joseph Alioto, attorney for the plaintiffs, stated that ''far from being deterred by the illegal terminations, we shall prosecute our claims vigorously to secure the earliest possible trial date against anticipated delay tactics by the Kubota defendants."

The executives claimed the board acted under pressure by Kubota and warned that ''submission to Japanese power plays in the sensitive supercomputer industry is a disservice to the national interest.''

Michels and Sanders will continue pressing their claims against Kubota, its subsidiaries and officers noting that ''there has been no specific denial of any of the factual allegations so painstakingly detailed in our complaint.''

Their lawsuit filed July 12 in Santa Clara County Superior Court alleges that Kubota threatened to withhold agreed upon financial commitments to Ardent in order to force the merger with Stellar Computer of Newton, Mass. and then subsequently conspired to shift control of the merged company's technology and key engineers into a wholly owned Kubota subsidiary in the United States.

The suit alleges that Kubota secretly planned to develop products that would compete with Stardent in worldwide markets, despite agreements restricting Kubota to distributing Stardent products to the Far East.

#90204b0104 07/23/1990 ~Business Wire

NEW YORK (JULY 23) BUSINESS WIRE - Shearson Lehman Hutton has announced the creation of a new division, The Consulting Group, which will provide investment management evaluation and data services to the firm's independent advisory programs.

The move is designed to meet the needs of the firm's rapidly growing independent advisory programs by expanding its due diligence and data management operations into a separate operation.

''The Consulting Group will take our already strong due diligence programs into the 1990s,'' said Len Reinhart, senior vice-president of the Consulting Services Division, who will be named president of the group.

''The increasing complexities of the domestic market and expansion of our independent advisory programs into the international market have made it desirable to expand our internal capabilities and allow us to conduct even more analysis and research for our client base.''

Since 1973, due diligence has been performed by specialists working within Shearson's Consulting Services Division. Under Don Robinson, first vice president of CSD who will be named executive vice president of the new

division, a team of research analysts has relied on a vast proprietary database and sophisticated computer programs to develop quantitative and qualitative criteria with which to evaluate money managers.

The new division will expand on this and perform other services for clients using a highly disciplined approach.

In establishing The Consulting Group, Shearson is separating the research and database management function from its marketing operations.

Noting that other firms are now establishing programs similiar to those pioneered by CSD, John Ellis, executive vice-president who co-founded CSD, said, ''The proprietary research process we've developed over the years remains unique. By taking this step today, we are insuring that we retain our leadership position in the future.''

Under the auspices of the Consulting Services Division, the organization has evaluated over 3,000 money managers and maintains detailed information on about 1,000. Analysts conduct regular detailed on-premise visits yearly to over 250 investment advisors as part of its due diligence effort.

The newly created Consulting Group, as well as the entire Consulting Services Division, sells no research or marketing data to money managers as part of its goal to maintain complete objectivity and avoid any potential conflict of interest.

Since 1973, the Consulting Services Division has placed over $65 billion with independent money managers. Today, the programs to be served by The Consulting Group have over $30 billion on behalf of more than 25,000 clients, making it the largest broker-related consulting firm in the country.

Clients range from major institutional accounts having over $1 billion each, to over 10,000 clients in the Select managers program with portfolios from $100,000. Total assets in the Select program are $2.7 billion.

WEST ALLIS, WI (JULY 23) BUSINESS WIRE - Sullivan Dental Products Inc. (NASDAQ:SULL), a Milwaukee-based distributor of dental supplies and dental equipment, today reported sales of $11,360,000 for its second quarter ended June 30, 1990, compared to sales of $8,198,000 for its second quarter ended June 30, 1989, an increase of 39 percent.

Sales for the six month period ended June 30, 1990 totaled $21,695,000 compared to sales totaling $15,542,000 during the same period in 1989, an increase of 40 percent. Increased sales were due primarily to internal growth coupled with the addition of new sales representatives.

The company reported net income of $564,000 for the quarter ended June 30, 1990, a 55 percent increase over net income of $365,000 during the same period in 1989.

Net income for the six months ended June 30, 1990, was $1,004,000, a 53 percent increase over net income of $657,000 during the same period in 1989.

In an initial public offering April 18, 1990, the company sold 970,000 shares of common stock. For the three month period ended June 30, 1989, based upon 2,475,000 average shares outstanding, earnings per share were 15 cents. For the corresponding three month period in 1990, based upon 3,264,000 average shares outstanding, earnings per share were 17 cents. For the six month period ended June 30, 1989, based upon 2,475,000 average shares outstanding, earnings per share were 27 cents. For the corresponding six month period in 1990, based upon 2,872,000 average shares outstanding, earnings per share were 35 cents.

The company's new Western Region Distribution Center in Livermore, Calif., became operational June 6, 1990, more than three weeks ahead of schedule. All products for the 11 western states are now being shipped from the new facility.

DALLAS (JULY 23) BUSINESS WIRE - In an effort to facilitate the acquisition of Continuing Education (CE) credits, Financial Satellite Network (FSN) and The American College jointly announced Monday an agreement for nationwide satellite distribution of programming for financial service professionals to help them meet state life insurance licensing requirements.

In recent years, insurance products have become more diverse and the federal tax code more complex. Consequently, to keep up with the changes an increasing number of states are enacting varied and more stringent CE requirements for most investment professionals, including the more than 75 percent of stockbrokers who are insurance licensed.

Ten years ago, no state required CE credits for individuals working in insurance licensed sales. As of July 1, however, 28 states had implemented different laws governing CE (four more have laws that will go into effect later in the year).

The growing emphasis on CE and increased state licensing requirements are moves to maintain the level of knowledge and professionalism within the financial services industry, placing more responsibility on insurance agents, bankers, brokers and others to obtain CE credits.

The collaboration between FSN and The American College, in which program content will include such topics as retirement planning, disability planning, estate and tax planning, and pension planning, offers them a cost-effective and efficient means by which to do so.

The American College, based in Bryn Mawr, Pa., is the nation's oldest and only accredited non-traditional college devoted exclusively to advanced education in the financial services. It awards the Chartered Life Underwriter (CLU) and Chartered Financial Consultant (ChFC) designations in addition to master's degrees in financial services and financial management.

Dallas-based FSN, a wholly owned subsidiary of Drossos Networks Inc., serves as a revolutionary training and information vehicle for stockbrokers, bankers, financial planners and insurance agents. FSN broadcasts 80 hours per month from 12:30 - 4:30 p.m. and produces more than 40 new shows each month.

#90204b0123 07/23/1990 ~Business Wire

DALLAS (JULY 23) BUSINESS WIRE - Interphase Corp. Monday introduced SOFTarray for VME, an innovative software package that provides system administrators with an easy-to-use, inexpensive way to significantly improve the performance and fault tolerance of disk subsystems.

SOFTarray for VME, innovative software from Interphase, enables system administrators to actually create a ''soft array'' to meet unique application needs.

SOFTarray enables scanning and mirroring of data for the wide range of VME platforms supported by the Interphase V/SCSI 4210 Jaguar or V/SCSI 4410 host bus adapters. The first version of the software, SOFTarray for Sun, is available for the Sun 3 and the Sun 4 SPARC platforms.

With a SOFTarray, system administrators can ensure uninterrupted availability of critical data. In addition, system performance and capacity are enhanced by the ability to spread data across multiple drives and to use portions of different drives together to act as a single, larger drive.

End users can also configure a SOFTarray to activate any combination of balanced striping, spanning, or mirroring capabilities, to suit a variety of system requirements.

With disk mirroring, users can automatically copy specified data to one or more additional drives. Use of disk space is optimized because the user can select to mirror only the data that are considered critical.

Balanced striping spreads data evenly across multiple drives, allowing simultaneous access of files on different disks. This capability provivdes significant performance enhancements in areas such as multi-user and file server environments. Early benchmark results show from 50 to 150 percent performance improvement.

With disk spanning, space on multiple disks can be utilized as a single, larger disk. This capability allows expanded system capacity without additional larger drives. Spanning is ideal for handling applications which require partitions that are too large for a single disk, such as video imaging or complex spreadsheets.

Interphase was founded in 1974 and had its initial public offering of stock in 1984. Its stock is traded on NASDAQ under the symbol INPH. The company is located at 13800 Senlac Drive, Dallas, Texas 75234. Telephone: 214/919-9000.

SANTA CLARA, CA (JULY 23) BUSINESS WIRE - The board of directors of Silicon Valley Bancshares (NASDAQ:SIVB), parent company of Silicon Valley Bank, has declared a 6 cent cash dividend, payable in two 3 cent installments.

The first 3 cent installment will be paid on Aug. 31, to shareholders of record as of Aug. 17. The second 3 cent installment will be paid on Feb. 22, 1991, to shareholders of record as of Feb. 8, 1991. This cash dividend is a 20 percent increase over the 1989 cash dividend paid by Silicon Valley Bancshares.

''We are pleased to announce this cash dividend after the recent report of the company's 13th successive record quarterly earnings. Our growth is a reflection of the dynamic marketplace we serve,'' said Roger V. Smith, president and chief executive officer.

Silicon Valley Banchares has 5,429,029 shares of common stock issued and outstanding.

The company recently announced record second quarter 1990 net income of $2,475,000 or 43 cents per share, a 50 percent increase over the like period last year. Net income for the six month period ended June 30, was $4,773,000, or 82 cents per share, a 51 percent increase compared to the like period last year.

Total assets increased 78 percent to $573 million at June 30, compared with $322 million at June 30, 1989. Return on average assets was 2 percent and 2.1 percent, and return on average equity was 29.3 percent and 29.4 percent for the quarter and six month periods ended June 30, respectively.

Silicon Valley Bank finances emerging and middle market technology companies, commercial businesses and residential construction projects in the San Francisco Bay Area.

Silicon Valley Bank is the only bank operating offices in the major financial centers of Santa Clara County: Santa Clara, Palo Alto, San Jose and downtown San Jose. The office at 3000 Sand Hill Road, Menlo Park, is the bank's first office in San Mateo County.

A loan production office was recently opened in Wellesley, Mass., to serve

the emerging and middle market technology companies in the greater Boston-area.

SAN JOSE, CALIF. (JULY 23) BUSINESS WIRE - MITEM Corp. and Digital Communications Associates Inc. (NYSE:DCA) jointly announce MitemView support for DCA's MacIRMA family of Macintosh-to-mainframe connectivity products.

Using MitemView, developers can create intelligent HyperCard front-ends to IBM mainframe applications that simplify access and information retrieval from host-based applications. This support is announced for the entire family of MacIRMA products, including both coax and LAN-based SNA gateways.

''MitemView revitalizes host applications by transforming raw host data into meaningful information. By supplying the logic for local processing of data, users can readily see graphical representations of the host data '' according to Barry Margerum, president and chief executive officer of MITEM.

''DCA's and MITEM's offering provides a significant reduction to corporations in development, maintenance, and training costs for creating these new applications.

''As the Macintosh gains in popularity within the corporate enviroment, DCA meets the challenge by connecting Macs to mainframes,'' said Peter Cheung, vice president and general manager of DCA's Macintosh Communications business unit.

MitemView is a Macintosh software development tool that enables developers to create ''pick and click'' graphical user interfaces to mainframe applications without host code modification. MitemView provides a simple and extensive set of communications tools to develop HyperCard applications.

Based in San Jose, MITEM Corp. develops products to simplify user access and communications with minicomputers, mainframes and other information sources, including CD-ROM and network servers. For product information, please contact MITEM at 408/559-8801.

Located 30 miles north of Atlanta in Alpharetta, Ga., DCA designs, markets and manufactures personal computer networking products that enhance the productivity of users of personal computers.

DENVER (JULY 23) BUSINESS WIRE - Forest Oil Monday announced a special voluntary early retirement program under its pension plan, designed to offer additional benefits to eligible employees.

Forest said that the program is a part of its ongoing efforts to substantially reduce general and administrative expenses in response to continuing constrained economic conditions in the oil and gas industry.

The special voluntary early retirement option is available to approximately 30 employees.

SAN FRANCISCO (JULY 23) BUSINESS WIRE - EurekaBank Monday reported earnings of $5.7 million on assets of $1.74 billion for the quarter ended June 30.

Second quarter earnings climbed eight percent over the first quarter 1990 figure and are the same as reported for the second quarter 1989.

The company's net worth reached $117.1 million with the quarterly earnings figure generating a strong annualized return on average assets of 1.30 percent.

As ranked by capital strength, the company maintained its position among the nation's leading financial institutions by posting capital ratios substantially above new requirements for the thrift industry. EurekaBank's risk-based capital ratio increased to 13.92 percent, with its tangible-capital ratio reaching 6.70 percent.

The financial strength was recently recognized with EurekaBank's high national ratings in two respected industry showings.

''American Banker'' magazine's May 25 national ranking for profitability of the 400 largest thrifts placed EurekaBank's 1989 net income of $22.2

million as the 32nd highest in the country. Only two institutions with fewer assets achieved a higher level of earnings during the period.

In a separate finding, the June 4 edition of the ''National Mortgage News'' ranked EurekaBank ninth in the nation on its list of High Performance Associations with assets of at least one billion dollars. EurekaBank was the only Bay Area-headquartered institution to make this prestigious list and was one of only three California thrifts in the large institution size-class to qualify for listing.

''We are very pleased that our financial condition and performance are being noted,'' said Byron A. Scordelis, EurekaBank president and chief executive officer. ''We have worked hard as a company to deliver a combination of financial strength and outstanding service to our customers.''

Headquartered in Foster City, Calif., Eurekabank serves more than 100,000 households through its greater Bay Area network of 35 branches.

Menlo Park, Calif. (JULY 23) BUSINESS WIRE - Network General Corp. (NASDAQ:NETG), Monday reported record quarterly revenues for the quarter ended June 30, 1990, Network General's first quarter of fiscal year 1991 of $10,003,000, an increase of 82 percent over the $5,490,000 reported for the like quarter last year.

The company posted net income for the quarter of $1,804,000, or 25 cents per share, an increase of 64 percent over net income of $1,103,000, or 18 cents per share, during the first quarter of fiscal 1990.

Revenues for the first quarter of fiscal year 1991 represent an increase of 14 percent over revenues of $8,774,000 reported for the previous fiscal quarter ended March 31, 1990. Net income increased five percent over the $1,712,000, or 24 cents per share, reported for the previous quarter.

Founded in 1986, Network General designs, develops and markets diagnostic equipment for local area networks. Network General is based at 4200 Bohannon Drive, Menlo Park, Calif., 94025; Telephone: 415/688-2700.

HOUSTON (JULY 23) BUSINESS WIRE - Continental Airlines Monday announced that it has cut fares by as much as 57 percent for travel during the next three weekends.

The sale fares range from $39 to $129 each way. For instance, the fare from Boston to Austin, Texas will be $99 each way, vs. a regular low fare of $182 each way, offering a savings of 46 percent.

The nationwide weekend sale fares apply to travel that begins July 26-28 and returns July 28-30; begins August 2-4 and returns August 4-6; or begins August 9-11 and returns August 11-13. Round-trip travel must occur on the same weekend.

Internationally, Continental is offering weekend sale fares (each way) from Houston to Acapulco ($69), Monterrey ($69), Mexico City ($99) and Guadalajara ($99); from Newark to Bermuda ($99) and Santo Domingo ($99); from San Antonio to Mexico City ($99); and from San Diego to Mexico City ($99).

''The enormous popularity of our most recent weekend sale fares for travel between hub cities has encouraged us to offer a weekend sale for travel nationwide,'' a Continental spokesman said. ''This is a limited-term, targeted fare promotion that will save millions of dollars for tens of thousands of consumers.''

Seats are limited, tickets must be purchased on July 24 or 25, and within 24 hours of making a reservation. A round-trip purchase is required, and tickets are nonrefundable. The sale applies to most Continental Express routes as well as Continental jet flights.

HOUSTON (JULY 23) BUSINESS WIRE - Smith International Inc. (NYSE/PSE:SII) Monday reported results for the second quarter and first half of 1990.

For the second quarter ended June 30, 1990, the company reported a profit of $1.5 million, or 4 cents per share, on revenues of $86.1 million. This compares with a profit of $.3 million, or zero cents per share, on revenues of $74.6 million, for the comparable period in 1989.

The increased revenues and profits were primarily attributable to higher U.S. rig activity and the continuing growth in horizontal drilling.

For the six months ended June 30, 1990, the company reported a profit of $1.6 million, or 2 cents per share, on revenues of $164.9 million, as compared with a net loss of $.7 million, or 6 cents per share, on revenues of $146.4 million, in the first half of 1989.

Commenting on the results, Doug Rock, president and chief executive officer stated, ''Even though first half 1990 revenues and profits showed gains over prior periods, increased worldwide drilling activity and improved product pricing will open the way for better results in future quarters.''

Smith International is a worldwide supplier of products and services to the oil and gas drilling industries.

#90204b0218 07/23/1990 ~Business Wire

SAN JOSE, CA (JULY 23) BUSINESS WIRE - Maxtor Corp. (NASDAQ:MXTR), a leading supplier of high-performance data storage products, Monday reported up revenues and profits for the first quarter of fiscal 1991.

Revenues were $147.1 million for the 13 weeks ended June 30, 1990, up from the $141.6 million reported in the 14-week fourth quarter of fiscal 1990 and up from the $108.5 million reported in the first quarter a year ago.

Net income of $6.7 million was up from the $6.5 million reported last quarter and from the $2.2 million reported in the first quarter last fiscal year.

Earnings per share were 30 cents on 22.2 million shares outstanding. The company reported 30 cents on 21.3 million shares in the fourth quarter of fiscal 1990, and 10 cents in the first quarter a year ago.

First quarter revenue and pre-tax income from ongoing operations were augmented by approximately $3 million (compared with approximately $2 million dollars in the prior quarter), representing payments from a supplier under a product discontinuance agreement, less the estimated costs of discontinuing and replacing those products.

The June quarter revenue and earnings data reflect the traditional Maxtor California 5.25- and 3.5-inch high capacity disk drives, the subsystems business of its Storage Dimensions subsidiary, and its erasable and write-once optical business from Maxoptix Corp.

The results of operations from the subsidiary formed from the acquisition of the assets of Miniscribe, now known as Maxtor Colorado Corp., will be

reflected in Maxtor Corp. financials for the second fiscal quarter of 1991 which ends Sept. 29, 1990. The company said that because the acquisition of the Miniscribe assets closed June 30, the June quarter balance sheet reflects the purchase price and the value of the assets acquired.

''We have successfully moved our acquisition through the transition period and we are now prepared to take full advantage of the opportunities that our new broadened product line afford us,'' said George M. Scalise, Maxtor Corp.'s president and chief executive officer.

''Maxtor's overall revenue growth in the first quarter resulted largely from increased sales of our LXT family of high-capacity 3.5-inch drives. We are seeing rapid growth of these products as they are accepted by new markets and customers, and to a lesser degree, as they begin to replace some of the traditional low-end 5.25-inch drive revenue,'' he said.

The company said it continued to ship evaluation quantities of its gigabyte-plus 5.25-inch Panther series, which now includes drives with capacities over 2 gigabytes of storage, the highest in the industry.

Maxtor Corp. was founded in 1982 and has headquarters in San Jose. The company and its subsidiaries manufacture high-capacity Winchester and optical data storage products in San Jose, Singapore, Hong Kong and Malaysia, and has a worldwide sales and distribution network. Maxtor's products range from 40 megabytes to 2.1 gigabytes, and are designed for use in high-performance computer systems, workstations, local area networks, personal computers and laptops.

SANTA CLARA, CA (JULY 23) BUSINESS WIRE - 3Com Corp. Monday announced a lifetime limited warranty covering the company's entire line of Ethernet adapters, giving customers a formal insurance policy that backs 3Com's EtherLink industry-leading reliability.

Currently all EtherLink adapters come with an automatic three year warranty. By completing and returning the registration card that comes with all EtherLink products, the existing three year warranty is extended to a lifetime limited warranty.

A defective adapter will be repaired or replaced at 3Com's option for as long as the board is in use in its original IBM Personal Computer (PC), Personal System/2 (PS/2), Macintosh or compatible computer, or for three years from time of purchase. This warranty applies retroactively to

adapters sold by 3Com's dealers, VARs, distributors and OEMs since June 1, 1990.

EtherLink adapters demonstrate observed mean time between failure (MTBF) rates averaging 70 years. This means approximately 99.5 percent of the 1.7 million EtherLink adapters installed around the world have never failed or been returned for repair. 3Com's lifetime limited warranty is a way of passing the benefits of 3Com adapters' outstanding reliability on to customers.

''Today's networking customers want products that work in multivendor, multimedia networks and provide the highest levels of performance and reliability,'' said Dave DePuy, director of marketing for 3Com's Transmission Systems Division.

''3Com's EtherLink adapters help provide customers with reliable solutions to their data networking needs.''

The EtherLink product line consists of the EtherLink, EtherLink II and EtherLink Plus for PC XT/AT and compatible computers, the EtherLink/MC for IBM Micro Channel based computers, and the EtherLink/NB for Apple's Macintosh II and the EtherLink/SE for the Macintosh SE.

The warranty also covers 3Com's Ethernet adapters for the emerging 10BASE-T standard -- the EtherLink II TP and EtherLink/MC TP. Prices for the adapters range from $295 to $895 each, and are available through leading OEMs, distributors and resellers worlwide.

3Com Corp. is a leading independent global data networking company, providing multivendor connectivity that spans organizations and businesses worldwide. The company designs, manufactures, markets and supports networking systems based on industry standards and open systems architecture.

#90204b0230 07/23/1990 ~Business Wire

PLANO, TX (JULY 23) BUSINESS WIRE - Texas Instruments (TI) will begin shipping the initial commercial release of its Information Engineering Facility (IEF) software products for OS/2 (Version 4.1) on Aug. 22 in the United States and Canada.

The IEF for OS/2 includes Planning, Analysis, Design and -- a new work station toolset -- Construction (or PC code generation). OS/2 is IBM's multi-tasking operating system for work stations.

TI's IEF product is an integrated CASE (computer-aided software engineering) tool that allows application developers to design business systems using graphical models that describe business operations and automatically generate business systems from those models.

Planning, Analysis and Design Toolsets for OS/2 operate similarly to the IEF Toolsets for MS-DOS. Developers use these toolsets to create business models using the windowing and multi-tasking capability of OS/2. From these models, the Construction Toolset generates business systems that will target other environments (hardware, databases, operating systems, teleprocessing monitors, and languages).

By separating the development environment from the environment in which the business system will ultimately execute, the IEF architecture provides true environmental independence. Developers will be able to generate and test business systems on the OS/2 workstation, move their tested models to other hardware platforms (such as MVS) and generate production business systems from the same business model.

This first release of the IEF Construction Toolset for OS/2 will allow for tested models and subsets of models to be moved to the IEF Central Encyclopedia for MVS where CICS, IMS, TSO and batch systems will be reconstructed and placed into production. Production business systems will represent 100 percent of their corresponding models because, at no time, will developers have to code or ''tune'' code.

This means that all maintenance and enhancements to code and data bases will be accomplished by changing production business system models -- not by looking at generated (then altered) code and data base definitions.

The new IEF Construction Toolset for OS/2 generates COBOL (ANSI 85) source code and relational data base definition statements from business models. For OS/2 testing purposes, it also generates data definition language (DDL) and data manipulation language (DML) statements for DBM, the data base manager that is part of IBM's OS/2 Extended Edition.

The IEF for OS/2 product also includes installation and diagram testing of the generated applications under OS/2. Workstation installation tasks, such as source code compilation, linking, binding, and library selection are completely automated. The Diagram Testing Tool allows the developer to test and verify the application logic at the diagram level with no need to look at code.

An additional benefit of the new OS/2 products is the potential reduction in the mainframe costs resulting from testing in the MVS environment. As a result of preliminary use of the testing capability of the OS/2 products TI developers expect a significant decrease in the mainframe usage

associated with testing IEF-generated applications.

The complete OS/2 package, consisting of Planning, Analysis, Design and Construction Toolsets, lists for $23,800. A Planning, Analysis and Design Toolset package for OS/2 lists for $14,900; the addition of the Construction Toolset to this package is $9,900.

Customers will be able to trade in any combination of their IEF for MS-DOS Planning, Analysis and Design Toolsets at a special price for a limited time. For example, a customer can trade in an IEF for MS-DOS Planning, Analysis and Design Toolset package for the equivalent OS/2 Toolset package for only $1000. This offer does not affect existing support programs for IEF MS-DOS products.

The IEF family of products includes four tightly integrated software engineering toolsets. The Planning, Analysis and Design Toolsets operate on intelligent desktop workstations running either MS-DOS or OS/2. Construction Toolsets run either on the OS/2 workstation or an IBM mainframe where the Central Encyclopedia resides. The Central Encyclopedia is a DB2-based relational repository for business and systems information. Production business systems, whether designed with the OS/2 or MS-DOS workstation toolsets, can be generated on the mainframe from the Central Encyclopedia.

The integrated IEF product was first made commercially available by TI in 1987. Over 200 major organizations in the United States, Canada, Europe and the Pacific Rim use the IEF in their IS departments to improve productivity, increase software systems quality and deliver business systems today. Companies such as TransWorld Airlines, Imperial Oil of Canada and Volvo are using the IEF to produce business systems that enhance their competitive position within their industries.

Texas Instruments, headquartered in Dallas, is a high-technology corporation engaged in worldwide development, manufacture, and sale of semiconductors, defense electronics systems, computer and software systems electrical controls, industrial automation systems, metallurgical materials and consumer products.

The Information Engineering Facility is marketed worldwide by Texas Instruments Inc.

#90204b0240 07/23/1990 ~Business Wire

CLEVELAND (JULY 23) BUSINESS WIRE - The nation's $24 billion steel service

center industry attained record shipping volume in the first six months of 1990, as June average daily shipments surpassed May levels, according to the latest Business Conditions Report of the Steel Service Center Institute (SSCI).

For the year-to-date (six months), service centers' average daily shipping rate is 1.5 percent ahead of last year's pace, when service centers shipped more than 23.7 million tons of steel products for the year.

In June, the average daily shipping rate climbed a slight 1.1 percent over strong May levels, and increased 5.7 percent over June of last year. The strong shipping month was fueled by tubular products and structurals, up 5.8 percent and 4.2 percent, respectively, over May average daily shipping rates.

Gains in these product categories offset a 6.8 percent decline in the average daily shipping rate for stainless steel and a 2.3 percent drop in the alloy steel average daily shipping rate.

For the second quarter, average daily shipments were even (up 0.2 percent) with first quarter, 1990, and were 1.4 percent ahead of second quarter, 1989. Compared to the like period last year, the second quarter average daily shipping rate for six of seven product categories was up, including stainless, which jumped 10.3 percent, and structurals, up 8.4 percent.

''While volume was obviously strong for steel service centers in the first half, overall economic conditions vary widely both by region and product '' said Andrew G. Sharkey, SSCI president. ''Both the manufacturing and construction sectors are continuing to send mixed signals, although we anticipate a relatively stable second half.''

The most recent SSCI Business Conditions Report supports Sharkey's view of a stable second half. According to the poll of SSCI members, 95 percent said that replacement costs six months from now are expected to be within a range of -2 percent to +5 percent.

The month's ending inventory remained stable, and is lean relative to current shipping levels. At the end of June, total inventories were at 6,194,643 tons, compared to 6,206,020 tons in May. Carbon flat-rolled products and structurals have shown the greatest inventory reduction, declining steadily over the past six quarters.

May's inventory-to-shipments ratio also was relatively unchanged at 3.15 months' supply, compared to 3.05 months' supply in May. One year ago, inventory ratios were at 3.63 months of supply.

''Overall, inventory levels are in line with shipments. We will, however, be closely monitoring stainless and alloy inventories in light of a flat

average daily shipping rate for those products,'' said Sharkey.

Additionally, optimism on the part of SSCI members, although down from earlier months, is high compared to one year ago at this time. Of SSCI members polled, 80 percent said that they expect incoming orders to either increase or remain steady over the next three months. One year ago, only 46 percent held a similar opinion.

The Steel Service Center Institute is a trade association representing the interests of 85 percent of the steel service center industry. America's steel service centers purchase and distribute one out of every three tons of carbon industrial steel products and nearly half of all stainless steel produced in the United States.

Steel service centers are the largest single customer group of the domentic steel industry and serve the metal supply needs of more than 300,000 manufacturers and fabricators through plant locations nationwide.

Because SSCI reports the scope and level of business activity as it relates to a wide cross section of industrial America, its Business Conditions Report is considered an excellent barometer for the state of the economy.

DALLAS (JULY 24) BUSINESS WIRE - MorningStar Foods Inc. announced Monday that it has obtained a commitment for $60 million of new financing from an unaffiliated source in connection with a plan to amend its existing senior credit arrangements.

The plan contemplates that proceeds from the financing would reduce bank indebtedness by approximately $22 million, and would significantly reduce interim amortization payments on the term loan due June 1991. The balance of the new financing proceeds would be available for working capital, debt restructuring and other corporate purposes.

Completion of this financing is subject to the execution of definitive loan agreements and to the final approval of the company's lending banks. MorningStar has reached an agreement in principle with its banks to proceed toward consummation of this transaction.

Upon completion of the transaction, the company will make the interest payment on its 13 percent Senior Subordinated Debentures due 2000. The company was prevented from making this interest payment because of the delay in reaching agreement with the bank group regarding an extension of

time for a principal payment that became due in June 1990.

MorningStar Foods Inc. is a nationwide dairy processor based in Dallas which manufactures products under several regional trade names. MorningStar reported revenues in excess of $800 million in its most recent fiscal year ended Dec. 31, 1989.

FORT WORTH, TX (JULY 24) BUSINESS WIRE - URCARCO (NASDAQ:CARS) Monday announced it anticipates July 1990 car sales to be down 10-15 percent from June 1990 sales, which were 1,952 units.

July 1989 sales were 1,008 units.

The company had hoped to overcome lower historic July sales activity and one less selling day through increased advertising and intensified selling efforts. An additional factor contributing to the anticipated decline was the residual effect of the company's tightened credit requirements for customers financing their cars.

The company does not expect that lower than anticipated unit sales for the month of July will have a material impact on its earnings for the first quarter ending Sept. 30.

URCARCO operates a chain of 17 used car retail lots in Fort Worth, Dallas, Houston and Austin, Texas, selling quality used passenger cars and light trucks and typically financing customer purchases.

#90204b0606 07/23/1990 ~Business Wire

FULLERTON, CA (JULY 23) BUSINESS WIRE - Beckman Instruments Inc. (NYSE:BEC) reported sales Monday of $202.9 million for the quarter ended June 30, 1990, 1 percent higher than the same quarter of 1989.

Research and development funding in the second quarter was $20.8 million or 21 percent greater than 1989. Primarily as a result of this strategic investment in new products, net profit for the quarter declined 25 percent to $8.6 million, or 30 cents per share.

Second-quarter and first-half sales were affected by two key factors: an ongoing reduction in the U.S. life-sciences research marketplace and a larger number of diagnostic systems delivered this quarter under operating lease agreements when compared with 1989.

The shift to more lease agreements is the result of tighter capital budgets in hospitals. Leases are a profitable part of the company's business but spread revenues from systems placed today over several years.

Profits were mainly affected by the company's incremental investment in research and development; however, operating efficiencies improved during the last six months. Marketing, administrative and general expenses are down 1.7 percent in the first half of the year as compared with 1989.

Also, first-half gross profits have increased to 51.1 percent as compared with 50.9 percent in the prior year.

Beckman Instruments develops, manufactures and markets automated systems and supplies used in biological laboratories for research, quality control and clinical diagnostics. The company has 7,100 employees in 36

facilities throughout the world and operates in more than 120 countries.

IRVINE, CA (JULY 23) BUSINESS WIRE - Optima Technology, a primary manufacturer of high-end mass storage subsystems, Monday announced the signing of a key distribution agreement with ComputerWorld France, a major peripheral distributor throughout Western Europe and Central Africa.

The exact value of this agreement has not been disclosed, but it is expected to exceed $8 million in the first year.

Bill Douglas, Optima's manager of international sales, stated: ''Optima strives to maintain a channel integrity rarely found in the computer market by establishing a tight circle of top distributors around the world and marketing our products solely through them.

''Like Optima, ComputerWorld focuses on the high-end of the market. Having established relationships with most of the top dealers in France, they are well positioned to bring Optima's product and marketing strategies into the international marketplace.''

ComputerWorld has recently included Optima storage products in their primary marketing list. According to Stephan Poulet, ComputerWorld's product marketing manager: ''We are approached by vendors on a daily basis. However, it is rare that we find an opportunity to market high-quality products with such a unique market position. This, in turn, will maintain a reasonable profit margin for our dealers who are very enthusiastic about handling Optima products.''

Optima Technology is a subsystem manufacturer specializing in high-capacity mass storage products with universal applications for the global computer market.

MILPITAS, CA (JULY 23) BUSINESS WIRE - The CrystalPrint Express, a high performance 12 page-per-minute (ppm) PostScript-language compatible laser

page printer with 600 x 300 dot per inch (dpi) resolution, twice that of the most widely used laser printers, making it ideal for applications such as desktop publishing that require high-resolution output, was introduced Monday by Qume Corp. (NASDAQ:QUME), a Milpitas-based supplier of computer peripheral products.

''With a suggested retail price of $5,595, the Express is priced comparably to similarly configured 8 ppm printers such as the HP LaserJet III with PostScript upgrade, but provides substantially higher throughput and versatility,'' explained Tom Blinn, Qume vice president, product marketing.

''The Express is an excellent shared resource or network printer, eliminating the need for separate, dedicated PostScript and HP LaserJet printers on a network,'' Blinn added.

''Designed specifically for high throughput in a mixed application network the Express is one of the first printers able to process a mixture of HP LaserJet and PostScript output without any reset time or other user interaction to change printer configurations.''

''Not only can the Express switch between the emulations instantaneously, but it processes both PostScript and LaserJet documents many times faster than other printers in its price class.''

''The features bundled with the Express make it the first printer truly designed for a multiplatform LAN environment,'' explained Blinn. ''At 12 ppm, it is 50 percent faster than comparably priced printers. Couple that with instantaneous switching between emulations and a high quality output in both 300 dpi and 600 dpi resolution, makes the Express a true multi-user, multitasking printer.''

Qume manufactures and markets page and daisywheel printers, display products and computer supplies and accessories. Qume's products are marketed worldwide through a variety of distribution channels and OEMs.

Additional information is available from Qume, 500 Yosemite Dr., Milpitas, Calif., 95035; telephone 408/942-4000; fax 408/942-4052.

#90204b0614 07/23/1990 ~Business Wire

COLUMBUS, GA (JULY 23) BUSINESS WIRE - Carmike Cinemas Inc. (NASDAQ:CMIKA) Monday announced results for its second quarter and six month period ended June 30.

For the quarter ended June 30, total revenues increased 24 percent to $31,311,000 from $25,177,000 for the quarter ended June 30, 1989. Operating income increased to $4,918,000 from $4,438,000 in the same period last year. The company's net income increased to $1,934,000 or 25 cents per share compared to net income of $1,571,000 or 25 cents per share in the comparable quarter of the previous year. Weighted average outstanding shares for the second quarter in 1990 and 1989 were 7,592,929 and 7,468,975, respectively.

For the six months ended June 30, total revenues increased 28 percent to $55,314,000 from $43,324,000 for the six months ended June 30, 1989. Operating income increased to $7,015,000 from $6,131,000 in the first half of last year.

The company's net income increased to $2,328,000 or 31 cents per share compared to net income of $1,518,000 or 29 cents per share in the comparable quarter of the previous year. Weighted average outstanding shares for the first half in 1990 and 1989 were 7,573,073 and 7,467,100, respectively.

Commenting on the results, President and Chief Executive Officer Michael Patrick stated, ''We are very pleased with our recent acquisition of theatres from Cineplex Odeon and United Artists, which complement our strong presence in the South.

Second quarter revenues reflect this year's summer motion picture mix, which to date has not produced the same matinee business of last year. However, we expect offerings such as Die Hard II, Navy S.E.A.L.S. and Arachnophobia to impact favorably on the third quarter, traditionally the strongest period of the year.''

Carmike Cinemas is the fifth largest motion picture exhibitor in the United States, and is the leading exhibitor in the southern United States in terms of number of screens and theatres operated.

#90204b0617 07/23/1990 ~Business Wire

PHOENIX (JULY 23) BUSINESS WIRE - John W. Teets, chairman, president and chief executive officer, Greyhound Dial Corp. (NYSE:G), Monday announced revenues, income and earnings per share for the second quarter and six months ended June 30, 1990.

In the second quarter of 1990, revenues were $912,318,000, compared to $925,460,000 in the same period last year.

Income from continuing operations was $39,160,000, up 10 percent, compared to $35,648,000 in the 1989 quarter. On a net basis, however, there was a $60,840,000 loss, compared to the $35,648,000 net income reported in 1989 because of a one-time $100 million (after-tax) loss provision, attributable to discontinued operations, taken in the quarter to establish a reserve for losses resulting from the bankruptcy of Greyhound Bus Lines.

Greyhound Dial sold the bus lines in 1987, but retained a 22.5 percent stake in the bus company's parent, GLI Holding, and also holds Greyhound Bus Lines preferred stock, a junior subordinated note, and other notes and accounts receivable, and leases substantial assets to the bus lines.

Income per share from continuing operations in the quarter was 97 cents, compared to 92 cents per share a year ago, a 5 percent increase. The one-time charge of $2.51 per share from discontinued operations resulted in a $1.54 per share net loss in the quarter vs. net income of 92 cents per share in 1989. There were, on average, 1.4 million more shares outstanding in 1990 than in 1989, primarily due to the sale of 1.1 million shares to an Employee Stock Ownership Plan in mid-1989.

Revenues for the first half of 1990 were $1,777,822,000 up from the $1,767,249,000 recorded last year.

Income from continuing operations was $56,050,000, compared to $50,484,000 in the six months of 1989.

For the six months, there was a net loss of $43,950,000, compared to net income of $50,484,000 posted in 1989, and a net loss of $1.12 per share, compared to net income of $1.30 in 1989. The loss in the first six months was due to the $100 million (after-tax) of $2.51 per share loss provision taken in the 1990 second quarter for the bus lines bankruptcy.

Greyhound Dial retained 22.5 percent of the common stock of GLI Holding, the parent of Greyhound Bus Lines, and also holds Greyhound Bus Lines preferred stock, a junior subordinated note and other notes and accounts receivable, and has substantial assets leased to the bus lines, as well as other contractual relationships.

#90204b0618 07/23/1990 ~Business Wire

INDIANAPOLIS (JULY 23) BUSINESS WIRE - Truevision Inc. and Pixar Monday announced that Truevision's single-card computer, the Horizon860, will support Pixar's rendering standard, PhotoRealistic RenderMan.

Truevision will market PhotoRealistic RenderMan for the Horizon860 in three versions, beginning with OS/2 in the fourth quarter of 1990. DOS and Unix versions will follow. Horizon860-based PhotoRealistic RenderMan will also support the Truevision TGA file format, a de facto industry standard supported by more than 300 PC applications.

The Truevision RenderPak, which includes Photorealistic RenderMan and the 8 megabyte configuration of the Horizon860, will be available for $7,995. The software price will be $1,495 if purchased separately from the RenderPak.

The major challenge in manipulating visual media is delivering enough processing power, bus bandwidth and memory to create realistic, photographic-quality images. Announced in March 1990, the Horizon860 is the first member of a new Truevision product family called the HorizonLine.

As a standalone product, the Horizon860 accelerates 3D animation, CAD and other graphics applications currently running on Truevision's industry-standard TARGA and ATVista products. Powered by the i860 microprocessor, the board can draw 40,000 polygons/second, eight times faster than such systems as the Silican Graphics Personal Iris.

An on-board, high performance and expandable bus, the HorizonBus can transfer data at 264 megabytes per second (MB/sec), 100 times the transfer rate of the PC/AT. Memory modules can be added to the Horizon860 to provide up to 64MB of DRAM in a single slot.

Endorsed by major computer graphics companies, the RenderMan Interface has a file format known as the RenderMan Interface Bytestream, or RIB. PhotoRealistic RenderMan, Pixar's rendering software,is the first renderer to meet the specifications of the RenderMan interface, and is used to create photorealistic images from RIB files.

Pixar was formed in 1979 as the Computer Graphics Division of Lucasfilm Ltd. At Lucasfilm, its technology was applied to films such as Star Trek II: The Wrath of Kahn and The Return of the Jedi. The Computer Graphics Division was spun off from Lucasfilm in February, 1986, named Pixar, and acquired by the employees of Pixar and Steven P. Jobs.

Truevision Inc. (Indianapolis) offers a broad range of products that

transform personal computers into visual media systems. The company's TARGA series is the industry standard solution for video production broadcasting and true color graphic applications.

PRINCETON, NJ (JULY 23) BUSINESS WIRE - Dow Jones Information Services, an operating group of Dow Jones & Co. Inc., Monday introduced Facts Delivered (SM), an information service that quickly delivers detailed reports on thousands of public companies via facsimile machine or electronic mail.

The report will include the latest news about the company, its current stock price, a detailed profile, financial data from the company's income statement and balance sheet, earnings estimates, its performance as compared with its industry group, a summary of its recent insider transactions and a list of research reports from investment analysts.

''Facts Delivered is designed to provide business people a comprehensive overview of a company with a single phone call,'' said Richard J. Levine, vice president and editorial director of the Information Services Group.

Through an agreement with MCI Mail, customers receive the report within hours of their request. The reports may be used for competitive analyses, and marketing and sales as well as investment purposes.

The reports are available for $70. The service hours are Monday through Friday 9 a.m. to 6 p.m. eastern time. To reach Facts Delivered, customers may call 800/445-9454.

Dow Jones & Co. Inc. publishes The Wall Street Journal, Barron's, Dow Jones News/Retrieval, five domestic and international newswires including the Dow Jones News Service (the ''Broadtape''), and the Ottaway group of community newspapers. The company also owns Telerate Inc., a supplier of real-time financial information, decision support products and transaction services.

#90204b0620 07/23/1990 ~Business Wire
SAN JOSE, CA (JULY 23) BUSINESS WIRE - Laserscope (NASDAQ:LSCP) Monday announced the introduction of a new air-cooled version of its KTP/532 and KTP/YAG Surgical Laser Systems.

According to Herbert G. Taus, Laserscope's president and chief executive officer, the new laser systems have the same functionality and performance as the company's water-cooled systems.

Because the new systems do not require an external water hook-up, they eliminate the hospital's costs associated with cooling utilities. The new systems are easily moved between operating rooms and out patient areas.

The company also announced that its factory was already fully cut over to production of the new system and that shipments had already commenced. Both water-cooled and air-cooled versions will be available to customers.

''Our new air-cooled laser systems represent the next evolutionary step in Laserscope's technology and product development,'' said Taus. ''Air-cooling improves the cost effectiveness and versatility of our products and enhances our competitive position in the market place.''

Based in San Jose, Laserscope designs, manufactures and markets an advanced line of KTP/532 and KTP/YAG Surgical Laser Systems, accessories and disposables. These systems employ the company's proprietary laser technology based on KTP crystalline material, and enable the surgeon to cut, coagulate and vaporize tissue in a wide variety of applications and procedures.

#90204b0621 07/23/1990 ~Business Wire
BREMERTON, WA (JULY 23) BUSINESS WIRE - GNW Financial Corp. (NASDAQ:GNWF) the holding company for Great Northwest Federal Savings and Loan Association, Monday reported that improved net interest margin and a better performing loan portfolio boosted net income 10% in the second quarter ended June 30, 1990, compared to the like quarter a year ago.

The corporation also announced that its board of directors declared GNW Financial's fourth consecutive regular quarterly cash dividend of $.05 per share payable on Aug. 15 to shareholders of record July 30, 1990.

GNW Financial's second quarter net income increased 10% to $1.03 million, or $.51 per share, compared to $940,000, or $.48 per share, in the like

quarter of 1989. For the first six months of 1990, net income increased to $1.9 million, or $.92 per share, from $1.7 million, or $.89 per share, in the first half a year ago.

''Net interest income, after provisions for possible loan losses, increased 12% and continues to remain above non-interest expense, as it has been for the past eight quarters,'' stated Raymond L. Soule, chairman, president and chief executive officer.

Net interest income, after loan loss provision, was $3.9 million in the quarter compared to $3.5 million in the second quarter a year ago. Non-interest expense totaled $3.2 million in the quarter ended June 30, 1990, compared to $2.9 million in the like quarter a year ago.

GNW Financial reported a 12% decrease in non-performing assets during the first half of 1990, while interest earning assets increased 4%. Non-performing assets declined to $6.2 million or 0.96% of assets at June 30, 1990, from $7.0 million at Dec. 31, 1989. Interest earning assets totaled $595,000 at the end of the quarter compared to $572,000 at the end of 1989.

''Not only is our core lending business healthy and strong, but also the insurance and real estate development subsidiaries generated higher income during the second quarter. This allowed the return on tangible equity to reach 11.6% for the second quarter," Soule stated. Non-interest income increased 17.5% to $816,000 compared to $695,000 in the second quarter of 1989.

Total assets were $637.8 million at June 30, 1990, compared to $617.4 million at Dec. 31, 1989. Deposits increased $20.0 million to $509.1 million since Dec. 31, 1989. The deposit growth resulted principally from successful marketing campaigns for longer-term certificate of deposit accounts during the second quarter.

Shareholders equity increased to $46.7 million as of June 30, 1990, compared to $44.9 million at the end of 1989. Stated book value at the end of the quarter was $23.82 per share and tangible book value, excluding goodwill, was $19.17 per share.

Great Northwest Federal Savings and Loan Association has applied to convert to a state-chartered savings bank. When this application is approved, GNW Financial Corp. plans to convert to a bank holding company. This conversion will provide the corporation with new growth and expansion opportunities.

Great Northwest Federal Savings and Loan Association was established in

Bremerton in 1916 and operates 17 branches in the Puget Sound and Spokane areas.

SAN DIEGO (JULY 23) BUSINESS WIRE - Telios Pharmaceuticals Inc. Monday

announced that it has begun clinical trials of the company's first product designed to speed the healing of chronic wounds.

Testing in human patients is aimed at three wound indications -- severe thermal burns, skin ulcers and surgical wounds resulting from skin-cancer surgery of the head and neck.

According to Michael D. Pierschbacher, Ph.D., Telios' vice president and scientific director, results of animal tests have shown that the topically administered product -- known as Telio-Derm -- acts as a temporary scaffold to which new cells can attach and grow until healing is completed.

Testing has been under way since late 1989 for the treatment of patients with burns requiring skin grafts. At that time, tests of the product's safety were initiated on patient skin-graft donor sites at the North Carolina Jaycee Burn Center.

Recently, testing began at the University of California, San Diego (UCSD) Medical Center to compare the product's safety with conventional therapy for treating patient skin-graft recipient sites.

Clinical-safety trials began last week at the University of Miami to test the product's ability to treat surgical wounds of the head and neck resulting from Mohs Skin Cancer Surgery. An initial safety study for the treatment of a type of chronic skin wound known as venous stasis ulcers is near completion at an undisclosed site.

Founded in 1987, Telios Pharmaceuticals is developing therapeutic products based on the company's matrix-peptide technology in the areas of wound healing, biocompatible implants and cardiovascular disease. At the heart of its technology is a protein fragment, or peptide, comprised of a trio of amino acids -- arginine, glycine and aspartic acid -- abbreviated RGD.

RGD is found within a meshwork of molecules known as the extracellular matrix, which surrounds the body's cells. Studies by the company's scientists have shown that the matrix is critical in allowing the body to heal itself and combat disease.

In addition to Telio-Derm, Telios is developing a new product for various ophthalmic applications such as ''dry eye,'' whereby inadequate production of tears results in damage to the cornea. The privately held company is also developing products to control blood-clotting and a biological coating to facilitate artificial implants such as vascular grafts, joint replacements and other orthopedic devices.

#90204b0635 07/23/1990 ~Business Wire
INDIANAPOLIS (JULY 23) BUSINESS WIRE - Truevision Inc. Monday introduced the next generation of its TARGA line, the industry standard for true color PC-based videographic cards for IBM PC/AT systems and--for the first time--Micro Channel-based PS/2 systems.

The new TARGA+ adds significant functionality to the TARGA platform at a substantial price reduction. Major new features include a digital chroma keyer, VGA overlay and pass-through, digital linear keyer, broadcast-quality NTSC or PAL composite video output, and Truevision's third generation encoder/decoder technology on-board.

TARGA+ remains 100 percent compatible with existing TARGA software. A Windows 3.0 driver is included with each board.

The TARGA+ is aggressively priced as the industry's most cost-effective solution for desktop video and advanced graphics applications. TARGA+ prices range from $1,795 to $2,995, depending on configuration.

The TARGA+ enables PC users to capture full-color or grayscale images from a video camera or VCR, and enhance or retouch the images at the pixel level. The resulting images may be output at broadcast quality to videotape or to film recorders and color printers.

The TARGA+ is available for the Micro Channel bus, bringing more than 300 TARGA solutions to IBM's PS/2 users. Since 1985, Truevision TARGA boards have stimulated the growth of desktop video and computerized graphic arts as viable, cost-effective PC applications.

The TARGA+ offers many new features that enhance existing TARGA applications, as well as create new market opportunities: VGA overlay and pass-through, digital chroma keyer, digital linear keyer, NTSC or PAL compatibility, third-generation encoder and decoder, advanced genlock, upgradable, configurable and incorporates all existing TARGA features, including real-time image capture and hardware zooming and panning.

TARGA+ offers new capabilities at a substantially lower price than its predecessor. Model prices are as follows for quantity of one: TARGA+ 16, $1,795; TARGA+ 16/32, $1,995; TARGA+ 64, $2,495; TARGA+ 16P, $2,595; and TARGA+ 32P, $2,995.

Truevision Inc. (Indianapolis) offers a broad range of products that transform personal computers into visual media systems. The company's TARGA series is the industry standard solution for video production, broadcasting and true color graphic applications.

#90204b0640 07/23/1990 ~Business Wire

MOUNTAIN VIEW, CA (JULY 23) BUSINESS WIRE - Adobe Systems Inc. (NASDAQ:ADBE) Monday announced a new version of Adobe Type Manager (ATM) software for the Macintosh computer.

The upgrade, Version 2.0, is more than twice as fast as the previous version, is easier to use and provides higher-quality type. The new version will be demonstrated in Adobe's booth at the MacWorld Exposition in Boston, August 8-11.

Preliminary lab tests show the new version to be twice as fast -- both on the screen and printing -- as ATM Version 1.2 on a Macintosh Plus or SE. And, customers using one of the Macintosh II family of computers may see up to 2.5 times the performance of the current ATM software.

In addition, Adobe has improved ease of use by including a new utility, Font Porter. With Font Porter, ATM software users can now install

bitmapped fonts by simply dragging the suitcase files into the Systems Folder, eliminating difficulties and confusion related to installing bitmapped fonts through the Font/DA Mover.

With ATM 2.0, customers will also notice type quality improvements on their screen.

All registered ATM customers can upgrade to Version 2.0 for $20 (plus $7.50 for shipping and handling). Or, for an additional $39, customers can receive the upgrade and any typeface package from the Adobe Type Library of font software. The product will be available Aug. 8, 1990. Customers interested in upgrading should call 1-800-64-ADOBE in the United States or 1-800-648-2846 in Canada.

ATM software supports all the most popular Macintosh software programs with no modifications. The product requires a Macintosh Plus, SE, SE/30, II, IIx, IIcx, IIci or Portable with one megabyte of RAM and supports System 6.0.2 or later.

In addition to any PostScript language printer, the product also supports the ImageWriter family, LaserWriter II SC, the Hewlett-Packard DeskWriter or PaintJet, the Kodak Diconix M150 Plus and most other QuickDraw devices.

Adobe Systems Inc. founded in 1982 by Dr. John Warnock and Dr. Charles Geschke, has headquarters in Mountain View. Adobe is the developer of PostScript, the industry standard page-description language for the electronic printing and publishing fields, and Display PostScript, a device-independent graphics imaging model that drives screen displays.

#90204b0642 07/23/1990 ~Business Wire

STAMFORD, CONN. (JULY 23) BUSINESS WIRE - Research and development spending as a percent of revenues by the Top 100 U.S. data processing vendors broke above the 10 percent mark in 1989 and reached its highest level in at least 10 years, Gartner Group Inc. reported Monday.

Increased investment and tighter price competition squeezed operating profit margins to their lowest levels in at least a decade. After staying in the middle teens through 1985, margins fell to 11.7 percent in 1988 and to 8.4 percent in 1989, (Operating profits consist of earnings before interest, taxes and extraordinary charges).

These facts are a small portion of those revealed in the new 1990 Edition of ''Yardstick Top 100 U.S.,'' which provides a five-year analysis of data

processing companies. Yardstick Top 100 is published annually by Gartner Group, the leading research company covering the information industries.

R&D expenditures reached 10.1 percent of revenue in 1989, up from 9.5 percent in 1988, and an average of 8.5 percent in the first half of the decade. The trend reflects the U.S. computer industry's commitment to invest long-term in future technology despite sluggish 1989 revenue growth.

The sharpest increases in R&D spending as a percent of revenue -- from 9.5 percent in 1985 to 11.7 percent in 1989 -- have come from the minicomputer and high-end workstation segment, which includes DEC, Hewlett-Packard, NCR and Wang.

The highest R&D margins in 1989 were concentrated in software and datacom hardware companies. Ashton-Tate had one of the highest rates, at 25.9 percent in 1989, up from 17.2 percent in 1988, as the firm readied its dBASE IV version 1.1 for release later this year.

The industry's largest R&D spender and revenue generator, IBM, spent 11.2 percent of its 1989 data processing revenue on R&D and 10.5 percent in 1988.

The Top 100 U.S. vendors spent a total of $16.7 billion on R&D in 1989, up 14.5 percent from $14.6 billion in 1988.

With over $65 million in current annual revenues, Gartner Group serves more than 6000 clients worldwide with an array of research reports, electronic communications services, briefings, consulting services and conferences.

#90204b0643 07/23/1990 ~Business Wire

INDIANAPOLIS (JULY 23) BUSINESS WIRE - Truevision Inc. Monday announced TrueVGA, a cost-effective VGA-to-NTSC videographics card bringing professional-quality video to the PC.

TrueVGA exceeds the capabilities of other Super VGA cards with features such as live video overlay, simultaneous VGA display and composite and S-Video NTSC (U.S. television) output and advanced genlock.

TrueVGA is a single-monitor solution for exporting non-interlaced VGA text

graphics and animations to interlaced, broadcast quality NTSC. At $995, TrueVGA is ideal for corporate media services and video production centers private cable systems in hospitals and industries, low-end video production centers and individual users.

''TrueVGA bridges the world of VGA graphics with the world of professional video,'' said Cathleen Asch, president and chief executive officer of Truevision. ''It is priced to make high-quality video production accessible on a large scale.''

TrueVGA can be used to record animations, overlay VGA text onto live video, add graphs, schematics and spreadsheets to video productions, and create interactive advertising displays. Features include: video encoding, genlock, NTSC output, single-slot solution and overlay/keying.

TrueVGA is competitively priced at $995, and will be available in mid-October (awaiting FCC verification). For more information, contact your local authorized Truevision dealers or Truevision at 800/858-TRUE.

Truevision Inc. (Indianapolis) offers a broad range of products that transform personal computers into visual media systems. The company's TARGA series is the industry standard solution for video production, broadcasting and true color graphic applications.

The TrueVista series for the Macintosh II and IBM PC/AT compatible computers is unmatched in broadcast-quality video, 3D animation, rendering and other advanced applications.

Truevision's new TrueVGA offers an affordable entry into high-quality videographics on IBM PC-compatible computers. The recently announced Horizon860, first member of the Horizon Line, is designed to supply the high performance necessary in compute-intensive applications such as real-time animation and 3D rendering.

Truevision is privately held and has more than 70 employees.

FAIRFIELD, NJ (JULY 23) BUSINESS WIRE - Daltex Medical Sciences Inc. (NASDAQ:DLTX) Monday announced that its executive committee on behalf of its board of directors has extended the expiration dates of its Class A

Warrants from September 30, 1990, until the close of business on September 30, 1991, and its Class B Warrants from March 31, 1991, until the close of business on March 31, 1992.

Terms of the Class A Warrants and Class B Warrants otherwise remain unchanged. Daltex adopted July 20, 1990 as the record date for purposes of determining holders of the Class A and B Warrants entitled to notice of the extensions of the expiration dates.

The Class A and B Warrants were issued as part of units which included Daltex's common stock in October 1984 as part of Daltex's initial public offering. Each Class A Warrant is redeemable at $3.25 for one share of Daltex common stock and one Class B Warrant. Each Class B Warrant is redeemable at $5.00 per share for one share of common stock.

Daltex Medical Sciences, Inc. develops and markets medical device and pharmaceutical technologies via alliances with leading colleges and universities under the guidance of its Scientific Advisory Board comprised of three Nobel laureates, prominent physicians and researchers in select technical disciplines.

WALTHAM, MA (JULY 23) BUSINESS WIRE - Parametric Technology Corp. (NASDAQ:PMTC) Monday reported net income of $1.5 million, or $0.17 per share, for its third quarter of fiscal 1990 ended June 30, 1990, a 194 percent increase from last year's $512,000, or $0.07 per share before extraordinary credit.

Revenues for the quarter increased 125 percent to $6.7 million, from $3.0 million for the comparable period a year ago.

For the nine months ended June 30, 1990, Parametric Technology reported net income of $3.9 million, or $0.45 per share, compared with net income of $942,000, or $0.13 per share before extraordinary credit, for the same 1989 period. Revenues for the nine months ended June 30, 1990, increased 150 percent to $17.5 million, from $7.0 million for the nine months ended July 1, 1989.

''I am pleased to report that repeat business from existing customers

represented 65 percent of third-quarter revenue. Throughout this fiscal year, the majority of our business has come from repeat business, and our growing customer base is purchasing a substantial amount of additional seats and products. At the same time, we are continuing to show consistent penetration into new accounts,'' said Steven C. Walske, president and chief executive officer. ''During the quarter, we added 130 new customers and sold over 400 seats and more than 2,800 software modules worldwide, increasing our total number of seats to over 2,300 and more than 12,500 software modules since we began shipping Pro/ENGINEER in January 1988.
